Message from the President

At Texas A&M University-Corpus Christi, everyone is committed to your success. We understand that your college experience extends beyond the classroom, and we are dedicated to ensuring you have everything you need to focus on your studies, gain valuable experiences and knowledge, and participate in a vibrant and active campus life.

We offer opportunities for students to work directly with faculty on important research that has a positive impact in our communities. Our renowned faculty work on innovative solutions to regional, national and international issues through the Harte Research Institute for Gulf of Mexico Studies, the Conrad Blucher Institute, and the Lonestar UAS Center of Excellence and Innovation. We also offer opportunities to develop leadership skills in every academic discipline.

We are committed to providing an excellent educational environment that embraces diversity, offers a wide variety of student organizations and activities including NCAA Division I athletics, and encourages involvement in our community. We believe in making an impact in your life and look forward to the impact you will make after you become part of our Islander family.

Sincerely,

Kelly M. Miller
President/CEO
Texas A&M University-Corpus Christi
GENERAL INFORMATION

- Campus Facilities (p. 6)
- Directory of Campus Offices and Services (p. 7)
- The University (p. 8)

Campus Facilities

Located on its own 240-acre island, the University features modern classroom buildings, support facilities, and student apartments and residence halls. Surrounded by the waters of Corpus Christi and Oso Bays, the campus is approximately ten miles from downtown Corpus Christi. The University is also developing an additional 137 acres located off of Ennis Joslin Road.

Mary and Jeff Bell Library

The Mary and Jeff Bell Library is the University’s major resource for research and study. The Library provides access to over 970,000 books, e-books, microforms, and government publications, and maintains subscriptions to more than 63,000 journals and periodicals. The Library also has a strong media collection, with access to approximately 44,500 streaming videos, 3,200 DVDs, and 2.5 million streaming audio tracks. Over 275 online databases provide additional support for general and discipline-specific research and learning.

The Special Collections and Archives Department provides significant, unique resources for scholars. The department houses rare books and archives dealing primarily with the life, history and culture of Corpus Christi and South Texas, as well as other books and manuscripts that require special housing and handling. These materials are available to individual students, university classes, and researchers under special and appropriate conditions within the department.

The Library is also an authorized depository for federal publications. As a depository the library provides the university and general public with access to government information in many formats.

The Library actively participates in national, state, and regional networks, commercial information services, area library agreements and interlibrary loan arrangements that provide access to materials not available on the Texas A&M University-Corpus Christi campus. Through the statewide TexShare cooperative library program, students and faculty have borrowing privileges at many other academic and public libraries in Texas.

Librarians assist individuals in locating, using, and evaluating information resources that support and enhance curriculum and research. Librarians also instruct classes in the use of information resources in specific subject areas. Librarians review resources and services regularly to ensure that both collections and services meet changing curricular needs and support the development of new academic programs.

Computing Resources

Student computing facilities at Texas A&M University-Corpus Christi are part of the campus network. Computer laboratories available for student use are located in the library and several other buildings. Various types of personal computers, such as Macintosh, RISC, and PC type; full-page scanners; laser printers; and graphic stations make up the laboratory machinery. Most computer laboratories are open over 85 hours per week, and are staffed with student lab assistants who provide support in various programs. The laboratories are equipped with a wide range of software applications, such as word processors, spreadsheets, graphics programs, programming languages, and specialized software applications that support individual classes. Internet access and e-mail are available for university students either on or off campus. Wireless access is available. Remote access to the network is provided. Students receive assistance via computer help sheets, online tutorials and a helpdesk.

Student Services Center

In the round building near the center of campus, students can find the Offices of Recruitment and Admissions, Registrar, Financial Assistance and Veterans Affairs, as well as the Business Office, and other units serving students.

Classroom Facilities

Classroom facilities are located in the Center for Instruction, Center for the Sciences, Science and Technology Building, Center for the Arts, Bay Hall, Tidal Hall, Island Hall, and the Michael and Karen O’Connor Building. Many teaching areas include state-of-the-art audio-video and computer equipment.

Visual and Performing Arts Facilities

The Performing Arts Center features a 1500-seat concert hall where local, national, and international artists perform. The Center for the Arts houses the Warren Theatre (a 275 seat, continental-style auditorium), the Wilson Studio Theatre (an experimental theatre), and the Weil Gallery. Also affiliated with the University is the Art Museum of South Texas, located in downtown Corpus Christi.

University Center

The University Center provides facilities and services for students, faculty, staff, and guests of the University. The center contains student services offices, space for student organizations and student activities, food services, the bookstore and other shops, the campus post office, a branch bank and study lounges, meeting rooms, and entertainment areas.

Conrad Blucher Institute for Surveying and Science

The Conrad Blucher Institute for Surveying and Science houses research laboratories and provides research and professional development for surveyors, science education and surveying related research.

Carlos F. Truan Natural Resources Center

University programs and state agencies focusing on natural resources are housed in the Carlos F. Truan Natural Resources Center.

Dugan Wellness Center

The Dr. Jack and Susie Dugan Wellness Center includes a gymnasium, free weights, weight machines, cardiovascular exercise equipment (treadmills, elliptical trainers, steppers and bikes), multi-purpose group exercise rooms, and offices for the Recreational Sports Department and Intercollegiate Athletics Department.
Harte Research Institute
This research facility houses the endowed Harte Research Institute for Gulf of Mexico Studies, whose mission is to support and advance the long-term sustainable use and conservation of the Gulf of Mexico.

Blanche Davis Moore Early Childhood Development Center and Math and Science Resource Center
The Blanche Davis Moore Early Childhood Development Center serves as a public school for area children and as a university teaching laboratory and research center. Children attending the school are selected from a stratified random sample. Housed adjacent to the Blanche Davis Moore Early Childhood Development Center is the Math and Science Resource Center which addresses the nation-wide shortage of math and science teachers through programs for teachers and students.

The University

Texas A&M University-Corpus Christi is committed to becoming one of the leading centers of higher education in the Gulf of Mexico region while serving the intellectual, cultural, social, environmental, and economic needs of South Texas. As a result, Texas A&M University-Corpus Christi will invigorate and strengthen the region and state through its educational programs, research initiatives, and outreach efforts.

Institutional Vision and Mission

Vision

Texas A&M University-Corpus Christi is committed to becoming one of the leading centers of higher education in the Gulf of Mexico region while serving the intellectual, cultural, social, environmental, and economic needs of South Texas. As a result, Texas A&M University-Corpus Christi will invigorate and strengthen the region and state through its educational programs, research initiatives, and outreach efforts.

Mission

Texas A&M University-Corpus Christi is committed to becoming one of the leading centers of higher education in the Gulf of Mexico region while serving the intellectual, cultural, social, environmental, and economic needs of South Texas. As a result, Texas A&M University-Corpus Christi will invigorate and strengthen the region and state through its educational programs, research initiatives, and outreach efforts.

Institutional History

The island campus of Texas A&M University-Corpus Christi has been a setting for higher education since 1947. That year, Ward Island became the home of the University of Corpus Christi (UCC), an institution affiliated with the Baptist General Convention of Texas. The UCC campus was developed on land previously used by the U.S. Navy as a radar training facility.

In 1970, Hurricane Celia severely damaged the college campus. The following year, UCC and the Baptist General Convention took steps to end their affiliation. Concerned about higher education in Corpus Christi, a coalition of civic leaders sought local support as well as state legislation to convert the campus of UCC to a state-supported institution with an expanded curriculum.

In 1971, the 62nd session of the Texas Legislature authorized the creation of a state-supported institution of higher education in Corpus Christi. The Board of Directors of the Texas A&I University System was authorized to establish an upper-level university and to prescribe courses for the new institution at the junior, senior, and graduate levels leading to both bachelor’s and master’s degrees.

Funding was approved by the legislature to initiate planning for the university. The citizens of Corpus Christi approved a bond issue to purchase the campus of the University of Corpus Christi on Ward Island. Subsequently, the campus was given to the State of Texas as a site for the new state-supported university. Civic leaders in Corpus Christi also launched a successful public fund raising campaign to provide local financial support for the fledgling university. On September 4, 1973, several months after UCC completed its final classes, Texas A&I University at Corpus Christi opened its doors with an initial enrollment of 969 students.

In 1977, the legislature changed the name of the institution to Corpus Christi State University. The name of the University System, which also included Laredo State University and Texas A&I University, was changed the same year to the University System of South Texas (USST).

In 1989, the Texas Legislature abolished the University System of South Texas and merged Corpus Christi State University and the other two USST universities into The Texas A&M University System. In the same year, the legislature approved the expansion of Corpus Christi State University to a four-year comprehensive university, with enrollment of freshmen and sophomores to begin in fall 1994. In 1992, the role of the institution was expanded further when the Texas Higher Education Coordinating Board authorized the University to offer its first doctoral degree program. Another milestone occurred in 1993 when The Texas A&M University System Board of Regents renamed the institution Texas A&M University-Corpus Christi.

The arrival of freshman and sophomore students in 1994 marked the transformation of the institution to a four-year university. Since then, student enrollment, facilities, and program offerings for both undergraduate and graduate students have continued to expand. In 2008, the City of Corpus Christi donated approximately 137 acres of land near the island campus to ensure adequate space for future growth.
Accreditation

Texas A&M University-Corpus Christi is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, and doctorate degrees. Questions about the accreditation of Texas A&M University-Corpus Christi may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC’s website (http://www.sacscoc.org).

The Accounting and Business Bachelor’s degree programs are accredited by AACSB International – The Association to Advance Collegiate Schools of Business, 777 South Harbour Island, Boulevard, Suite 750, Tampa, FL 33602-5730; USA; telephone 813-769-6500; fax 813-769-6559.

The baccalaureate degree program in nursing at Texas A&M University-Corpus Christi are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).

Texas A&M University-Corpus Christi is an accredited institutional member of the National Association of Schools of Music, 11250 Roger Bacon Drive, Suite 21, Reston, VA 20190-5248.

The Clinical Laboratory Science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 N. River Rd. Suite 720, Rosemont, IL 60018-5119 - telephone: 773-714-8880.

The bachelor’s degree program in Geographic Information Science is accredited by the Applied and Natural Science Accreditation Commission (ANSAC) of ABET, www.abet.org (http://www.abet.org).

The bachelor’s degree program in Electrical Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org (http://www.abet.org).

The bachelor’s degree program in Mechanical Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org (http://www.abet.org).

The bachelor’s degree program in Mechanical Engineering Technology is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, www.abet.org (http://www.abet.org).

The bachelor’s degree program in Computer Science-Systems Programming option is accredited by the Computing Accreditation Commission (CAC) of ABET, www.abet.org (http://www.abet.org).

In addition, numerous memberships are held by the University in selective associations and societies that recognize high standards in specific fields.

Student Responsibility

University personnel may assist students in progressing toward the degree that they are seeking. However, the final and ultimate responsibility for understanding and following the degree requirements rests with the students themselves. Each student is held responsible for knowing degree requirements, for enrolling in courses that fit into degree programs and for taking courses in the proper sequence to ensure orderly progression of work. The student must seek advice about degree requirements and other University policies when necessary. The student is held responsible for knowing and abiding by University regulations regarding the standard of work required to continue in the University, as well as those dealing with academic integrity, scholastic probation, suspension, and dismissal. Additionally, the student is expected to comply with the rules in the Student Code of Conduct, as well as the processes in the latter, which are administered by the Office of Student Engagement and Success.

The University reserves the right to require a student to withdraw at any time, as well as the right to impose probation on any student whose conduct is unsatisfactory. An admission on the basis of false statements or documents is void upon discovery of the fraud, and the student is not entitled to any credit for work that the student may have done at the University. Upon dismissal or suspension from the University for cause, there will be no refund of tuition and fees. The balance due the University will be considered receivable and will be collected.

Equal Educational/Employment Opportunity

With respect to the admission and education of students; the availability of student loans, grants, scholarships and job opportunities; the employment and promotion of teaching and non-teaching personnel; and the student and faculty activities conducted on premises owned or occupied by the University, Texas A&M University-Corpus Christi shall not discriminate either in favor of or against any U.S. citizen on the basis of race, creed, color, sex, age, national origin or disability.

Catalog Subject To Change

The provisions of this catalog do not constitute a contract, express or implied, between any applicant, student, or faculty or staff member of Texas A&M University-Corpus Christi or The Texas A&M University System. This catalog is for informational purposes only. The University reserves the right to change or alter any statement herein without prior notice. This catalog should not be interpreted to allow a student that begins his or her education under the catalog to continue the program under the provisions in the catalog.

Admissions

The student transferred from an accredited Texas private institution of higher education or an accredited out-of-state institution with acceptable college-level course work determined by the receiving institution. Texas A&M University-Corpus Christi has elected to use the following course work with the grade of A, B, C, or Pass/Credit to meet the following standards: Texas A&M University-Corpus Christi considers itself to be an advocate of opportunity, particularly for those persons residing in the South Texas Region. Accordingly, the admission standards and policies of the University have been designed to identify students who show potential for academic success.
Undergraduate Admission

There are eight categories of undergraduate admission to the University:

- Regular Freshman Admission
- Conditional Freshman Admission
- Transfer Admission
- Transient Admission
- International Admission
- Postbaccalaureate Admission
- High School Dual Enrollment
- Readmission

These categories and their associated requirements are described below.

Applications to Texas A&M University-Corpus Christi through any of the eight admission categories will be processed only after all required documentation and fees have been received. An application is considered to be complete only when the Office of Recruitment and Admissions (http://admissions.tamucc.edu/) has received all required documentation, including completed application forms, required test scores, and any other information or fees specifically required. Incomplete applications will not be processed.

Completed applications are processed as they are received, and applicants are usually informed of their admission status within three to four weeks.

Application materials and information concerning all aspects of the admissions process may be obtained directly from:

Office of Recruitment and Admissions
Texas A&M University-Corpus Christi
6300 Ocean Drive, Unit 5774
Corpus Christi, TX 78412-5774
Telephone: (361) 825-2624

Prospective students are strongly urged to apply early.

Application Fee

Applicants applying or reapplying to Texas A&M University-Corpus Christi are required to pay a non-refundable application fee of $40. The fee may be waived only in exceptional cases for applicants with financial hardships. An applicant in such circumstances should request his or her high school counselor, financial aid officer, or social worker to submit a letter verifying the need for a waiver with the application for admission. Applications submitted after the published deadline for the intended semester of enrollment will be assessed an additional $10 late application fee.

Applicants who are not U.S. citizens are considered through International Admission. For international applicants, the nonrefundable application fee is $75.00, paid in U.S. currency. Applications submitted after the published deadline for the intended semester of enrollment will be assessed an additional $10 late application fee.

Freshman Admission Procedure

Application and Transcript Submission

A student may apply for admission by completing the ApplyTexas Application (for U.S. Freshman Admission) online at www.goapplytexas.org (http://www.goapplytexas.org) or www.tamucc.edu (http://www.tamucc.edu). Upon completion of the application, an applicant should submit appropriate application fee to Texas A&M University-Corpus Christi. The student must request his or her registrar to

1. send an official final transcript indicating grades through the applicant’s junior year and his or her class rank and
2. confirm the courses that will be completed through the senior year.

Any student who has already graduated from high school at the time of application must furnish an official transcript, which includes the date of graduation, class rank, and grades for all courses taken and the official high school graduation plan. To be considered official, a transcript must bear an original signature of a school official and/or the school seal. Applicants should submit the application, transcript, application fee, and any supporting credentials directly to the Office of Recruitment and Admissions.

Testing

Submission of standardized test scores will be optional for first-time freshman applicants. Instead, Texas A&M University-Corpus Christi will utilize the combination of the student’s high school class rank and GPA. Students may still submit SAT and/or ACT test scores for admission; this will not give the student any advantage or disadvantage.

Applicants must take either the Scholastic Assessment Test (SAT) or American College Test (ACT). Students are encouraged to take the SAT or the ACT during the spring of their junior year in high school. However, scores from tests taken later are acceptable if submitted by the freshman admission deadlines.

The SAT and ACT are offered at conveniently located testing centers throughout the United States and in major cities in many foreign countries. Testing dates, locations, and fees required are described in the information bulletin, which may be obtained from the student’s high school or accessing the College Board website at https://www.collegeboard.org/, or by accessing the ACT website at https://www.act.org/.

When registering, designate that the results be sent to Texas A&M University-Corpus Christi by the testing agency. Test scores may also be submitted on the official high school transcript. Test scores are not official and will not be accepted unless furnished in these manners. For Texas A&M University-Corpus Christi, the SAT code is 0366 and the ACT code is 4045.

Admission Requirements

State of Texas Uniform Admissions Policy

Texas Education Code (TEC) 51.803 – 51.809 requires all first-time freshmen seeking admission at a public four-year institution in Texas to satisfy one of the following college readiness standards in order to be eligible to be considered for admission.

- Successfully complete the Recommended or Advanced/ Distinguished high school programs or a pre-college high school curriculum equivalent in content and rigor; or
- Satisfy ACT College Readiness Benchmarks (English- 18, Reading- 22, Mathematics- 22, and Science- 23); or
- Satisfy SAT College Readiness Benchmarks of a 480 on the Evidence-Based Reading and Writing (EBRW) test and a minimum score of 530 on the mathematics test.
Undergraduate Admission

There are eight categories of undergraduate admission to the University:

Regular Freshman Admission
Conditional Admission
Transfer Student Admission
Transient Admission
International Student Admission
Postbaccalaureate Admission
High School Dual Enrollment Program
Readmission

Regular Freshman Admission

Freshman applicants are those citizens or permanent residents of the United States who have not been enrolled in any college-level institution except while still in high school or during the summer immediately following high school graduation and before enrolling in Texas A&M University-Corpus Christi for the subsequent fall. Freshman applicants are also called “first-year” applicants.

The best predictors of academic success have been a combination of high school class rank, high school grade point average (GPA) and standardized test scores. A student's high school class rank and GPA result from ongoing opportunities to demonstrate capabilities in familiar situations, whereas standardized tests use objective measures for gauging academic potential. Regular Freshman Admission is based upon the combination of these factors.

Applications are reviewed to ensure that applicants present the basic academic preparation required to pursue study at this University. Students who seek admission into Texas A&M University-Corpus Christi must successfully complete the Recommended High School Program, the Distinguished Achievement Program, or another pre-college curriculum that is equivalent in content and rigor to fulfill the academic preparation requirement.

The units of study and acceptable high school courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td></td>
<td>4</td>
</tr>
<tr>
<td>Mathematics</td>
<td>at the level of Algebra I, Geometry, Algebra II and a higher math</td>
<td>4</td>
</tr>
<tr>
<td>Social Studies</td>
<td>(which includes Economics)</td>
<td>4</td>
</tr>
<tr>
<td>Foreign Language</td>
<td>(in one foreign language or American Sign Language)</td>
<td>3</td>
</tr>
</tbody>
</table>

Students who have graduated in the top 25% of their high school classes and who successfully complete the required pre-college curriculum are admitted without minimum SAT or ACT score requirements. Students who have graduated in the top 25% who have not successfully completed a required pre-college curriculum or an equivalent are required to satisfy the automatic admissions standards outlined in Texas Education Code 51.000, including earning a minimum SAT of a 480 on the Evidence-Based Reading and Writing (EBRW) test and a minimum score of 530 on the mathematics test or satisfy ACT's College Readiness Benchmarks on the ACT assessment.

The following requirements linking high school class standing and minimum SAT/ACT scores will apply.

<table>
<thead>
<tr>
<th>Class Standing</th>
<th>Required SAT Score</th>
<th>New Redesigned SAT Composite Score (March 2016 and forward)</th>
<th>ACT Composite Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Top 25%</td>
<td>No minimum</td>
<td>No minimum</td>
<td>No minimum</td>
</tr>
<tr>
<td>2nd Quarter</td>
<td>1,000</td>
<td>1080</td>
<td>21</td>

<td>1270</td>
<td>27</td>
</tr>
</tbody>
</table>

All GED graduates are to present their State of Texas Official Certificate of High School Equivalency indicating a test passing status with a certificate issue date and certificate number.

Holders of GED certificates who seek admission are also subject to Regular Admission Requirements as shown below:

<table>
<thead>
<tr>
<th>SAT Composite Score</th>
<th>New Redesigned SAT Composite Score (March 2016 and forward)</th>
<th>ACT Composite Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>1,000</td>
<td>1080</td>
<td>21</td>
</tr>
</tbody>
</table>

Those applicants who do not meet these standards will be considered for Conditional Freshman Admission.

Freshman Admission Priority Application Dates

To ensure full consideration, the ApplyTexas Application, application fee, required transcripts, and any supporting documentation must be in the Office of Recruitment and Admissions by the following priority dates:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>July 1</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>November 1</td>
</tr>
<tr>
<td>Summer Session</td>
<td>April 1</td>
</tr>
</tbody>
</table>

Completed applications received after the deadline date but before the beginning of regular registration will be processed as received.

Conditional Freshman Admission

Those students who do not meet regular admission requirements may be considered for Conditional Freshman Admission. The Undergraduate Admissions Committee will convene early Spring semester to review applications for consideration. In addition to reviewing the student's class rank, GPA, standardized test scores, and high school courses, the committee will consider other factors such as participation in extracurricular activities, including evidence of leadership; community service; talents and awards; extenuating circumstances; and employment, internships, and summer activities. International students cannot be admitted under Conditional Admission.

Applicants are considered under this procedure on a case-by-case basis. Students admitted under Conditional Freshman Admission will be subject to specific enrollment conditions based on the applicant's individual circumstances. These conditions may include enrolling in prescribed developmental course work, participating in tutoring sessions and other academic support activities, and meeting other conditions designed to promote academic success. Subsequent admission reviews will be conducted on a case-by-case basis contingent on the submission of new
academic credentials that demonstrate the student’s admissibility into the University.

**Exceptional Talent Policy**

Admission based upon exceptional talent provides an important pathway to higher education for students who do not meet regular admissions criteria but who have outstanding abilities and/or experience. Accordingly, a select group of applicants may be considered for admission because they possess exceptional talents that are important to the intellectual vitality, prestige, and diversity of the university community. Areas identified for consideration under exceptional talent admissions include outstanding achievement in intellectual or creative endeavors including the visual and performing arts, communications, athletics, and other experiences that demonstrate unusual promise for leadership.

To determine eligibility, a student must document for the Undergraduate Admissions Committee his or her talent through an audition, portfolio, videotape, or written evidence of exceptional performance. Three written recommendations from individuals who are knowledgeable about the student's performance in his or her talent area are required. In the final selection of these students, the Undergraduate Admissions Committee must also take into consideration the academic record of each applicant to determine his or her potential to graduate in a timely manner and successfully complete his or her academic career. Applications considered under the Exceptional Talent Policy will be on a case-by-case basis. Students admitted to the University by way of their exceptional talent may be required to take additional leveling courses at the request of the Undergraduate Admissions Committee.

**Transfer Admission**

It is the goal of Texas A&M University-Corpus Christi to maintain a transfer-friendly reputation. Students who have earned 24 or more transferable semester hours of credit and who wish to transfer to the University must have a minimum cumulative grade point average (GPA) of 2.0 on a 4.0 scale. Those students who wish to transfer with fewer than 24 transferable hours of credit must have minimum cumulative of 2.0 on a 4.0 scale and must also satisfy the regular freshman entry requirements. A transfer applicant may not disregard his or her college record and apply for admission as a freshman. The following additional rules also apply:

1. The applicant must provide official transcripts from each college or university attended. To be considered official, the transcript must bear the seal of the granting institution and must be submitted to Texas A&M University-Corpus Christi by the granting institution.
2. No remedial or duplicate credits may be transferred.
3. The applicant must be eligible to return to his or her previous institution.
4. The cumulative GPA includes all work attempted, excluding remedial, high school, or duplicate courses.
5. Repeated courses are calculated within the GPA according to the standards and rules of the granting institution. When multiple institutions of higher education have been attended, Texas A&M University-Corpus Christi will use the highest repeated course grade in the grade point calculation.

**Transfer Admission Priority Application Dates**

Texas A&M University-Corpus Christi has rolling admission, however we encourage students to apply early to qualify for federal student aid and scholarships. To ensure full consideration, the completed ApplyTexas Application (for U.S. Transfer Admission) and all required documents and supporting material must be on file in the Office of Recruitment and Admissions by the following priority dates:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>July 1</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>December 1</td>
</tr>
<tr>
<td>Summer Session</td>
<td>May 1</td>
</tr>
</tbody>
</table>

**Transient Admission**

Students who are pursuing a degree at another college or university may be admitted as transient students if they provide proof of enrollment in good standing at their home college or university. Such students must complete an ApplyTexas Application (for Transient Admission) and submit an official transcript from their current institution of enrollment. Enrollment as a transient student is restricted to the summers or one long semester. Summer transient students must reapply each summer that enrollment is sought. Students admitted as transient students who later wish to pursue a degree at this University may do so by completing the regular admission process and meeting all admission requirements. International students cannot be admitted as transient students.

**International Admission**

International students (non-U.S. citizens) with outstanding academic records will be considered for admission. International students who seek admission to Texas A&M University-Corpus Christi must meet the following requirements:

1. Application and Fee: A completed ApplyTexas Application (for either International Freshman Admission or International Transfer Admission) and a $75 application fee are required.
2. Testing: Prospective students from other countries must demonstrate the ability to speak, write and understand the English language. Prospective students whose native language is not English must take the Test of English as a Foreign Language (TOEFL) examination or the International English Language Testing System (IELTS) examination unless:
   - The applicant completed a bachelor’s degree at a U.S. or Canadian institution of higher education, or
   - The applicant successfully completed two years of instruction (taught in the English language) at a U.S. or Canadian high school or college, or
   - a minimum TOEFL IBT score of 73, or,
   - a minimum TOEFL Paper-Based score of 537, or,
   - a minimum TOEFL CBT score of 205, or,
   - a minimum IELTS Academic test score of 6.0 overall band for both undergraduate and graduate students (TAMUCC does not accept the IELTS General test), or,
   - a minimum ACT English score of 21 (undergraduates), or,
   - a minimum PTE Academic score of 53
   - A minimum IELTS Academic test score of 6.0 overall band for both undergraduate and graduate students (TAMUCC does not accept the IELTS General test), or,
   - a minimum ITEP score between 3.5 - 3.9 for graduate students, or,
   - Duolingo English Test and English3: TAMU-CC is temporarily accepting both the Duolingo English Test and English3 online assessments from applicants where TOEFL and IELTS exams are impacted due to Coronavirus (COVID-19) concerns. Applicants from affected countries may submit Duolingo
English Test scores of 100 (105 on Duolingo English3) to satisfy English proficiency requirements.

- completing all four years in a high school within the U.S. and obtaining a subsequent U.S. high school degree (undergraduates).
- Cambridge C1 Advanced Proficiency Test (Cambridge CAE) of 175, or,
- Cambridge C2 Proficiency Test (Cambridge CPE) of 180.

The TOEFL is administered by the Educational Testing Service in over 200 centers around the world. A registration form and a “Bulletin of Information for Candidates” may be obtained by writing to:

TOEFL Registration Office
P.O. Box 6151
Princeton, New Jersey 08541-6151, USA

Applicants from the following countries will be exempt from the TOEFL or IELTS requirements:

- American Samoa
- Anguilla
- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Bermuda
- British Virgin Islands
- Canada (except Quebec)
- Cayman Islands
- Dominica
- Federated States of Micronesia
- Gambia
- Ghana
- Gibraltar
- Grenada
- Guyana
- Ireland
- Jamaica
- Liberia
- New Zealand
- Nigeria
- Saint Kitts and Nevis
- Saint Lucia
- Trinidad/Tobago
- Turks and Caicos Islands
- United Kingdom

Freshman international applicants must have their test scores for either the Scholastic Assessment Tests (SAT) or the American College Test (ACT) submitted to the Office of Recruitment and Admissions.

3. Transcripts: The University requires all transcripts from international high schools, colleges and universities to be evaluated by a certified evaluation agency approved by the Executive Director of Recruitment and Admissions. The evaluation report must be submitted by the agency to the Office of Recruitment and Admissions. A list of approved evaluation agencies is available from the Office of Recruitment and Admissions (http://admissions.tamucc.edu/).

4. Grade Point Average (GPA): A cumulative GPA of 2.5 for all work attempted at other U.S. colleges or universities is required.

5. Finances: The U.S. Citizenship and Immigration Services (USCIS) and Texas A&M University-Corpus Christi require all international applicants to provide an “Affidavit of Support” form certifying ability to finance study in the U.S. The Affidavit of Support must be completed with U.S. currency figures only.

6. Immunizations and Related Requirements: International students are required to have a tuberculin skin test or chest x-ray and must meet all immunization requirements.

7. Health Insurance: All international students (students who are not citizens or permanent residents of the United States) must be covered by the Texas A&M University System's student health insurance plan or show proof of an equivalent insurance coverage. Students without insurance will not be permitted to register for classes. For information, contact the Coordinator of International Student Services.

International students should contact the Office of Recruitment and Admissions for further information on admission requirements for international students.

The admission application review will not begin until all required documents are received by the Office of Recruitment and Admissions.

An international student must be enrolled for a minimum of 12 semester hours during both the spring and fall semesters. An international student may not be admitted in undergraduate transient (visiting) or non-degree status. An international student sponsored by a program in a regionally accredited college or university may be admitted with the approval of the Office of Recruitment and Admissions.

**International Admission Priority Application Dates**
The completed ApplyTexas Application for admission of international students and all required documents and supporting material must be on file by the following priority dates:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td>June 1</td>
</tr>
<tr>
<td>Spring Semester</td>
<td>November 1</td>
</tr>
<tr>
<td>Summer Session</td>
<td>April 1</td>
</tr>
</tbody>
</table>
**International Student Advising**

The Coordinator of International Student Services, located in the Office of International Education, oversees all academic and U.S. Citizenship and Immigration Services (USCIS) requirements of F-1 students attending A&M-Corpus Christi. International students are required to report to the Coordinator of International Student Services at the beginning of each semester to maintain accurate status and essential information. The Coordinator of International Student Services assists students with forms and paperwork required for optional and curricular practical training, changes on the I-20 form, change of status, reinstatement, and medical insurance.

For additional information regarding international students, contact the Coordinator of International Student Services in the Office of International Education at (361) 825-2258.

**Postbaccalaureate Admission**

A student holding a baccalaureate or higher degree who intends to seek an additional bachelor’s degree or an additional undergraduate major or minor, or who intends to take undergraduate course work required for Texas public school teacher certification, should seek admission as postbaccalaureate student. Postbaccalaureate students may enroll in undergraduate-level courses (numbered below 5000) only. The following documents are required as part of the application process:

1. A completed ApplyTexas Application form.
2. A nonrefundable $40 application fee.
3. Official transcripts documenting all course work taken at any regionally accredited college or university and attended and the degree awarded at the completion of all coursework. Official transcripts must be submitted directly to Texas A&M University-Corpus Christi by the granting institutions.

**High School Dual Enrollment**

TAMU-CC offers high school students the opportunity to earn dual credit; a dual credit course is a class that awards both high school and college credit upon completion. High school students who wish to enroll at the University may do so if they are enrolled in the Islander Academy.

The Islander Academy allows high school students in Nueces County to take college classes at TAMU-CC. Students must complete an Islander Academy application. For more information see https://ucoll.tamucc.edu/Anchor%20Team/uphs,-islander-academy.html

Qualifications for the Islander Academy:

- You must be a current high school student
- You must have the approval of your legal guardian/parent, your high school counselor and your high school principal
- You must enroll in a course selected from the list of approved dual credit courses for TAMU-CC
- You must be prepared to function in an adult learning environment
- You must meet the Texas Success Initiative (TSI) requirement for reading, writing and math skills prior to enrolling in courses or meet the exemption standards. (A high school student is also eligible to enroll in academic dual credit courses that require demonstration of TSI college readiness in reading, writing, and/or mathematics under the following conditions: if the student achieves a Level 2 final recommended score, as defined by the Texas Education Agency (TEA), on the English II STAAR EOC; or a combined score of 107 on the PSAT/NMSQT with a minimum of 50 on the reading test; or a score of 460 on the evidence-based reading and writing (EBRW) test on a PSAT/NMSQT exam administered on or after October 15, 2015; or a composite score of 23 on the PLAN with a 19 or higher in English or an English score of 435 on the ACT-Aspire. For Courses that require demonstration of TSI college readiness in mathematics: if the student achieves a Level 2 final recommended score, as defined by TEA, on the Algebra I STAAR EOC and passing grade in the Algebra II course; or a Level 2 final recommended score, as defined by TEA, on the Algebra II STAAR EOC; or a combined score of 107 on the PSAT/NMSQT with a minimum of 50 on the mathematics test; or a score of 510 on the mathematics test on a PSAT/NMSQT exam administered on or after October 15, 2015 or a composite score of 23 on the PLAN with a 19 or higher in mathematics or a mathematics score of 431 on the ACT-Aspire.)

High school students admitted under the Islander Academy will be advised by the Islander Advising Center. All students admitted into Islander Academy are subject to all Texas A&M University-Corpus Christi, Texas A&M University System, State of Texas, and federal rules and regulations applicable to degree-seeking students.

Students admitted under this program who wish to continue their degree with TAMU-CC following high school graduation must reapply for admission.

**Readmission**

Students who have a previous enrollment history with Texas A&M University-Corpus Christi but have not been enrolled for one (1) or more years are required to complete a new ApplyTexas Application. Re-enrollees who have not been enrolled in any postsecondary institution prior to the term for which they are applying and are in good academic standing with the University are eligible for admission.

Students who have enrolled at another institution prior to their return to the University are required to submit official transcripts from all postsecondary institutions attended since leaving A&M-Corpus Christi and must satisfy transfer admission requirements.

**Texas Success Initiative (TSI)**

The Texas Success Initiative is a state-legislated program that requires students to be assessed in reading, writing, and math skills prior to enrolling in a Texas public institution and to be advised based on that assessment. The Texas Higher Education Coordinating Board (THECB) has approved the TSI Assessment offered by College Board as the only acceptable assessment instrument for entering students. The assessment or the results of the assessment are not a condition of admission, but a condition of registration to an institution.

If a student’s score on any section of an assessment is below passing, the student must enroll in appropriate developmental classes. Placement and participation in developmental education is determined on an individual basis for students by Academic Advising and Coaching. Students may contact an Academic Success Coach at 361-825-4049 or visit the office in the Glasscock Student Success Center. Students may re-test to meet the TSI standard. Institutions may consider the performance in developmental education, in college-level courses, and on an assessment instrument in determining college readiness. If a student does not participate in the specified courses or program prior to completing all TSI requirements, the student may be dropped from all registered courses. The hours of the required developmental courses will count toward determining full-time status.
A student is exempt from the TSI if any of the following applies:

- The student has an associate or baccalaureate degree from an accredited college or university.
- The student, on a single test administration prior to March 2016, has an SAT composite score of 1070 with at least 500 on the Verbal (Critical Reading) and Math sections.*
- The student, on a single test administration on or after March 2016, has a score of 480 on the Evidenced-Based Reading and Writing (EBRW) test and a score of 530 on the mathematics test. (There is no combined score).*
- The student, on a single test administration, has an ACT composite score of 23 with at least 19 on the Math and English sections.*
- The student has an exit-level TAKS score of 2200 on the Math and a 2200 on the English Language Arts section with a 3 on the Writing subscore.*
- The students has a minimum score of 2000 (Level 2) on the STAAR English III EOC for reading or writing and a minimum score of 4000 (Level 2) on the STAAR Algebra II EOC.*
- The student was honorably discharged, retired, or released from active duty as a member of the Armed Forces of the U. S. or the Texas National Guard, or served as a member of a reserve component of the Armed Forces on or after August 1, 1990.
- The student has met the readiness standard at another Texas public higher education institution.
- The student transferred from an accredited Texas private institution of higher education or an accredited out-of-state institution with acceptable college-level course work determined by the receiving institution. Texas A&M University-Corpus Christi has elected to use the following course work with the grade of A, B, C, or Pass/Credit to meet the following standards:
  a. Math readiness standard - College Algebra [MATH 1314 College Algebra (3 sch)],
  b. Reading readiness standard - A three-credit hour course in history, political science/government, economics, philosophy, literature, or composition,
  c. Writing readiness standard - Composition I [ENGL 1301 Writing and Rhetoric I (3 sch)] or Composition II [ENGL 1302 Writing and Rhetoric II (3 sch)].
- The student has successfully completed a college preparatory course under Texas Education Code §28.014 with one of our partnering school districts or institutions of higher education.¹
- The student has an SAT, ACT, TAKS, and STAAR EOC scores are valid five years from the date of testing to the first day of enrollment in an accredited Texas public institution of higher education. After April 1, 2004, students holding the composite score on the SAT/ACT may be exempt from a portion of the TSI approved examination in the individual area in which they met the required score. Partial exemptions also exist for TAKS and STAAR EOC scores. Students must have both the required reading and writing TAKS score to be partially exempt from the reading and writing portion of an assessment. Mixing or combining scores from the SAT administered prior to March 2016 and the SAT administered on or after March 2016 is not allowable.

In regards to the college preparatory course, the waiver is good for a period of two years from the date of high school graduation with respect to the content area of the course. A student receiving this waiver must enroll in a college-level course in the exempted content area during the student’s first year of enrollment at an institution of higher education occurring after the student qualifies for the waiver.

For additional information, contact the Academic Coaching Program at (361) 825-4049 or the Academic Testing Center at (361) 825-2334.

**Academic Fresh Start Legislation**

The “Right to an Academic Fresh Start” legislation, passed by the 73rd Texas Legislature, entitles residents of this state to seek admission to public institutions of higher education as undergraduate students without consideration of courses undertaken ten or more years prior to enrollment. This law gives students the option of electing to have coursework taken ten or more years prior to the starting date of the semester in which the applicant seeks to enroll either counted as usual or ignored for admission purposes. Applicants who elect to apply for admission under this law and who are admitted as students may not receive any course credit for courses undertaken ten or more years prior to enrollment.

The intent of the “Fresh Start” legislation is to provide students with an opportunity to clear their academic records, if they choose to do so, of all college-level work accumulated ten or more years ago. Students may not pick and choose what is to be ignored and what is not. Either all college hours ten or more years old are ignored or they are counted. Applicants interested in seeking a “Fresh Start” should contact the Office of Recruitment and Admissions.

**Immunization and Related Requirements**

**Recommended Vaccinations**

Students are encouraged to submit immunization records voluntarily in order to assure the availability of a more complete medical record while a student at Texas A&M-Corpus Christi. Student Health Services strongly recommends that every student, and their family members, review our updated list of immunizations most appropriate for university students. This list of recommended vaccines was compiled by the American College Health Association (ACHA) with assistance from the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC). See Recommended Immunizations (https://www.tamucc.edu/health-center/immunizations.php).
Tuberculosis Screening Procedure

Tuberculosis (TB) is a potentially life-threatening disease that has the ability to spread quickly in the close confines of classrooms and student residences on a university campus. Nearly one-third of the world’s population has the disease. Students from countries with a high incidence of tuberculosis (https://www.who.int/tb/en/) (as designated by the World Health Organization) and other students who have had extended visits to those countries are at a greater risk for carrying the disease. Of those with the disease, most have the latent form. Even so, on a college campus it is important to take precautionary measures.

TB Testing Procedure for Newly Admitted International Students

Texas A&M University-Corpus Christi (TAMU-CC), in consideration of the recommendations from the American College Health Association (April 2016), has developed a procedure for mandatory TB screening of newly admitted international students from countries where there is a high incidence of tuberculosis (https://www.who.int/tb/en/) (as designated by the World Health Organization).

All international students who apply to TAMU-CC will be asked screening questions during the application process. If a student is identified as someone who is at high risk for exposure to TB, a hold will be placed on their account and they will be contacted via email by the TAMU-CC Health Center so that they may begin a TB testing process, as outlined below. The student may enroll in the first semester of classes while being tested for TB but must comply with the procedure below in order to enroll in a second semester of classes.

- A newly admitted international student who is identified as in need of a PPD skin test will be required to provide proof of a skin test and reading to TAMU-CC Health Center (located in Sandpiper building) by the 8th day of class.
  - Students can take the PPD test at the TAMU-CC Health Center for a cost of $101 or at the Nueces County Health Department for $151. The test can also be taken at many pharmacies and physicians’ offices at the student’s expense.
  - The PPD skin test must be taken in the United States no more than six months prior to the start of the semester but after the visit or residency in the high-incidence country.
  - If the skin test is negative, the student is cleared and the TB Hold is removed from the student’s account.
  - If the PPD skin test is positive, the student must have a chest X-ray and provide proof of the X-ray to the TAMU-CC Health Center by the 12th day of class.
    - In Corpus Christi, X-rays can be done as a walk-in patient at Radiology Associates, 5742 Spohn Drive (begins with Route 37 on the RTA bus from campus; involves transfers), or Radiology & Imaging of South Texas, 3226 S. Alameda Street (Route 5 on the RTA bus from campus; no transfers). Students can pay in cash for the X-rays (around $301 at RA and $651 at R&I) or present their insurance cards.
    - If the X-ray is negative, the student is cleared and the TB Hold is removed from the student’s account.
    - If the X-ray is positive, the student must make immediate contact with the Nueces County Health Department at 361-826-7247 for further testing. The Health Department is located at 1702 Horne Road (begins with Route 5 on the RTA bus from campus; involves transfers).

Non-compliance with the above TB Testing Procedure can:
- Cause serious illness and death.
- Result in disenrollment from the university.
- Affect a student’s ability to stay in the US on an F-1 or J-1 visa.
- Require intervention by a university official.

TB Testing Recommendations for Continuing Students and Faculty

It is recommended that students and faculty who travel to countries with high incidence of tuberculosis discuss their specific travel circumstances before the trip with a health care provider who can determine the appropriate evaluation. If a month or more is spent in the country, it is recommended that a TB skin test be conducted 4-6 weeks after returning to the US.

For More Information about TB

- Center for Disease Control (https://www.cdc.gov/tb/)
- The World Health Organization (https://www.who.int/health-topics/tuberculosis/#tab=tab_1)
- TAMU-CC Health Center (http://healthcenter.tamucc.edu/)

Appeals

Appeals can be made to the associate vice president for Academic Affairs by calling 361-825-3060.

Campus Contact

For additional information on this procedure, please contact the TAMU-CC Health Center by calling 361-825-2601.

1 Prices are subject to change.

Bacterial Meningitis Vaccination Policy

In accordance with Texas Senate Bill 1107 (amended by SB 62, effective October 1, 2013), Texas A&M University-Corpus Christi requires all new students under the age of 22 to provide certified proof from a health practitioner that they have received a valid bacterial meningitis vaccination or booster within the last five years. Students must submit proof of vaccination or booster at least 10 days prior to the intended start of the term of enrollment.

A new entering student includes a first-time student of an institution of higher education or private or independent institution of higher education and includes a transfer student, or a student who previously attended an institution of higher education before January 1, 2012, and who is enrolling in the same or another institution of higher education following a break in enrollment of at least one fall or spring semester.

Students are strongly encouraged to obtain the bacterial meningitis vaccination before entering the United States or moving to the Corpus Christi area. A list of U.S. approved meningococcal vaccines is available: English (http://admissions.tamucc.edu/assets/CDC_Handout_vis-mening.pdf), Español (http://admissions.tamucc.edu/assets/CDC_Handout_sp_men05.pdf)

Important Facts about Bacterial Meningitis (https://www.cdc.gov/ meningitis/)

Students who fail to submit certified proof of vaccination or a valid booster within the required time frame will be unable to register for their intended term. Please note, vaccinations older than 5 years will require a booster and all bacterial meningitis vaccinations and boosters must be administered by a health practitioner authorized by law to administer an immunization.
Valid Proof of Vaccination

1. A complete Evidence of Vaccination against Bacterial Meningitis Form (http://admissions.tamucc.edu/assets/Evidence_of_Vaccination_Against_Bacterial_Meningitis_Form.pdf). Use this form if you plan to obtain your vaccination elsewhere other than your personal physician’s office.

2. A document bearing the signature or stamp of the physician or her/his designee, or public health personnel (must include the month, day, and year the vaccination was administered).

3. An official immunization record generated from a state or local health authority (must include the month, day, and year the vaccination was administered).

4. An official record received from school officials, including a record from another state (must include the month, day, and year the vaccination was administered).

Valid Proof of Vaccination Exemption

1. An affidavit or a certificate signed by a physician who is duly registered and licensed to practice medicine in the United States, in which it is stated that, in the physician’s opinion, the vaccination required would be injurious to the health and well-being of the student.

2. Conscientious Objection Form: An affidavit signed by the student stating that the student declines the vaccination for bacterial meningitis for reasons of conscience, including a religious belief. A conscientious exemption form from the Texas Department of State Health Services (TDHSS) must be used and can be downloaded from the following link: TEXAS DEPARTMENT OF STATE HEALTH SERVICES FORM (https://www.dshs.state.tx.us/immunize/docs/EF11-13140.pdf). Please complete following the instructions provided on the conscientious exemption form. Please allow several weeks for delivery.

Other Vaccination Exemptions

A student is not required to submit evidence of receiving the vaccination against bacterial meningitis, or a booster dose, if:

1. The student is 22 years of age or older by the first day of the start of the semester; or

2. The student is enrolled only in online or other distance education courses; or

3. The student is enrolled in a continuing education course or program that is less than 360 contact hours, or continuing education corporate training; or

4. The student is enrolled in a dual credit course which is taught at a public or private K-12 facility not located on a higher education institution campus; or

5. The student is incarcerated in a Texas prison.

Students are encouraged to visit their primary care provider prior to enrollment at the University. The cost of the bacterial meningitis vaccination may be less expensive in a student’s home country or through the student’s primary care provider. Students may also obtain the Meningitis vaccination or booster from their local County Public Health Department or other local pharmacies.

For medical questions concerning the meningitis vaccination or booster, students may contact the University Health Center Nurse Line at 361.825.5735. For questions regarding document submission and approval, students should contact the Office of Recruitment and Admissions at 361.825.2624.
there will be no refund of tuition and fees. The balance due the University will be considered receivable and will be collected.

Transfer Credit Policies

General Regulations

Texas A&M University-Corpus Christi will consider for credit collegiate level work from regionally accredited institutions. However, work completed while an institution is a candidate for accreditation may also be considered. Course work transferred or accepted for credit toward an undergraduate or graduate degree must represent collegiate course work relevant to that degree, with course content and level of instruction resulting in student competencies at least equivalent to those of students enrolled in the relevant degree programs at Texas A&M University-Corpus Christi. College-level work posted on a sending institution’s transcript as the result of the College Level Examination Program (CLEP) and other credit-by-examination programs will be treated as transfer work. Remedial, high school, or duplicate work will not be transferred to the University. Acceptability of credit for transfer does not imply that it is applicable to the requirements of a particular degree program.

The student must provide official copies of transcripts from each institution attended. The granting institution must submit official transcripts directly to the University. Hand carried documents will not be accepted for evaluation. Upon receipt, the documents become the property of the University and will not be returned to the student as originals.

All transferred work (with accompanying grades or marks) will be translated into Texas A&M University-Corpus Christi terms. If an equivalency for an undergraduate course has not already been established, the Office of Recruitment and Admissions will consult with the department that represents the course content to determine the course equivalency. If the content and level renders an equivalency impossible, the work will be given a generic title and number. Should the Executive Director of Recruitment and Admissions determine that a student has taken courses of similar level and content at more than one institution (duplicated work), the highest grade of the course attempted will be the grade of record, and all others will be recorded without credit. Transfer work will become a part of the student’s record only after matriculation and then only when the student has enrolled in a credit bearing course.

The Office of Recruitment and Admissions is responsible for the evaluation of undergraduate transfer credit. Appeals related to the evaluation of undergraduate transfer credit are submitted to The Office of Recruitment and Admissions.

No more than 45 semester hours of undergraduate work may be transferred from military service, credit by examination and vocational technical courses. This limit applies both to work completed prior to and after matriculation.

The holding of an associate’s degree from another institution does not affect the transfer of credit or the transfer policies and practices of Texas A&M University-Corpus Christi.

Texas Common Course Numbering System

The University participates in the Texas Common Course Numbering System (https://www.tccns.org/search/comparelnstitutions/) (TCCN), a program developed to facilitate transfer of academic course work between Texas public junior and senior institutions. This system is used as the basis for numbering most lower-division courses on campus. A lower-division course with a common course number equivalent will generally use the common number. The catalog section on Lower-Division Transfer Courses lists Texas A&M University-Corpus Christi courses that are equivalent to courses in the common course numbering system.

Resolution of Transfer Disputes for Lower-Division Courses

Public institutions of higher education in Texas use the following procedures in the resolution of credit transfer disputes involving lower-division courses, as required by the Texas Higher Education Coordinating Board:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.

2. A student who receives notice as specified above may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution. (The designated officer at Texas A&M University-Corpus Christi is the Executive Director of Recruitment and Admissions.)

3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Board rules and guidelines.

4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner’s designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

The Board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the Commissioner or the Commissioner’s designee.

If a receiving institution has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, it should first contact the sending institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, the receiving institution may notify the Commissioner of Higher Education, who may investigate the course. If its quality is found to be unacceptable, the Board may discontinue funding for the course.

Military Transfer Credit

Persons who have been granted honorable or general discharge from military service of the United States and who would like a review of service records for potential college credit must request the appropriate documentation. Depending on the type of military service, students must request one of the following transcripts sent directly to the Office of Recruitment and Admissions:

1. Official transcripts from the service branch.
2. Official transcript from the Department of Education.
3. Statement from the Department of Education verifying the courses and credit already earned.

Further information is available at the Office of Recruitment and Admissions.
1. JST (Joint Services Transcript): Army, Coast Guard, Navy - [jst.doded.mil/official.html](https://jst.doded.mil/official.html)
2. CCAF Transcript (Community College of the Air Force)

The American Council on Education guidelines will be used in the evaluation. Credit will be awarded only in areas offered within the current curriculum of the institution, and only when the course work is appropriately related to the student’s educational programs. The evaluation of military credit is utilized in awarding college credit only and is not considered in determining admission eligibility.

**Foreign Institutions Transfer Credit**

Students who wish to transfer work from foreign institutions must present transcript copies rendered into standard English and certified as true copies by a translator approved by the Executive Director of Recruitment and Admissions. Originals must also be provided. In cases where it is impossible, practically, to obtain official transcripts, alternatives to translated transcripts may be considered on a case-by-case basis.

The University requires students transferring work from foreign institutions to provide an evaluation from a professional source. A list of acceptable companies is available from the Office of Recruitment and Admissions ([http://admissions.tamucc.edu/international/](http://admissions.tamucc.edu/international/)). The student is responsible for costs associated with this service.

**Credit by Examination**

Texas A&M University-Corpus Christi recognizes the validity of accepting credit for specified levels of achievement on institutionally approved, standardized examinations. Examples include College Level Exam Program (CLEP), Advanced Placement (AP), DSST Program, American Council on the Teaching of Foreign Languages (ACTFL) Oral Proficiency Interview (OPI) test and International Baccalaureate (IB) exams. Such work will be treated as transfer credit. The minimum scores acceptable for the different examinations are stated below. The testing agency must provide examination results (scores) directly to Texas A&M University-Corpus Christi.

A grade of CR (credit) will be assigned where applicable. This grade will not be computed in the student’s grade point average, will not carry grade points, and cannot be translated into grades A, B, C, or D. The grade of CR will not replace any existing course grade earned at Texas A&M University-Corpus Christi. Credit earned by examination does not count toward the number of semester credit hours required for graduation with honors. For information regarding applicability of these tests to specific degree programs, students should contact an academic advisor.

**CLEP Examinations**

The table below shows CLEP exams that may be accepted for lower-division credit (unless otherwise specified), the minimum scores required, the equivalent Texas A&M University-Corpus Christi courses, and the number of semester credit hours that may be awarded for these exams.

CLEP has a policy that an exam of the same title may not be retaken in a three-month period. CLEP will not release scores for an examination of the same title taken within the 3-month period after the initial administration. If a candidate retakes the examination within the 3-month period, the administration will be considered invalid, the score will be canceled and fees will be forfeited. Candidates who are military service members and whose exams are funded by the Dantess Subject Standardized Tests (DSST) may not repeat an examination of the same title; however, they may personally fund a retest after waiting the required period of time.

Students may receive financial aid based on the total number of hours they have earned at Texas A&M University-Corpus Christi. Financial Aid regulations limit the total number of hours for which a student may receive aid, and the total number of credit hours a student can receive is determined by the number of qualifying credits awarded. Federal Financial Aid regulations limit the total number of hours for which a student may receive financial aid based on the total number of hours they have completed.

Students submitting an IB transcript for credit evaluation should consider the total number of qualifying credits to be awarded. Federal Financial Aid regulations limit the total number of hours for which a student may receive aid based on the total number of hours they have completed.

Students must submit an official IB transcript to the Office of Recruitment and Admissions. Students may contact the Office of Recruitment and Admissions for more information.

**ACTFL Examinations**

Students may receive course credit for their oral proficiency levels in a foreign language through the American Council on Education (ACE) Credit Recommendation Service and Language Testing International (LTI), the assessment agency for the American Council on the Teaching of Foreign Languages (ACTFL). Students who have taken an ACTFL Oral Proficiency Interview (OPI/OPIc) or Writing Proficiency Test (WPT) through LTI, received a proficiency rating by LTI, and received credit recommendation by ACE will receive the following lower-division (LD) course credits in a foreign language at Texas A&M University-Corpus Christi:

Texas A&M University-Corpus Christi - Credit Recommendations for Official ACTFL Ratings

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Legend**

The 10 ACTFL OPI language proficiency ratings are: Superior, Advanced High, Advanced Mid, Advanced Low, Intermediate High, Intermediate Mid, Intermediate Low, Novice High, Novice Mid, and Novice Low. For candidates completing French, German, or Spanish, credit can be earned in the respective courses of 1311, 1312, 2311, or 2312 based on the approved rating. For candidates completing Chinese, credit can be earned for CHIN 1311 Chinese I (3 sch), CHIN 1312 Chinese II (3 sch), and 6 hours of additional general credit based on the approved rating. Candidates taking any of the other foreign languages not taught at Texas A&M University-Corpus Christi will receive the respective amount of general credit.

For a complete listing of languages and a description of levels of speaking proficiency, please refer to the ACTFL website (http://www.actfl.org). To begin the process, students must:

- **International Baccalaureate Diploma (IBD)**

  The International Baccalaureate Diploma (IBD) is an international program of courses and exams offered at the high school level. Keeping with Senate Bill 111 passed in 2005, Texas A&M University-Corpus Christi will grant credit (CR) for International Baccalaureate (IB) exams with certain required scores beginning fall of 2006 to incoming freshmen students.

  Texas institutions of higher education must award at least 24 semester credit hours in appropriate subject areas on all IB exams with scores of 4 or above, as long as the incoming freshman has earned an IBD. However, course credit does not have to be awarded on any IB exam where the score is a 3 or less. This may mean that students will not receive 24 hours of college credit, even if they have an IBD.

  Students submitting an IB transcript for credit evaluation should consider the total number of qualifying credits to be awarded. Federal Financial Aid regulations limit the total number of hours for which a student may receive financial aid based on the total number of hours they have completed.
submit an application to LTI (www.languagetesting.com (http://www.languagetesting.com))

**Other Examinations**
Credit may be accepted for other nationally recognized standardized exams. Credit for such exams will be considered on a case-by-case basis.

**Additional Information on Credit by Examination**
For further information on testing, contact the Office of Academic Testing (http://testing.tamucc.edu/credit_by_examination%20/) at 361-825-2334.

For more information on the awarding of credit, contact the Office of Recruitment and Admissions at 361-825-7024.

**Other Non-Collegiate Experiences**
Texas A&M University-Corpus Christi recognizes the quality and importance of some non-collegiate training programs offered through industrial sources. In collaboration with university faculty, offerings detailed in the appropriate ACE publication will be reviewed for potential credit award. CEU and similar professional credits cannot be translated into academic credit hours.

**Equivalencies**
For purposes of transfer, work taken on a trimester system will be converted to semester hours on a 1-to-1 basis. In the event that the work was taken on a class hour basis, 15 class hours will be equated to 1 semester hour. For conversion from quarter hours to semester hours, Texas A&M University-Corpus Christi has established the following equivalencies:

<table>
<thead>
<tr>
<th>Quarter hours</th>
<th>Semester hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>0.7</td>
</tr>
<tr>
<td>2</td>
<td>1.3</td>
</tr>
<tr>
<td>3</td>
<td>2.0</td>
</tr>
<tr>
<td>4</td>
<td>2.7</td>
</tr>
<tr>
<td>5</td>
<td>3.3</td>
</tr>
<tr>
<td>6</td>
<td>4.0</td>
</tr>
</tbody>
</table>

The University uses the summation of the individual course equivalencies from a particular institution to compute grade point average and/or credits earned. For credit systems other than those listed above, the University Registrar will determine the mathematical relationship and apply it to the record in question.

**Non-Credit Admission (Auditing)**
A student may attend classes for a course without receiving credit if the student submits a Course Audit Form at the time of registration and has the permission of both the instructor of the course and the dean of the college in which the course is offered. No formal admission to the University is required for course audits. The fee for auditing a course is the same as that required for registration for credit, however no credit will be awarded, no records will be kept, and the student may be restricted from lab work and tests. A student will not be given permission to audit a course until the first day of classes. Students may not change from credit to audit status after the 12th class day during a long semester or after the 4th class day during the summer. Senior citizens (65 or over) may audit with all fees exempted except material or field trip fees on a space available basis only. If the student is under the age of 22, Texas A&M University-Corpus Christi will require the students to provide certified proof from a health practitioner that the student has received a Bacterial Meningitis vaccination or booster within the last five years. Under no circumstance may audit be converted to credit. No refunds are given on audits.

**Registration**
New students must apply for admission through the Office of Recruitment and Admissions prior to the term of enrollment. Former students may need to reapply for admission or reactivate their records in the Office of Recruitment and Admissions prior to the term of enrollment. As a general rule, students who have previously attended classes at the University, but who have not been enrolled for two consecutive long semesters, need to reapply for admission. Information regarding dates, registration, and course offerings are available through the Office of the Registrar (http://registrar.tamucc.edu/). Unless exempted from the Texas Success Initiative (TSI), students must be assessed in reading, writing, and math skills prior to registration. Additional information on the Texas Success Initiative (TSI) is available in the Admissions (p. 9) section of this catalog. Students must register by the specified deadlines for the term in order to be eligible to receive course credit. Registration requires the payment of tuition and fees. More information on tuition, fees, and payment options is available under the Tuition, Fees, and Financial Assistance section of this catalog.

**Unit of Credit**
A semester hour is the amount of credit for one class hour per week for one semester. Each class hour generally requires two hours of preparation on the part of the student, though the actual time required may vary from one to three. Three hours of laboratory work are equivalent to one class hour. Most courses are for three semester hours of credit. Some have variable credit from one to three hours, others four to six hours.

**Classification of Degree-Seeking Students**
Texas A&M University-Corpus Christi enrolls degree-seeking students in both undergraduate and graduate programs. An undergraduate student is one who has not yet received a baccalaureate degree. Graduate student is a student who has earned a baccalaureate degree and is enrolled in graduate coursework.

A degree-seeking undergraduate is classified as a freshman (or first-year student), sophomore, junior, or senior according to the number of semester credit hours earned, as follows:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Semester Credit Hours Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman (or First-Year Student)</td>
<td>fewer than 30</td>
</tr>
<tr>
<td>Sophomore</td>
<td>at least 30, but fewer than 60</td>
</tr>
<tr>
<td>Junior</td>
<td>at least 60, but fewer than 90</td>
</tr>
<tr>
<td>Senior</td>
<td>90 or more</td>
</tr>
</tbody>
</table>

**Enrollment Status for Financial Assistance**
Enrollment status affects a student’s eligibility for financial assistance. Students who are enrolled at least half time may be eligible for financial aid. Rules applying to veterans’ benefits are available under Veterans Educational Benefits (p. 29).
Registrar and the drop not processed due to exceeding the six-drop limit. To drop a seventh class, your request will be denied by the University unless specifically identified as being exempt. Should you attempt to schedule or academic calendar is counted toward the six-course limit a student drops after the census date published in the class schedule. Any student has dropped at another institution of higher education. "an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education."

Non-degree students are not classified as part-time or full-time students, nor are they classified as freshmen (first-year), sophomores, juniors, or seniors.

### Courses of Instruction

All undergraduate courses offered at Texas A&M University-Corpus Christi are listed in the Courses A-Z (p. 640) section of this catalog. Although the lists of courses are based on the best information available at the time of catalog preparation, course offerings are subject to change without notice. This catalog was prepared well in advance of its effective date; therefore, changes may occur in course content or availability. Some new courses and modified courses are included in this catalog pending their approval by the Texas Higher Education Coordinating Board.

When registering for courses, students should consult the semester class schedule, a separate online publication that provides specific course offering information for a particular semester or session. The class schedule is made available online before the registration period for each term.

### Adding or Dropping a Course

**Adding or Dropping a Course:** A student may add or drop a course during the time specified in the class schedule. To add or drop a course after the first class day, the student must complete a Class Scheduling Form (http://registrar.tamucc.edu/assets/Class%20Scheduling%20Form_new.pdf) from the Office of the University Registrar.

**Deadline for Dropping a Course with a Grade of W:** The grade of W will be assigned to any student officially dropping a course by the date stated in the class schedule. No student is eligible to receive a W without completing the official drop process by this deadline. After the drop date listed in the class schedule, a student will not be allowed to drop a course. A change of section or a change from credit to audit is a change of registration and requires that the add/drop process be followed.

**Implications for Financial Assistance:** Dropping courses may affect student eligibility for financial assistance.

**Six-Course Drop Limit:** The State of Texas enacted a statute that applies to students who enroll in public institutions of higher education as first-time freshmen in fall 2007 or later. Under section 51.907 of the Texas Education Code, "an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education." Any course a student drops after the census date published in the class schedule or academic calendar is counted toward the six-course limit unless specifically identified as being exempt. Should you attempt to drop a seventh class, your request will be denied by the University Registrar and the drop not processed due to exceeding the six-drop limit.

### As a result, you will have to accept a grade in all courses in which you are enrolled and should plan your schedule accordingly.

**Withdrawal:** If a student should drop all courses for a given semester or term, a Withdrawal Form must be processed. Refer to the following paragraph.

### Withdrawal from the University

A student who finds it necessary to withdraw from the University during a semester must file a Withdrawal Form with the Office of the University Registrar. The deadline for withdrawing from the University is the day before the last day of classes during a long semester (fall or spring), and two days before final examinations during a summer session. Failure to file a Withdrawal Form can result in grades of “F” for all courses in progress.

A student who withdraws from the University according to procedures stipulated for a withdrawal, will be allowed a grace period to rescind the withdrawal. A student may rescind a withdrawal no later than the end of the second University business day following the date of withdrawal or the last class day, whichever is sooner. The date of reinstatement must be among the regular days of classes; days of final examinations and thereafter are specifically excluded.

Should space no longer be available in a class, the student must secure the approval of the dean and instructor before reinstatement in class is allowed.

All indebtedness to the University must be satisfied prior to the reinstatement.

Reinstatement must be requested in writing by the student to the University Registrar. All documentation and requirements for the reinstatement must be filed with the University Registrar by the end of the second business day (following the withdrawal), or else the reinstatement will not occur.

Students receiving veterans benefits for education should contact the Office of Veterans Affairs for specific policies concerning drops and withdrawals. These changes have a direct effect on VA benefits.

### Withdrawal of Students Called to Active Duty

Section 54.006 of the Texas Education Code states:

Beginning with the summer semester of 1990, if a student withdraws from an institution of higher education because the student is called to active military service, the institution, at the student’s option, shall:

1. refund the tuition and fees paid by the student for the semester in which the student withdraws;
2. grant a student who is eligible under the institution’s guidelines, an incomplete grade in all courses by designating “withdrawn-military” on the student’s transcript; or
3. as determined by the instructor, assign an appropriate final grade or credit to a student who has satisfactorily completed a substantial amount of coursework and who has demonstrated sufficient mastery of the course material.

### Retroactive Withdrawal

A student may request that all grades in an academic period be retroactively removed and replaced by entries of “W” on his or her
transcript. A retroactive withdrawal may be granted only when a student has experienced circumstances of such serious and compelling nature that the student could not reasonably have been expected to satisfactorily complete the academic period or submit a petition for regular withdrawal by the deadline specified in the Academic Calendar. Such serious and compelling circumstances may include (but are not limited to) hospitalization, incarceration, debilitating mental illness, or sudden absence at the end of the semester due to family crisis. Failure to academically perform due to factors such as bad habits, poor judgment, time management issues, failed relationships, roommate conflicts, or ignorance of University policies would not generally qualify a student for retroactive withdrawal.

To withdraw retroactively from the University, the student must request this action in writing through the Office of the University Registrar via an online appeal form that will be reviewed by the Associate Registrar. The appeal must be accompanied by supporting documents which demonstrate serious and compelling reasons why action was not taken through the regular withdrawal process during the academic period in question. The time limit for submitting this appeal is the end of the next long semester following the academic period in question; requests that extend past this period will be denied.

If the retroactive administrative withdrawal is granted, the Office of the University Registrar will set all grades for the relevant term to a non-punitive mark of "W." If the student should wish to appeal a decision on retroactive withdrawal, an appeal can be made, in writing, to the University Registrar within 14 days of the date of notification. The decision of the University Registrar is final.

**Class Attendance**

Students are held responsible for class attendance. Excessive absences may adversely affect course grades. Every instructor is required to make clear the policy on class attendance at the beginning of each course.

If students are absent from class on approved university business (e.g., intercollegiate athletics competition/travel, field trips, student research conferences, Board of Regents meetings), faculty members should count this as an excused absence and should not penalize the student for it. Students should be allowed to make up any required course work in advance or within two weeks after their return to campus. Students are responsible for informing their instructors about the trip in advance so that the faculty members can make plans accordingly. Students need to make prior arrangements to make up labs. If students have any doubt as to whether the activity in question is considered official university business, they should contact the Office of the Provost.

**Student Absences on Religious Holy Days**

In accordance with Texas Education Code 51.911, Texas A&M University-Corpus Christi will excuse a student from attending classes or other required activities, including examinations, for the observance of a religious holy day, including travel for that purpose. A student whose absence is excused for observance of a religious holy day may not be penalized for that absence and must be allowed to take an exam or complete an assignment from which the student is excused within a reasonable time after the absence.

Texas Education Code, Section 51.911 defines a religious holy day as a holy day observed by a religion whose places of worship are exempt from property taxation under Section 11.20, Tax Code. If a student and an instructor disagree that the absence is for the observance of a religious holy day, or if there is similar disagreement about whether the student has been given a reasonable time to complete any missed assignments or examinations, either the student or the instructor may request a ruling from the Provost. The student and instructor shall abide by the decision of the Provost.

If a student’s academic course work includes patient care, the University may exclude from these policies and procedures any student absence for religious holy days that may interfere with patient care.

**Grades**

Grades for undergraduate courses shall be reported by the symbols below, with grade points as noted:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Interpretation</th>
<th>Grade Points per Semester Hour</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>D</td>
<td>Passing</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>Failure; work not passed</td>
<td>0</td>
</tr>
</tbody>
</table>

[Note: Graduate students should consult the graduate catalog.]

<table>
<thead>
<tr>
<th>Grade</th>
<th>Descriptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>CR</td>
<td>Satisfactory, but without qualitative grading. See “Alternate Grading Systems” section below.</td>
</tr>
<tr>
<td>NC</td>
<td>No credit.</td>
</tr>
<tr>
<td>P</td>
<td>Pass. Satisfactory, but without qualitative grading of the credit hours earned. Applicable only to those courses stipulated by the PASS/NO PASS policy. Not used in graduate courses.</td>
</tr>
<tr>
<td>NP</td>
<td>No pass. No credit is generated and the mark is not punitive. Applicable only to those courses stipulated by the PASS/NO PASS policy. Not used in graduate courses. Students are advised to use caution before electing the P/NP option and are encouraged to read the policy pertaining to it.</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory. Applicable to specified graduate courses.</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory. Applicable to specified graduate courses.</td>
</tr>
<tr>
<td>UP</td>
<td>Unsatisfactory. Applicable to specified graduate courses.</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete. An incomplete notation may be given to a student who is passing but has not completed a term paper, examination, or other required work for reasons beyond the student’s control other than lack of time.</td>
</tr>
</tbody>
</table>
Incomplete-Military. An “IM” notation may be given to a student who is called to active military service and who consequently cannot continue attending class. In order for this notation to be given, the student must be passing the course, must have completed a significant portion of the course work, and must have the approval of the instructor.

Withdrawal pass. Before the fall semester of 1996, this grade was assigned to a student who dropped a course or withdrew between designated dates in the semester or summer term and was passing the course at the time of the withdrawal. Grades of WP assigned before fall 1996 will remain on the transcript.

Withdrawal failure. Before fall 1996, this grade was assigned to a student who dropped a course or withdrew between designated dates in the semester or summer term and was failing the course at the time of withdrawal. Grades of WF assigned before fall 1996 will remain on the transcript.

For a grade of W to be assigned, a student must officially withdraw from the course or University through the Office of the University Registrar. If no grade is submitted by an instructor, a temporary notation (XX) will be placed on the student’s records. In such cases, the course grade must be submitted within 30 days from the beginning of the next semester. If the instructor is not able to submit the grade within the 30 days, the dean in consultation with faculty will submit the course grade.

Course dropped or withdrawal from the University. Automatically given, regardless of the student’s standing in class, when a student officially withdraws from the University or drops a course prior to the deadline as indicated in the class schedule. See “Adding or Dropping a Course” and “Withdrawal from the University” in this catalog.

Calculation of Grade Point Average

Texas A&M University-Corpus Christi uses a 4.0 scale for calculation of Grade Point Average (GPA). GPA is determined by dividing the total number of grade points earned by the number of semester credit hours taken for a qualitative grade (A=4, B=3, C=2, D=1, F=0). The result of this division is expressed as a number carried to the fourth decimal place and rounded up to the third.

Change of Grade

A change of grade (among the values A, B, C, D, F) may occur only if there has been an error in computation or recording of the grade or if a change has been ordered as a result of the grade appeal process. A grade may not be changed because of consideration of work completed following the end of the grading period for which the grade was issued. If not associated with the grade appeal process, a grade change is initiated by the instructor of record and approved by the dean of the college of record. In rare circumstances, the approval of the Provost may be required. To be valid, a grade change must be submitted to the Office of the University Registrar on or before the last day of the next regular semester following the term in which the grade was originally issued, and on the form provided for that purpose.

Grade Appeal Process

As stated in University Procedure 13.02.99.C0.03 (http://academicaffairs.tamucc.edu/rules_procedures/assets/13.02.99.c0.03_student_grade_appeals.pdf), Student Grade Appeals, a student who believes that he/she/they have not been held to appropriate academic standards as outlined in the class syllabus, equitable evaluation procedures, or appropriate grading, may appeal the final grade given in the course. The burden of proof is upon the student to demonstrate the appropriateness of the appeal.
A student with a complaint about a grade is encouraged to first discuss the matter with the instructor. If the problem cannot be resolved at this level, the student may take the steps below:

1. Written appeal to department chair or area coordinator. (This step must be taken within 20 business days after the start of the next term.)
2. If no satisfactory resolution can be found, the Department Chair will refer the matter, normally within 5 business days, to the Associate Dean for a hearing by the College Grade Appeal Committee (CGAC).
3. The Associate Dean will schedule a hearing before the College Grade Appeal Committee normally within 20 business days.
4. The Committee shall hear all parties to the case and review all evidence presented. Both the faculty member and student shall be present at the same time during the formal hearing.
5. The College Grade Appeal Committee will determine the facts of the case and attempt to develop a fair and appropriate resolution to the complaint.
6. The Chair of the CGAC will present its findings and recommendations, in writing, to the Associate Dean normally within 5 business days after completion of its hearings and deliberations.
7. The Associate Dean will send written notification of the decision to the student and the faculty member involved normally within 5 business days after receiving the CGAC’s findings and recommendations.
8. The decision of the Associate Dean is final.

For complete details, including the responsibilities of the parties involved in the process and the number of days allowed for completing the steps in the process, see University Procedure 13.02.99.C0.03 (http://academicaffairs.tamucc.edu/rules_procedures/assets/13.02.99.c0.03_student_grade_appeals.pdf), Student Grade Appeals.

For assistance and/or guidance in the grade appeal process, students may contact the Office of the Provost.

Removing the Grade of Incomplete

The notation of “I” indicates that work in a course is satisfactory but incomplete (certain work is postponed by the student for substantial reason with the prior consent of the instructor). This work must be completed by the last day of the next regular (fall or spring) semester unless the instructor designates an earlier date for completion. If the work is not completed by the appropriate date, the qualitative grade provided by the instructor on the incomplete notation application will be submitted to the Office of the University Registrar and will replace the “I.” An incomplete notation cannot remain on the student’s permanent record and must be replaced by a qualitative grade (A-F) at the conclusion of the next regular semester. If the grade of “I” has not been changed at the conclusion of the next regular semester and no qualitative grade was provided on the incomplete notation application, it will be changed to a final grade of “F” by the Office of the University Registrar.

Removing Grade of Incomplete—Military (IM)

The “IM” notation may be given to a student who is called to active military service and who consequently can no longer attend class. Such a notation may be assigned if the student is passing a course but will not be able to complete a term paper, examination, or other required work for the course before the end of the semester or session because of required active military service. Assignment of the “IM” notation requires the approval of the instructor. Normally the “IM” grade is not assigned unless the student has completed a substantial amount of course work. The remaining course work must be completed by the last day of the next regular semester (fall or spring) following the student’s return from active military service. The “IM” designation will remain on the student’s permanent record if the work is not completed by the appropriate date. For more information on options available to students who are called to active military service, see “Students Called to Active Duty (p. 17).”

Pass/No Pass Policy

Each upper-division student may take up to two academic courses (eight semester hours maximum) graded on a pass/no pass basis during a particular degree program. These courses (if passed) will count as part of the total needed to graduate but will not enter into calculation of grade point average. Designated general education requirements and specific courses required by the major/minor, including required foundation courses outside the discipline of the student’s major; as approved by the college of the student’s major, cannot be taken pass/no pass, unless so stated in the catalog. A course that has been recorded as P cannot be used as a component of general education requirements or of the major/minor field of study. Students will indicate to the Office of the University Registrar their intention to take a course on a pass/no pass basis before the 12th class day of a fall or spring semester or the 4th class day of a summer session or term, as shown in the class schedule. Once such a declaration is made, it cannot be changed on any account including a change of major or degree designation. The faculty member will not be informed that a student is taking the course on a pass/no pass basis. Pass/no pass grades are not used in graduate courses.

Alternate Grading Systems

Certain courses proposed by individual colleges and approved by the Faculty Senate may use the alternate grading system CR/NC when the standard system authorized for the University (A, B, C, D, F, I, IP, W) is not considered appropriate. CR/NC is a designation of the University given to certain courses, all of whose students receive one of these grades; P/NP is an option that a student may designate in any course, subject to the restrictions above.

A student may apply no more than ten credit hours eared at this university outside the standard grading system (e.g., grades of CR/NC or P/NP) toward a baccalaureate degree. No more than seven semester hours of CR/NC may be in a student’s major field of study. The hours graded P (pass) or CR (credit), given in those instances where standard letter grades are not used, will not be applied in computing grade point averages nor influence student eligibility for academic honors.

Final Examinations

Final examinations must be scheduled during the regularly scheduled examination time listed in the official class schedule. If papers or take-home examinations are assigned in lieu of a final examination, the due date must be at the regularly scheduled examination time listed in the official class schedule. If final presentations or final critiques assigned in lieu of final examinations require multiple days to complete, then the final day for the critiques/presentations must occur on the regularly scheduled exam day.

Students are not required to take more than two final examinations in any one day. Any student with three or more final examinations scheduled on
the same day may request to take one of the examinations on another
day during the final examination period. The process is described below.

1. The student should first try to resolve the matter with the appropriate
instructor(s).
2. If the matter remains unresolved, the student should submit a request
for an alternative final exam time in writing to the Office of Academic
Affairs. This request must be submitted by the drop date (the last day
to drop a course for the semester with an automatic grade of W as
stated in the semester class schedule).
3. The Office of Academic Affairs will select which of the exams should
be taken at an alternative time and formally contact the faculty
member at least 15 working days before the final examination period.
Preference for selection of which course would have an alternative
final exam time must be based on the course with the smaller class
size and, then, courses with final exam times in between other exams.
4. The Office of Academic Affairs will select which of the exams should
be taken at an alternative time and formally contact the faculty
member at least 15 working days before the final examination period.
Preference for selection of which course would have an alternative
final exam time must be based on the course with the smaller class
size and, then, courses with final exam times in between other exams.

For additional information regarding this process students should refer
to University Procedure 13.99.99.C0.01: Course Examinations and
Study Week (http://academicaffairs.tamucc.edu/rules_procedures/
assets/13.99.99.c0.01_course_examinations_and_study_week.pdf).

Graduation Under a Particular Catalog
A student may receive the baccalaureate degree upon satisfying the
requirements of the catalog under which credit was first earned in
this University or upon satisfying the requirements of the catalog of
any subsequent year in which credit was earned as a student in the
University. This provision is subject to the restriction that all requirements
must be completed within six years of the date of the catalog chosen
and that the University still offers programs and required curriculum
described in the earlier catalog. A student who transfers from a public
community college in Texas may choose to graduate under the University
catalog in effect at the time the student first earned credit at the
community college or a later catalog in effect when the student earned
credit at either the community college or the University. This provision
is subject to the six-year restriction stated earlier.

Certification or licensure requirements are subject to change. Students
enrolled in programs leading to certification or licensure must meet all
current requirements, regardless of the catalog chosen.

Application for Graduation
Students who plan to participate in a graduation exercise and/or receive
a diploma and degree conferral must submit an online application for
graduation by the deadline indicated in the Academic Calendar (http://
catalog.tamucc.edu/academic-calendar/) and pay the associated fee.
Students are strongly advised to consult their academic advisor prior to
submitting an application for graduation. The application for graduation
and associated fees is not transferable to a subsequent semester. If a
student does not graduate, the application will be canceled and a new
application and fee must be submitted. Students participating in the
graduation exercise will also be required to obtain an appropriate cap and
gown.

Academic Integrity
Texas A&M University-Corpus Christi students are expected to conduct
themselves in accordance with the highest standards of academic
honesty. Academic misconduct for which a student is subject to penalty
includes all forms of cheating, which include but are not limited to illicit
possession of examinations or examination materials, falsification,
forger, plagiarism or collusion in any of these behaviors.

Responsibility of the Student: It is the responsibility of the student to
become educated regarding University Rules, Regulations and Policies
regarding academic misconduct. This includes, but is not limited to,
seeking clarification from each instructor regarding acceptable behaviors
and guidelines for completing individual assignments. A failure to
become educated with the University Rules, Regulations and Policies or
the instructors individuals guidelines will not excuse the student from
accountability for violations of such policies.

Responsibility of the Instructor:
The instructor should maintain a policy regarding academic misconduct
within the course syllabus and provide clear expectations regarding
behaviors that will and will not be permitted regarding the completion of
in-class and out-of-class assignments. The instructor shall address all
matters of suspected academic misconduct with the student in question
and may choose to document and refer the matter to the Student
Conduct & Community Standards. The burden of proof shall lie with the
instructor when presenting cases of academic misconduct to the Student
Conduct & Community Standards.

Disciplinary action for academic misconduct is first the responsibility
of the faculty member assigned to the course. The faculty member is
charged with assessing the gravity of any case and with recommending
sanctions for any student involved.

Sanctions that may be recommended by the faculty member for
individual cases of academic misconduct include one or more of the
following:

- Written reprimand (an official letter of reprimand will be issued by the
Student Conduct & Community Standards);
- Requirement to re-do work in question;
- Requirement to submit additional work;
- Lowering of grade on work in question;
- Assigning grade of ‘F’ to work in question;
- Assigning grade of ‘F’ for course;
- Recommendation for more severe punishment, such as suspension,
dissmissal from program, or expulsion from the University.

If the faculty member recommends a more severe sanction, such as
dissmissal from program or expulsion from the program or from the
University, the matter will automatically be reviewed by Student Conduct
& Community Standards and may be referred to an Academic Integrity
Hearing Panel. Additionally, if the student has a history of academic
misconduct, the matter will be reviewed by the Academic Integrity
Hearing Panel.

The faculty member must file a report for each case of academic
misconduct, including a description of the incident, the disciplinary
action taken, the assignment, the instructions for the assignment, and
evidence indicating misconduct, and a current syllabus for the course
to the Student Conduct & Community Standards. The faculty member
should also provide a copy to the chair of their department. The Student
Academic Records

Permanent academic records are maintained in the Office of the University Registrar. When a transcript or other document has been submitted to Texas A&M University-Corpus Christi, it becomes the property of the University and will not be returned to the student as an original.

Academic files and degree plans are maintained in the offices of the college deans. The college deans are responsible for certifying that students receiving undergraduate degrees have satisfied all college degree requirements. The Office of the University Registrar is responsible for certifying that University minimum requirements have been satisfactorily completed.

Challenge to an Academic Record

A student who wishes to challenge the accuracy of the academic record established at Texas A&M University-Corpus Christi and held in his or her behalf, must notify the Office of the University Registrar in writing and explain in detail the nature of the error. The Office of the University Registrar will study the challenge and the contents of the student's file, and consult with the appropriate academic personnel. The Office of the University Registrar will reply to the student within 30 business days.

The student has one calendar year from the date that the data becomes a fact of record to initiate a challenge. If a challenge is successful and affects the student's GPA, honors status or similar rubric, the historical record will be altered accordingly.

Application of this policy is not intended to abridge, supplant, or supersede other deadlines. The University reserves the right to correct or amend an academic record at any time that an error may be detected. In each case, the student will be given written notice of the change.

Change of Name or Address

Changes of name must be filed in the Office of the University Registrar. Address and/or telephone number changes may be processed through the Office of the University Registrar or through Student Academic Information Link (SAIL) (http://sail.tamucc.edu/).

Student Records Policy

The University accumulates data and keeps records to enable staff and faculty to plan educational opportunities to meet the needs of individual students, to better understand students, to counsel them more effectively, and to assist them in placement in graduate education or employment after graduation.

The University maintains student records in several locations, including the Office of the University Registrar, Office of Student Financial Assistance, Business Office, offices of academic deans and faculty, Office of Student Engagement and Success, College of Graduate Studies, Office of Communications and Public Affairs, Career Services, University Health Center, University Counseling Center, Disability Services, and Alumni Office. Provisions are made in these offices for students to review and challenge the accuracy of records when appropriate and upon request.

The University complies with the Family Educational Rights and Privacy Act of 1974 (FERPA) and with the Texas Public Information Act. FERPA is a federal law intended to protect the privacy of education records, to establish the rights of students to inspect and review their education records and to provide guidelines for the correction of inaccurate or misleading information through informal or formal hearings. Information in student records may be provided to parents without the written consent of the student if the eligible student is a financial dependent of his or her parents as defined under Section 152 of the Internal Revenue Code of 1954. Such requests should be submitted to the Office of the University Registrar.

Students have the right to inspect and review their education records, except for the following:

1. Financial records of the student's parents.
2. Confidential records and statements of recommendation, which were placed in the education records prior to January 1975.
3. Confidential records and statements of recommendation, which were placed in the student's education records on or after January 1, 1975, if the student has waived the right to review the letters or statements.

Education records, as defined by FERPA, do not include the following: a personal record of a University faculty or staff member that is in the sole possession of the individual who made it and that has never been revealed to any other person except the maker's temporary substitute; certain employment records; student health records; student records of personal counseling (records protected under other laws and regulations); and records maintained by a University law enforcement unit that were created by that unit for the purpose of law enforcement. (However, the University may release to an alleged victim of a crime of violence the results of a University disciplinary proceeding concerning the alleged perpetrator of the crime.)

The University manages two types of student education records: directory information and student records. Directory information is considered public information and will be released by the University upon request, in accordance with existing law. This public information includes: name; student ID, permanent address; permanent telephone number; University email address; field of study; enrollment status (full-time, part-time, undergraduate, graduate, etc.); classification (fr., so., jr., sr.); dates of attendance; degrees, certificates, and other awards received (if any); the type of degree received; date of graduation; name of most recent previous institution attended; and similar information. A student who does not wish this public information to be released must complete the appropriate form and submit it to the Office of the University Registrar.

With the exception of directory information, the University will not permit the release of personally identifiable information in education records without the prior written consent of the student, except as follows:

1. To appropriate University personnel who need access to educational records to perform their legitimate educational duties.
2. To officials of other schools in which the student seeks to enroll, provided the student is notified of what is being released and is given a copy if desired.
3. To federal, state, or local officials authorized by law.
4. In connection with a student's application for, or receipt of, financial aid.
5. To organizations conducting educational studies, provided that these organizations do not release personally identifiable data.

6. To accrediting organizations.

7. To the parents who certify that a student is carried as a dependent for federal income tax purposes.

8. To appropriate persons, in an emergency, if the knowledge of such information is necessary to protect the health or safety of the student or other persons.

9. To individuals requiring such information by means of a judicial order or a lawfully issued subpoena, provided a reasonable effort is made to notify the student in advance of compliance.

The University does not maintain records of membership in organizations of political, racial, or religious affiliations.

The acquisition and dissemination of information for records is based on a respect and concern for the privacy and protection of the individual student. However, the obligation of confidentiality may lapse when the common welfare of the community or the welfare of the individual demands revelation such as in the case of suicidal preoccupations, expressed homicidal thoughts or actions, commission of a felony, or similar circumstances. Evaluation and interpretation of a student’s records shall be done only by a professional and qualified staff person.

**Policies Subject to Change**

Although every effort has been made to provide complete and accurate information in this catalog, changes may occur at any time, without notice, in academic policies and regulations.

**Tuition, Fees & Financial Assistance**

**Tuition and Fees**

The Business Office (http://businessoffice.tamucc.edu/) website provides current tuition and fee information. Tuition and fees are subject to change.

**Texas Residency**

All students attending Texas A&M University-Corpus Christi who are non-residents of Texas will be charged additional tuition in accordance with State law. In general, students will be classified as Texas residents if they meet one or more of the following criteria:

1. Any individual who has resided in Texas from birth.
2. Any individual 18 years of age or over who has come from outside Texas and who is gainfully employed in Texas for a 12-month period immediately preceding registration in any institution of higher learning.

Additionally, there are certain other circumstances under which an individual may be classified as a Texas resident. Residency status will be established according to the interpretations by the Texas Higher Education Coordinating Board. The Coordinating Board (https://texreg.sos.state.tx.us/public/readtac%24ext.TacPage/?sl=R&app=9&p_dir=&p_loc=&p_ploc=&pg=1&p_tac=&ti=19&pt=1&ori=1&dir=24) provides rules on determining residency status.

Although classified as a non-resident, a member of the armed services who is assigned to duty in Texas, as well as their immediate family members, may register at the Texas resident fee rate.

Under State law, certain other categories of students may be eligible for tuition and fees exemptions or adjustments. Additional information is available through the Business Office (http://businessoffice.tamucc.edu/).

The student is responsible for registering under the correct residency status. Students should consult with the Office of Recruitment and Admissions prior to registration to address residency questions.

A non-Texas resident seeking to change residency status must submit a Core Residency Questionnaire to the Office of Recruitment and Admissions prior to registration. Additional information about Texas Residency (https://www.tamucc.edu/admissions/texas-residency.php) is available through the Office of Recruitment and Admissions.

**Financial Obligations**

Students are expected to pay all financial obligations to the University by the published deadline. Failure to meet financial obligations may result in:

- Removal from the University
- Transcripts placed on hold
- Exclusion from final exams and graduation
- Exclusion from further enrollment

Financial obligations include, but are not limited to, the following:

- Returned checks and returned check charges
- Library Fines
- Lost or Damaged Book Fines
- Replacement costs of long-overdue books
- Loss or breakage of university instructional material or equipment
- Housing Fees
- Meal Plans
- Installment Payments
- Parking Permits and Fines
- Repayment of financial aid loans and emergency loans

All tuition and fee costs are due upon registration. Failure to pay may result in deregistration from classes. Registration is not completed until the University Business Office has received payment and all necessary documentation has been completed. Ultimate financial responsibility rests with the student. Payment made after the established deadline will result in a fee of $50.00. An additional fee of $100.00 will be assessed for reinstatement into classes lost as a result of non-payment. The University Business Office periodically performs audits on student accounts to verify tuition and fee charges. This may result in additional charges or refunds.

**Returned Checks**

When personal checks or online payments are returned for insufficient funds, the individual responsible for the payment will be notified. Within seven days of notification, the full amount due, plus a return check fee of $25, must be paid to the university Business Office (http://businessoffice.tamucc.edu/).

Payment may be done in person or by mail and must be in the form of cash, money order, or cashier’s check. The University will not accept a personal check in payment following a returned check.

Failure to submit full payment by the deadline may result in disciplinary action, which may include removal from the University, legal action as prescribed by law, and payment of additional collection fees. The
Refund of Tuition and Fees

A student officially and completely withdrawing from the University during the semester may be eligible for a refund of applicable tuition and fees according to the following schedule:

10 Weeks or Longer Term:
- 100% prior to the University's first official class day of the semester
- 80% during the first five class days of the semester
- 70% during the second five class days of the semester
- 50% during the third five class days of the semester
- 25% during the fourth five class days of the semester

No refund thereafter

Less than 10 Weeks but Greater than 5 Weeks Term:
- 100% prior to the University's first official class day of the semester
- 80% during the first three class days of the semester
- 50% during the second three class days of the semester

No refund during the seventh class day and thereafter

5 Weeks or Less Term:
- 100% prior to the University's first official class day of the semester
- 80% during the first five class days of the semester
- 50% during the second five class days of the semester

No refund during the third class day and thereafter

The number of class days is counted from the first official class day of the semester, not the first meeting day of a particular class.

For more information, contact the Business Office or go to http://businessoffice.tamucc.edu/index.html and click on Important Dates.

The process to withdraw from the University begins in the Registrar's Office.

A student dropping a course or courses who remains enrolled in other courses for the semester may be subject to a refund of applicable tuition and fees as follows:

Ten Weeks or Longer Term:
- 100% prior to and including 12th class day of the semester
- No refund after 12th class day

Less than Ten Weeks but Greater than Five Weeks Term:
- 100% prior to and including 4th class day of the semester
- No refund after 4th class day

Five Week Summer Term:
- 100% prior to and including 3rd class day of the semester
- No refund after 3rd class day

2½ Half Week Summer Term:
- 100% prior to and including 2nd class day of the semester
- No refund after 2nd class day

For more information, contact the Business Office (http://businessoffice.tamucc.edu/) or go to http://businessoffice.tamucc.edu/index.html and click on Important Dates.

The number of class days is counted from the first official class day of the semester, not the first meeting day of a particular class.

After an audit of all fees has been made, the refund process will begin. This process requires a reasonable length of time. No refunds are given on audited courses.

Students using the Installment Payment Plan who withdraw from the institution will have the refund, if any, calculated based on the total amount of tuition and fees due at the time of registration, not the amount of tuition and fees paid at the time of withdrawal.

Students with financial aid who withdraw may be subject to the federal refunding timetable and rates. Students should consult with the Financial Aid Office about their situation before withdrawing.

BankMobile and Refunds

A refund will occur when a credit balance remains on each student’s Business Office account after all charges are paid. A credit balance may occur due to overpayments, dropped courses, withdrawals or financial aid (loans, scholarships, grants, etc.…). Refunds are issued to the students by BankMobile. A new student, upon registration, will receive in the mail, from BankMobile, a Refund Selection Kit along with refund preference instructions. BankMobile will use the Billing Address on file with the University to send this correspondence to the student. It is important that this address is current. The Refund Selection Kit will contain a personal code which is used to make your refund selection preference with BankMobile. Once it arrives, you’ll simply login to S.A.I.L, select Student, Student Account and Student Refunds to select your refund preference. The three preferences are: 1) Direct Deposit into a bank account of their choice, 2) Opening a BankMobile Vibe Account or 3) Paper Check. If the student does not make a refund selection preference, BankMobile will not be able to process the refund.

New students will begin the process of receiving their Refund Selection Kit approximately 5-9 business days after registration. If a student does not receive their Refund Selection Kit they should contact the Business Office at 361-825-2600.

Tuition Rebates for Certain Undergraduates

Certain undergraduate students who attempt no more than three hours in excess of the minimum number of semester credit hours required to complete their degrees may be entitled to tuition rebate of up to $1,000 after graduation.

To be eligible for rebates under this program, students must meet all of the following conditions:

1. They must have enrolled for the first time in an institution of higher education in the fall 1997 semester or later,
2. They must be requesting a rebate for work related to a first baccalaureate degree received from this University,
3. They must have been a resident of Texas, must have attempted all course work at a Texas public institution of higher education, and have been entitled to pay resident tuition at all times while pursuing the degree, and
4. They must have attempted no more than three hours in excess of the minimum number of semester credit hours required to complete the degree according to the catalog to which under they were graduated. Hours attempted include transfer credits, course credit earned exclusively by examination, courses that are dropped after the official census date, for-credit developmental courses, optional internship and cooperative education courses, and repeated courses. Courses dropped for reasons that are determined by the institution to be completely beyond the control of the student will not be counted.

5. Beginning with students admitted for the first time in fall 2005, a student must also graduate in a timely manner to earn the tuition rebate. A student who wants to qualify to receive the rebate must graduate within four calendar years for a four-year degree or within five calendar years for a five-year degree if the program is determined by the Texas Higher Education Coordinating Board to require more than four years to complete.

In order to qualify for tuition rebates, students are responsible with complying with all rules related to the administration of the program. Students are responsible for enrolling only in courses that will qualify them for the rebates. Students who have transferred from other institutions of higher education are responsible for providing the University with official transcripts from all institutions attended. Students must apply for rebates on the appropriate forms prior to receiving their baccalaureate degrees and must keep the University apprised of their addresses for a specified period following graduation.

The amount of tuition to be rebated to students under this program is based on state guidelines. If a student entitled to a rebate has an outstanding balance owed to the University or to student loans, the University will apply the amount of the rebate to the balances owed. If the amount of the rebate exceeds the amount of indebtedness, the University will pay the student the remaining amount.

For more information on this program, contact the Business Office or the Office of the University Registrar (https://www.tamucc.edu/academics/registrar/degrees-graduation/tuition-rebate.php) or visit the College for Texans (http://www.collegeforalltexans.com/) website.

Methods of Payment
The methods of payment that are accepted by the Business Office include cash, checks, credit/debit cards, installment payment plans and emergency loans. Installment payment plans and emergency loans are discussed below. For information on payment by check or credit/debit card, see the Business Office (http://businessoffice.tamucc.edu/).

An installment payment plan is available to most students under the provisions of Section 54.007 of the Texas Education Code. The University offers an option to pay by installments: a four-payment plan (25% prior to the start of the semester with three more payments during the semester of 25%). Subsequent installment payments should be made directly through S.A.I.L or to the Business Office. A nonrefundable processing fee of $20.00 will be charged and a late fee of $25.00 will be added to each installment not received by the due date.

For more information on the payment plan, contact the Business Office or the Office of the University Registrar (https://www.tamucc.edu/academics/registrar/degrees-graduation/tuition-rebate.php) or visit the College for Texans (http://www.collegeforalltexans.com/) website.

Students utilizing the installment option must execute an electronic agreement which sets forth the conditions and repayment schedule of the payment plan selected. Under the provisions of the installment payment option in the law, a student who fails to make full payment of tuition and fees, including any incidental fees, due by the due date may be prohibited from registering for classes until full payment is made. A student who fails to make payment prior to the end of the semester (last class day) may be denied credit for work done that semester.

Tuition for Excessive Undergraduate Hours
The State of Texas will not provide funds to state institutions of higher education for excess semester credit hours earned by a resident undergraduate student. Therefore, as permitted by state law, the University will charge additional tuition to students who exceed the semester credit hour limit for their programs. The additional charge per semester credit hour is based on the number of semester credit hours required for the degree program in which the student is enrolled. Thus, the student may accumulate up to 30 hours beyond those required for the chosen degree program and not exceed the limitation. The limitation on excess credit hours applies only to those undergraduate students who first enter higher education in fall 1999 or later. The semester credit hours counted toward the limitation include all hours attempted by the student except:

- Semester credit hours earned by the student before receiving a baccalaureate degree that was previously awarded to the student
- Semester credit hours earned by the student by examination or under any other procedure by which credit is earned without registering for a course for which tuition is charged
- Credit for a remedial education course, a technical course, a workforce education course funded according to contact hours, or another course that does not count toward a degree program at the institution
- Semester credit hours earned by the student at a private institution or an out-of-state institution

Form more information please visit the Excessive Hours (https://www.tamucc.edu/academics/excessive-hours/) website.

Emergency Loans
Short-term emergency loans are available to students who need assistance in covering tuition and fees and books. Funds are limited and will be provided on a first-come, first-served basis to eligible applicants.
Information on eligibility requirements and the application process can be found on the Business Office website. There is a non-refundable processing fee of $25.00 per loan. A late payment fee of $25 will be added to each loan that is not paid in full by the due date.

**Fees**
Information on current tuition and fees can be found on the Business Office website.

**Fees for Proctored Exams**
Online courses may require the use of exam-proctoring involving third party charges. Exam-proctoring charges may range from $1 - $50.00 per exam. Students may be required to schedule exams at least 24 hours in advance or incur late scheduling charges. All costs for exams are the responsibility of the student. Students may also be responsible for providing web-cams to be used in test proctoring.

**Parking Fees**
All students who park their vehicles on campus lots, including the lots at the housing complexes, must obtain a permit to park in the designated areas. The University Police Department implements and enforces the parking regulations. Information on costs of parking permits and access to the TAMUCC Parking Portal can be found on the University Police Department Parking Services website.

**Designated Tuition**
Information on current tuition and fees can be found on the Business Office website.

**Undergraduate Student Tuition**
Information on current tuition and fees can be found on the Business Office website.

**Hope and Lifetime Learning Tax Credits**
Go to the website for information about Hope and Lifetime Learning tax credits. The Business Office mails out 1098-T forms to students by January 31st for the preceding calendar year.

**Financial Assistance**
Programs to assist students and parents in financing an education at Texas A&M University-Corpus Christi are administered by the Office of Student Financial Assistance. Students may apply for financial assistance through the submission of a financial aid application.

1. be officially admitted to the University
2. be working toward a degree and classified by the Office of Admissions as degree-seeking
3. be enrolled at least half-time (6 semester hours during a long semester or 3 hours during each summer term)
4. meet the deadlines set by the Office of Student Financial Assistance
5. not be in default or owe a refund on any Title IV grant(s) or loan(s)
6. provide proof of eligibility if not a citizen of the United States
7. provide documents that support information reported on applications for financial aid
8. meet minimum G.P.A. requirements of a 2.0 cumulative for all undergraduate students and maintain satisfactory academic progress as required for financial aid eligibility to fulfill federal requirements

Financial aid programs available to undergraduates include Federal Pell Grant, Federal College Work Study, Federal Supplemental Educational Opportunity Grant, Texas Public Educational Grant (resident and nonresident), A&M-Corpus Christi Grant; TEXAS Grant; Federal Direct Loan programs, and various scholarships. Several grants, scholarships and work study opportunities are offered through the Texas Higher Education Coordinating Board. Federal Direct Loans are distributed in two disbursements in accordance with Federal regulations. If the student is receiving a loan for one term, the first check will be disbursed at the beginning of the semester and the second after the midpoint of the semester. A loan that covers both fall and spring terms will result in a disbursement at the beginning of each semester. Per federal regulations from the Department of Education all first-year, first-time borrowers will have a 30 day delay in disbursement of their direct subsidized and direct unsubsidized loans.

Most financial aid programs have a limited amount of funds, which must be granted on a first-completed, first-awarded basis. Therefore, students are strongly encouraged to have their financial aid files completed by February 15th for summer only terms, by January 15th if applying for assistance for both fall and spring, or by November 1 if applying for assistance for spring only.

Application forms and detailed instructions on applying for financial aid are available through the Office of Student Financial Assistance and at: http://osfa.tamucc.edu.

**Satisfactory Academic Progress Policy**
The Higher Education Act of 1965, as amended, mandates that institutions of higher education establish policies to monitor the academic progress of students who apply for and/or receive federal financial assistance. Texas A&M University-Corpus Christi applies its minimum standards to all federal, state, and institutional financial aid programs in order to maintain a consistent policy for all financial aid applicants. Though this policy establishes the minimum standards for all financial aid programs at A&M-Corpus Christi, an individual aid program may have unique qualitative and/or quantitative standards specific to the program as mandated by law or the program's governing entity. Examples include Texas Grant, Academic Scholarships, and Athletic Scholarships.

To be awarded or receive any financial aid, a student must be accepted to the University in good academic standing (i.e., no conditional admittance), be enrolled in credit courses leading toward a degree, teaching certificate, or other eligible certificate program and maintain satisfactory academic progress in the course of study pursued. This policy is consistently applied to all enrollment periods regardless
of whether or not the student received aid. The official Satisfactory Academic Progress (SAP) Policy can be viewed here (https://www.tamucc.edu/cost-and-aid/financial-aid/info-for-students/satisfactory-academic-progress.php).

Minimum Standards of Satisfactory Academic Progress
At the end of each academic year (spring semester), students must show satisfactory progress toward a degree or certificate based on the following elements:

1. Academic Standards
2. Maximum Frame for Degree/Certificate Completion
3. Successful Credit Hour Completion Rate

Academic Standards
Students must maintain the following cumulative grade point average to retain financial aid eligibility:

- All undergraduate students = 2.0 cumulative G.P.A.
- All graduate students = 3.0 cumulative G.P.A.

Learn how G.P.A. is calculated by clicking here (http://casa.tamucc.edu/gpa.php).

Maximum Frame (Attempted Hours) for Degree/Certificate Completion
For financial assistance purposes, students will be limited to the following number of attempted hours to complete their degree or certification program:

- Undergraduate Degree/Certification: 180 attempted hours

Attempted hours include all transfer hours and all registered hours at A&M-Corpus Christi per semester whether or not the student earns a grade, receives credit, or received financial aid. The following are considered hours attempted, but not completed/earned:

- Grades of F or NC
- I or incomplete
- W or withdrawal from courses

The following are considered hours attempted and successfully completed/earned:

- Grades of A, B, C, D, CR, and IP

Successful Credit Hour Completion Rate
Students must successfully complete/earn a minimum of 67% of all attempted semester credit hours. Note: All partial credit hours will be rounded down to the nearest hour. Examples:

1. If a student attempts (registers for) 24 credit hours in an academic year, the student must complete a minimum of 16 credit hours (24 x 67% = 16) in order to meet the requirements for satisfactory academic progress for the year.
2. If at the end of the second year, a student has attempted 60 hours, the student must have completed a minimum of 40 credit hours (60 x 67% = 40) to meet the requirements for satisfactory academic progress.

Remedial Course Work
Students may receive financial assistance for remedial course work if acceptance to a program has been confirmed, and the remedial course work is necessary to complete the program. Students cannot receive financial assistance for remedial course work if their acceptance to a program is based on the completion of the remedial work. Remedial course work is limited to 24 semester hours.

Review Policy
At the end of each spring semester, the Office of Student Financial Assistance will review the progress of each financial aid recipient to determine eligibility for aid consideration for the upcoming academic year.

Financial Assistance Suspension Policy
If it is determined that a student does not meet the minimum satisfactory academic progress requirements, the student will automatically be placed on financial assistance suspension and will be notified accordingly. Students on financial aid suspension are not eligible for any type of federal, state, or institutional aid.

Note: Students on scholastic suspension/dismissal or enforced withdrawal will also be placed on financial assistance suspension.

Conditions for Reinstatement
Students may attend the next semester/term at A&M-Corpus Christi without financial aid to reinstate eligibility. If, at the end of the semester/term, the student again meets the minimum satisfactory academic progress standards, the student may submit a written request to the Office of Student Financial Assistance to have their application for aid reinstated for the next and subsequent semesters/terms of the current academic year. Continued eligibility for the next academic year will be determined again at the end of the spring semester during the regular review process.

Appeal Policy
Students who fail to maintain satisfactory progress due to extenuating circumstances may submit an application for appeal to be reviewed by the Aid Appeals Committee. To appeal for reinstatement of financial aid eligibility, students must complete and submit the Request for Appeal form to the Office of Student Financial Assistance. A completed appeal application includes a letter and supporting documentation providing a detailed explanation of the extenuating circumstances, such as personal injury or medical problems, illness or death of an immediate family member, etc. In addition, if a student has exceeded the maximum time frame and is appealing based on a change of major, the student should state the reason for the change and indicate the number of hours remaining to be taken in the new major. Supporting documentation from the student’s academic advisor may be requested to support the appeal.

If the appeal is approved by the Aid Appeals Committee, financial aid will be continued as if the student is otherwise eligible. If denied, the student may request a second appeal to the Administrative Appeals Committee. The decision of the Administrative Appeals Committee is final.

All students (approved or denied) will be reviewed again for continued eligibility at the end of the academic year during the regular review process.

Refund and Repayment Policies
Students who register and then withdraw from their classes at the University will have their aid recalculated based on the number of days they attended class. If a student withdraws from all classes prior to the first class day, the student may be required to repay any and all financial aid received. Students should consult the Satisfactory Academic Progress Policy to determine eligibility for aid consideration for the upcoming academic year.
Progress Policy to determine if their withdrawal will affect future aid eligibility.

Scholarships
Texas A&M University-Corpus Christi offers a variety of academic scholarships for incoming freshmen, current undergraduate, and transfer students. Current undergraduate and transfer students must have a minimum GPA of 3.0 to apply (unless otherwise noted) and plan to be at least a full-time student (12 hours per semester) if awarded.

Lists of scholarships available to students can be found in the scholarship office. The deadline to apply for undergraduate university scholarships is February 15. Applications will be reviewed and rated on the basis of GPA, transcript, community involvement, essay, resume, and other criteria. More information is available at scholarships.tamucc.edu/current (https://scholarships.tamucc.edu/current.html).

The priority deadline for incoming freshmen for the next academic year is December 1. All applications received after this date will be awarded on a funds-available basis. Information on scholarships for incoming freshmen is available online at scholarships.tamucc.edu/freshmen (https://scholarships.tamucc.edu/freshmen.html).

Scholarships are open to all incoming freshman students and are not restricted by college major. Decisions will be based on academic standing, class rank, test scores, and enrollment in AP classes. A non-resident U.S. citizen or international student who is a recipient of a competitive University scholarship may be eligible for the Texas resident tuition rate. The student must have competed with other students, including Texas residents, for the scholarship. For additional information on scholarships, visit the University website for Scholarship Programs at scholarships.tamucc.edu/ (http://scholarships.tamucc.edu/).

Emergency Loans
Short-term emergency loans are available to students who need assistance in covering tuition and fees and school-related expenses such as books. Detailed information regarding eligibility requirements and the application process can be found in the Business Office.

Veterans Educational Benefits
Office of Military and Veterans Services
The mission of the Texas A&M University-Corpus Christi Office of Military and Veterans Services is to assist service members, veterans, and dependents in receiving entitled educational benefits and in achieving educational goals. The Office of Military and Veterans Services strives to assist active-duty service members and veterans with the transition from military to academic life. For more information on military educational benefits, please call (361) 825-2331 or visit our web site https://www.tamucc.edu/vets (https://www.tamucc.edu/vets/).

Enrollment Certification
Certifications for veterans' educational benefits are submitted to the Department of Veterans Affairs, Muskogee, OK. Please visit the U.S. Department of Veterans Affairs for information on eligibility requirements, applications and forms, and updates on the following benefits:

- Chapter 30 Montgomery GI Bill ® – Active-Duty Educational Assistance Program
- Chapter 1607 Reserve Educational Assistance Program (REAP)
- Chapter 33 Post 9/11 Veterans Educational Assistance Act of 2008
- Chapter 1606 Montgomery GI Bill ® Selected Reserve
- Chapter 31 Vocational Rehabilitation and Employment Program
- Chapter 32 Post-Vietnam Era Veterans’ Educational Assistance Program (VEAP)
- Chapter 35 Survivors’ and Dependents’ Educational Assistance Program

The applicant must provide a Certificate of Eligibility (COE) from the Dept. of Veterans Affairs showing the benefit has been awarded. A Request for Certification is required each term for certification and provides the VA Certifying Official with authorization to submit an enrollment certification on behalf of the student. Students must notify the Office of Military and Veterans Services of any enrollment changes, to include: added or dropped courses, withdrawals, or change of major. A degree plan from the academic advisor is required for the veteran’s file. Texas A&M University-Corpus Christi does not participate in the VA Advance Payment Program.

Hazlewood Exemption
In accordance with the Texas Education Code, Section 54.203, Texas veterans and eligible dependents must apply for benefits under the Hazlewood Act or the Hazlewood Legacy Act each term. An exemption of tuition and fees, with the exception of the student services fee, is granted per term for Hazlewood eligible students, up to 150 cumulative credit hours. Students must submit the application, an original, certified, or notarized copy of the veteran’s discharge papers (VA Form DD-214 member 4 copy), and other qualifying documentation, and a letter from the Muskogee, Oklahoma VA Regional Processing Office stating that they have exhausted federal veterans’ educational benefits. The Hazlewood file must be completed, and the exemption requested by the census date per term. The number of credit hours a student is registered for on the census date of a given term is the number of Hazlewood credit hours reported for the term to the Texas Higher Education Coordinating Board.

Training Time
For information on enrollment status requirements for students receiving financial assistance, administered through the Office of Financial Assistance, please review that section of the catalog. The criteria for enrollment status of students receiving financial assistance and training time for Department of Veterans Affairs benefits may differ. Please contact the Office of Military and Veterans Services to determine training time criteria for the various summer terms.

Academic and Student Services
The University provides a variety of academic support services that complement the academic programs and help students reach their educational goals.

New Student Orientations
Islander Launch (new student orientation) provides first-year students with information regarding academic advising and registration. Academic Advisors assist students in selecting the appropriate courses for their first semester at Texas A&M-Corpus Christi. We offer in-person and virtual opportunities to gain information, become familiar with campus resources, and learn how to register for classes in an online platform. The Islander Launch experience is offered prior to fall and spring semesters.
**Academic Advising Centers**

Texas A&M University – Corpus Christi’s six advising centers are staffed by professional, full-time academic advisors. The Islander Advising Center (IAC) is designed to serve students entering Texas A&M University – Corpus Christi from orientation through 45 earned credit hours. The IAC provides services for undeclared/undecided students as well as students in pre-admission programs. Students with 46 or more earned credit hours are advised by professional, full-time academic advisors in one of the five college advising centers. All academic advising centers provide students with information on student education plans, course selection, degree requirements, and other academic resources. To locate your academic advisor or find out more about academic advising, please visit https://www.tamucc.edu/academics/planning/academic-advising/index.php (https://www.tamucc.edu/academics/planning/academic-advising/).

**Office of Academic Testing**

The Office of Academic Testing at Texas A&M University-Corpus Christi serves the student population and the Coastal Bend community with their testing needs. For information on TExES examinations, see the “College of Education and Human Development (p. 105)” section of the catalog. Please visit http://testing.tamucc.edu/academics/testing (http://testing.tamucc.edu/academics/testing/) or call (361) 825-2334 for other services provided by this office.

**Center for Academic Student Achievement (CASA)**

The Center for Academic Student Achievement (CASA) is committed to providing academic support services to help students reach their educational goals and to succeed in the university environment. CASA programs are designed to improve the retention and graduation rates of University students. These academic support services include tutorials, Writing Center, Supplemental Instruction, mentorship, developmental education (TSI), and student retention assistance. Students are encouraged to contact the Center for Academic Student Achievement, located in the Glasscock Student Success Center (GSSC-CASA), at (361) 825-5933 or visit our website at http://casa.tamucc.edu for hours of operation, our programs’ details, and schedules of services.

**CASA Services**

The needs of students attending CASA are individually assessed and academic support services are recommended to aid students in reaching their academic goals. Services are available to all A&M-Corpus Christi students. In order to utilize academic support services such as tutoring and writing support, one must be enrolled at or an alumnus of A&M Corpus Christi.

**First Islanders Scholars’ Academy**

CASA’s First Islanders Scholars’ Academy (FISA) is a program designed to assist first-generation students through peer and professional staff mentorship. Students will belong to a group of like-minded students and find engagement in campus resources and academic success workshops. The FISA mentoring team works one-on-one with students to track their academic progress and to build a supportive mentoring relationship to aid in navigating the University, assistance in overcoming challenges or barriers to success, and networking opportunities with peers and colleagues. To join FISA, a voluntary academic and social program, please contact Martha Gutiérrez at Martha.Gutierrez@tamucc.edu or at 361.825.2893.

**CASA Peer Mentors**

The CASA Peer Mentorship Program assists first-year students in collaboration with the First Year Program. CASA peer mentors are academically successful upper-division and graduate students who are trained to help first-year students make a smooth transition while fostering habits for academic success and integration. For additional information, please call us at 361.825.5933 or email casa@tamucc.edu.

**Academic Collegiate Excellence (ACE)**

Academic Collegiate Excellence is a program designed to assist students who are currently on scholastic probation through the use of metacognitive learning strategies workshops and one-on-one meetings with Scholastic Performance Specialists. Scholastic Performance Specialists work closely with students to identify and enhance learning behaviors and strategies for academic success. In an effort to increase academic student success, the program generates an individualized academic recovery plan to assist students as they work towards good academic standing. For more information on the ACE Program, please contact us 361.825.5933 or at casa@tamucc.edu.

**Starfish**

Hosted by CASA, Starfish Early Alert and Connect is an academic early alert system for undergraduate students at Texas A&M University-Corpus Christi. The software is designed to support faculty course progress feedback for students and to help connect students with their “Success Network” comprised of faculty, advisors, mentors and other campus support units. For additional information, please contact Nicholas.Gentry@tamucc.edu or John.Fortiscue@tamucc.edu.

**Supplemental Instruction (SI)**

CASA provides Supplemental Instruction (SI) that is designed to increase student performance and retention. This program targets large entry-level courses and provides regularly scheduled out-of-class, peer facilitated sessions by a highly trained Supplemental Instructor Leaders. Schedules are available online at http://casa.tamucc.edu. For additional information, we invite you to call us at 361.825.5933 or by email http://casa.tamucc.edu.

**Texas Success Initiative Advising (TSI)**

Academic Success Coaches at CASA coordinate the Texas Success Initiative Program for TAMUCC. TSI requirements are detailed under the “Texas Success Initiative (TSI)” section of the “Admission (p. 9)” chapter. While Academic Success Coaches support all students, conditionally admitted students, and students who have not met college-readiness in one or more content areas of the TSI assessment are their primary focus. Success Coaches work with those students to enroll in the appropriate developmental education course(s) and track progress through completion of all TSI and admission requirements. For additional information, please call the Academic Success Coaches at 361.825.2977 or email casa@tamucc.edu.

**Tutorials Program**

CASA’s Tutorial Program, certified by the College Reading and Learning Association, provides tutorial services to students in most core courses facilitated by trained and faculty-recommended successful upper-division and graduate students. Disciplines include mathematics, science, statistics, business and accounting, among others. For schedules of tutorials, please visit http://casa.tamucc.edu. For additional information, please call us at 361.825.5933 or email casa@tamucc.edu.
The Writing Center
The CASA Writing Center supports the writing process of all University writers, from freshmen to graduate students, as well as to alumni, faculty, and staff. The Writing Center offers face-to-face and online writing consultations. We also provide faculty-requested writing workshops. Though the Writing Center does accept walk-in sessions based on consultant availability, it is strongly encouraged those seeking assistance schedule an appointment by visiting: http://casa.tamucc.edu.

Most sessions are 30 minutes in length for undergraduate writers. For additional information, please contact Kristen.Ruggles@tamucc.edu or call 361.825.3490.

Mary and Jeff Bell Library
For information on library resources and services, see "Mary and Jeff Bell Library" in the catalog section entitled "Campus Facilities (p. 6)."

Computing Resources
For information on computing resources, see "Campus Facilities (p. 6)" in the catalog section entitled "The University"

Student Services
Student Engagement and Success (SEAS)
Student Engagement and Success aims to foster a healthy academic climate and professional atmosphere that promotes and encourages student leadership, learning, and growth. Services and programs are designed to meet the needs of students with varied backgrounds and interests. Music, arts, special events, and multicultural programs contribute to a positive experience on campus and promote an understanding of a diverse and changing global community.

Student Engagement and Success is made up of various departments, including Islander Housing, University Center, Student Activities, Recreational Sports, Dean of Students Office, Disability Services, Multicultural Programs & Services, University Counseling Center, and University Health Center. The Division collaborates with all departments on campus to assist students in the attainment of their personal and academic goals.

A major strength of A&M-Corpus Christi is that students participate in a variety of out-of-class activities. Activities begin with Launch and include a variety of campus organizations and sports clubs that provide a wide range of leadership experiences. Student services are designed to help students attain their desired degrees, learn healthy lifestyles, and attain employment or admission into graduate school. For additional information, see the Student Engagement and Success (https://www.tamucc.edu/sea/) website. The Office of Student Engagement and Success is located in the University Center, Suite 318, (361) 825-2612.

Career and Professional Development Center
The Career and Professional Development Center staff help students explore, select, prepare for, and actively pursue satisfying employment and careers. The following services are available:

- Career counseling, computer-assisted assessment, and vocational guidance, which help students explore career options beginning in their first semester. Students may meet with a Career Counselor to explore interests and values, with a view toward choosing a career. For students who are experiencing difficulty choosing a major, this can be a useful process of self-exploration.
- Job search and graduate school advisement.
- Student employment services: assistance in finding on- and off-campus employment.
- Internship and co-op placement assistance for students at all levels.
- On-line job listings via Handshake (Hire an Islander).
- Resume and professional document review.
- Interview skill practice with mock interviews.
- On-campus recruiting and Job Fairs throughout the year targeted at different majors.
- Career seminars, workshops, and Business Etiquette Dinner.
- Izzy’s Career Closet.

The Career Center is located on the third floor of the University Center in Suite 304 (UC 304). For information, call (361) 825-2628 or visit the website at https://www.tamucc.edu/institutional-advancement/career-center/.

Chancellor’s Student Advisory Council (CSAC)
The purpose of the Chancellor’s Student Advisory Council of the Texas A&M University System is to provide representation for the students to the Chancellor and Texas A&M University System leadership, and to educate and stimulate student involvement in Student Engagement and Success. It is made up of two students from each system institution. Thus, the Chancellor’s Student Advisory Council is the official student voice to the system leadership.

Islander Housing
On-campus housing is available through two communities. Miramar on the Island, offers both residence hall and apartment room styles. Momentum Village located at the Momentum Campus, offers apartments and townhomes. Living on campus will provide many rewarding experiences to supplement your academic studies. Plus, we make it easy to use your financial aid to pay for housing. Most importantly, studies have shown that students who reside on campus are more likely to graduate on time and with higher GPAs. For more information, please visit our website at housing.tamucc.edu (https://www.tamucc.edu/housing/).

Transportation Services
All students and employees ride the Corpus Christi Regional Transportation Authority (RTA) buses free of charge by showing their Sanddollar ID card. Plan a trip anywhere RTA services through Google Maps by selecting the ‘public transit’ method of transportation (train icon). For bus route information, go to https://www.ccrta.org/ or call 361.289.2600. For paratransit transportation services, please call 361.289.5881 or go to https://www.ccrta.org/ and select Paratransit from the Rider menu. If you have questions or concerns regarding this service, you may contact the RTA at the number above or call the Office of Student Engagement and Success at 361.825.2612.

Student Conduct
Student Conduct & Community Standards officers strive to protect the University’s educational community and to maintain social discipline through the administration of the Student Code of Conduct. Inappropriate
behavior will be investigated and adjudicated in a manner consistent with the institution’s educational and community development goals. Students may view a copy of the Student Code of Conduct here (https://www.tamucc.edu/conduct-advocacy/conduct/codeofconduct.php).

**Student Government Association (SGA)**

Established in 1994, the Student Government Association is a student-run, campus wide organization that provides students with a voice in the decision-making process of the University. SGA members are the link between students and the administration of TAMU-CC. SGA strives to improve communication, enhance leadership abilities, hone critical thinking skills, and successfully build relationships with staff, faculty and peers.

The Student Government Association (SGA) is composed of the Executive Branch, Legislative Branch, and the Judicial Branch. The SGA President, Vice President, and Senators are elected in the spring semester for a term of one year. Elections for freshman senators are held in September. The Judicial Branch is appointed by the SGA President and approved by the Student Senate. For more information, call (361) 825-5745, or visit us on the website at: https://www.tamucc.edu/sga/

**Recreational Sports**

The Recreational Sports program provides facilities, equipment, and opportunities for participation in a wide variety of sports and recreational activities for the University community. These activities are designed to accommodate all individuals and activities ranging from beginner to expert and sport activities ranging from highly competitive and structured to informal and social. Program areas of interest include intramural sports, fitness and wellness, informal (open play) recreation, sport clubs, aquatics, outdoor adventure, and special events.

The Dr. Jack and Susie Dugan Wellness Center (DWC) includes a gymnasium, free weights, weight machines, cardiovascular exercise equipment (treadmills, elliptical trainers, steppers and bikes), multi-purpose group exercise rooms, and offices for the Recreational Sports Department and Intercollegiate Athletics Department. A 25-yard outdoor season pool is located adjacent to DWC. Multi-purpose playing fields and tennis courts are located at Momentum Campus and available for use.

As the largest student employer on campus, each semester Recreational Sports employs students to work as intramural supervisors and officials, lifeguards, facility assistants and supervisors, group exercise instructors, and personal trainers. Work study and non-work study positions are available. No experience is necessary. Training for all positions is conducted by the Recreational Sports Department. The Recreational Sports Department Office is in the Dugan Wellness Center Room 107. For more information, call (361) 825-2454 or go to recsports.tamucc.edu (https://www.tamucc.edu/rec-sports/).

**Student Activities**

Dedicated to cultivating students of character through inclusive programming, Student Activities promotes leadership development, campus and community engagement and responsible citizenship that compliments the academic experience and instills Islander pride.

Located in the Student Involvement Center on the 2nd floor of the UC, Student Activities is the place to get involved, with something for everyone! Interested in joining a student organization, Fraternity and Sorority Life, attending a leadership conference, attending an event, participating in a talent show, or serving your community? Stop by and learn about our programs and events or visit https://www.tamucc.edu/student-activities/

**Anchor Camp: The Freshman Camp Experience**

Anchor Camp provides incoming first-year students with an optional summer camp experience designed to aid in their successful transition to Texas A&M University-Corpus Christi. Student leaders serve as camp counselors who facilitate activities, discussions, games, and presentations. During Anchor Camp, first-year students develop friendships with current students and university staff, learn about the benefits and opportunities for leadership involvement, understand the values of diversity, learn more about themselves, and of the pride in the growing traditions, spirit, and rich heritage of A&M-CCPISTI. Through Anchor Camp, our hope is that students will begin to find their “anchor” and feel more at home on the Island before classes begin. For more information call (361) 825-2707 or visit anchorcamp.tamucc.edu (https://www.tamucc.edu/student-activities/anchor-camp/)

**Campus Activities Board (CAB)**

The Campus Activities Board (CAB) is a student led organization focused on providing programs and opportunities for students. You can catch a movie on the East Lawn, attend a concert, check out a comedy or talent show and much more! CAB members are dedicated to creating a safe and fun environment for our community to enjoy entertaining events and activities through extensive planning and organization. Additionally, CAB is devoted to providing opportunities for students to learn and develop leadership and social skills through meetings, retreats, socials and other activities. For information and upcoming events call (361) 825-2707 or search for CAB on I-Engage (http://iengage.tamucc.edu/).

**Leadership @ TAMU-CC**

Leadership @ TAMU-CC offers students the opportunity to improve leadership skills to become more marketable and global leaders. Centered on the belief that leadership is an important part of being the best version of yourself, the program works on developing awareness and personal leadership that can benefit any student regardless of positions held. Leadership @ TAMU-CC offers a variety of programs including Leadership Hour, Islander Leadership Conference, Weekend Leadership, Workshop To-Go and Sigma Alpha Pi, the National Society for Leadership and Success (NSLS) Honor Society. For more information call (361) 825-2707 or visit Leadership (http://iengage.tamucc.edu/) and search for Leadership.

**Fraternity & Sorority Life (FSL)**

Fraternities and sororities are value-driven student organizations based on brother/sisterhood, leadership, service and academic success. The FSL community strives to enhance the college experience and compliment the mission of the university through engagement, service, scholarship, diversity and leadership. In addition, the community strives to maintain a respectful and unified environment where members and their organizations can positively develop into responsible global citizens.

For more information call (361) 825-2707 or visit the Fraternity & Sorority Life (https://www.tamucc.edu/student-activities/fsl/) website.

**Student Volunteer Connection (SVC)**

The Student Volunteer Connection is a student organization that aims to get TAMU-CC students actively involved and committed to community service and service-learning. SVC makes community service opportunities more accessible to students by connecting students to off campus opportunities through the GivePulse platform and offering a variety of volunteer programs and events such as Islander
Clean, National Hunger & Homelessness Awareness Week, and Green Week. The Big Event is a one big day of service in which the campus community comes together to express their gratitude and do service for the surrounding Corpus Christi Community. Additionally, SVC coordinates the Alternative Breaks program providing opportunities for students to engage in hands-on service and experiential learning through travel outside of the Corpus Christi community. SVC is a certifying organization for students interested in earning the President’s Volunteer Service Award. For more information call (361) 825-2707, visit svc.tamucc.edu (https://www.tamucc.edu/student-activities/svc/) or find events on I-Engage. To explore opportunities click on the Service tab (https://tamucc.campuslabs.com/engage/service-opportunities/) in I-Engage.

University Council of Student Organizations (UCSO)

The University Council of Student Organizations (UCSO) provides oversight, training and funding for the approximately 100 student groups that exist on campus. There are many types of organizations, including: academic, honor societies, special interest, political, faith-based, cultural, professional, and other interest groups. A current list of recognized student organizations is available at iengage.tamucc.edu. For more information call (361) 825-3239 or visit the UCSO page. (https://www.tamucc.edu/student-activities/organizations/)

Waves of Welcome (WOW)

Waves of Welcome (WOW) is designed to help students make the Island University feel like home by connecting to other students and student leaders, providing directions and information, and building campus spirit. By attending info sessions, special events, student organization and community fairs, and other activities, students can learn more about the many student organizations, and campus and community resources available to help them succeed and get the most out of their college experience. The Waves of Welcome schedule is distributed at the beginning of the fall semester. For more information call (361) 825-2707 or visit http://wow.tamucc.edu.

University Center

The University Center serves as the living room of the university, home to the Bookstore and Cove Dining, provides dining and lounge seating areas, Breakers game room with video games and billiards, and large flat-screen TV’s for the campus community to enjoy. The UC hosts thousands of events and meetings every year for students. Activities and events include UCP Radio, Patio Jam, Late Night Breakfast, Study Center and other social and fun activities. A number of small to large meeting and event spaces are available for reservations. The UC is also one of the largest student employers on campus. For more information, call 825-5202, or visit our website at universitycenter.tamucc.edu (https://www.tamucc.edu/university-center/).

Izzy’s Food Pantry

Izzy’s Food Pantry strives to provide food assistance for currently enrolled Texas A&M-Corpus Christi students in need. Providing students with a convenient site to obtain food assistance when needed, helps ensure that students with food insecurity can meet their nutritional needs and minimize adverse impacts on their academic progress and success. The Food Pantry operates in partnership with the Coastal Bend Food Bank and is supported by individual donations and grants.

Izzy’s Food Pantry also provides temporary assistance in obtaining meals through Izzy’s Swipes, a short-term assistance program that allocates meals to students in need. For more information call (361) 825-FOOD (3663) or visit foodpantry.tamucc.edu (http://seas.tamucc.edu/FoodPantry/).

Multicultural Programs and Services

The Multicultural Student Center (MSC) is a space that celebrates the many cultures and identities that make up our Islander community. The MSC provides programs that enrich the Islander experience through cultural events, provides opportunities to explore your heritage and cultural origins, and to engage in meaningful cross-cultural interactions and discussion. The MSC also provides dedicated resources and support for our Islander students of color and other historically marginalized communities. Programs include: Islander Cultural Alliance (ICA), Men of Color initiatives, multicultural student organizations, multicultural fraternities & sororities, and multicultural student programming, etc. For more information visit https://www.tamucc.edu/student-life/diversity/index.php (https://www.tamucc.edu/student-life/diversity/) or call 361.825.3925.

Disability Services (DS)

Texas A&M University-Corpus Christi is committed to promoting equal opportunities for students with disabilities to access campus facilities, resources, and programs. Support services and reasonable academic adjustments are arranged for students with permanent or temporary disabilities through the Disability Services (DS) Office. The DS Office is in Corpus Christi Hall 116.

Students with permanent or temporary disabilities who qualify for support under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act of 1990 must self-identify and register with the Office of Disability Services. To qualify for services students must

1. be admitted to the University
2. present appropriate and current documentation of their disability from a qualified professional and
3. register with the Office of Disability Services each semester.

Advance planning by the student with the Office of Disability Services is necessary to ensure adequate time to arrange for appropriate accommodations. It is recommended that requests for services and/or academic adjustments be made as soon as possible. Requests for services requiring extensive preparation (e.g., interpreter services, adaptive and assistive equipment, textbooks in alternate format, etc.) may need up to 30 days to process. For additional information please call (361) 825-5816 or visit the Office of Disability Services website at http://disabilityservices.tamucc.edu.

University Counseling Center (UCC)

The University Counseling Center helps students resolve problems that can interfere with meeting the demands of college life and offers a variety of services for students who want to develop skills and resources to be personally and academically successful. UCC services are funded through the Student Services fee and are available to all currently enrolled TAMUCC students at no additional charge. Counseling Center records are kept strictly confidential and are not released without the student’s written permission except under certain legal conditions.

Services include brief individual counseling, academic skills counseling, psycho-educational workshops, limited psychiatry services, alcohol and other drug treatment and education, and consultation. The Counseling Center also offers a Relaxation Room which is a quiet, peaceful space for
students to develop and practice relaxation skills that can enhance their academic productivity and their sense of well-being.

Students who are interested in counseling services, can call or visit the Counseling Center during walk-in hours for a brief consultation/assessment with the Counselor on Duty (COD). The role of the COD is to assist students to connect with the most appropriate services and resources. Common concerns addressed in counseling include stress, anxiety, depression, relationship issues, substance use, and identity issues. The Counseling Center is in the Driftwood Building. Walk in hours are Monday-Friday, 9:00am-11:30am and 1:00-4:00pm. Call (361) 825-2703 or visit the website http://counseling.tamucc.edu for more information. If a student is in crisis and needs to speak to a counselor outside of regular business hours, the after-hours crisis line, (361)825-2703, is available.

University Health Center
The University Health Center, located in Sandpiper Hall, assists students in maintaining optimal health while attending A&M-Corpus Christi. Primary emphasis is on preventive health practices, health education, and the promotion of wellness. Primary health care is provided by registered nurses, family nurse practitioners, and a physician for the care of acute illnesses and minor injuries. Chronic health care needs are referred to local community providers and/or the student’s primary care provider. The University Health Center provides a variety of health services such as:

- “Ask-A-Nurse-Line” at 361-825-2601
- Women’s Health Clinic - Gynecological services
- Men’s Health Clinic
- Administration of allergy shots - Student provides serum from allergist.
- Laboratory testing
- Preventive health care and medical resource information - Referrals for community resources
- Blood pressure screening and monitoring
- Contraception, sexually transmitted diseases (STD), HIV testing, and counseling
- Physicals, vision, and hearing screening
- Substance abuse prevention, assessment, and referral
- Immunizations and tuberculin skin testing
- Educational consultations: nutrition, lifestyle, weight management, smoking cessation, and substance abuse
- Insurance and claim assistance.

Health Insurance
In collaboration with the Texas A&M University System, a private insurance plan is available at special rates to students attending A&M-Corpus Christi. All non-insured students are strongly encouraged to consider the benefits of enrolling in a health insurance program. Information brochures regarding this health plan are available in the University Health Center or at https://tamucc.myahpcare.com (https://tamucc.myahpcare.com/).

Islanders Teaching, Engaging, And Motivating (I-TEAM)
I-TEAM student leaders are dedicated to helping Islanders stay informed about substance use and all dimensions of wellness. I-TEAM’s trained peer educators want each Islander to succeed, this means practicing healthy behaviors and making wise choices. Through exciting events like Party House, Bond-Fire, late night alternative programming, and many more, I-TEAM teaches facts about substance use, models healthy behaviors, and helps Islanders learn to unwind and party safely! Find out more and get in touch at I-TEAM’s i-Engage page (https://tamucc.campuslabs.com/engage/organization/i-team/) or call 361.825.4284.

Campus Security Report
Click here (https://police.tamucc.edu/cleryact/campusSecurityAct.html) to view the university crime log.

Intercollegiate Athletics
Texas A&M University-Corpus Christi Athletics has grown into a respected NCAA Division I program offering 16 men’s and women’s sports dedicated to achieving competitive success, providing an exceptional academic and athletic experience for student-athletes, and prioritizing community service and engagement. Men’s sports include basketball, baseball, tennis, cross country, and indoor and outdoor track and field. Women’s sports include basketball, tennis, golf, softball, volleyball, beach volleyball, soccer, cross country, and indoor and outdoor track and field. Athletics teams at A&M-Corpus Christi are known as the “Islanders,” and the official school colors are blue, green, and silver.

Texas A&M University-Corpus Christi Athletics’ mission is to bring distinction to the university by winning conference championships and competing successfully on the national stage, contribute to a vibrant campus culture, and develop successful student-athlete graduates who will excel as leaders in their communities.

Having recently completed our 22nd year of intercollegiate athletic competition and with a renewed commitment to success by university leadership, TAMU-CC has positioned itself as a leader among the institutions of the highly competitive Division I Southland Conference. Each year, the Southland Conference tournament champion in each sport receives an automatic bid to the NCAA Division I Championship tournament.

For more information on Islanders Athletics and to join the excitement, please call 361-825-3415 or visit www.goislanders.com (http://www.goislanders.com).

Office of International Education (OIE)
The Office of International Education (OIE) provides services and programs to TAMU-CC international students, scholars, faculty, staff, and help departments and schools/colleges hire international students, scholars, and faculty. OIE offers a variety of services and programs, including:

Immigration Advising and Services
- Provide immigration advising and services that ensure students, scholars, and institutional compliance with federal rules and regulations and guides them through all the requirements for foreign nationals studying and working in the U.S., such as enrollment requirements, travel, status extension, OPT, CPT, dependent employment authorization, change of status, reinstatement, maintaining status, academic training, RCL, transfer, to name a few.

Click
Support programs
Host intercultural and social events and activities that welcome and help international students and scholars transition and adjust to life in the United States and Texas A&M University-Corpus Christi. These include the international student and scholar orientation, workshops, International Education Week, Parade of Nations, field trips, photo contests, coffee/tea hours, mixers, fashion shows, Eyes on the World, open house, as well as many others.

For more information, contact the Office of International Education at (361)-825-3346 or Email at international@tamucc.edu; visit the office in UC 226, or visit the website at http://oie.tamucc.edu/.

Study Abroad Services
The Office of International Education (OIE) is committed to providing access to international education opportunities for all students and dedicated to creating an inclusive community and establishing collaborative relationships across cultures. OIE promotes international learning environments that embrace diversity through the following study abroad programs:

Faculty-led Programs
These programs are credit-bearing, international study-travel courses. They are led by one or more University professors and usually last between one to 15 weeks. Students travel as a group to one or more international locations, where there is a mix of lectures, exercises, assignments, excursions, cultural encounters, and free time. There are certain programs that are open only to students in a particular college, while others are open to all A&M System students.

Reciprocal Exchange Programs
A reciprocal exchange involves an agreement between two universities to exchange students. Tuition and fees are paid at the home university while studying at the host university. When a student participates in a reciprocal exchange, the student remains enrolled at the home university, allowing students to receive credit. Proficiency in the language of the host country is required; however, some programs are available in English-speaking countries.

Independent Programs
Students have the option to apply directly to an international university, to an institute or organization, or to a sponsoring U.S. University. Graduate students may conduct research abroad coordinated by a TAMU-CC faculty member.

Third-Party Study Abroad Programs
Students can study abroad through the third-party study abroad providers. These providers work together with the OIE to take care of the whole study abroad process from the beginning of the application to transferring the credits back to the home institution. Most of the study abroad providers have onsite staff to advise and support students.

Funding for Study Abroad Programs
Students who receive federal financial aid for on-campus study may use their aid for study abroad. Financial Aid counselors work with each individual student to assess their eligibility and give students accurate information. The University also offers the International Education Scholarship to all students meeting the general requirements. There are prestigious national grants and scholarships specifically for study abroad, including Boren Awards for International Study, Benjamin A. Gilman International Scholarship, Gilman International Scholarship, and Fulbright Scholarship.

For more information and applications for Study Abroad programs, please visit the OIE website (http://oie.tamucc.edu/) or email international@tamucc.edu or study.abroad@tamucc.edu or call (361)-825-3346.

The International Pathway Program for Undergraduate Students
The International Pathway Program welcomes and supports international students by helping them to gain the academic English skills, cultural knowledge, and foundation to succeed at TAMU-CC. International Year (IY), our undergraduate Pathways program, prepares students for the university’s core curriculum and pursuit of a bachelor’s degree in their chosen major. The program’s English for Academic Purposes (EAP) courses focus on academic writing, reading, speaking and listening skills, as well as knowledge of US Culture, critical thinking skills, and an understanding of US university norms.

Matriculation Requirements
The undergraduate Pathways program is comprised of four possible levels, each one semester in length. A student’s placement is determined by their score on IELTS, TOEFL, or other accepted test of English language proficiency. IY students must pass all EAP courses with a minimum grade of ‘C’, earn a cumulative TAMU-CC GPA of 2.0 and maintain attendance in the program at a level above 80% to progress to full degree-seeking status at Texas A&M University-Corpus Christi.

Student Learning Outcomes:
At the end of the program, students will be able to:

- Demonstrate an understanding of writing as a process involving invention, research, sources analysis and evaluation, revision, and publication (spoken, written, and/or multimodal).
- Produce texts for various audiences and purposes using the appropriate vocabulary, grammatical conventions, and design/structure for the chosen genre.
- Comprehend, analyze, and evaluate texts from a variety of academic, professional, and consumer genres.
- Create and deliver presentations designed for various audiences containing research-based evidence that supports unique purposes.
- Develop familiarity with available campus resources, student organizations, and soft skills pursuant to success with university navigation and student life.
- Adapt to teaching practices common at TAMU-CC, such as active reading and listening skills, student-centered teaching styles, group work, discussions, and integrative learning.
in English. This course is aimed at students planning to study, or are already studying, at university level in English.

In this course, students will learn and apply the writing skills essential for academic success including sentence, paragraph, and basic essay writing. This course is aimed at students planning to study, or are already studying, at university level in English.

1-Semester Program:
13-14 credit-bearing hours and the following non credit-bearing hours:
PATH 0036 US Culture
PATH 0005 Recitation I

Course Descriptions:

PATH 0001 Grammar I
0 Semester Credit Hours (2 Lecture Hours)
Grammatical structures that enable students to better comprehend and use academic English are the focus of the course. Students will learn to appreciate the relevance of acquiring and applying grammatical knowledge to express themselves confidently and appropriately in different academic situations, as well as social situations relevant to the American college context.

PATH 0002 Listening and Speaking I
0 Semester Credit Hours
This course provides short and focused activities to help students improve their English listening and speaking skills. It includes practice in both mastering the larger message and key words, phrases and specific sounds to assist students in developing better speaking and comprehension skills. Students will practice giving academic presentations as well as practice speaking in small groups and individually.

PATH 0003 Reading I
0 Semester Credit Hours
In this course, students will develop the reading skills essential for academic learning and inquiry in the context of authentic academic reading tasks. Students will work to build fluency, comprehension, and vocabulary skills through extensive and intensive reading tasks of increasing complexity. Contemporary academic and literary texts will be used to develop students' critical reading and vocabulary, writing, listening, and speaking skills.

PATH 0004 Writing I
0 Semester Credit Hours
In this course, students will learn and apply the writing skills essential for academic success including sentence, paragraph, and basic essay writing. This course is aimed at students planning to study, or are already studying, at university level in English.

PATH 0005 Recitation I
1 Semester Credit Hour
This course provides students with a structured, scheduled academic environment providing the opportunity to complete assignments and work closely with their language instructor. Instructors utilize materials from student courses to facilitate activities and discussions that will increase comprehension of academic material and further students' abilities to work independently in academic settings. Each week, the course will focus on the language skills and vocabulary needed for the students' courses. Additionally, there will be a focus on study skills and time management needed for success in academic settings. Students will leave the course better equipped for university level academic course work and a thorough understanding of time management and appropriate study habits for the university.

PATH 0011 Grammar II
2 Semester Credit Hours
This course will focus on high-intermediate grammatical structures that enable students to better comprehend and use academic English. Students will learn to appreciate the relevance of acquiring and applying grammatical knowledge to express themselves confidently and appropriately in different academic situations, as well as social situations relevant to the American college context.

PATH 0012 Listening and Speaking II
2 Semester Credit Hours
In this course, students will learn and apply the listening, note-taking, and presentation skills essential for academic learning, inquiry, and communication in the context of authentic academic listening and speaking tasks. Students will work to build fluency, comprehension, and vocabulary skills through extensive and intensive listening tasks of increasing complexity. Contemporary academic lectures and seminars will be used to develop students’ critical thinking skills.

PATH 0013 Reading II
2 Semester Credit Hours
In this course, students will study texts across several different academic disciplines in order to deepen their understanding of the rhetorical styles and conventions used and applied within the English language. Students will practice identifying audience, purpose, theme, main ideas, and details within several different genres of writing. Students will also develop a variety of strategies to improve their reading comprehension and efficiency, including annotation, vocabulary-building, and discussions regarding written materials.

PATH 0014 Writing II
2 Semester Credit Hours
In this course, students will develop a foundation in the writing skills critical to academic success. Students will apply knowledge of audience, purpose, voice, arrangement, and style in varied writing tasks by writing across several different genres. Genres practiced in this course may include, but are not limited to: emails, newsletters, personal narratives, fiction, academic essays, and magazine/news articles. Students will learn grammar and vocabulary conventions as they apply to different genres and apply these skills in writing tasks of increasing complexity throughout the semester.
The Office of Research Engagement (ORE) works to develop and support a community of practice within Texas A&M University-Corpus Christi that’s focused on being impactful by leaving a legacy in the community. We know that can happen through research, teaching, service and beyond and want to support and empower people to do that. For more information, see https://www.tamucc.edu/research/research-engagement/.

Undergraduate Programs

This section focuses on the general requirements for the baccalaureate degree and on academic policies and regulations that apply specifically to undergraduate students. For information on core curriculum requirements, see “Core Curriculum Program (http://catalog.tamucc.edu/undergraduate/university-college/programs/core-curriculum-program/)” in the catalog. For information on the Texas Success Initiative, see “Admission (p. 9).” For information on specific majors and on college baccalaureate requirements, please refer to the chapters on specific colleges.

Bachelor’s Degrees

The University offers the following undergraduate degrees: Bachelor of Applied Arts and Sciences, Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science, Bachelor of Music, Bachelor of Business Administration, Bachelor of Science in Health Sciences, and Bachelor of Science in Nursing.

Degree Requirements

University Minimum Requirements

General University requirements for baccalaureate degrees are:

Total Hours

A minimum of 120 semester hours of credit must be completed successfully. Students must satisfactorily complete all degree requirements specified by the academic college in which the degree is offered. Some academic programs require more hours and a longer length of time for degree completion. Please see each academic college section for specific information on program hours and length.

Upper-division Hours

A minimum of 45 semester hours of upper-division credit (courses numbered in the 3000 and 4000 series) is required.

Grade Point Average

A minimum grade point average of 2.0 (C) on a 4 point scale in all work taken and a minimum grade point average of 2.0 in the major field of study at the University are required. Specific academic programs may require a higher grade point average in the major.
Residence Requirement
A minimum of 30 hours of upper-division course work required for graduation must be successfully completed in residence at Texas A&M University-Corpus Christi to obtain a baccalaureate degree. A minimum of 12 hours of these 30 hours must be in the major. Hours earned through credit by examination may not be used to fulfill the residence requirement. Hours earned through credit by examination at another institution will likewise not affect the residence requirement calculation.

General Education Requirement
To fulfill the general education requirement, a student must successfully complete the University core curriculum (or the equivalent as described below) and meet the foreign language requirements. In addition, all students who enter the University as full-time, first-year students must complete the First-Year Seminar requirement.

Core Curriculum Program
The 42-hour Core Curriculum Program, described in the “Core Curriculum Program (http://catalog.tamucc.edu/undergraduate/university-college-programs/core-curriculum-program/)” section, includes courses that satisfy the state statutory requirements for core curricula and the state statutory requirements in history and in government or political science. (To receive a bachelor’s degree, a student must have successfully completed 6 semester hours in government or political science, including consideration of the U.S. Constitution and state constitutions, with special emphasis on that of Texas. Additionally, the student must have credit for 6 semester hours in American history, of which up to 3 hours may be in Texas history.) Undergraduate transfer students have several means of fulfilling the core curriculum requirement.

1. A student may satisfy specific core curriculum requirements by taking the approved core curriculum transfer courses that are listed in Appendix B (p. 758). Courses equivalent to A&M-Corpus Christi’s Core Curriculum Program courses are identified by their common course numbers.

2. If a student successfully completes a core curriculum of 42 or more semester credit hours at another regionally accredited public institution of higher education in Texas, and that core curriculum meets the specified “Foundational Component Area” requirements below, that block of courses may be transferred to the University and satisfy the core curriculum here. The student will not be required to take any additional core curriculum courses at this institution. The State of Texas has specified the following Foundational Component Area requirements:
   - 6 Credit Hours Communication
   - 3 Credit Hours Mathematics
   - 6 Credit Hours Life and Physical Sciences
   - 3 Credit Hours Language, Philosophy, and Culture
   - 3 Credit Hours Creative Arts
   - 6 Credit Hours American History
   - 6 Credit Hours Political Science
   - 3 Credit Hours Social and Behavioral Science
   - 6 Credit Hours Component Area Option

3. If a student transfers from another regionally accredited public institution in Texas without having completed a 42 or more semester credit hour core curriculum, A&M-Corpus Christi will accept approved core curriculum courses from the transferring schools’ core curricula as fulfillment of the equivalent requirement here.

4. A student who transfers from a regionally accredited private or out-of-state institution will receive academic credit for each of the acceptable courses that the student has successfully completed in the core curriculum of the sending institution as long as these courses meet the state of Texas criteria for core curricula. Following receipt of credit for these courses, the Office of Admissions will determine the equivalency of those courses to the courses in A&M-Corpus Christi’s core curriculum. Core curricula completed at regionally accredited private or out-of-state institutions will be evaluated on a case by case basis.

For further clarification see “Transfer Credit Policies” in the “General Academic Policies and Regulations (p. 17)” section of the catalog.

First-Year Seminar Requirement
All students who enter the University as full-time first-year students are required to register for First-Year Seminar, UNIV 1101 University Seminar I (1 sch) and UNIV 1102 University Seminar II (1 sch), as part of a learning community during their first two semesters. (See the “First-Year Learning Communities Program” section of the catalog.) Those who fail to complete this requirement during the first year will be required to fulfill the requirement prior to graduation.

Foreign Language Requirement
At least two high school credits in one foreign language or American Sign Language OR two semesters of study with passing grades in a single foreign language or American Sign Language at the college level are required for graduation from TAMU-CC. This requirement may be met by earning a CLEP, AP, or ACTFL score equivalent to one year of college-level foreign language study. If students decide to meet this requirement by taking two semesters at the University, an assessment test must be taken prior to registering in order to be placed in the appropriate language course. Information regarding the assessment tests and the foreign language courses that satisfy the university Foreign Language Requirement can be obtained from the College of Liberal Arts “Baccalaureate Degree Requirements (p. 212)” section of the university undergraduate catalog.

Spanish Placement Test
If students decide to meet this requirement by taking two semesters in Spanish at this university, they must take the Spanish Placement test prior to registering in order to enroll in the appropriate language course. The test will be used to determine whether the student should register for Spanish 1311, 1312, 2311, 2313 or any upper Spanish division classes. This test does not give you university credits, nor does it provide a waiver for the requirement. The test is free of charge to registered TAMU-CC students and can be taken from any computer with network access to Blackboard. After taking the test, students will be contacted via Blackboard, My Grades. Soon after taking and submitting the test, students will be contacted with information about the most appropriate class for them based on their test results.

Students who score 1-40 will be automatically placed in SPAN 1311. Those who score 41-60 will be automatically placed in SPAN 1312. Finally, students with scores 61 and above will be evaluated by Spanish faculty, who will contact students with further information about appropriate course placement and registration.

Further information about the Spanish Placement Test can be obtained from the Spanish Program (https://www.tamucc.edu/liberal-arts/departments/humanities/spanish/) in the College of Liberal Arts or by visiting its web site under Spanish Placement Test (https://
International students may also complete the Foreign Language requirement the following ways:

- International students who have successfully passed the Test of English as a Foreign Language (TOEFL) with a score of 550 or higher, scored a 6.5 or higher on the International English Language Testing System (IELTS), or have successfully completed the English as a Second Language International (ESLI) course of study may elect to choose English as their second language to meet the above requirement.
- International and naturalized students who have provided proof of completion of high school in a foreign language (their native language) and who have successfully completed the Communication core component requirements of the University Core Curriculum Program may choose English as their second language. English is considered to be the first language for all other students.
- International and naturalized students who have provided proof of completion of the International Pathway Program and who have successfully completed the Communication core component requirements of the University Core Curriculum Program may choose English as their second language. English is considered to be the first language for all other students.

I-Know Program

The goal of the I-Know digital information literacy program is to prepare students to find, evaluate, create, and communicate knowledge using digital technologies so that they can successfully and responsibly navigate the increasingly complex modern information landscape as global citizens. The I-Know program is designed to scaffold digital information literacy concepts and values throughout the academic careers of every undergraduate students at TAMU-CC. The program is implemented within existing courses, starting with the First-Year Seminar course, progressing to a designated pre-requisite course within each major, and culminating in a designated capstone or research course within each major. Each step of the program will build upon itself working through three levels of learning objectives:

1. Identify and pursue effective digital approaches for accessing information (such as keyword searching and citation following) as well as assess the quantity, quality, and relevance of search results. (First-Year Seminar)
2. Evaluate a source's credibility and suitability in the context of their information needs. (designated pre-requisite courses)
3. Create effective research questions based on curiosity and gaps in the information or data available. (designated capstone/research courses)
4. Use appropriate technology (such as shared documents and digital presentation software) for creating knowledge, collaborating with peers, and contributing to scholarly conversations. (designated capstone/research courses)

College Degree Requirements

In addition to the University requirements, a student must meet the specific requirements as determined by the college in which the degree will be awarded. Such requirements are outlined in the college sections of the catalog.

Second Bachelor’s Degree

Students wishing to earn a second bachelor’s degree from Texas A&M University–Corpus Christi must complete a minimum of 144 semester hours of credit, or 24 hours more than those counted toward the bachelor’s degree that requires the higher number of credit hours. All university, college, and major requirements must be met for each degree (see the information on degree requirements in this chapter and in the sections for the relevant college and major). Students must complete all degree requirements under a particular catalog (see “Graduation Under a Particular Catalog” in the “Academic Policies” (p. 17) section of the catalog).

As for any student intending to have a degree conferred, students seeking multiple degrees who plan to participate in a graduation exercise and/or receive a diploma must notify the Office of the University Registrar by the deadline date indicated in the Class Schedule for the semester in which they plan to have the degree or degrees awarded.

For students who have already completed a first bachelor’s degree at an accredited college or university, with the approval of the Provost’s Office, the core curriculum requirements for that degree may be accepted in lieu of the Texas A&M-Corpus Christi core curriculum. However, requirements associated with particular degrees, e.g., completion of the modern language requirement for a Bachelor of Arts degree, or Legislative requirements, e.g., history and government course requirements, must be included in an approved program for a second bachelor’s degree.

A student receiving a subsequent bachelor’s (post baccalaureate) degree must complete 30 hours in residence above and beyond the minimum number of hours required to receive the first bachelor’s degree.

Academic Major

A minimum of 24 semester hours in a defined course of study must be completed for a major. Specific majors may require completion of additional hours. See the college sections of the catalog for the specific requirements of particular majors.

Double Major

Colleges may provide the opportunity for a student to earn a double major while working toward his or her first undergraduate degree. Both majors must lead to the same baccalaureate degree (e.g., BA, BS, or BBA). A student who completes the requirements for a degree with a double major will be awarded ONE degree (with both majors indicated) and will receive ONE diploma. Because only one degree is granted for the double major, students must have completed the requirements for both majors before the degree can be awarded. Students wishing to pursue a double major must satisfy the following conditions:

- Meet all university and college requirements for each major,
- Successfully complete departmental requirements in each major (if the majors are in the same college) or successfully meet the major field of study requirements for each program as determined by each college (if the majors are in different colleges).

Academic Minor

To earn an academic minor, a student must meet the requirements mandated by the college offering the minor. At least 18 semester hours will be required in the area of the minor (excluding prerequisites); the maximum number of hours will be limited to 23. At least 6 hours of upper-
level courses will be included. At least 9 semester credit hours in the area of the minor must be completed in residence at Texas A&M University-Corpus Christi. The student must complete all prerequisites for required courses and must maintain a grade point average of at least 2.00 on a 4-point scale. Colleges may set higher GPA requirements.

The following rules apply regarding graduation with a minor:

1. A student may count the same course for both major and minor requirements.
2. After applying for graduation, if a student fails to complete the requirements for the minor but meets the requirements for graduation, the student will be graduated without the minor.
3. A student may graduate with more than one minor if the student meets all the requirements.

A student who holds a bachelor’s degree from the University and who wishes to complete requirements for a minor may do so by completing all course work in the minor and by fulfilling any other requirements mandated by the college offering the minor within five years of graduation. A notation indicating that all requirements for each minor have been completed will be added to the Texas A&M University-Corpus Christi transcript; the transcript will not state that a minor has been awarded. If the requirements for a minor are satisfied following degree conferral, credits earned during the satisfaction of the minor have no effect on the GPA of the previously awarded degree.

**Addition of a Major**

A student who holds a bachelor’s degree from the University and who wishes to complete requirements for an additional major within the same degree may do so by completing all course work in the major and by fulfilling any other requirements mandated by the college offering the major. A notation indicating that all requirements for each major have been completed will be added to the student’s transcript. The transcript will not state that a major has been awarded.

**Academic Policies and Regulations**

**Reency of Credit**

No restriction on reency of credit is made for undergraduate work. Lower-division and transfer hours applied toward the baccalaureate degree should provide those competencies necessary for entry into the upper-division level.

**Correspondence and Extension Credit**

No more than 15 semester hours of extension-center and correspondence study credit may be applied toward a bachelor’s degree. Not more than 6 semester hours of this 15 may be in correspondence study. No more than 6 semester hours of upper-division extension and correspondence credit may be applied toward a degree. All work transferred is subject to approval, as suitable for the student’s degree plan, by the student’s college dean or designee.

**Placement Process**

New undergraduates and transfer students are placed into mathematics classes on the basis of their scores on standardized tests (SAT, ACT, STAAR, etc), their high school record, or their previous college level mathematics credits. Consult the placement link on http://math.tamucc.edu for details. Students not designated as College Ready in mathematics, must take the TSI Assessment. Students who are College Ready in mathematics, but don’t have test scores or math grades in their records, or those hoping for a higher mathematics placement may take a challenge exam offered regularly by the Department of Mathematics and Statistics. Call 361-825-3754 for details and to schedule taking the exam.

For brief information on the foreign language placement test, see “Foreign Language Requirement (p. 43)” earlier in this chapter.

**Maximum Course Load**

An undergraduate student may not register for more than 18 hours of course work in a regular semester, or more than 6 hours of course work in a single session of summer school, without the approval of the appropriate administrator.

1. For a student with 30 or more semester credit hours and a declared major, the request must be approved by the dean of the college in which the student is majoring.
2. For a student with fewer than 30 semester credit hours, or for a student with 30-59 semester hours but without a declared major, the request must be approved by the Department of Undergraduate Studies. Also, a student who is required to pass the THEA or approved alternative examination, and who has not yet done so, must have the approval of the Department of Undergraduate Studies to register for more than the maximum course load.

**Repetition of a Course**

Undergraduate students may repeat courses at the University under the following circumstances:

1. Courses specifically designated as repeatable for credit in the Undergraduate Catalog (such as variable topic courses) are calculated in the grade point average in the same manner as separate courses.
2. Undergraduate students may also repeat any undergraduate course at the University in order to replace a grade. Only the highest grade will count to calculate the Texas A&M University-Corpus Christi grade point average. This procedure will be used in the calculation of GPA from this point forward for all students. A notation will be placed on the transcript after the course to indicate that it has been repeated. In the case of repeats, grades are included in computing the A&M-Corpus Christi hours attempted and all attempts and grades will appear on the official transcript. Repeated course grades are not removed from the transcript. The repeated grade and grade points will be excluded from the cumulative grade point average only. Except as noted above in #1, a student may not receive credit for any given course more than once. The Office of the University Registrar conducts audits of student records as needed and prior to graduation. When repeating a course more than once, the student should seek advice from his or her faculty mentor, or academic advisor, as appropriate, prior to registering for the course. Students may be charged an additional fee for each course taken for the third or more times. (See “Tuition and Fees” for details.)
3. Once a student has been awarded a degree at the University, the student may not repeat a course for the purpose of changing the grade on the official transcript of any course taken as part of that degree.
A course taken at another institution will not replace a grade received at TAMU-CC, this includes the grade of “F”. The transferred work will not affect the grade point average (GPA) on the student’s transcript.

Scholastic Probation, Suspension, Dismissal

For undergraduate students, a minimum GPA of 2.0 (C) on a 4.0 scale in all work taken and a minimum grade point average of 2.0 in your major field of study are required. Specific academic programs may require a higher grade point average in the major.

Scholastic Probation 1 and Removal from Probation

Undergraduate students whose cumulative Texas A&M-Corpus Christi (TAMU-CC) grade point average (GPA) falls below 2.0 after being in good standing are placed on Scholastic Probation 1. A student on Scholastic Probation 1 may enroll in no more than 16 semester hours of coursework in a long semester and must participate in the Academic Collegiate Excellence Program through the Center for Academic Student Achievement.

Students are removed from Scholastic Probation 1 after completing a semester at TAMU-CC during which a TAMU-CC cumulative grade point average of 2.0 or greater is achieved. Students whose TAMU-CC cumulative GPA is below 2.0 at the end of their semester on Scholastic Probation 1 will be placed on Scholastic Probation 2 as continued probation.

Scholastic Probation 2 and Removal from Probation 2 for Undergraduates

Undergraduate students whose semester GPA and/or TAMU-CC cumulative GPA is below a 2.0 while on Scholastic Probation 1 is placed on Scholastic Probation 2. Students are removed from Scholastic Probation 2 after completing a semester at TAMU-CC during which a TAMU-CC cumulative GPA of 2.0 or greater is achieved.

Scholastic Probation 2 and Removal from Probation 2 for Undergraduates

Scholastic Probation 2 and Removal from Probation 2 for Undergraduates

Scholastic Probation 2 and Removal from Probation 2 for Undergraduates

Academic Suspension 1 and 2

Undergraduate students on Scholastic Probation 2 who earn less than a 2.0 semester GPA and TAMU-CC cumulative GPA will be placed on Academic Suspension 1 and suspended for one long semester. Students on Academic Suspension 1 who do not attain a 2.0 TAMU-CC semester and TAMU-CC cumulative GPA are placed on Academic Suspension 2. Students suspended for the second time will be placed on Academic Suspension 2 and suspended for two long semesters and any intervening summer semesters. Students who experience extenuating circumstances may appeal using the academic reinstatement appeal procedures and can be reinstated by the Scholastic Standing Appeals and Reinstatement Committee. If no appeal is granted, enrollment for the subsequent semester will be administratively dropped. For questions regarding the appeals and reinstatement process and procedures, please visit: http://casa.tamucc.edu/appeal.html.

After a first or second suspension, students who re-enroll will be placed on Scholastic Probation 2 after sitting out the appropriate length of time, as denoted by the suspension status. Students must achieve a minimum semester GPA of 2.0 for that and all subsequent semesters until a minimum TAMU-CC cumulative GPA of 2.0 is attained. Students will remain on Scholastic Probation 2 until a cumulative TAMU-CC 2.0 GPA is attained.

Academic Dismissal

A third suspension results in dismissal from the University. In most cases, a student who is dismissed is not re-admitted to TAMU-CC. Students may petition for a review of their dismissal case after a period of four long semesters and intervening summer semesters. Re-admission is permitted only in exceptional circumstances. Students may appeal using the academic reinstatement appeal procedures and must be authorized by the dean of the college to which admission is sought. If students do not attain the required GPA (as described above) after such re-admittance, the student is dismissed and may not petition for re-admission for a period of a minimum of five calendar years.

Note: Any student who has not been enrolled at TAMU-CC for one academic year, must re-apply for re-admission to the university. Please visit the Office of Admission for more information (http://admissions.tamucc.edu/former/index.html).

Academic Progress of Students on “Probationary Admission” Status

If a first-time, first-year student is admitted on “Probationary Admission” status, certain conditions will apply. While on probationary admission status, the student must remain a part-time student, taking no more than 2 courses each semester. The student’s progress will be monitored at the end of each term, with a GPA of 2.0 or better required for continued enrollment each semester while on probationary status. In addition, the student may not earn a grade of D or F in any remedial course attempted while on probationary status.

The courses the student will attempt while on probationary status will be determined by A&M-Corpus Christi placement results, THEA scores (or scores on an accepted alternative examination), and the recommendation of the assigned academic advisor. All course work while a student is on probationary status will be chosen from remedial offerings and the core curriculum. After completing 12 semester credit hours of non-remedial coursework with a GPA of 2.0 or better, and having earned no grade of D or F in any remedial course attempted, the student will become a regularly admitted student, with all the rights and responsibilities of that status.

Graduation with Honors

To be eligible to graduate with honors, a student must have completed at least 45 undergraduate semester hours at Texas A&M University-Corpus Christi. If students have not yet completed 45 undergraduate semester hours at Texas A&M University-Corpus Christi they must be enrolled in enough hours to fulfill the 45-hour requirement by the end of the term. The cumulative A&M-Corpus Christi grade point average is used to determine honors status. The cumulative grade point average is calculated on all courses taken at A&M-Corpus Christi, excluding courses taken pass/no pass or credit/no credit. A student may graduate summa cum laude with a grade point average of 3.9 or above. A student may graduate magna cum laude with a grade point average of 3.70 through 3.89. A student may graduate cum laude with a grade point average of 3.5 through 3.699. To be recognized at one of these levels at the Commencement Ceremony, students must have earned the appropriate grade point average and completed 45 undergraduate semester hours at Texas A&M University-Corpus Christi by the end of the semester immediately preceding the one in which they will graduate. This honor
designated will be used in the commencement ceremony and will be recalculated once all grades are received and processed.

The Islander Impact Initiative
The Islander Impact Initiative is an effort by the University to expose students to a minimum number of high impact practices (two for transfer students and four for first-time-in-college students) during their career at Texas A&M University-Corpus Christi. The American Association of Colleges & Universities (AAC&U) has identified a set of “effective educational practices” that research has found have a positive effect on students. These practices have been termed “high impact practices” and include: first-year seminars and experiences, common intellectual experiences, learning communities, writing-intensive courses, undergraduate research, collaborative assignments and projects, diversity and global learning, service learning and community-based learning, internships, and capstone courses and projects (AAC&U, 2008). The initiative will ensure that students are provided with a challenging, learning-centered environment that promotes innovation, creativity, and discovery.

Dean’s List
All undergraduate degree-seeking students registered for a minimum of 12 semester hours at the University (excluding hours where standard letter grades are not used) who complete all work registered for and who have a 3.65 grade point average or above for a regular semester will be placed on the Dean’s List.

Graduate Study by Undergraduates
1. Reservation of Work for Graduate Credit
   A senior student in the last term of undergraduate work may enroll in graduate work and reserve the course work for graduate credit provided that
   a. the student has a cumulative grade point average of 3.0 or better,
   b. the dean of the college in which the work is offered has granted written approval, and
   c. the graduate work is not used to fulfill undergraduate degree requirements, unless enrolled in a 3+2 program.

2. Graduate Work for Undergraduate Credit
   A senior student in the last semester or summer session of undergraduate work may enroll in graduate work to be applied toward the baccalaureate degree provided that
   a. the student has a cumulative grade point average of 3.0 or better,
   b. the dean of the college in which the work is offered has granted written approval,
   c. the chair of the student’s major department and the dean of the student’s undergraduate college have granted written approval, and
   d. the student has not reserved the course work for graduate credit, unless enrolled in a 3+2 program.

Graduate credit hours used to meet the requirements of a baccalaureate degree may not be used to meet the requirements for a graduate degree.

Any exceptions to the above must be approved by the Office of the University Registrar and the Provost and Vice President for Academic Affairs.

Catalog Subject to Change
The catalog was prepared well in advance of its effective date. While every effort has been made to provide complete and accurate information regarding undergraduate programs, changes may occur at any time, without notice, in academic requirements or policies.

Core Curriculum Program
Core Curriculum Program Overview
The Core Curriculum Program (the Core) is a 42-semester-hour program of study that is required of undergraduates to ensure that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life.

Each course in the Core has been reviewed and approved on the basis of its potential to contribute to the achievement of the following six core objectives.

• Critical Thinking Skills - to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information
• Communication Skills - to include effective development, interpretation and expression of ideas through written, oral and visual communication
• Empirical and Quantitative Skills - to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions
• Teamwork - to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal
• Personal Responsibility - to include the ability to connect choices, actions and consequences to ethical decision-making
• Social Responsibility - to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities

Core Curriculum Program Courses
Students are encouraged to consult their degree plans for specific Core course requirements for their majors. Core curriculum courses are organized according to the Foundational Component Areas are listed below.

### First-Year Learning Communities Program

**Overview**

As part of the First-Year Learning Communities Program, all full-time Texas A&M Corpus Christi students are expected to enroll, in each of their first two semesters, in specially selected groups of two to four classes known as dyad, triads, and tetrads, with the goal of helping students...

| BIOL 1407 | Biology II               |
| BIOL 2401 | Anatomy and Physiology I |
| BIOL 2402 | Anatomy and Physiology II|
| BIOL 2420 | Principles of Microbiology|
| CHEM 1305 | Introductory Chemistry *|
| CHEM 1411 | General Chemistry I *    |
| CHEM 1412 | General Chemistry II     |
| ESCI 1401 | Environmental Science I: Intro to Environmental Science |
| GEOL 1303 | Essentials of Geology *  |
| GEOL 1403 | Physical Geology         |
| GEOL 1404 | Historical Geology       |
| GISC 1301 | Physical Geography       |
| PHYS 1303 | Introduction to Astronomy: Stars and Galaxies |
| PHYS 1304 | Introduction to Astronomy: Solar System |
| PHYS 1401 | General Physics I        |
| PHYS 1402 | General Physics II       |
| PHYS 2425 | University Physics I     |
| PHYS 2426 | University Physics II    |

### Language, Philosophy and Culture

Select one of the following:

| ENGL 2316 | Literature and Culture * |
| ENGL 2332 | Literature of the Western World: From the Classics to the Renaissance * |
| ENGL 2333 | Literature of the Western World: From the Enlightenment to the Present * |
| PHIL 1301 | Introduction to Philosophy |
| PHIL 2306 | Introduction to Ethics   |
| SPAN 3304 | Spanish Civilization    |
| SPAN 3305 | Latin American Civilization |
| SPAN 3320 | Introduction to Spanish Literature |
| SPAN 3325 | Introduction to Latin American Literature |

### Creative Arts

Select one of the following:

| ARTS 1301 | Art and Society |
| ARTS 1303 | Art History Survey I |
| ARTS 1304 | Art History Survey II |
| MEDA 1305 | Film and Culture ** |
| MUSI 1306 | Understanding and Enjoying Music * |
| MUSI 1307 | Elements of Musical Style |
| THEA 1310 | Theatre Appreciation |

### American History

Select 6 hours of the following:

| HIST 1301 | U.S. History to 1865 *    |
| HIST 1302 | U.S. History Since 1865 * |
| HIST 2301 | Texas History             |

### Government/Political Science

POLS 2305 U.S. Government and Politics **

### Social and Behavioral Sciences

Select one of the following:

| ECON 1301 | Introduction to Economics * |
| ECON 2301 | Macroeconomics Principles * |

### Component Area Option

Select 6 hours of the following:

| ECON 2302 | Microeconomics Principles * |
| PSYC 2301 | General Psychology *        |
| SOCI 1301 | Introduction to Sociology * |

| 1 - 2 Foundational Component Area Courses (not counted in a Foundational Area) 4 |

| COMM 1315 | Public Speaking |

### Total Hours

42

1. Students who have taken COMM 1315 Public Speaking (3 sch) previously at TAMUCC or another institution can count these courses toward completion of the Communication Foundational Component Area.

2. Students should complete the Communication Component Area by the end of the sophomore year. Students who transfer into the University without equivalent credit should complete these courses as soon as possible.

3. For 4-SCH courses that are taken as a Foundational Component Area requirement, students may count the extra 1 SCH of each course as part of the Component Area Option (to a maximum of 3 SCH).

4. Students who have passed MATH 2413 Calculus I (4 sch) may take MATH 2414 Calculus II (4 sch) to satisfy up to 4 hours of the Component Area Option.

*Online offering

^Blended offering

## Transfer Students and the Core Curriculum Program

Transfer students will be advised through their college’s academic advising center.

For a list of transfer courses that will fulfill specific Core requirements, please see the appendix entitled “Lower-Division Transfer Courses: Common Courses.”

Students transferring credit hours to Texas A&M Corpus Christi from other institutions may have various means of fulfilling the Core requirement.

## First-Year Learning Communities Program Overview

As part of the First-Year Learning Communities Program, all full-time Texas A&M Corpus Christi students are expected to enroll, in each of their first two semesters, in specially selected groups of two to four classes known as dyad, triads, and tetrads, with the goal of helping students...
make meaningful connections with faculty, staff, and students at the University.

The students and teachers within each dyad, triad, or tetrad form a learning community. The same group of students takes all classes within a given learning community together, which gives them many opportunities to work together, get to know each other, and learn in collaboration with peers. The teachers in each learning community also work with each other to develop connections among the classes.

All learning communities include University Seminar (UNIV 1101 University Seminar I (1 sch) or UNIV 1102 University Seminar II (1 sch)) and many are linked to a Communication class (COMM 1311 Foundation of Communication (3 sch), ENGL 1301 Writing and Rhetoric I (3 sch), or ENGL 1302 Writing and Rhetoric II (3 sch)). These are small classes of 25 students or fewer. Dyads and triads include a lecture class (such as History or Sociology), and tetrads include two lecture classes. The classes within each learning community are “linked,” in the sense that students enroll in all classes at once.

An example of a dyad could include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>UNIV 1101</td>
<td>University Seminar I</td>
<td>1</td>

</tr>
</tbody>
</table>

**University Seminar**

Students learn what it means to be an engaged member of the Texas A&M University-Corpus Christi community in the two-semester sequence of University Seminar. University Seminar explores different facets of college knowledge for academic and social success. As the integrative engine of the first-year experience, University Seminar engages students in a collaborative learning experience. University Seminar faculty facilitate meaningful connections between linked courses and the first-year experience. Students gain confidence in their individual skills and develop abilities for use in the academic community and beyond. UNIV 1101 University Seminar I (1 sch) familiarizes students with university-level expectations and UNIV 1102 University Seminar II (1 sch) emphasizes student success after the first year.

Both UNIV 1101 University Seminar I (1 sch) and UNIV 1102 University Seminar II (1 sch) are degree plan requirements for all students who graduate from Texas A&M-Corpus Christi.

**Full-time First-year Students**

First-year students are those who have never attended any college after graduating from high school. This includes students enrolled in the fall term who attended college for the first time in the prior summer term. It also includes students who entered with advanced standing (college credits earned before graduation from high school). Full-time first-year students are required to enroll in a University Seminar during each of their first two semesters. UNIV 1102 University Seminar II (1 sch) can be taken first for students who begin at TAMU-CC in the spring semester.

**Part-time First-year Students**

Part-time first-year students are encouraged to enroll in University Seminar to support their successful transition and may be required to enroll based on their admission category. Students who begin at TAMU-CC as part-time students in their first year will follow the transfer student rules for University Seminar requirements unless otherwise indicated.

**Transfer Students**

Transfer students are those who have attended another college after graduating from high school. Transfer students who become full-time Texas A&M-Corpus Christi students after having completed less than 12 semester hours are required to take both UNIV 1101 University Seminar I (1 sch) and UNIV 1102 University Seminar II (1 sch). Students who become full-time Texas A&M University-Corpus Christi students after having completed 12-23 semester hours are required to take only one University Seminar; they may choose to take either UNIV 1101 University Seminar I (1 sch) or UNIV 1102 University Seminar II (1 sch). Students who become full-time Texas A&M University-Corpus Christi students after having completed 24 or more semester hours are exempt from the University Seminar requirement.

**University Seminar Course Descriptions**

**UNIV 1101 University Seminar I (1 sch)**

**UNIV 1102 University Seminar II (1 sch)**

**Honors Program**

**Program Description**

The Honors Program at Texas A&M University-Corpus Christi offers an enriched plan of study to highly motivated students who have the capacity to excel academically and a strong and abiding determination
to reach their greatest intellectual potential. We pride ourselves on being an experience-based program that helps students develop the skills necessary to succeed in the workforce or graduate education, by focusing on three key areas of personal development: undergraduate research, study away, and volunteerism. Students admitted to our selective community of scholars will receive the following direct benefits:

**Undergraduate Research/Creative Experience**
- Study with outstanding faculty
- Work on original research
- Honors research fellowships

**Study Away Experience**
- Travel away
- Attend conferences
- Travel to professional events

**Service-Learning Experience**
- Community outreach
- Skills-relevant curriculum
- Course credit for internships

**Student Learning Outcomes**
Upon completion of the Honors Program, students will be able to:

1. Demonstrate critical thinking and analytical skills, to include: creative thinking, innovation, inquiry and analysis, evaluation, and synthesis of information.
2. Demonstrate communication skills, to include: the effective development and interpretation and expression of ideas through written, oral, and visual communication.

**Admission Requirements**
Students can apply for admission to the Honors Program by completing the general application for admission to the university (ApplyTexas) and choose if they want to apply to the program. If they select “yes” they will be taken to a secondary application for the Program that can be submitted automatically with their general application. Students will be admitted on a rolling basis to the program as space allows for those meeting the requirements outlined on the Honors Program website (honors.tamucc.edu (http://honors.tamucc.edu)). The Director and Program Coordinator will review the application as part of the admissions process prior to making invitations to join the Program. The Program will host open houses for prospective students.

**Contact**
For further information contact the Honors Program.

**Program Requirements**

**Curriculum and Requirements**
In order to graduate from the Honors Program at TAMU-CC and receive an Honors designation on the diploma, students have broad discretion over the kinds of curricular, research, and service-learning experiences they can explore in order to meet our program requirements.

The minimum requirements to remain in good standing and complete the Honors Program are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tbody>
</table>

| Elective Honors Courses | Select 12 hours of Honors electives | 12 |

**Total Hours** 18

**Elective Honors Courses**
Students are encouraged to take elective Honors courses that enhance their college experience. Any course offered at TAMU-CC has the potential to be an elective Honors course option. Honors courses may be offered each semester from across the Colleges; some of these courses may be stacked courses in that they may require the Honors student to complete additional readings, assignments, etc. Elective Honors courses will be listed under Honors in SAIL and also denoted as Honors courses by the “H” code assigned to the course section. Standalone Honors courses may also be offered. The Director and Program Coordinator will have discretion over whether transfer courses or other substitutions can meet these requirements.

Students are expected to take the Honors Seminar courses in sequence as they progress through their academic studies. The Director and Program Coordinator will have discretion over whether transfer courses or other substitutions can meet these requirements.

**Honors Electives Counting Towards a Major/Minor Course Requirement**
Course requirements for a major or minor are determined by the faculty in each corresponding academic discipline, and variations in the major/ minor requirements are subject to the approval of the faculty in that area. Therefore, the student should consult the description of the major/ minor in the section of the catalog dedicated to that discipline. Questions about the major/minor course work should be directed to the appropriate advisor within the major/minor discipline.

**Major/Minor Courses Counting Towards an Honors Elective Course Requirement**
Only 3 hours of major/minor course requirements may be applied as Honors elective credits. However, a student may choose to exclude a class from the major or minor course requirements and use the course exclusively for Honors elective course requirements.
Honors elective credits. Students will also create a plan for earning their service and research that will help them achieve academic, personal skills, discovering ways to make connections with potential faculty for their Project of Excellence. This includes honing information literacy.

In the Honors Experience Seminar students begin the exploration process 1 Semester Credit Hour (2 Lecture Hours)

HONR 2101

Honors Community Leadership Seminar
1 Semester Credit Hour (1 Lecture Hour)

This course is intended to serve as an introduction to the Honors Program, its requirements and the Program's commitment to service, as well as the Honors Student Association. In an effort to prepare students to be campus and community leaders, students learn the organizational structure of the campus and engage in various events to become familiar with the campus and our surrounding community, its traditions and its needs. Students take this course in addition to UNIV 1101.

HONR 1102

Honors Peer Leadership Training
1 Semester Credit Hour (2 Lecture Hours)

A seminar devoted to the completion of the Project of Excellence with the guidance and approval of the course instructor and the student's faculty mentor. As part of the Preliminary Proposal, the student will complete a timeline that sets a course for project completion in time for graduation. In addition, students will be introduced to TAMUC's Research Compliance process and will complete any training necessary for his/her project. Students must successfully complete HONR 3101 in order to register for HONR 4101.

HONR 3340

Academic and Field Research
3 Semester Credit Hours (3 Lecture Hours)

Examination of the assumptions and questions underlying research methods across disciplines, with special emphasis on how methodologies from different fields (such as science and humanities) can complement each other. The course will address issues such as 1) the distinct qualities of quantitative and qualitative research, 2) current uses of surveys, interviews, and market research, 3) the construction of new knowledge in various disciplines, from problem to publication, 4) the critical use and evaluation of electronic and print resources, archival materials, government documents, and scholarly list serves.

HONR 3390

Topics in the Humanities
1-4 Semester Credit Hours (1-4 Lecture Hours)

A course that deals with significant contemporary issues in the arts, humanities, and/or education. May be repeated when topics vary.

HONR 3490

Topics in the Sciences
1-4 Semester Credit Hours (1-3 Lecture Hours, 1 Lab Hour)

A course that deals with significant contemporary issues in the disciplines of the natural sciences, health sciences, social sciences, and/or business. May be repeated when topics vary.

HONR 3491

Science and Technology for Decision Makers
4 Semester Credit Hours (4 Lecture Hours)

A course in the natural sciences concerned with the interdisciplinary nature of science, the formal tools and techniques of critically evaluating scientific research, and the use of qualitative and quantitative data in the application of science and technology.

HONR 4101

Project of Excellence Seminar I
1 Semester Credit Hour (2 Lecture Hours)

This seminar culminates in the completion of a Preliminary Proposal for the Project of Excellence with the guidance and approval of the course instructor and the student's faculty mentor. As part of the Preliminary Proposal, the student will complete a timeline that sets a course for project completion in time for graduation. In addition, students will be introduced to TAMUC's Research Compliance process and will complete any training necessary for his/her project. Students must successfully complete HONR 3101 in order to register for HONR 4101.

HONR 4102

Project of Excellence Seminar II
1 Semester Credit Hour (2 Lecture Hours)

This seminar culminates in the completion of full proposal for the Project of Excellence. The proposal is completed with the guidance and approval of both the course instructor and the faculty mentor. Students must successfully complete HONR 4101 in order to register for HONR 4102.

HONR 4103

Honors Peer Leadership Training
1 Semester Credit Hour (2 Lecture Hours)

A seminar devoted to the completion of the Project of Excellence.

HONR 4104

Honors Peer Leadership Training
1 Semester Credit Hour (2 Lecture Hours)

Training of upper-class students for Honors First-Year Peer Mentors. Includes cognitive and developmental theories of the college-aged student, faciliation skills practice, discussion and listening techniques, and mentoring and advising skills.
HONR 4304 Honors Peer Leadership Practicum
1-3 Semester Credit Hours (1 Lecture Hour)
This course assists student leaders in further developing their own self-awareness, learning skills and strategies, and explores methods for facilitating these in others. Provides a forum for reflection on and processing of the Peer Mentor experience and to allow peer leaders to develop and practice important leadership skills that are transferable to other settings. Emphasizes building relationships with students, teaching life skills and learning strategies, and guiding students through the college experience. Mentors grow their own capacity as future leaders, managers, networkers and community change makers.

HONR 4390 Seminar in the Humanities
1-4 Semester Credit Hours (1-3 Lecture Hours)
Study of specialized topics and themes in arts, humanities, and education. May be repeated when topics vary.

HONR 4396 Honors Directed Independent Study
1,3 Semester Credit Hours
Individual supervised study / research. Requires a formal proposal of study to be completed in advance of registration to be approved by a supervising faculty member and the Honors Director and Program Coordinator. Only 3 semester hours of Honors independent study credit may be counted toward the Honors graduation requirement.

HONR 4397 Honors Internship
3 Semester Credit Hours
Practical experience related to the student’s major field. Internships require approval by the Honors Director and Program Coordinator. At the close of the internship, a written report and self-assessment must be submitted to a supervising faculty member. Internship is offered on a pass/fail basis and students must volunteer a minimum of 120 hours and meet the course objectives in order to receive course credit. Can be repeated for credit with approval by the Honors Director and Program Coordinator.

HONR 4398 Honors Applied Experience
3 Semester Credit Hours
Practical experience connected to the student’s field of study, usually with a service or leadership component. Applied experience requires approval by the Honors Director and Program Coordinator. Students must volunteer a minimum of 120 hours and meet the course objectives in order to receive course credit. Can be repeated for credit with approval by the Honors Director and Program Coordinator.

HONR 4399 Honors Undergraduate Research and Creative Works
3 Semester Credit Hours
Undergraduate research and creative works is designed to provide students with the opportunity to develop and practice advanced discipline-specific projects in collaboration with faculty members. A student electing to enroll in an Undergraduate Research and Creative Works course must contract with a faculty member to work on an existing research project or to develop a new project, and a specific list of responsibilities and a work schedule of at least 120 hours must be developed prior to approval. Can be repeated for credit with approval by the Honors Director and Program Coordinator.

HONR 4490 Seminar in the Sciences
1-4 Semester Credit Hours (1-3 Lecture Hours, 1 Lab Hour)
Study of specialized topics and themes in the sciences, health sciences, social sciences, and business. May be repeated when topics vary.

**College of Business**

The accounting and business undergraduate and master’s degree programs are accredited by the AACSB International – The Association to Advance Collegiate Schools of Business. The Bachelor of Business Administration degree program is offered on TAMU-CC’s main Island Campus, online and at the Texas A&M University System RELLIS Campus in Bryan, Texas. The Master of Business Administration program is
offered as an evening program on the Island Campus and online. The Master of Accountancy is offered online only.

Mission

The College of Business serves a diverse student body on the Corpus Christi Island Campus, on the Brazos Valley RELLIS Campus, and online. Our programs and faculty prepare students for successful careers as future business leaders. College Centers facilitate economic development in the Coastal Bend and beyond.

The College research strategy is focused primarily on applied scholarship, supplemented with basic research and teaching and learning scholarship, which impacts students, academia, and the community.

College of Business academic programs, faculty scholarship, community service, and student engagement support the mission of Texas A&M University-Corpus Christi.

Organization

The College's formal administrative units include three academic departments, the Business Advisory Council, the Accounting Advisory Council, the Coastal Bend Business Innovation Center and the South Texas Economic Development Center. The College sponsors student chapters of Collegiate Entrepreneurs Organization, Society for Human Resource Management, Management Information Systems Association, MBA Student Network, Marketing Club, Student Accounting Society, Student Finance Association, and Student Economics Association.

Participating faculty in each of the academic departments (Accounting, Finance, and Business Law, Decision Sciences and Economics, and Management and Marketing) are the principal architects of the academic programs (majors, minors, and certificates) in their respective disciplines. Content of undergraduate and graduate programs is coordinated through the Curricula Management Committee.

Programs

The College offers a Bachelor of Business Administration Degree with majors in Accounting; Business Economics; Finance; General Business; Management; Management Information Systems; and Marketing. A minor in Business Administration is available to nonbusiness majors desiring to supplement their degree with a business background. Other minors include: Accounting, Economics, Entrepreneurship, Finance, Human Resource Management, International Business, Management, Management Information Systems, and Marketing. The College of Business also offers an Entrepreneurship & Innovation Certificate and an International Business Certificate. (Please consult the Graduate Catalog for information concerning the Master of Business Administration and the Master of Accountancy.)

Entry into Business Major

Students can choose a major in the College of Business when they are admitted to the University. Students changing to a major in the College of Business at a later point in their academic career must meet the following requirements:

• A minimum of an overall 2.0 cumulative GPA
• An official meeting with a College of Business Academic Advisor to develop a degree plan.

Community/Junior College Transfers

Community and junior college students who plan to transfer to the College of Business are advised to pursue the business foundation curriculum outlined below. The appropriate course equivalency guide should be consulted to resolve questions of course transferability. All business courses normally offered by the College of Business at the junior or senior level must be completed by the student at that level. Courses acceptable for transfer by Texas A&M University-Corpus Christi will be accepted at the level at which the courses were taken, and at least 50% of the business hours required must be taken at Texas A&M University-Corpus Christi. Generally, courses from a community/junior college cannot be used to satisfy upper level requirements. Lower level transfer courses in Business Law and/or Statistics may be accepted with approval from the appropriate department chair. All business courses transferred require a grade of “C” or better and require prior approval by a College of Business academic advisor.

Contact an academic advisor in the College of Business for specific information.

Grade Point Average for Graduation

In addition to meeting the various course requirements for a specified major in the College of Business, students must also achieve the following minimum grade point averages:

1. 2.00 for all credit course work completed at Texas A&M University-Corpus Christi,
2. 2.00 in all business courses, and
3. 2.00 in courses in their designated major.

Effective fall 2012, no more than two Ds earned after fall 2007 are accepted toward graduation by business majors in business core classes, courses taken in their business major, and business elective courses. (See “Scholastic Probation, Suspension, Dismissal” in the section entitled “General Academic Policies and Regulations.”)

Upper-Level Course Requirements

All business students are required to complete at least 45 hours of upper-level (junior and senior level) courses; at least 45 of these hours must be business and/or economics courses.

Student Code of Ethics

The College of Business requires its students to abide by the COB Student Code of Ethics (available online at www.cob.tamucc.edu). Its provisions and stipulations apply to all students taking courses offered by the college, regardless of whether or not they are pursuing a degree awarded by the COB. BUSI 0011 Cob Student Code of Ethics and Plagiarism (0 sch), a noncredit Blackboard course, is a prerequisite for all 3000 level business core courses.

Assurance of Learning/Student Learning Outcomes

To continue to improve the undergraduate curriculum and the quality of the academic programs the COB, guided by AACSB accreditation standards, has implemented a comprehensive assurance of learning system. Under this assessment program the COB has developed four learning goals with corresponding objectives for Bachelor of
Business Administration (BBA) graduates and has identified a number of instruments to measure the extent to which they are being met.

Learning Goals:
- To be effective communicators
- To be competent in business practices
- To be good decision makers
- To be good citizens

**Undergraduate Courses**
The College of Business offers undergraduate courses in the following fields:
- Accounting (ACCT)
- Business Administration (BUSI)
- Business Law (BLAW)
- Business Economics (ECON)
- Finance (FINA)
- Management (MGMT)
- Management Information Systems (MISY)
- Marketing (MKTG)
- Operations Management (OPSY)
- Operations Research/Management Science (ORMS)

All course descriptions are located in Courses A-Z (p. 640).

**Programs**
- Bachelor Degree Programs (p. 62)
  - Accounting, BBA (p. 62)
  - Business Economics, BBA (p. 68)
  - Finance, BBA (p. 71)
  - General Business, BBA (p. 75)
  - Management Information Systems, BBA (p. 78)
  - Management, BBA (p. 82)
  - Marketing, BBA (p. 86)
- Certificate Programs (p. 90)
  - Entrepreneurship & Innovation, Certificate (p. 90)
  - International Business, Certificate (p. 92)
- Minors (p. 92)
  - Accounting, Minor (p. 93)
  - Business Administration, Minor (p. 94)
  - Economics, Minor (p. 94)
  - Entrepreneurship, Minor (p. 96)
  - Finance, Minor (p. 97)
  - Human Resource Management, Minor (p. 98)
  - International Business, Minor (p. 100)
  - Management Information Systems, Minor (p. 100)
  - Management, Minor (p. 102)
  - Marketing, Minor (p. 103)

**Bachelor Degree Programs**
- Accounting, BBA (p. 62)
- Business Economics, BBA (p. 68)
- Finance, BBA (p. 71)
- General Business, BBA (p. 75)
- Management Information Systems, BBA (p. 78)
- Management, BBA (p. 82)
- Marketing, BBA (p. 86)

**Accounting, BBA**

**Program Description**
The accounting major is designed to provide entry-level knowledge, skills, and concepts for careers in accounting. These careers are generally divided into four broad areas, corresponding to particular employment environments: management accounting, government accounting, accounting education, and public accounting. The career can include such activities as auditing, budgeting, data processing, controlling costs, providing tax advice, meeting tax requirements, and designing and analyzing financial systems.

**Professional Certification**
Practicing accountants generally acquire one or more certifications available to members of the profession. The most common certification is the Certified Public Accountant (CPA), conferred by the State Board of Public Accountancy of the state in which the individual maintains his or her license. Other certifications include the Certified Management Accountant (CMA), the Certified Internal Auditor (CIA), Certified Fraud Examiner (CFE), and others.

The Texas State Board of Public Accountancy has set the minimum educational requirements for taking the CPA examination at 150 semester hours. **Students aspiring to an accounting career should give serious consideration to pursuing advanced studies at the graduate level to enhance their potential for a successful accounting career.** Accounting students should be aware that requirements to sit for the CPA examination in Texas may change at any time. CPA requirements are determined by the Texas State Board of Public Accountancy (TSBPA). Students should frequently visit the TSBPA website at http://www.tsbpa.state.tx.us/ and check with their advisor on a regular basis to ensure that the courses they are taking will qualify them to sit for the CPA exam.

For students who have received their undergraduate degrees, the Department of Accounting, Business Law, and Finance offers an avenue to pursue graduate studies to meet the State qualifications for professional certification through the Master of Accountancy (MAcc). This option is described in the College of Business section of the Graduate Catalog. Students are encouraged to contact the Director of Master’s Programs in the College of Business for more information and answers to specific questions.

**BBA Student Learning Goals and Objectives**
- G1. To Be Effective Communicators
  - 01. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - 02. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.
- G2. To Be Competent in Business Practices
• O1. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.

• O2. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.

• O3. Students will effectively analyze data.

• G3. To Be Good Decision Makers
  • O1. Students will demonstrate the ability to identify valid, reliable and important information applicable to the issue being studied.
  • O2. Students will demonstrate the ability to analyze multiple responses to issues.
  • O3. Students will demonstrate the ability to determine and support an appropriate decision.

• G4. To Be Good Citizens
  • O1. Students will demonstrate the ability to identify ethical concepts.

In addition, all Accounting Majors will demonstrate knowledge of key Accounting theories and concepts, and will apply these Accounting theories and concepts correctly.

**Accounting Major**

Student Learning Outcome: Students will demonstrate an understanding of the principles and practices common to the major areas of accounting.

Complete the Business Foundation Curriculum in the freshman and sophomore years.

of Public Accountancy of the state in which the individual maintains his or her license. Other certifications include the Certified Management Accountant (CMA), the Certified Internal Auditor (CIA), Certified Fraud Examiner (CFE), and others.

The Texas State Board of Public Accountancy has set the minimum educational requirements for taking the CPA examination at 150 semester hours. Students aspiring to an accounting career should give serious consideration to pursuing advanced studies at the graduate level to enhance their potential for a successful accounting career. Accounting students should be aware that requirements to sit for the CPA examination in Texas may change at any time. CPA requirements are determined by the Texas State Board of Public Accountancy (TSBPA). Students should frequently visit the TSBPA website at http://www.tsbpa.state.tx.us/ and check with their advisor on a regular basis to ensure that the courses they are taking will qualify them to sit for the CPA exam.

For students who have received their undergraduate degrees, the Department of Accounting, Business Law, and Finance offers an avenue to pursue graduate studies to meet the State qualifications for professional certification through the Master of Accountancy (MAcc). This option is described in the College of Business section of the Graduate Catalog. Students are encouraged to contact the Director of Master’s Programs in the College of Business for more information and answers to specific questions.

### BBA Student Learning Goals and Objectives

- **G1. To Be Effective Communicators**
  - 01. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - 02. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.

- **G2. To Be Competent in Business Practices**
  - 01. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.
  - 02. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.
  - 03. Students will effectively analyze data.

- **G3. To Be Good Decision Makers**
  - 01. Students will demonstrate the ability to identify valid, reliable, and important information applicable to the issue being studied.
  - 02. Students will demonstrate the ability to analyze multiple responses to issues.
  - 03. Students will demonstrate the ability to determine and support an appropriate decision.

- **G4. To Be Good Citizens**
  - 01. Students will demonstrate the ability to identify ethical concepts.

In addition, all Accounting Majors will demonstrate knowledge of key Accounting theories and concepts, and will apply these Accounting theories and concepts correctly.

### BBA Accounting Online Completion

The accounting major is designed to provide entry-level knowledge, skills, and concepts for careers in accounting. These careers are generally divided into four broad areas, corresponding to particular employment environments: management accounting, government accounting, accounting education, and public accounting. The career can include such activities as auditing, budgeting, data processing, controlling costs, providing tax advice, meeting tax requirements, and designing and analyzing financial systems. An Online Completion format provides 60 hours of online courses. The course schedule for the Online BBA Accounting option will differ from on-campus course offerings and may not include all course options available to on-campus students.

### Professional Certification

Practicing accountants generally acquire one or more certifications available to members of the profession. The most common certification is the Certified Public Accountant (CPA), conferred by the State Board...
**Entry Requirements**

Applicants who have completed 42 hours with a GPA of 2.0 or higher may be accepted into the Online Accounting BBA Completion Program. Students may transition into the upper division course sequence as they complete the University Core Curriculum and 60 hours including the following courses or their equivalents:

<table>

**Business Electives**

Upper-Level Business Elective | 3
Business Elective | 3
Total Hours | 60

1. All Business Majors and Minors must complete BUSI 0011 Cob Student Code of Ethics and Plagiarism (0 sch) before or during their first semester enrolled in upper-division Business courses.

2. MGMT 3315 Business Communications (3 sch), see Business Core, fulfills TSBPA's communications education requirement. TSBPA requires 24 semester credit hours in business, 30 semester credit hours in upper level accounting courses, and 150 total semester hours. Students completing the Accounting BBA will have satisfied the business requirement but may need additional course work to meet the accounting education and total semester hour requirements. As of August, 1999, the Texas State Board of Public Accountancy will accept only 15 hours of online accounting courses toward the hours you need to sit for the CPA exam.

3. ACCT 3321 Federal Income Tax I (3 sch) and ACCT 4311 Auditing Principles and Procedures (3 sch) together fulfill the Texas State Board of Public Accounting's (TSBPA) research education requirement.

* Online offering

**Pathway to the Master of Accountancy**

Students who have been admitted into Master of Accountancy program and have fifteen or less student credit hours to complete the Bachelor of Business Administration degree in Accounting may enroll in graduate accounting coursework with the approval of the Director of Masters Programs.

**Alternatives for Students Planning to take the CPA Examination - The 150-Hour Requirement for CPA Examination**

1. Complete a BBA degree, majoring in Accounting, and complete the Master of Accountancy (MAcc).

2. Complete a BBA degree, majoring in Accounting, and complete a Master of Business Administration (MBA). A minimum of 30 semester hours in accounting coursework is required.

3. Complete a BBA degree, majoring in Accounting, take 6 or 9 semester hours of additional accounting courses as part of the business electives, and additional coursework to satisfy the 150 total semester credits requirement.

Courses

ACCT 2301 Financial Accounting
3 Semester Credit Hours (3 Lecture Hours)

TCCNS: ACCT 2301

ACCT 2302 Managerial Accounting
3 Semester Credit Hours (3 Lecture Hours)
The use of accounting information as an aid to management decision making, including performance measurement and budgets.

Prerequisite: ACCT 2301.

TCCNS: ACCT 2302

ACCT 3311 Intermediate Accounting I
3 Semester Credit Hours (3 Lecture Hours)
An intensive study of the balance sheet accounts and the related income statement accounts. It exposes the student to the various Accounting Principles Board opinions and Financial Accounting Standards Board statements, and International Financial Reporting standards, as these publications affect the various accounts and transactions. It covers the various working capital accounts and operational assets.

Prerequisite: (ACCT 2301 and 2302).

ACCT 3312 Intermediate Accounting II
3 Semester Credit Hours (3 Lecture Hours)
A continuation of Intermediate Accounting I involving current and non-current liabilities and owner equity accounts, the Statement of Cash Flows, deferred income tax, financial statement analysis and several special problem areas.

Prerequisite: (ACCT 3311).

ACCT 3314 Cost Accounting
3 Semester Credit Hours (3 Lecture Hours)
A study of procedures and concepts in allocating the costs of firm inputs to outputs, determination and use of standard costs in the control function, profit planning and control techniques used in management decision-making.

Prerequisite: (ACCT 2301 and 2302).

ACCT 3315 Multinational Entities: Accounting and Consolidations
3 Semester Credit Hours (3 Lecture Hours)
A study of the similarities and differences between U.S. and other countries’ accounting and reporting procedures. Basic consolidation of international segments will be covered. Use of spreadsheets and web technology required.

Prerequisite: (ACCT 2302).

ACCT 3316 Governmental and Not-for-Profit Accounting
3 Semester Credit Hours (3 Lecture Hours)
A study of fund accounting used in governmental entities and non-profit organizations. Emphasis on budgetary and fund accounts.

Prerequisite: (ACCT 2301 and 2302).

ACCT 3317 Oil, Gas, & Energy Accounting
3 Semester Credit Hours (3 Lecture Hours)
This course covers the basic principles of oil and gas accounting. Course topics include upstream oil and gas operations, successful efforts accounting, full cost pool accounting, accounting for production, exploration and construction, joint interest accounting, international operations, oil and taxation and analysis of oil and gas financial statements.

Prerequisite: (ACCT 3311).

ACCT 3321 Federal Income Tax I
3 Semester Credit Hours (3 Lecture Hours)
Emphasizes the role of taxation in the business decision-making process. The course introduces the tools to conduct basic tax research and planning.

Prerequisite: (ACCT 2301 and 2302).

ACCT 3322 Federal Income Tax II
3 Semester Credit Hours (3 Lecture Hours)
Examines additional, more complex topics in business decision-making, tax research, and tax planning.

Prerequisite: (ACCT 3321).

ACCT 3340 Fraud Examination
3 Semester Credit Hours (3 Lecture Hours)
This course covers the basic principles of fraud examination. Course topics include the behavioral aspects of fraud and common fraud schemes including skimming, larceny, check tampering, register disbursement schemes, billing schemes, payroll and expense reimbursement, non-cash misappropriations, corruption and bribery, and fraudulent financial statements.

Prerequisite: (ACCT 2301 and 2302).

ACCT 4311 Auditing Principles and Procedures
3 Semester Credit Hours (3 Lecture Hours)
Auditing principles and techniques underlying the audit process; procedures used in conducting external audits, reviews and compilations.

Prerequisite: (ACCT 3312).

ACCT 4314 Advanced Accounting Problems
3 Semester Credit Hours (3 Lecture Hours)
A study of advanced accounting topics, including leases, pensions, consolidations, asset retirement obligations, accounting for not-for-profit organizations and government entities and other special problem areas.

Prerequisite: (ACCT 3312).

ACCT 4345 Ethics for Texas CPA Candidates and Business Executives
3 Semester Credit Hours (3 Lecture Hours)
This course will cover ethical theory, ethical reasoning, integrity, objectivity, independence and other core values and regulatory requirements associated with the practice of professional accounting and decision making of other executives, with an emphasis on corporate governance in the post-Sarbanes-Oxley regulatory environment. This course satisfies the ethics requirement of the Texas State Board of Public Accountancy (TBSPA); however, it does not count for advanced accounting hours required to sit for the CPA exam. Students who receive credit for ACCT 4345 cannot also receive credit for ACCT 5345.

ACCT 4355 Accounting Information Systems
3 Semester Credit Hours (3 Lecture Hours)
A study of the role of accounting information systems and related subsystems in both for profit and not-for-profit entities. The relationship of accounting information systems to other systems, including management information systems, is addressed. Concepts are reinforced by the completion of computer-based projects.

Prerequisite: (ACCT 2301, 2302 and MISY 2305).

ACCT 4390 Current Topics in Accounting
3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to accounting functions, processes or issues. May be repeated for credit when topics vary.

ACCT 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
Individual supervised study and completion of a final report.
**ACCT 4398 Accounting Internship**
3 Semester Credit Hours (3 Lecture Hours)
Supervised full-time or part-time, off-campus training in public accounting, industry, or government. Oral and written reports required.

---

**Business Economics, BBA**

**Program Description**

The Business Economics program integrates economics with courses in marketing, management, accounting, finance and quantitative analysis. Economics as a discipline is positioned at the intersection of social science and business, so has a great relevance for an extremely wide range of business and public policy issues, thereby providing our successful graduates with great career prospects in both the private and public sectors. By combining the study of economics (the scientific study of how society manages its scarce resources) and business, our degree provides a strong theoretical and professional basis for a successful and rewarding career. Business economics majors gain the skills to gather and analyze data for solving problems affecting companies, governments and non-profit organizations. The program includes basic courses in all business disciplines as well as in economics, and develops the skills that graduates need to work in a wide range of industries. The skillset includes understanding of the incentives that affect human behavior, the operation of markets and the strategic decisions of businesses and governments, both locally and internationally.

**BBA Student Learning Goals and Objectives**

- **G1. To Be Effective Communicators**
  - O1. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - O2. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.
- **G2. To Be Competent in Business Practices**
  - O1. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.
  - O2. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.
  - O3. Students will effectively analyze data.
- **G3. To Be Good Decision Makers**
  - O1. Students will demonstrate the ability to identify valid, reliable and important information applicable to the issue being studied.
  - O2. Students will demonstrate the ability to analyze multiple responses to issues.
  - O3. Students will demonstrate the ability to determine and support an appropriate decision.
- **G4. To Be Good Citizens**
  - O1. Students will demonstrate the ability to identify ethical concepts.

In addition, all Economics Majors will demonstrate the ability to identify (valid, reliable, and important) information relevant to the issue being studied.

Take this course concurrently. (ENGL 0399) and/or Mathematics (MATH 0300) is not recommended to take TCCNS. A student taking remedial courses in Basic English is not recommended to fulfill the social and behavioral sciences component of the University core curriculum. A student taking remedial courses in Basic English (ENGL 0399) and/or Mathematics (MATH 0300) is not recommended to take this course concurrently.

Courses

ECON 1301 Introduction to Economics
3 Semester Credit Hours (3 Lecture Hours)
Non-technical introduction to the structure and functioning of the aggregate economy and selected specific markets. Basic concepts regarding how markets function, regulation, monetary and fiscal policy in a macroeconomic context and some special topics of contemporary relevance are studied. Students are introduced to the basic concepts used in the social and behavioral sciences for measuring and interpreting economic and business conditions. This course cannot be taken to fulfill the Business Core or any Business Major requirements. It is recommended that students who might be interested in majoring in business or economics, take either ECON 2301 or ECON 2302 instead.

TCCNS: ECON 1301

ECON 2301 Macroeconomics Principles
3 Semester Credit Hours (3 Lecture Hours)
An overview of how the economy of the United States is organized and functions in a market price system. Market processes are used to show how resources and incomes are allocated by households and businesses. Determination of national income, employment, price level, interest rates, and growth are the focus of simple analysis techniques. Monetary and fiscal policies are examined including their international dimensions. Satisfies the social and behavioral sciences component of the University core curriculum. A student taking remedial courses in Basic English (ENGL 0399) and/or Mathematics (MATH 0300) is not recommended to take this course concurrently.

TCCNS: ECON 2301

ECON 2302 Microeconomics Principles
3 Semester Credit Hours (3 Lecture Hours)
Demand and supply, consumer behavior, elasticity, production costs, perfect and imperfect market structures and models of the modern market price system are analyzed. Emphasis is on use of marginal analysis to determine prices, output, income and economic welfare in a market price system. Satisfies the social and behavioral sciences component of the university core curriculum. A student taking remedial courses in Basic English (ENGL 0399) and/or Mathematics (MATH 0300) is not recommended to take this course concurrently.

TCCNS: ECON 2302

ECON 3310 Intermediate Macroeconomics
3 Semester Credit Hours (3 Lecture Hours)
Theory of the determination of aggregate income, employment and prices is examined. Focus is on the microeconomic foundations of aggregate demand: consumption, investment, foreign trade, and government. Macroeconomic models from the basic through the complete model are examined for the U.S. and global economies.

Prerequisite: (ECON 2301 and 2302).

ECON 3311 Intermediate Microeconomics
3 Semester Credit Hours (3 Lecture Hours)
Examines supply and demand analysis, consumption theory, production theory, structure and performance of firms, efficiency of markets, and determination of general welfare in a market price system.

Prerequisite: (ECON 2301 and 2302).

ECON 3312 Money and Banking
3 Semester Credit Hours (3 Lecture Hours)
Description of the operations of banking and other financial institutions, examination of the basic tenets of monetary theory, analysis of monetary policy and its contribution to economic policy.

Prerequisite: (ECON 2301 and 2302).

ECON 3315 International Economic Issues
3 Semester Credit Hours (3 Lecture Hours)
Evaluates and analyzes various contemporary issues in international economics, using elementary economic theory and recent economic and financial data. The course includes issues such as economic integration, regionalization and globalization, international trade issues, the structure and role of international economic organizations, the foreign exchange market, and economic issues in developing countries.

Prerequisite: (ECON 2301).

ECON 3316 Environmental Economics
3 Semester Credit Hours (3 Lecture Hours)
Uses economic analysis to examine the underlying causes of environmental and natural resource problems, as well as alternative policy issues. The choice of environmental protection goals and the means of achieving them are analyzed and applied to the cases of air pollution (local and global), water pollution, and toxic pollution. The environmental policies of various countries are compared and studied from an economic perspective.

Prerequisite: (ECON 2301 or 2302).
ECON 3320 Public Finance
3 Semester Credit Hours
This course examines the role that government plays in the economy. The course discusses the conditions for economic efficiency to be achieved and circumstances where a market fails. It also presents the concepts of public goods and the aggregation of individual preferences into collective priorities as expressed by the general public through the political process. Topics include taxation, welfare economics, environmental and health externalities, cost-benefit analysis, and government budget. 
Prerequisite: (ECON 2301 or 2302).

ECON 3322 Managerial Economics
3 Semester Credit Hours (3 Lecture Hours)
Emphasis is on the use of economic principles to make sound business decisions. Students will use economic analysis, knowledge of markets and organizations to address real-world problems. The course emphasizes the role of the business economist as a member of the management team trying to find ways to improve the use of resources available to an organization. 
Prerequisite: (ECON 2302).

ECON 3335 Labor Economics
3 Semester Credit Hours (3 Lecture Hours)
The study of labor theory and labor market processes to explain how household labor decisions are made and how household incomes are determined. The effects of labor market imperfections, and the effects of business decisions and labor unions on labor market outcomes are also evaluated. Provides an overview of the U.S. labor movement, including its impact on federal legislation; labor theory; and contemporary labor issues. The effects of federal legislation are examined, including those on the competitiveness of U.S. labor in a global economy. 
Prerequisite: (ECON 2301 and 2302).

ECON 3340 Healthcare Economics
3 Semester Credit Hours (3 Lecture Hours)
The supply and demand for health services. Markets for health professionals and healthcare provider firms. Discusses the roles of insurance, managed care and HMO’s, professional licensure, for-profit and not-for-profit provider firms, and information problems in health care markets; regulation, government financing of health care and health care reform issues in the U.S. 
Prerequisite: (ECON 2301 and 2302).

ECON 4085 Economics Exit Exam
0 Semester Credit Hours
The Economics Exit Exam (EEE) is an exam given in the Fall and Spring semesters only. It is a graduation requirement for all students with a BBA degree in Economics. Students enroll in this course during the semester that they plan to take the EEE. Admission is limited to students who have completed 90 or more semester credit hours.

ECON 4310 Introduction to Econometrics
3 Semester Credit Hours (3 Lecture Hours)
A study of the analysis of quantitative data, with special emphasis on the application of statistical methods to economic problems. The course covers the theory and practice of ordinary least squares regression, application to economics and finance, and selected special topics. Topics include heteroskedasticity, multicollinearity and autocorrelation, qualitative independent and dependent variables, and simple time-series analysis. 
Prerequisite: (ECON 2301, 2302 and ORMS 3310 or MATH 1342).

ECON 4325 Economics of European Integration
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the economics of Western Europe, and by implication, the economic functions of the institutions of the European Union (EU). Students are introduced to economic policy issues which are currently of concern in the European Union, and the analysis of economic problems which are of particular relevance to European Union member states. These include (but are not limited to) the theory of customs unions, optimal currency area theory, the single market, competition policy, and the external trade and development policies of the EU. 
Prerequisite: (ECON 2301 and 2302).

ECON 4340 Topics in Health Economics and Healthcare Policy
3 Semester Credit Hours (3 Lecture Hours)
Examines some aspects of U.S. healthcare decision making and delivery system from an applied and behavioral economics perspective. Topics selected will show students how to apply the principles of economics to analyze healthcare outcomes and institutional effectiveness, as well as government decision making in healthcare. The scope of this course may include analysis of current trends and topics in the U.S. healthcare industry; the utilization and application quantitative skills required to understand and evaluate performance of healthcare organizations, health outcomes, and current healthcare issues. 
Prerequisite: (ECON 3340).

ECON 4388 History of Economic Thought
3 Semester Credit Hours (3 Lecture Hours)
A consideration of the philosophical basis, historical context, and development of economic thinking. Focuses on pre-20th-century economists-the Mercantilists, the Physiocrats, Adam Smith, David Ricardo, Karl Marx, and early neoclassical economists. Attention is also given to later economists and schools of thought as continuations and modifications of earlier ideas in economics. 
Prerequisite: (ECON 3310 and 3311).

ECON 4390 Current Topics in Economics
1-3 Semester Credit Hours (1-3 Lecture Hours)
Selected topics for special study related to economics, the functioning of the economy or economic issues. May be repeated for credit when topics vary. 
Prerequisite: (ECON 2301).

ECON 4396 Directed Individual Study
1-3 Semester Credit Hours
Individual supervised study and a final report. 

ECON 4398 Internship in Economics
3 Semester Credit Hours
Supervised full-time or part-time, off-campus training in a service, manufacturing, or public sector position. Oral and written reports required. 

Finance, BBA
Program Description
The courses required for a finance major are designed to help students prepare for careers in Corporate Financial Management, Investment Planning, Brokerage, Insurance, Commercial Banking, Real Estate and other similar fields. Core courses in finance provide students with a background in security analysis and investments, portfolio management, and financial planning and analysis. The curriculum also covers monetary policy, banking, financial markets, financial reporting, statement analysis, and risk management. Students may select finance electives in their area
of interest such as insurance, real estate, accounting, or expand their knowledge in investments or financial analysis.

Complete the Business Foundation Curriculum in the freshman and sophomore years.

**BBA Student Learning Goals and Objectives**

- **G1. To Be Effective Communicators**
  - O1. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - O2. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.

- **G2. To Be Competent in Business Practices**
  - O1. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.
  - O2. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.
  - O3. Students will effectively analyze data.

- **G3. To Be Good Decision Makers**
  - O1. Students will demonstrate the ability to identify valid, reliable and important information applicable to the issue being studied.
  - O2. Students will demonstrate the ability to analyze multiple responses to issues.
  - O3. Students will demonstrate the ability to determine and support an appropriate decision.

- **G4. To Be Good Citizens**
  - O1. Students will demonstrate the ability to identify ethical concepts.

In addition, all Finance Majors will demonstrate knowledge of key Finance theories and concepts, and will apply these Finance theories and concepts correctly.

**Courses**

**FINA 1307 Personal Finance**

3 Semester Credit Hours (3 Lecture Hours)
Covers the foundations of financial planning, managing basic assets, managing credit, managing insurance needs, managing investments, and retirement and estate planning. This course is designed for nonbusiness as well as business majors to give them a basic understanding of the aspects of personal financial planning.

**TCCNS: BUSI 1307**

**FINA 3310 Financial Management**

3 Semester Credit Hours (3 Lecture Hours)
A survey of financial management issues emphasizing planning and decision making. Specific topics covered include discounted cash flow analysis, stock and bond valuation, financial intermediation, organizing, raising and managing capital, capital investment, risk analysis, and financial statement analysis.

**Prerequisite:** ACCT 2301, MATH 1325 and BUSI 0011.

**FINA 3312 Financial Markets and Institutions**

3 Semester Credit Hours (3 Lecture Hours)
Course coverage includes an analysis of financial markets and institutions; regulation, money market operations, global impact of central banking principles and monetary policy, and determinants of interest rates with financial asset pricing.

**Prerequisite:** (ECON 2301 and 2302).

**FINA 3320 Intermediate Corporate Finance**

3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of financial planning and management with emphasis on capital structure and cost of capital, capital budgeting, and other topics in corporate financial management. The course serves as a framework for understanding a broad range of corporate financial decisions.

**Prerequisite:** (FINA 3310).

**FINA 3331 Investments**

3 Semester Credit Hours (3 Lecture Hours)
Framework of financial markets, valuation of the firm, security analysis, investment equity versus debt, efficiency of market evaluation, diversification efforts, investment goals, and portfolio selection.

**Prerequisite:** (ACCT 2301 and MATH 1325).

**FINA 3335 Financial Modeling**

3 Semester Credit Hours (3 Lecture Hours)
This course will cover the use of spreadsheet analysis in financial applications and introduce students to spreadsheet tools and functions to conduct business and personal financial analysis, valuation of bonds and stocks, and financial forecasting.

**FINA 3350 Cash Management**

3 Semester Credit Hours (3 Lecture Hours)
An examination of the principles and methods of cash and liquidity management with particular attention to funds transfer procedures and requirements. Specific topics include the role of cash management in corporate financial management, a review of relevant accounting concepts, the structure of the financial environment, the system of disbursements and collections, accounts receivable management, accounts payable management, information technology and electronic commerce, cash flow forecasting, short-term investing and borrowing, financial risk management, international treasury management, and management of relationships.

**Prerequisite:** (FINA 3310).

**FINA 3351 Insurance Principles**

3 Semester Credit Hours (3 Lecture Hours)
Fundamentals of risk management as practiced in the commercial life, health, property, and casualty insurance industries.

**FINA 3354 Real Estate Principles**

3 Semester Credit Hours (3 Lecture Hours)
Fundamental real estate covering the basic principles of real estate, providing the background necessary for advanced study in specialized real estate courses.

**FINA 3355 Employee Benefits and Retirement Planning**

3 Semester Credit Hours (3 Lecture Hours)
This course examines the financial aspects of retirement planning as well as employee benefit planning including group insurance plans and the characteristics of the various types of employee benefit plans: life insurance, medical expense, disability, and retirement income.

**FINA 4310 Advanced Financial Management**

3 Semester Credit Hours (3 Lecture Hours)
Application of financial management tools, examination and interpretation of financial statements, and integration of financial policy and structure on overall management of the enterprise. Students will present cases on the material covered in this and earlier courses to demonstrate they are able to collect and analyze data and present recommendations.

**Prerequisite:** (FINA 3320).

**FINA 4315 International Finance**

3 Semester Credit Hours (3 Lecture Hours)
A study of the institutions and relationships of the international financial system as it relates to the balance of payments, foreign exchange risk, arbitrage and the Eurocurrency market. The emphasis is on methods of arbitrage, forecasting exchange rates, and hedging against foreign exchange risk.

**Prerequisite:** (ECON 2301, 2302 and FINA 3310).

**FINA 4321 Financial Institutions Management**

3 Semester Credit Hours (3 Lecture Hours)
A study of major financial institutions and the markets in which they operate, with emphasis on financial decision making and risk management. Topics include financial intermediation theory; measurement and management of interest rate risk, credit risk, off-balance-sheet risk, foreign exchange risk, country risk, and liquidity risk; capital adequacy; and product/market diversification.

**Prerequisite:** (FINA 3310 and ECON 2302).
FINA 4330 Introduction to Derivative Securities
3 Semester Credit Hours (3 Lecture Hours)
Course coverage includes an analysis of financial derivative contracts. The class includes options, futures and forward contracts; in particular commodity trading and hedging strategies will be covered in detail. Swaps and interest rate options will be included in the presentation if time permits. (Prerequisite: MATH 1324).

FINA 4332 Security Analysis and Portfolio Management
3 Semester Credit Hours (3 Lecture Hours)
Evaluation of investment securities of both private and public institutions through external analysis of financial statements and economic conditions, portfolio selection, expected return and risk selection, and conditions of market efficiency. (Prerequisite: FINA 3310, 3331 and ORMS 3310).

FINA 4334 Financial Statement Analysis
3 Semester Credit Hours (3 Lecture Hours)
A detailed study of financial reporting with emphasis upon practical interpretations. Attention will be given to financial statement analysis using financial accounting information and its financial implications. Assignments may differ depending on major. (Prerequisite: ACCT 2301, 2302 and FINA 3310).

FINA 4390 Current Topics in Finance
3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to finance functions, processes or issues. May be repeated for credit when topics vary.

FINA 4396 Directed Individual Study
1-3 Semester Credit Hours
Individual supervised study and completion of a final report.

FINA 4398 Internship in Finance
3 Semester Credit Hours
Supervised full-time or part-time, off-campus training in business or government finance office. Oral and written reports required.

General Business, BBA
Program Description
This program of study provides a broad-based business background for those persons who are interested in a business career but do not wish to specialize in a specific functional area. Study in the various business disciplines provides a broader competency base for those who may want to work in or to manage small businesses or selected not-for-profit organizations. This major provides a background for entry-level work in a broad range of businesses. An On-Campus format provides a mix of online, face-to-face, and blended courses. An Online completion format provides 60 hours of online courses. The course schedule for the Online BBA General Business option will differ from on-campus course offerings and may not include all course options available to on-campus students.

Entry Requirements
Applicants who have completed 42 hours with a GPA of 2.0 or higher may be accepted into the Online General Business BBA Completion Program. Applicants who have completed 60 hours with a GPA of 2.0 or higher may be accepted into the Online General Business BBA Completion Program.

BBA General Business Online Completion
This program of study provides a broad-based business background for those persons who are interested in a business career but do not wish to specialize in a specific functional area. Study in the various business disciplines provides a broader competency base for those who may want to work in or to manage small businesses or selected not-for-profit organizations. This major provides a background for entry-level work in a broad range of businesses. An On-Campus format provides a mix of online, face-to-face, and blended courses. An Online completion format provides 60 hours of online courses. The course schedule for the Online BBA General Business option will differ from on-campus course offerings and may not include all course options available to on-campus students.

Entry Requirements
Applicants who have completed 42 hours with a GPA of 2.0 or higher may be accepted into the Online General Business BBA Completion Program.

Students may transition into the upper division course sequence as they complete the University Core Curriculum and 60 hours including the following courses or their equivalents:

Courses

BUSI 0010 Orientation to Online Learning
0 Semester Credit Hours
This non-credit, no-cost, self-paced web-based course introduces new online MBA and new online Master of Accountancy students to successful online learning practices and the Blackboard Learn environment.

BUSI 0011 Cob Student Code of Ethics and Plagiarism
0 Semester Credit Hours
The emphasis of this non-credit, web-based course is educational. It covers the provisions in the COB Student Code of Ethics and covers information related to the issue of plagiarism. It prepares business majors to successfully complete an online test to meet a requirement for graduation.

BUSI 0088 Graduation Requirements Review
0 Semester Credit Hours
The purpose of this non-credit, web-based course is educational. This no cost course provides important information to prepare students for a successful progression toward graduation.
Prerequisite: MGMT 3312.
Co-requisite: MGMT 3310.

BUSI 1310 Introduction to the Business Environment
3 Semester Credit Hours (3 Lecture Hours)
An overview of the nature of business and its environment. Emphasizes the dynamic role of business in everyday life and its importance to society. Not open to Juniors or Seniors majoring in business.
TCCNS: BUSI 1301

BUSI 4310 International Business
3 Semester Credit Hours (3 Lecture Hours)
An understanding of international business including its importance in today's world, the evolution of international institutions and the monetary system, the differences and similarities among nations and cultures, and the special characteristics of the business functions in a global setting.

Management Information Systems, BBA

Program Description
The MIS program supports students and professionals in their applied use of computers. Information systems supports a variety of business activities using computer systems; it is not intended to prepare software developers.
Student Learning Outcome: Students will demonstrate an understanding of how computer systems support a variety of business activities. Complete the Business Foundation Curriculum in the freshman and sophomore years.

BBA Student Learning Goals and Objectives

- G1. To Be Effective Communicators
  - 01. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - 02. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.
- G2. To Be Competent in Business Practices
  - 01. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.
  - 02. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.
  - 03. Students will effectively analyze data.
- G3. To Be Good Decision Makers
  - 01. Students will demonstrate the ability to identify valid, reliable and important information applicable to the issue being studied.
  - 02. Students will demonstrate the ability to analyze multiple responses to issues.
  - 03. Students will demonstrate the ability to determine and support an appropriate decision.
- G4. To Be Good Citizens
  - 01. Students will demonstrate the ability to identify ethical concepts.
In addition, all Management Information Systems Majors will demonstrate basic knowledge of Management Information Systems theories and an understanding of how to apply concepts correctly.

### MISY 2305 Computer Applications in Business

3 Semester Credit Hours (3 Lecture Hours)

Survey of modern business computer hardware, software, and applications. Opportunities to create programs and use existing application software to solve various management information technology-oriented problems. Emphasizes the end-user’s perspective, and interactions with management information technology.

**TCCNS:** BCIS 1305

### MISY 3310 Management Information Systems Concepts

3 Semester Credit Hours (3 Lecture Hours)

Provides an understanding of the importance of computer-based information in the success of the firm. Illustrates ways in which companies utilize computer systems to strategically compete within certain industries. Emphasis is on the role of information systems within each of the functional areas of business. Major concepts include data management, decision support, and management information systems.

**Prerequisite:** BUSI 0011 and MISY 2305

### MISY 3320 Business Data Communication and Networking I

3 Semester Credit Hours (3 Lecture Hours)

Characteristics of contemporary business data communication components, their configurations, and their impact on management information systems design. Topics include designing, managing, securing, and implementing business data communication networks, and their integration into management information systems. Exercises and assignments use various data communication facilities.

### MISY 3330 Database Management

3 Semester Credit Hours (3 Lecture Hours)

Concepts and methodology of data base planning, design, development, and management of the computerized data base of a management information system. The emphasis is on logical data base design and a study of hierarchical, network, and relational implementations. Normalization exercises are completed relative to the logical design of relational data bases. Exercises and assignments use a relational DBMS package.
MISY 3340  Systems Analysis and Design
3 Semester Credit Hours (3 Lecture Hours)
Develops ability to analyze an existing information system within an organization, to identify information requirements, and to specify the functions of a new information system. Includes cost/benefit analysis of proposed information systems. Exercises and assignments use a Computer Aided Software Engineering (CASE) tool.

MISY 3350  Business Applications Development
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to the fundamental techniques used in the development and programming of software applications. This course is designed for students who have little or no previous computer programming experience. This course will use a scripting and/or visual development programming language.

MISY 4310  Business Data Communications and Networking II
3 Semester Credit Hours (3 Lecture Hours)
Design, implementation, and operation of client-server network systems for organizational Intranets and Internet presence. Exercises and assignments use selected data communications facilities.
Prerequisite: MISY 3320.

MISY 4325  Business Decision Support Systems and Expert Systems
3 Semester Credit Hours (3 Lecture Hours)
A survey of decision support systems and expert systems used in business. Topics include artificial intelligence (AI), knowledge engineering, knowledge acquisition, expert system shells, modeling, simulation, and selection of appropriate computer package support. Exercises and assignments use various computer packages such as neural network systems and expert system shells.

MISY 4330  Website Development for Business
3 Semester Credit Hours (3 Lecture Hours)
This course provides an understanding of the principles and techniques for client-side web development using HTML and CSS. Text editors and the website development software will be used to create and maintain websites. This course includes designing to meet web standards, including accessibility, usability, and workflow for web design.

MISY 4340  Electronic Commerce Management
3 Semester Credit Hours (3 Lecture Hours)
A broad overview of electronic commerce topics as they relate to various users. General coverage includes electronic commerce history, opportunities, limitations, and risks. Technical discussions include the internet, intranets, extranets, firewalls, security, protocols, servers, and browsers.

MISY 4341  Management of Healthcare Information Systems
3 Semester Credit Hours (3 Lecture Hours)
This course provides an overview of the knowledge and skills required to manage information for organizations related to healthcare. The course specifically focuses on the practice of acquiring, analyzing and protecting digital and traditional medical information vital to providing quality patient care. Some of the topics that are covered include: evolution of health care information systems (HCIS), components and basic HCIS functions, technology infrastructure for healthcare organizations, basic concepts such as electronic health records (HER), health information exchange (HIE), computerized physician order entry (CPOE), clinical decision support systems (CDSS), hospital incident command systems (HICS) and standards such as HIPPA, HL7, and digital imaging and communications in medicine (DICOM). Other topics include strategic information systems planning for healthcare organizations, systems analysis and project management, information security and privacy issues, and the roles of HCIS professionals in health organizations.
Prerequisite: (MISY 3310).

MISY 4345  Information Security and Privacy in Healthcare
3 Semester Credit Hours (3 Lecture Hours)
This course provides an overview of the knowledge and skills required to manage information privacy and security for organizations related to healthcare. It focuses on best practices for healthcare information security and privacy with detailed coverage of essential topics such as information governance, roles and occupations, risk assessment and management, incident response, patient rights, healthcare responsibilities, cyberattacks and cybersecurity. Topics also include relevant laws and regulations and other aspects of information security and privacy, with emphasis on real-life scenarios in clinical practices and business operations in healthcare. Course
Prerequisite: (MISY 3310).

MISY 4350  Business Intelligence and Analytics
3 Semester Credit Hours (3 Lecture Hours)
Overview of important concepts of business intelligence, and the use of analytics, technologies, applications and processes used by organizations to gain data-driven insights. These insights and predictions can be used to aid decision-making and performance management across functional areas, including marketing, operations, and finance. Students will learn to extract and manipulate data, and create reports, scorecards and dashboards, including mobile apps. ONLY Juniors or Post-Baccalaureate or Seniors for MISY 4350

MISY 4365  Data Warehousing and Data Mining for Business Intelligence
3 Semester Credit Hours (3 Lecture Hours)
In the information age, organizations can and do collect massive amounts of data. Yet organizations are often "data rich" but "information and knowledge poor". This course is designed to prepare business professionals who, by using analytical methods and data mining and data visualization tools will be able to harness the potential of data by extracting business intelligence that can be used to improve decisions and operations at various points in the value chain.
Prerequisite: MISY 2305, 3330 and ORMS 3310.
MISY 4366 Data Analytics for Healthcare Management
3 Semester Credit Hours (3 Lecture Hours)
The goal of this course is to prepare business professionals to extract business intelligence to improve decisions and operations in organizations, especially in the healthcare industry, at various points in the value chain. Data mining methods covered include multiple linear regression, k-nearest neighbor, classification and regression trees, logistic regression, discriminant analysis, artificial neural networks, association rules, cluster analysis and text mining. Areas in healthcare include healthcare market basket analysis, churn analysis for hospitals and insurance companies, health insurance fraud detection, readmission assessment, personalization of treatment regimen, patient risk management and performance-based payment analysis. Students should have a background in database and statistics. The focus will be less on statistical mathematics and more on the application of data mining methods using software tools.
Prerequisite: MISY 2305, 3330, ORMS 3310 and MISY 4341.

MISY 4375 IT Project Management
3 Semester Credit Hours (3 Lecture Hours)
This course covers issues related to managing projects in organizations. The course focuses on the management of projects and working as a team. Students are expected to draw on materials from other management information system courses, especially the System Analysis and Design, and Database Management courses.
Prerequisite: MISY 3330.

MISY 4390 Current Topics in Management Information Systems
1-3 Semester Credit Hours (1-3 Lecture Hours)
Selected topics for special study related to management information systems.

MISY 4396 Directed Individual Study
1-3 Semester Credit Hours
Individual supervised study and a final report.

MISY 4398 Internship in Management Information Systems
1-3 Semester Credit Hours
Supervised practical experience in business computer systems.

Management, BBA
Program Description
The major is designed to provide entry-level knowledge, skills, and concepts for general management. Management majors take a common core of management courses. These courses provide a basic understanding of the nature of organizations, effective acquisition and utilization of human and physical resources, and the skills required to carry out the managerial functions of planning, organizing, directing, and controlling.

A sound background in management fundamentals, coupled with applied classroom experiences, can accelerate an individual's progress in obtaining positions of greater responsibility. Students completing the major will be better prepared to handle supervisory or managerial positions in profit, not-for-profit, and governmental organizations.

Complete the Business Foundation Curriculum in the freshman and sophomore years.

BBA Student Learning Goals and Objectives
- G1. To Be Effective Communicators
  - O1. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - O2. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.
- G2. To Be Competent in Business Practices
  - O1. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.
  - O2. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.
  - O3. Students will effectively analyze data.
- G3. To Be Good Decision Makers
  - O1. Students will demonstrate the ability to identify valid, reliable and important information applicable to the issue being studied.
  - O2. Students will demonstrate the ability to analyze multiple responses to issues.
  - O3. Students will demonstrate the ability to determine and support an appropriate decision.
- G4. To Be Good Citizens
  - O1. Students will demonstrate the ability to identify ethical concepts.

In addition, all Management Majors will demonstrate knowledge of key Management theories and concepts, and will apply these Management theories and concepts correctly.

BBA General Management Online Completion
The major is designed to provide entry-level knowledge, skills, and concepts for general management. Management majors take a common core of management courses. These courses provide a basic understanding of the nature of organizations, effective acquisition and utilization of human and physical resources, and the skills required to carry out the managerial functions of planning, organizing, directing, and controlling. The general management Online Completion students will broaden their understanding of these basic concepts in their advanced courses. An On-Campus format provides a mix of online, face-to-face, and blended courses. An Online completion format provides 60 hours of online courses. The course schedule for the Online BBA General Management option may differ from on-campus course offerings.

Entry Requirements
Applicants who have completed 42 hours with a GPA of 2.0 or higher may be accepted into the Online General Management BBA Completion Program. Students may transition into the upper division course sequence as they complete the University Core Curriculum and 60 hours including the following courses or their equivalents:

Upper-level Business Elective 3
Business Elective 3
Non-Business Elective 3
Total Hours 122

1. Higher level mathematics course may be accepted as a substitute with approval.

2. All Business Majors and Minors must complete BUSI 0011 Cob Student Code of Ethics and Plagiarism (3 sch) before or during their first semester enrolled in upper-division Business courses.

3. ACCT 3315 Multinational Entities: Accounting and Consolidations (3 sch) may be taken as either International Business Course or as an Accounting Elective but not both.
Students should choose electives that fit their interests and career aspirations. Please be aware that courses cannot be counted as part of the Core Requirements and again as a Management Elective.

* Online offering

^ Blended offering

Note:

Course prerequisites are strictly enforced.

Courses

MGMT 3310 Principles of Management
3 Semester Credit Hours (3 Lecture Hours)
Explores fundamental management principles and theories of organizations. Emphasis is placed on the basic functions of management: planning, organizing, directing, and controlling. Topics include the external environment, ethics, international management, decision making, organizational structure, human resource management and diversity, motivation, group dynamics, and control mechanisms.
Prerequisite: BUSI 0011.

MGMT 3315 Business Communications
3 Semester Credit Hours (3 Lecture Hours)
Introduces the fundamentals of effective communication in business and administration. Emphasis is placed on the application of modern techniques to business writing, professional presentations, group communications, verbal communications, nonverbal communications, and listening.
Prerequisite: BUSI 0011.

MGMT 3318 Organizational Behavior
3 Semester Credit Hours (3 Lecture Hours)
Introduces factors that influence interactions between individuals and groups in work environments. Topics include individual differences and diversity, motivation, leadership, power and influence, conflict, organizational culture, stress, and teams.
Prerequisite: MGMT 3310.

MGMT 3320 Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
Explores the comprehensive set of managerial activities carried out in organizations to develop and maintain a qualified workforce. Topics include the legal environment, recruitment, selection, training, employee appraisals, compensation systems, and employer relations.
Prerequisite: MGMT 3310.

MGMT 3350 Business Ethics and Decision Making
3 Semester Credit Hours (3 Lecture Hours)
Introduces the theory and practice of mission-driven organizations. Emphasis is on understanding unmet social needs and opportunities and creating a viable sustainable social venture.
Prerequisite: MGMT 3310.

MGMT 3355 Organization Change
3 Semester Credit Hours (3 Lecture Hours)
The student will learn the description and analysis of the characteristics that produce creative opportunities and commercially sustainable innovations. This will include learning about the personal and organizational characteristics, business and societal planning tools, and practices of entrepreneurs. Factors inside and outside the entrepreneurial firm that influence creativity and innovation are also considered as they affect successful business decisions.
Prerequisite: MGMT 3310.

MGMT 4305 Organization Staffing
3 Semester Credit Hours (3 Lecture Hours)
Examines the concepts, methods, and problems encountered in the development, validation, and utilization of employee recruitment, selection, training, and career development. Legal defensibility, and organizational effectiveness of staffing and development will be discussed.
Prerequisite: MGMT 3320.

MGMT 4315 Multinational Management
3 Semester Credit Hours (3 Lecture Hours)
A study of management processes and their application across different cultural, economic and legal environments. The course focuses on differences among values, beliefs, perceptions, attitudes and behaviors across national and cultural boundaries that affect the employee work and performance.
Prerequisite: MGMT 3310.
MGMT 4320 Leadership Development
3 Semester Credit Hours (3 Lecture Hours)
A study of traditional and contemporary leadership models, styles, and practices. Focuses on self-assessment and the characteristics of leaders important to effective leadership outcomes.
Prerequisite: MGMT 3310.

MGMT 4350 Small and Family Business
3 Semester Credit Hours (3 Lecture Hours)
Examines the entrepreneurial aspects and the ongoing management of a small and family business enterprise, with a focus on achieving and sustaining competitive advantage. Additional topics include the unique aspects of family business, leadership, decision-making, management, marketing, financial controls and other mission-critical processes.
Prerequisite: MGMT 3310.

MGMT 4370 New Venture Creation
3 Semester Credit Hours (3 Lecture Hours)
New venture creation teaches students how to analyze the feasibility of a new product, service or innovation within the entrepreneurial organization. Students learn to develop business plans necessary for the creation of start-up enterprise to include specific business practices, finances, and obligations of the firms created and maintained by entrepreneurs. Factors inside and outside the entrepreneurial enterprise are researched and analyzed as they affect successful new venture business decisions.

MGMT 4385 Strategic Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
An examination of the issues important to human resource planning. Emphasis is on the processes and activities used to develop human resource objectives, practices, and policies to meet the needs and opportunities of an organization and improve organizational effectiveness.
Prerequisite: MGMT 3320.

MGMT 4388 Business Strategy
3 Semester Credit Hours (3 Lecture Hours)
Analytical process and methodology for policy-strategy formulation, approached as a multi-level, integrative process. Analysis focused on integration of skills and competencies acquired through the BBA program.

MGMT 4390 Current Topics in Management
1-3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to management functions, processes or issues. May be repeated for credit when topics vary.

MGMT 4396 Directed Individual Study
1-3 Semester Credit Hours (3 Lecture Hours)
Individual supervised study and a final report.

MGMT 4398 Internship in Management
3 Semester Credit Hours (3 Lecture Hours)
Supervised full-time or part-time, off-campus training in business or government organization. Oral and written reports required.

Marketing, BBA

Program Description
The marketing curriculum is designed to help students prepare for careers in fields such as retailing, distribution, marketing research, advertising, and personal selling. The program provides knowledge and competencies that facilitate acquiring and succeeding in entry-level positions and moving into marketing management positions or business ownership. Emphasis is on development of analytical skills adequate for and appropriate to professional marketing activities in a highly competitive global market place. Marketing courses stress problem solving and decision making and the development and implementation of competitive policies and strategies.

Complete the Business Foundation Curriculum in the freshman and sophomore years.

BBA Student Learning Goals and Objectives

- G1. To Be Effective Communicators
  - 01. Students will demonstrate the ability to identify the appropriate message purpose, select appropriate organization, provide sufficient supporting details, and use effective mechanics.
  - 02. Students will demonstrate the ability to prepare (content, presentation and media) and deliver (verbally and nonverbally) a professional presentation.

- G2. To Be Competent in Business Practices
  - 01. Students will demonstrate knowledge of key business theories and concepts and will apply these business theories and concepts correctly.
  - 02. Students demonstrate the ability to incorporate theories, concepts, and practices across multiple disciplines to produce practical answers.
  - 03. Students will effectively analyze data.

- G3. To Be Good Decision Makers
  - 01. Students will demonstrate the ability to identify valid, reliable and important information applicable to the issue being studied.
  - 02. Students will demonstrate the ability to analyze multiple responses to issues.
  - 03. Students will demonstrate the ability to determine and support an appropriate decision.

- G4. To Be Good Citizens
  - 01. Students will demonstrate the ability to identify ethical concepts.

In addition, all Marketing Majors will demonstrate knowledge of key marketing theories and concepts, and the ability to apply these theories and concepts.

BBA Marketing Online Completion
The marketing curriculum is designed to help students prepare for careers in fields such as retailing, distribution, marketing research, advertising, and personal selling. The program provides knowledge and competencies that facilitate acquiring and succeeding in entry-level positions and moving into marketing management positions or business ownership. Emphasis is on development of analytical skills adequate for and appropriate to professional marketing activities in a highly competitive global market place. Marketing courses stress problem solving and decision making and the development and implementation of competitive policies and strategies. An On-Campus format provides a mix of online, face-to-face, and blended courses. An Online completion format provides 60 hours of online courses. The course schedule for the Online BBA-Marketing option will differ from on-campus course offerings and may not include all course options available to on-campus students.
Entry Requirements
Applicants who have completed 42 hours with a GPA of 2.0 or higher may be accepted into the Online Marketing BBA Completion Program. Students may transition into the upper division course sequence as they complete the University Core Curriculum and 60 hours including the following courses or their equivalents:

<table>

All Business Majors and Minors must complete BUSI 0011 Cob Student Code of Ethics and Plagiarism (0 sch) before or during their first semester enrolled in upper-division Business courses.

* Online offering

* Blended offering
**Courses**

**MKTG 3310** Principles of Management  
3 Semester Credit Hours (3 Lecture Hours)  
The initial course in Marketing. Description and analysis of the flow of goods, services and ideas to consumers and industrial users. Factors outside the firm are also considered as they affect marketing decisions.  
Prerequisite: BUSI 0011.

**MKTG 3311** Professional Selling: Concepts and Practices  
3 Semester Credit Hours (3 Lecture Hours)  
An introduction to professional selling as a marketing tool. Emphasis is placed on the theory and application of the professional selling process.

**MKTG 3315** Advertising and Promotional Strategy  
3 Semester Credit Hours (3 Lecture Hours)  
The student will learn about the development and implementation of a coordinated and integrated advertising and promotions strategy. Emphasis is placed on the interrelationships among advertising, sales management, and sales promotion activities.  
Prerequisite: MKTG 3310.

**MKTG 3320** Basic Advertising  
3 Semester Credit Hours (3 Lecture Hours)  
Advertising concepts and a critical analysis of commercial advertising practices. Students apply advertising concepts in projects such as case studies, campaign evaluations, and simulation exercises.

**MKTG 3325** Entrepreneurial Marketing  
3 Semester Credit Hours (3 Lecture Hours)  
Entrepreneurial marketing provides entrepreneurs and small business owners with the knowledge needed to successfully perform marketing activities (primarily promotion) on a very low budget. Students will learn the utilization of techniques and the analysis of market characteristics that impact the small entrepreneurial organization, its products and services. Additionally, students will learn how to develop specific yet flexible marketing plans and activities, and the effective management of practices, finances, and obligations associated with the marketing of smaller entrepreneurial firms. Factors inside and outside the firm are researched and analyzed as they affect successful small business marketing decisions.

**MKTG 3330** Consumer Behavior  
3 Semester Credit Hours (3 Lecture Hours)  
An examination of the psychological and social influences that affect consumer decision making. Emphasizes the development of marketing programs designed with behavioral considerations in mind.  
Prerequisite: MKTG 3310.

**MKTG 3333** Digital Marketing  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to the theories, strategies, tools, and techniques of effective online marketing. The course emphasizes the essential concepts, methods, technologies, and decision making criteria for business-to-business and business-to-consumer Internet marketing. The broad concepts of ethics, social responsibilities, sustainability, and globalization are integrated through the course. Topics include online marketing research, business intelligence, Web site design, and Internet marketing strategy.

**MKTG 3340** Retail Management  
3 Semester Credit Hours (3 Lecture Hours)  
A managerial approach to retailing. Topics such as trade area evaluation, buying, layout, pricing, cost and expense analysis are considered.  
Prerequisite: MKTG 3310.

**MKTG 3345** Sales Management  
3 Semester Credit Hours (3 Lecture Hours)  
An exploration of the problems and practices of sales and sales management. Organizational structure and development of programs to assure a competent and effective sales force are stressed.

**MKTG 4310** Distribution Systems in Marketing  
3 Semester Credit Hours (3 Lecture Hours)  
An analysis of the development of integrated distribution systems. Topics include retail and wholesale institutions, channel conflict and cooperation, channel control, franchising and emerging developments in distribution channels.

**MKTG 4320** Marketing Research and Analytics  
3 Semester Credit Hours (3 Lecture Hours)  
The study of research in marketing with emphasis on the collection and interpretation of data and its application to the solution of marketing problems.  
Prerequisite: ORMS 3310 and MKTG 3310.

**MKTG 4340** International Marketing  
3 Semester Credit Hours (3 Lecture Hours)  
A study of the economic, social and cultural environment of international marketing. The course focuses on marketing decision making in this environment.  
Prerequisite: MKTG 3310.
MKTG 4350  Marketing Strategy  
3 Semester Credit Hours (3 Lecture Hours)

The study and application of the strategic marketing planning process to realistic business situations. Topics include: strategies for growth and competitive advantage; market segmentation, targeting and positioning; marketing mix strategies and tactics; customer satisfaction and relationship building; and evaluation and control of marketing strategies. Attention to ethical considerations in marketing and a triple bottom line (TBL) evaluation of marketing outcomes.  
Prerequisite: MKTG 3310.

MKTG 4360  Social Media Marketing  
3 Semester Credit Hours (3 Lecture Hours)

A comprehensive study of Social Marketing strategy and implementation. The course explores the tools, techniques, and strategic logic used in the development and implementation of social media marketing strategy. The course also describes and defines the logic models used for specific plans and programs that affect and are affected by the technology and competitive environments.  
Prerequisite: MKTG 3310.

MKTG 4390  Special Topics in Marketing  
1-3 Semester Credit Hours (3 Lecture Hours)

Selected topics for special study related to marketing functions, processes, or issues. May be repeated for credit when topics vary.

MKTG 4396  Directed Individual Study  
1-3 Semester Credit Hours

Individual supervised study and a final report.

MKTG 4398  Internship in Marketing  
3 Semester Credit Hours

Supervised full-time or part-time, off-campus training in business or government organization. Oral and written reports required.

Certificate Programs

- Entrepreneurship & Innovation, Certificate (p. 90)
- International Business, Certificate (p. 92)

Entrepreneurship & Innovation, Certificate

Program Description

Knowing how to integrate innovation into a student’s chosen profession is crucial for creating thriving communities and careers. The Entrepreneurship & Innovation Certificate Program will teach the essential skills and effective strategies for enhancing working experiences and for starting new opportunities. In classes designed to engage and inspire idea generation, students will learn how to solve problems, seize opportunities, and move from idealized dreams to tangible ventures.

Student Learning Outcomes

The Student Will Benefit From:

- Understanding how to transform ideas into feasible commercial opportunities.
- A wider set of innovation skills that are designed to fit any profession or career path.
- Exposure to the most current practice and theory on innovation and entrepreneurship.
- Insights about the entrepreneurial process and entrepreneurial competencies needed to succeed in a highly competitive global economy.
- The joy of learning how to transform their passion into the source of their livelihood.

The Student should Enroll If:

- There is a desire to be independent.
- Is creative and innovative.
- There is an interest in starting their own venture or enhancing their career.
- They are leaders wishing to solve problems for the betterment of their communities.

Courses

MGMT 3310 Principles of Management
3 Semester Credit Hours (3 Lecture Hours)
Explores fundamental management principles and theories of organizations. Emphasis is placed on the basic functions of management: planning, organizing, directing, and controlling. Topics include the external environment, ethics, international management, decision making, organizational structure, human resource management and diversity, motivation, group dynamics, and control mechanisms. 
Prerequisite: BUSI 0011.

MGMT 3315 Business Communications
3 Semester Credit Hours (3 Lecture Hours)
Introduces the fundamentals of effective communication in business and administration. Emphasis is placed on the application of modern techniques to business writing, professional presentations, group communications, verbal communications, nonverbal communications, and listening. 
Prerequisite: BUSI 0011.

MGMT 3318 Organizational Behavior
3 Semester Credit Hours (3 Lecture Hours)
Introduces factors that influence interactions between individuals and groups in work environments. Topics include individual differences and diversity, motivation, leadership, power and influence, conflict, organizational culture, stress, and teams. 
Prerequisite: MGMT 3310.

MGMT 3320 Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
Explores the comprehensive set of managerial activities carried out in organizations to develop and maintain a qualified workforce. Topics include the legal environment, recruitment, selection, training, employee appraisals, compensation systems, and employer relations. 
Prerequisite: MGMT 3310.

MGMT 3350 Business Ethics and Decision Making
3 Semester Credit Hours (3 Lecture Hours)
Historical and contemporary views of business as a social institution; focus is on the nature of ethics and the utilization of codes of ethics, decision-making processes, critical thinking, and creative problem solving. 
Prerequisite: MGMT 3310.

MGMT 3355 Organization Change
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of group and organization-wide interventions designed to improve the group and organization's ability to cope with change and manage continuous improvement. Emphasis is on developing processes to improve group dynamics, organization-wide health and effectiveness, and on a systems approach to diagnosing and solving problems. 
Prerequisite: MGMT 3310.

MGMT 3360 Social Entrepreneurship
3 Semester Credit Hours (3 Lecture Hours)
Introduces the theory and practice of mission-driven organizations. Emphasis is on understanding unmet social needs and opportunities and creating a viable sustainable social venture. 
Prerequisite: MGMT 3310.

MGMT 3370 Entrepreneurship, Creativity, & Innovation
3 Semester Credit Hours (3 Lecture Hours)
The student will learn the description and analysis of the characteristics that produce creative opportunities and commercially sustainable innovations. This will include learning about the personal and organizational characteristics, business and societal planning tools, and practices of entrepreneurs. Factors inside and outside the entrepreneurial firm that influence creativity and innovation are also considered as they affect successful business decisions. 
Prerequisite: MGMT 3310.

MGMT 4305 Organization Staffing
3 Semester Credit Hours (3 Lecture Hours)
Examines the concepts, methods, and problems encountered in the development, validation, and utilization of employee recruitment, selection, training, and career development. Legal defensibility, and organizational effectiveness of staffing and development will be discussed. 
Prerequisite: MGMT 3320.

MGMT 4315 Multinational Management
3 Semester Credit Hours (3 Lecture Hours)
A study of management processes and their application across different cultural, economic and legal environments. The course focuses on differences among values, beliefs, perceptions, attitudes and behaviors across national and cultural boundaries that affect the employee work and performance. 
Prerequisite: MGMT 3310.

MGMT 4320 Leadership Development
3 Semester Credit Hours (3 Lecture Hours)
A study of traditional and contemporary leadership models, styles, and practices. Focuses on self-assessment and the characteristics of leaders important to effective leadership outcomes. 
Prerequisite: MGMT 3310.

MGMT 4350 Small and Family Business
3 Semester Credit Hours (3 Lecture Hours)
Examines the entrepreneurial aspects and the ongoing management of a small and family business enterprises, with a focus on achieving and sustaining competitive advantage. Additional topics include the unique aspects of family business, leadership, decision-making, management, marketing, financial controls and other mission-critical processes. 
Prerequisite: MGMT 3310.

MGMT 4370 New Venture Creation
3 Semester Credit Hours (3 Lecture Hours)
New venture creation teaches students how to analyze the feasibility of a new product, service or innovation within the entrepreneurial organization. Students learn to develop business plans necessary for the creation of start-up enterprise to include specific business practices, finances, and obligations of the firms created and maintained by entrepreneurs. Factors inside and outside the entrepreneurial enterprise are researched and analyzed as they affect successful new venture business decisions. 

MGMT 4385 Strategic Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
An examination of the issues important to human resource planning. Emphasis is on the processes and activities used to develop human resource objectives, practices, and policies to meet the needs and opportunities of an organization and improve organizational effectiveness. 
Prerequisite: MGMT 3320.
International Business, Certificate

Program Description
(for Business and Non-Business Majors)

This certificate provides students with exposure to the global dimension of business. Exploration of global ideas and issues provides students with the knowledge and skills that enhance their ability to compete in today's complex work environment.

In addition, the student must participate in a College of Business qualified international travel experience as part of their academic degree.

The student will receive a printed certificate from the College of Business upon completion of the requirements. Completion of the certificate will not appear on the student's transcript. All course work will be included on the student's transcript.

Course Sequencing

Certificate Coordinator: Dr. Randall Harris

Students should take the courses in the following sequence to complete in the most timely manner:

Courses

**BUSI 0010 Orientation to Online Learning**
0 Semester Credit Hours
This non-credit, no-cost, self-paced web-based course introduces new online MBA and new online Master of Accountancy students to successful online learning practices and the Blackboard Learn environment.

**BUSI 0011 Cob Student Code of Ethics and Plagiarism**
0 Semester Credit Hours
The emphasis of this non-credit, web-based course is educational. It covers the provisions in the COB Student Code of Ethics and covers information related to the issue of plagiarism. It prepares business majors to successfully complete an online test to meet a requirement for graduation.

**BUSI 0088 Graduation Requirements Review**
0 Semester Credit Hours
The purpose of this non-credit, web-based course is educational. This no cost course provides important information to prepare students for a successful progression toward graduation.

**Prerequisite:** MGMT 3312.

**Co-requisite:** MGMT 3310.

**BUSI 1310 Introduction to the Business Environment**
3 Semester Credit Hours (3 Lecture Hours)
An overview of the nature of business and its environment. Emphasizes the dynamic role of business in everyday life and its importance to society. Not open to Juniors or Seniors majoring in business.

**TCCNS:** BUSI 1301

**BUSI 4310 International Business**
3 Semester Credit Hours (3 Lecture Hours)
An understanding of international business including its importance in today’s world, the evolution of international institutions and the monetary system, the differences and similarities among nations and cultures, and the special characteristics of the business functions in a global setting.

### Courses

**ACCT 2301 Financial Accounting**  
3 Semester Credit Hours (3 Lecture Hours)
**TCCNS:** ACCT 2301  

**ACCT 2302 Managerial Accounting**  
3 Semester Credit Hours (3 Lecture Hours)
The use of accounting information as an aid to management decision making, including performance measurement and budgets.  
**Prerequisite:** ACCT 2301.  
**TCCNS:** ACCT 2302  

**ACCT 3311 Intermediate Accounting I**  
3 Semester Credit Hours (3 Lecture Hours)
An intensive study of the balance sheet accounts and the related income statement accounts. It exposes the student to the various Accounting Principles Board opinions and Financial Accounting Standards Board statements, and International Financial Reporting standards, as these publications affect the various accounts and transactions. It covers the various working capital accounts and operational assets.  
**Prerequisite:** (ACCT 2301 and 2302).  

**ACCT 3312 Intermediate Accounting II**  
3 Semester Credit Hours (3 Lecture Hours)
A continuation of Intermediate Accounting I involving current and non-current liabilities and owner equity accounts, the Statement of Cash Flows, deferred income tax, financial statement analysis and several special problem areas.  
**Prerequisite:** (ACCT 3311).  

**ACCT 3314 Cost Accounting**  
3 Semester Credit Hours (3 Lecture Hours)
A study of procedures and concepts in allocating the costs of firm inputs to outputs, determination and use of standard costs in the control function, profit planning and control techniques used in management decision-making.  
**Prerequisite:** (ACCT 2301 and 2302).  

**ACCT 3315 Multinational Entities: Accounting and Consolidations**  
3 Semester Credit Hours (3 Lecture Hours)
A study of the similarities and differences between U.S. and other countries' accounting and reporting procedures. Basic consolidation of international segments will be covered. Use of spreadsheets and web technology required.  
**Prerequisite:** (ACCT 2302).  

**ACCT 3316 Governmental and Not-for-Profit Accounting**  
3 Semester Credit Hours (3 Lecture Hours)
A study of fund accounting used in governmental entities and non-profit organizations. Emphasis on budgetary and fund accounts.  
**Prerequisite:** (ACCT 2301 and 2302).  

**ACCT 3317 Oil, Gas, & Energy Accounting**  
3 Semester Credit Hours (3 Lecture Hours)
This course covers the basic principles of oil and gas accounting. Course topics include upstream oil and gas operations, successful efforts accounting, full cost pool accounting, accounting for production, exploration and construction, joint interest accounting, international operations, oil and taxation and analysis of oil and gas financial statements.  
**Prerequisite:** (ACCT 3311).  

**ACCT 3321 Federal Income Tax I**  
3 Semester Credit Hours (3 Lecture Hours)
Emphasizes the role of taxation in the business decision-making process. The course introduces the tools to conduct basic tax research and planning.  
**Prerequisite:** (ACCT 2301 and 2302).  

**ACCT 3322 Federal Income Tax II**  
3 Semester Credit Hours (3 Lecture Hours)
Examines additional, more complex topics in business decision-making, tax research, and tax planning.  
**Prerequisite:** (ACCT 3321).  

**ACCT 3340 Fraud Examination**  
3 Semester Credit Hours (3 Lecture Hours)
This course covers the basic principles of fraud examination. Course topics include the behavioral aspects of fraud and common fraud schemes including skimming, larceny, check tampering, register disbursement schemes, billing schemes, payroll and expense reimbursement, non-cash misappropriations, corruption and bribery, and fraudulent financial statements.  
**Prerequisite:** (ACCT 2301 and 2302).
ACCT 4311  Auditing Principles and Procedures
3 Semester Credit Hours (3 Lecture Hours)
Auditing principles and techniques underlying the audit process; procedures used in conducting external audits, reviews and compilations.
Prerequisite: (ACCT 3312).

ACCT 4314  Advanced Accounting Problems
3 Semester Credit Hours (3 Lecture Hours)
A study of advanced accounting topics, including leases, pensions, consolidations, asset retirement obligations, accounting for not-for-profit organizations and government entities and other special problem areas.
Prerequisite: (ACCT 3312).

ACCT 4345  Ethics for Texas CPA Candidates and Business Executives
3 Semester Credit Hours (3 Lecture Hours)
This course will cover ethical theory, ethical reasoning, integrity, objectivity, independence and other core values and regulatory requirements associated with the practice of professional accounting and decision making of other executives, with an emphasis on corporate governance in the post-Sarbanes-Oxley regulatory environment. This course satisfies the ethics requirement of the Texas State Board of Public Accountancy (TSSBP); however, it does not count for advanced accounting hours required to sit for the CPA exam. Students who receive credit for ACCT 4345 cannot also receive credit for ACCT 5345.

ACCT 4355  Accounting Information Systems
3 Semester Credit Hours (3 Lecture Hours)
A study of the role of accounting information systems and related subsystems in both for profit and not-for-profit entities. The relationship of accounting information systems to other systems, including management information systems, is addressed. Concepts are reinforced by the completion of computer-based projects.
Prerequisite: (ACCT 2301, 2302 and MISY 2305).

ACCT 4390  Current Topics in Accounting
3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to accounting functions, processes or issues. May be repeated for credit when topics vary.

ACCT 4396  Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
Individual supervised study and completion of a final report.

ACCT 4398  Accounting Internship
3 Semester Credit Hours (3 Lecture Hours)
Supervised full-time or part-time, off-campus training in public accounting, industry, or government. Oral and written reports required.

Business Administration, Minor
Program Description
(for Nonbusiness Majors)

The minor is designed to provide a foundation of business knowledge for students who want to complement a nonbusiness bachelor's program with a planned business program. Students who select the minor must establish a record with the academic advisor in the College of Business and be certified by the Dean of the College of Business upon application for graduation. A minimum of 18 hours is required for the minor. At least 12 of these hours must be taken at Texas A&M University-Corpus Christi.
ECON 4310 Introduction to Econometrics

Total Hours: 18

Core Curriculum Program

Courses

ECON 1301 Introduction to Economics
3 Semester Credit Hours (3 Lecture Hours)
Non-technical introduction to the structure and functioning of the aggregate economy and selected specific markets. Basic concepts regarding how markets function, regulation, monetary and fiscal policy in a macroeconomic context and some special topics of contemporary relevance are studied. Students are introduced to the basic concepts used in the social and behavioral sciences for measuring and interpreting economic and business conditions. This course cannot be taken to fulfill the Business Core or any Business Major requirements. It is recommended that students who might be interested in majoring in business or economics, take either ECON 2301 or ECON 2302 instead.

TCCNS: ECON 1301

ECON 2301 Macroeconomics Principles
3 Semester Credit Hours (3 Lecture Hours)
An overview of how the economy of the United States is organized and functions in a market price system. Market processes are used to show how resources and incomes are allocated by households and businesses. Determination of national income, employment, price level, interest rates, and growth are the focus of simple analysis techniques. Monetary and fiscal policies are examined including their international dimensions. Satisfies the social and behavioral sciences component of the University core curriculum. A student taking remedial courses in Basic English (ENGL 0399) and/or Mathematics (MATH 0300) is not recommended to take this course concurrently.

TCCNS: ECON 2301

ECON 2302 Microeconomics Principles
3 Semester Credit Hours (3 Lecture Hours)
Demand and supply, consumer behavior, elasticity, production costs, perfect and imperfect market structures and models of the modern market price system are analyzed. Emphasis is on use of marginal analysis to determine prices, output, income and economic welfare in a market price system. Satisfies the social and behavioral sciences component of the university core curriculum. A student taking remedial courses in Basic English (ENGL 0399) and/or Mathematics (MATH 0300) is not recommended to take this course concurrently.

TCCNS: ECON 2302

ECON 3310 Intermediate Macroeconomics
3 Semester Credit Hours (3 Lecture Hours)
The theory of the determination of aggregate income, employment and prices is examined. Focus is on the microeconomic foundations of aggregate demand: consumption, investment, foreign trade, and government. Macroeconomic models from the basic through the complete model are examined for the U.S. and global economies.

Prerequisite: ECON 2301 and 2302.

ECON 3311 Intermediate Microeconomics
3 Semester Credit Hours (3 Lecture Hours)
Examines supply and demand analysis, consumption theory, production theory, structure and performance of firms, efficiency of markets, and determination of general welfare in a market price system.

Prerequisite: ECON 2301 and 2302.

ECON 3312 Money and Banking
3 Semester Credit Hours (3 Lecture Hours)
Description of the operations of banking and other financial institutions, examination of the basic tenets of monetary theory, analysis of monetary policy and its contribution to economic policy.

Prerequisite: (ECON 2301 and 2302).

ECON 3315 International Economic Issues
3 Semester Credit Hours (3 Lecture Hours)
Evaluates and analyzes various contemporary issues in international economics, using elementary economic theory and recent economic and financial data. The course includes issues such as economic integration, regionalization and globalization, international trade issues, the structure and role of international economic organizations, the foreign exchange market, and economic issues in developing countries.

Prerequisite: ECON 2301.

ECON 3316 Environmental Economics
3 Semester Credit Hours (3 Lecture Hours)
Uses economic analysis to examine the underlying causes of environmental and natural resource problems, as well as alternative policy issues. The choice of environmental protection goals and the means of achieving them are analyzed and applied to the cases of air pollution (local and global), water pollution, and toxic pollution. The environmental policies of various countries are compared and studied from an economic perspective.

Prerequisite: (ECON 2301 or 2302).

ECON 3320 Public Finance
3 Semester Credit Hours
This course examines the role that government plays in the economy. The course discusses the conditions for economic efficiency to be achieved and circumstances where a market fails. It also presents the concepts of public goods and the aggregation of individual preferences into collective priorities as expressed by the general public through the political process. Topics include taxation, welfare economics, environmental and health externalities, cost-benefit analysis, and government budget.

Prerequisite: (ECON 2301 or 2302).

ECON 3322 Managerial Economics
3 Semester Credit Hours (3 Lecture Hours)
Emphasis is on the use of economic principles to make sound business decisions. Students will use economic analysis, knowledge of markets and organizations to address real-world problems. The course emphasizes the role of the business economist as a member of the management team trying to find ways to improve the use of resources available to an organization.

Prerequisite: (ECON 2302).

ECON 3335 Labor Economics
3 Semester Credit Hours (3 Lecture Hours)
The study of labor theory and labor market processes to explain how household labor decisions are made and how household incomes are determined. The effects of labor market imperfections, and the effects of business decisions and labor unions on labor market outcomes are also evaluated. Provides an overview of the U.S. labor movement, including its impact on federal legislation; labor theory; and contemporary labor issues. The effects of federal legislation are examined, including those on the competitiveness of U.S. labor in a global economy.

Prerequisite: (ECON 2301 and 2302).
Entrepreneurship, Minor

Program Description
(for Business and Nonbusiness Majors)

This minor is designed for students who wish to supplement their major with applied course work in the field of entrepreneurship and who would like to explore the possibilities of starting their own business. A minimum of 12 hours must be taken at Texas A & M University-Corpus Christi.

Courses

BUSI 0010 Orientation to Online Learning
0 Semester Credit Hours

This non-credit, no-cost, self-paced web-based course introduces new online MBA and new online Master of Accountancy students to successful online learning practices and the Blackboard Learn environment.
BUSI 0011 Cob Student Code of Ethics and Plagiarism
0 Semester Credit Hours
The emphasis of this non-credit, web-based course is educational. It covers the provisions of the COB Student Code of Ethics and covers information related to the issue of plagiarism. It prepares business majors to successfully complete an online test to meet a requirement for graduation.

BUSI 0088 Graduation Requirements Review
0 Semester Credit Hours
The purpose of this non-credit, web-based course is educational. This no cost course provides important information to prepare students for a successful progression toward graduation.

Prerequisite: MGMT 3312.
Co-requisite: MGMT 3310.

BUSI 1310 Introduction to the Business Environment
3 Semester Credit Hours (3 Lecture Hours)
An overview of the nature of business and its environment. Emphasizes the dynamic role of business in everyday life and its importance to society. Not open to Juniors or Seniors majoring in business.
TCCNS: BUSI 1301

BUSI 4310 International Business
3 Semester Credit Hours (3 Lecture Hours)
An understanding of international business including its importance in today's world, the evolution of international institutions and the monetary system, the differences and similarities among nations and cultures, and the special characteristics of the business functions in a global setting.

Finance, Minor
Program Description
(for Business and Nonbusiness Majors)

This minor is designed to serve business and nonbusiness students who are interested in supplementing their major with additional knowledge and skills in the area of Finance. A minimum of 12 hours must be taken at Texas A&M University - Corpus Christi. For additional information, contact the academic advisor in the College of Business.

Designated Electives
Select three of the following: 9

| ACCT 3321 | Federal Income Tax I ³                          |
| FINA 3312 | Financial Markets and Institutions             |
| FINA Elective - Upper Division Finance electives (excluding Finance Internship) | 3, 6 or 9 sch |

Total Hours 18

1 MATH 1325 Calculus for Business & Social Sciences (3 sch) or MATH 2413 Calculus I (4 sch) are required prerequisite for FINA 3310 Financial Management (3 sch)*.

2 ACCT 2301 Financial Accounting (3 sch), MATH 1325 Calculus for Business & Social Sciences (3 sch) or equivalent is required prerequisite for FINA 3331 Investments (3 sch).

3 ACCT 2301 Financial Accounting (3 sch) and ACCT 2302 Managerial Accounting (3 sch) are required prerequisites for ACCT 3321 Federal Income Tax I (3 sch)*.

Other Requirements
A minimum of 12 hours must be taken at Texas A&M University - Corpus Christi.

Courses

FINA 1307 Personal Finance
3 Semester Credit Hours (3 Lecture Hours)
Covers the foundations of financial planning, managing basic assets, managing credit, managing insurance needs, managing investments, and retirement and estate planning. This course is designed for nonbusiness as well as business majors to give them a basic understanding of the aspects of personal financial planning.
TCCNS: BUSI 1307

FINA 3310 Financial Management
3 Semester Credit Hours (3 Lecture Hours)
A survey of financial management issues emphasizing planning and decision making. Specific topics covered include discounted cash flow analysis, stock and bond valuation, financial intermediation, organizing, raising and managing capital, capital investment, risk analysis, and financial statement analysis.
Prerequisite: ACCT 2301, MATH 1325 and BUSI 0011.

FINA 3312 Financial Markets and Institutions
3 Semester Credit Hours (3 Lecture Hours)
Course coverage includes an analysis of financial markets and institutions; regulation, money market operations, global impact of central banking principles and monetary policy, and determinants of interest rates with financial asset pricing.
Prerequisite: (ECON 2301 and 2302).

FINA 3320 Intermediate Corporate Finance
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of financial planning and management with emphasis on capital structure and cost of capital, capital budgeting, and other topics in corporate financial management. The course serves as a framework for understanding a broad range of corporate financial decisions.
Prerequisite: (FINA 3310).

FINA 3331 Investments
3 Semester Credit Hours (3 Lecture Hours)
Framework of financial markets, valuation of the firm, security analysis, investment equity versus debt, efficiency of market evaluation, diversification efforts, investment goals, and portfolio selection.
Prerequisite: (ACCT 2301 and MATH 1325).

FINA 3335 Financial Modeling
3 Semester Credit Hours (3 Lecture Hours)
This course will cover the use of spreadsheet analysis in financial applications and introduce students to spreadsheet tools and functions to conduct business and personal financial analysis, valuation of bonds and stocks, and financial forecasting.
FINA 3350  Cash Management
3 Semester Credit Hours (3 Lecture Hours)
An examination of the principles and methods of cash and liquidity management with particular attention to funds transfer procedures and requirements. Specific topics include the role of cash management in corporate financial management, a review of relevant accounting concepts, the structure of the financial environment, the system of disbursements and collections, accounts receivable management, accounts payable management, information technology and electronic commerce, cash flow forecasting, short-term investing and borrowing, financial risk management, international treasury management, and management of relationships.
Prerequisite: (FINA 3310).

FINA 3351  Insurance Principles
3 Semester Credit Hours (3 Lecture Hours)
Fundamentals of risk management as practiced in the commercial life, health, property, and casualty insurance industries.

FINA 3354  Real Estate Principles
3 Semester Credit Hours (3 Lecture Hours)
Fundamental real estate covering the basic principles of real estate, providing the background necessary for advanced study in specialized real estate courses.

FINA 3355  Employee Benefits and Retirement Planning
3 Semester Credit Hours (3 Lecture Hours)
This course examines the financial aspects of retirement planning as well as employee benefit planning including group insurance plans and the characteristics of the various types of employee benefit plans: life insurance, medical expense, disability, and retirement income.

FINA 4310  Advanced Financial Management
3 Semester Credit Hours (3 Lecture Hours)
Application of financial management tools, examination and interpretation of financial statements, and integration of financial policy and structure on overall management of the enterprise. Students will present cases on the material covered in this and earlier courses to demonstrate they are able to collect and analyze data and present recommendations.
Prerequisite: (FINA 3320).

FINA 4315  International Finance
3 Semester Credit Hours (3 Lecture Hours)
A study of the institutions and relationships of the international financial system as it relates to the balance of payments, foreign exchange risk, arbitrage and the Eurocurrency market. The emphasis is on methods of arbitrage, forecasting exchange rates, and hedging against foreign exchange risk.
Prerequisite: (ECON 2301, 2302 and FINA 3310).

FINA 4321  Financial Institutions Management
3 Semester Credit Hours (3 Lecture Hours)
A study of major financial institutions and the markets in which they operate, with emphasis on financial decision making and risk management. Topics include financial intermediation theory; measurement and management of interest rate risk, credit risk, off-balance-sheet risk, foreign exchange risk, country risk, and liquidity risk; capital adequacy; and product/market diversification.
Prerequisite: (FINA 3310 and ECON 2302).

FINA 4330  Introduction to Derivative Securities
3 Semester Credit Hours (3 Lecture Hours)
Course coverage includes an analysis of financial derivative contracts. The class includes options, futures and forward contracts; in particular commodity trading and hedging strategies will be covered in detail. Swaps and Interest Rate Options will be included in the presentation if time permits.
Prerequisite: (MATH 1324).

FINA 4332  Security Analysis and Portfolio Management
3 Semester Credit Hours (3 Lecture Hours)
Evaluation of investment securities of both private and public institutions through external analysis of financial statements and economic conditions, portfolio selection, expected return and risk selection, and conditions of market efficiency.
Prerequisite: (FINA 3310, 3311 and ORMS 3310).

FINA 4334  Financial Statement Analysis
3 Semester Credit Hours (3 Lecture Hours)
A detailed study of financial reporting with emphasis upon practical interpretations. Attention will be given to financial statement analysis using financial accounting information and its finance implications. Assignments may differ depending on major.
Prerequisite: (ACCT 2301, 2302 and FINA 3310).

FINA 4390  Current Topics in Finance
3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to finance functions, processes or issues. May be repeated for credit when topics vary.

FINA 4396  Directed Individual Study
1-3 Semester Credit Hours
Individual supervised study and completion of a final report.

FINA 4398  Internship in Finance
3 Semester Credit Hours
Supervised full-time or part-time, off-campus training in business or government finance office. Oral and written reports required.

Human Resource Management, Minor
Program Description
(for Business and Nonbusiness Majors)
This minor is designed for students seeking to supplement their major with a human resource management dimension. A minimum of 12 hours must be taken at Texas A & M University-Corpus Christi.

Total Hours 18

Note:
MGMT 4320 Leadership Development (3 sch) may be substituted for FINA 3355 Employee Benefits and Retirement Planning (3 sch) if FINA 3355 is not available.

Courses

MGMT 3310 Principles of Management
3 Semester Credit Hours (3 Lecture Hours)
Explores fundamental management principles and theories of organizations. Emphasis is placed on the basic functions of management: planning, organizing, directing, and controlling. Topics include the external environment, ethics, international management, decision making, organizational structure, human resource management and diversity, motivation, group dynamics, and control mechanisms.
Prerequisite: BUSI 0011.

MGMT 3315 Business Communications
3 Semester Credit Hours (3 Lecture Hours)
Introduces the fundamentals of effective communication in business and administration. Emphasis is placed on the application of modern techniques to business writing, professional presentations, group communications, verbal communications, nonverbal communications, and listening.
Prerequisite: BUSI 0011.

MGMT 3318 Organizational Behavior
3 Semester Credit Hours (3 Lecture Hours)
Introduces factors that influence interactions between individuals and groups in work environments. Topics include individual differences and diversity, motivation, leadership, power and influence, conflict, organizational culture, stress, and teams.
Prerequisite: MGMT 3310.

MGMT 3320 Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
Explores the comprehensive set of managerial activities carried out in organizations to develop and maintain a qualified workforce. Topics include the legal environment, recruitment, selection, training, employee appraisals, compensation systems, and employer relations.
Prerequisite: MGMT 3310.

MGMT 3350 Business Ethics and Decision Making
3 Semester Credit Hours (3 Lecture Hours)
Historical and contemporary views of business as a social institution; focus is on the nature of ethics and the utilization of codes of ethics, decision-making processes, critical thinking, and creative problem solving.
Prerequisite: MGMT 3310.

MGMT 3355 Organization Change
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of group and organization-wide interventions designed to improve the group and organization’s ability to cope with change and manage continuous improvement. Emphasis is on developing processes to improve group dynamics, organization-wide health and effectiveness, and on a systems approach to diagnosing and solving problems.
Prerequisite: MGMT 3310.

MGMT 3360 Social Entrepreneurship
3 Semester Credit Hours (3 Lecture Hours)
Introduces the theory and practice of mission-driven organizations. Emphasis is on understanding unmet social needs and opportunities and creating a viable sustainable social venture.
Prerequisite: MGMT 3310.

MGMT 3370 Entrepreneurship, Creativity, & Innovation
3 Semester Credit Hours (3 Lecture Hours)
The student will learn the description and analysis of the characteristics that produce creative opportunities and commercially sustainable innovations. This will include learning about the personal and organizational characteristics, business and societal planning tools, and practices of entrepreneurs. Factors inside and outside the entrepreneurial firm that influence creativity and innovation are also considered as they affect successful business decisions.
Prerequisite: MGMT 3310.

MGMT 4305 Organization Staffing
3 Semester Credit Hours (3 Lecture Hours)
Examines the concepts, methods, and problems encountered in the development, validation, and utilization of employee recruitment, selection, training, and career development. Legal defensibility, and organizational effectiveness of staffing and development will be discussed.
Prerequisite: MGMT 3320.

MGMT 4315 Multinational Management
3 Semester Credit Hours (3 Lecture Hours)
A study of management processes and their application across different cultural, economic and legal environments. The course focuses on differences among values, beliefs, perceptions, attitudes and behaviors across national and cultural boundaries that affect the employee work and performance.
Prerequisite: MGMT 3310.

MGMT 4320 Leadership Development
3 Semester Credit Hours (3 Lecture Hours)
A study of traditional and contemporary leadership models, styles, and practices. Focuses on self-assessment and the characteristics of leaders important to effective leadership outcomes.
Prerequisite: MGMT 3310.

MGMT 4350 Small and Family Business
3 Semester Credit Hours (3 Lecture Hours)
Examines the entrepreneurial aspects and the ongoing management of a small and family business enterprises, with a focus on achieving and sustaining competitive advantage. Additional topics include the unique aspects of family business, leadership, decision-making, management, marketing, financial controls and other mission-critical processes.
Prerequisite: MGMT 3310.

MGMT 4370 New Venture Creation
3 Semester Credit Hours (3 Lecture Hours)
New venture creation teaches students how to analyze the feasibility of a new product, service or innovation within the entrepreneurial organization. Students learn to develop business plans necessary for the creation of start-up enterprise to include specific business practices, finances, and obligations of the firms created and maintained by entrepreneurs. Factors inside and outside the entrepreneurial enterprise are researched and analyzed as they affect successful new venture business decisions.

MGMT 4385 Strategic Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
An examination of the issues important to human resource planning. Emphasis is on the processes and activities used to develop human resource objectives, practices, and policies to meet the needs and opportunities of an organization and improve organizational effectiveness.
Prerequisite: MGMT 3320.
MGMT 4388 Business Strategy
3 Semester Credit Hours (3 Lecture Hours)
Analytical process and methodology for policy-strategy formulation, approached as a multi-level, integrative process. Analysis focused on integration of skills and competencies acquired through the BBA program.

MGMT 4390 Current Topics in Management
1-3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to management functions, processes or issues. May be repeated for credit when topics vary.

MGMT 4396 Directed Individual Study
1-3 Semester Credit Hours (3 Lecture Hours)
Individual supervised study and a final report.

MGMT 4398 Internship in Management
3 Semester Credit Hours (3 Lecture Hours)
Supervised full-time or part-time, off-campus training in business or government organization. Oral and written reports required.

International Business, Minor
Program Description
(for Business and NonBusiness Majors)
This minor is designed to serve students who are interested in supplementing their major with a global dimension. A minimum of 12 hours must be taken at Texas A&M University-Corpus Christi. For additional information, contact the academic advisor in the College of Business.

Courses
BUSI 0010 Orientation to Online Learning
0 Semester Credit Hours
This non-credit, no-cost, self-paced web-based course introduces new online MBA and new online Master of Accountancy students to successful online learning practices and the Blackboard Learn environment.

BUSI 0011 Cob Student Code of Ethics and Plagiarism
0 Semester Credit Hours
The emphasis of this non-credit, web-based course is educational. It covers the provisions in the COB Student Code of Ethics and covers information related to the issue of plagiarism. It prepares business majors to successfully complete an online test to meet a requirement for graduation.

BUSI 0088 Graduation Requirements Review
0 Semester Credit Hours
The purpose of this non-credit, web-based course is educational. This no cost course provides important information to prepare students for a successful progression toward graduation.

Prerequisite: MGMT 3312.
Co-requisite: MGMT 3310.

BUSI 1310 Introduction to the Business Environment
3 Semester Credit Hours (3 Lecture Hours)
An overview of the nature of business and its environment. Emphasizes the dynamic role of business in everyday life and its importance to society. Not open to Juniors or Seniors majoring in business.

TCCNS: BUSI 1301

BUSI 4310 International Business
3 Semester Credit Hours (3 Lecture Hours)
An understanding of international business including its importance in today's world, the evolution of international institutions and the monetary system, the differences and similarities among nations and cultures, and the special characteristics of the business functions in a global setting.

Management Information Systems, Minor
Program Description
(for Business and Nonbusiness Majors)
This minor is designed for students who are interested in supplementing their major with applied computer knowledge. A minimum of 12 hours must be taken at Texas A&M University-Corpus Christi. For additional information contact the academic advisor in the College of Business.

Courses
MISY 2305 Computer Applications in Business
3 Semester Credit Hours (3 Lecture Hours)
Survey of modern business computer hardware, software, and applications. Opportunities to create programs and use existing application software to solve various management information technology-oriented problems. Emphasizes the end-user's perspective, and interactions with management information technology.

TCCNS: BCIS 1305
MISY 3310 Management Information Systems Concepts  
3 Semester Credit Hours (3 Lecture Hours)  
Provides an understanding of the importance of computer-based information in the success of the firm. Illustrates ways in which companies utilize computer systems to strategically compete within certain industries. Emphasis is on the role of information systems within each of the functional areas of business. Major concepts include data management, decision support, and management information systems.  
Prerequisite: BUSI 0011 and MISY 2305.

MISY 3320 Business Data Communication and Networking I  
3 Semester Credit Hours (3 Lecture Hours)  
Characteristics of contemporary business data communication components, their configurations, and their impact on management information systems design. Topics include designing, managing, securing, and implementing business data communication networks, and their integration into management information systems. Exercises and assignments use various data communication facilities.

MISY 3330 Database Management  
3 Semester Credit Hours (3 Lecture Hours)  
Concepts and methodology of data base planning, design, development, and management of the computerized data base of a management information system. The emphasis is on logical data base design and a study of hierarchical, network, and relational implementations. Normalization exercises are completed relative to the logical design of relational data bases. Exercises and assignments use a relational DBMS package.

MISY 3340 Systems Analysis and Design  
3 Semester Credit Hours (3 Lecture Hours)  
Develops ability to analyze an existing information system within an organization, to identify information requirements, and to specify the functions of a new information system. Includes cost/benefit analysis of proposed information systems. Exercises and assignments use a Computer Aided Software Engineering (CASE) tool.

MISY 3350 Business Applications Development  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to the fundamental techniques used in the development and programming of software applications. This course is designed for students who have little or no previous computer programming experience. This course will use a scripting and/or visual development programming language.

MISY 4310 Business Data Communications and Networking II  
3 Semester Credit Hours (3 Lecture Hours)  
Design, implementation, and operation of client-server network systems for organizational Intranets and Internet presence. Exercises and assignments use selected data communications facilities.  
Prerequisite: MISY 3320.

MISY 4325 Business Decision Support Systems and Expert Systems  
3 Semester Credit Hours (3 Lecture Hours)  
A survey of decision support systems and expert systems used in business. Topics include artificial intelligence (AI), knowledge engineering, knowledge acquisition, expert system shells, modeling, simulation, and selection of appropriate computer package support. Exercises and assignments use various computer packages such as neural network systems and expert system shells.

MISY 4330 Website Development for Business  
3 Semester Credit Hours (3 Lecture Hours)  
This course provides an understanding of the principles and techniques for client-side web development using HTML and CSS. Text editors and the website development software will be used to create and maintain websites. This course includes designing to meet web standards, including accessibility, usability, and workflow for web design.

MISY 4340 Electronic Commerce Management  
3 Semester Credit Hours (3 Lecture Hours)  
A broad overview of electronic commerce topics as they relate to various users. General coverage includes electronic commerce history, opportunities, limitations, and risks. Technical discussions include the internet, intranets, extranets, firewalls, security, protocols, servers, and browsers.

MISY 4341 Management of Healthcare Information Systems  
3 Semester Credit Hours (3 Lecture Hours)  
This course provides an overview of the knowledge and skills required to manage information for organizations related to healthcare. The course specifically focuses on the practice of acquiring, analyzing and protecting digital and traditional medical information vital to providing quality patient care. Some of the topics that are covered include: evolution of health care information systems (HCIS), components and basic HCIS functions, technology infrastructure for healthcare organizations, basic concepts such as electronic health records (HER), health information exchange (HIE), computerized physician order entry (CPOE), clinical decision support systems (CDSS), hospital incident command systems (HICS) and standards such as HIPPA, HL7, and digital imaging and communications in medicine (DICOM). Other topics include strategic information systems planning for healthcare organizations, systems analysis and project management, information security and privacy issues, and the roles of HCIS professionals in health organizations.  
Prerequisite: (MISY 3310).

MISY 4345 Information Security and Privacy in Healthcare  
3 Semester Credit Hours (3 Lecture Hours)  
This course provides an overview of the knowledge and skills required to manage information privacy and security for organizations related to healthcare. It focuses on best practices for healthcare information security and privacy with detailed coverage of essential topics such as information governance, roles and occupations, risk assessment and management, incident response, patient rights, healthcare responsibilities, cyberattacks and cybersecurity. Topics also include relevant laws and regulations and other aspects of information security and privacy, with emphasis on real-life scenarios in clinical practices and business operations in healthcare. Course  
Prerequisite: (MISY 3310).

MISY 4350 Business Intelligence and Analytics  
3 Semester Credit Hours (3 Lecture Hours)  
Overview of important concepts of business intelligence, and the use of analytics, technologies, applications and processes used by organizations to gain data-driven insights. These insights and predictions can be used to aid decision-making and performance management across functional areas, including marketing, operations, and finance. Students will learn to extract and manipulate data, and create reports, scorecards and dashboards, including mobile apps. ONLY Juniors or Post-Baccalaureate or Seniors for MISY 4350.
MISY 4365 Data Warehousing and Data Mining for Business Intelligence
3 Semester Credit Hours (3 Lecture Hours)
In the information age, organizations can and do collect massive amounts of data. Yet organizations are often "data rich" but "information and knowledge poor". This course is designed to prepare business professionals who, by using analytical methods and data mining and data visualization tools will be able to harness the potential of data by extracting business intelligence that can be used to improve decisions and operations at various points in the value chain.
Prerequisite: Misy 2305, 3330 and ORMS 3310.

MISY 4366 Data Analytics for Healthcare Management
3 Semester Credit Hours (3 Lecture Hours)
The goal of this course is to prepare business professionals to extract business intelligence to improve decisions and operations in organizations, especially in the healthcare industry, at various points in the value chain. Data mining methods covered include multiple linear regression, k-nearest neighbor, classification and regression trees, logistic regression, discriminant analysis, artificial neural networks, association rules, cluster analysis and text mining. Areas in healthcare include healthcare market basket analysis, churn analysis for hospitals and insurance companies, health insurance fraud detection, readmission assessment, personalization of treatment regimen, patient risk management and performance-based payment analysis. Students should have a background in database and statistics. The focus will be less on statistical mathematics and more on the application of data mining methods using software tools.
Prerequisite: (Misy 2305, 3330, ORMS 3310 and MISY 4341).

MISY 4375 IT Project Management
3 Semester Credit Hours (3 Lecture Hours)
This course covers issues related to managing projects in organizations. The course focuses on the management of projects and working as a team. Students are expected to draw on materials from other management information system courses, especially the System Analysis and Design, and Database Management courses.
Prerequisite: MISY 3330.

MISY 4390 Current Topics in Management Information Systems
1-3 Semester Credit Hours (1-3 Lecture Hours)
Selected topics for special study related to management information systems.

MISY 4396 Directed Individual Study
1-3 Semester Credit Hours
Individual supervised study and a final report.

MISY 4398 Internship in Management Information Systems
1-3 Semester Credit Hours
Supervised practical experience in business computer systems.

Management, Minor
Program Description
(for Business and Nonbusiness Majors)
This minor is designed for students seeking to supplement their major with a management dimension. A minimum of 12 hours must be taken at Texas A&M University-Corpus Christi. For additional information, contact the academic advisor in the College of Business.

Total Hours: 18

Courses

MGMT 3310 Principles of Management
3 Semester Credit Hours (3 Lecture Hours)
Explores fundamental management principles and theories of organizations. Emphasis is placed on the basic functions of management: planning, organizing, directing, and controlling. Topics include the external environment, ethics, international management, decision making, organizational structure, human resource management and diversity, motivation, group dynamics, and control mechanisms.
Prerequisite: BUSI 0011.

MGMT 3315 Business Communications
3 Semester Credit Hours (3 Lecture Hours)
Introduces the fundamentals of effective communication in business and administration. Emphasis is placed on the application of modern techniques to business writing, professional presentations, group communications, verbal communications, nonverbal communications, and listening.
Prerequisite: BUSI 0011.

MGMT 3318 Organizational Behavior
3 Semester Credit Hours (3 Lecture Hours)
Introduces factors that influence interactions between individuals and groups in work environments. Topics include individual differences and diversity, motivation, leadership, power and influence, conflict, organizational culture, stress, and teams.
Prerequisite: MGMT 3310.

MGMT 3320 Human Resource Management
3 Semester Credit Hours (3 Lecture Hours)
Explores the comprehensive set of managerial activities carried out in organizations to develop and maintain a qualified workforce. Topics include the legal environment, recruitment, selection, training, employee appraisals, compensation systems, and employer relations.
Prerequisite: MGMT 3310.

MGMT 3350 Business Ethics and Decision Making
3 Semester Credit Hours (3 Lecture Hours)
Historical and contemporary views of business as a social institution; focus is on the nature of ethics and the utilization of codes of ethics, decision-making processes, critical thinking, and creative problem solving.
Prerequisite: MGMT 3310.
MGMT 3355 Organization Change  
3 Semester Credit Hours (3 Lecture Hours)  
An in-depth study of group and organization-wide interventions designed to improve the group and organization's ability to cope with change and manage continuous improvement. Emphasis is on developing processes to improve group dynamics, organization-wide health and effectiveness, and on a systems approach to diagnosing and solving problems.  
Prerequisite: MGMT 3310.

MGMT 3360 Social Entrepreneurship  
3 Semester Credit Hours (3 Lecture Hours)  
Introduces the theory and practice of mission-driven organizations. Emphasis is on understanding unmet social needs and opportunities and creating a viable sustainable social venture.  
Prerequisite: MGMT 3310.

MGMT 3370 Entrepreneurship, Creativity, & Innovation  
3 Semester Credit Hours (3 Lecture Hours)  
The student will learn the description and analysis of the characteristics that produce creative opportunities and commercially sustainable innovations. This will include learning about the personal and organizational characteristics, business and societal planning tools, and practices of entrepreneurs. Factors inside and outside the entrepreneurial firm that influence creativity and innovation are also considered as they affect successful business decisions.  
Prerequisite: MGMT 3310.

MGMT 4305 Organization Staffing  
3 Semester Credit Hours (3 Lecture Hours)  
Examines the concepts, methods, and problems encountered in the development, validation, and utilization of employee recruitment, selection, training, and career development. Legal defensibility, and organizational effectiveness of staffing and development will be discussed.  
Prerequisite: MGMT 3320.

MGMT 4315 Multinational Management  
3 Semester Credit Hours (3 Lecture Hours)  
A study of management processes and their application across different cultural, economic and legal environments. The course focuses on differences among values, beliefs, perceptions, attitudes and behaviors across national and cultural boundaries that affect the employee work and performance.  
Prerequisite: MGMT 3310.

MGMT 4320 Leadership Development  
3 Semester Credit Hours (3 Lecture Hours)  
A study of traditional and contemporary leadership models, styles, and practices. Focuses on self-assessment and the characteristics of leaders important to effective leadership outcomes.  
Prerequisite: MGMT 3310.

MGMT 4350 Small and Family Business  
3 Semester Credit Hours (3 Lecture Hours)  
Examines the entrepreneurial aspects and the ongoing management of a small and family business enterprises, with a focus on achieving and sustaining competitive advantage. Additional topics include the unique aspects of family business, leadership, decision-making, management, marketing, financial controls and other mission-critical processes.  
Prerequisite: MGMT 3310.

MGMT 4370 New Venture Creation  
3 Semester Credit Hours (3 Lecture Hours)  
New venture creation teaches students how to analyze the feasibility of a new product, service or innovation within the entrepreneurial organization. Students learn to develop business plans necessary for the creation of start-up enterprise to include specific business practices, finances, and obligations of the firms created and maintained by entrepreneurs. Factors inside and outside the entrepreneurial enterprise are researched and analyzed as they affect successful new venture business decisions.

MGMT 4385 Strategic Human Resource Management  
3 Semester Credit Hours (3 Lecture Hours)  
An examination of the issues important to human resource planning. Emphasis is on the processes and activities used to develop human resource objectives, practices, and policies to meet the needs and opportunities of an organization and improve organizational effectiveness.  
Prerequisite: MGMT 3320.

MGMT 4388 Business Strategy  
3 Semester Credit Hours (3 Lecture Hours)  
Analytical process and methodology for policy-strategy formulation, approached as a multi-level, integrative process. Analysis focused on integration of skills and competencies acquired through the BBA program.

MGMT 4390 Current Topics in Management  
1-3 Semester Credit Hours (3 Lecture Hours)  
Selected topics for special study related to management functions, processes or issues. May be repeated for credit when topics vary.

MGMT 4396 Directed Individual Study  
1-3 Semester Credit Hours (3 Lecture Hours)  
Individual supervised study and a final report.

MGMT 4398 Internship in Management  
3 Semester Credit Hours (3 Lecture Hours)  
Supervised full-time or part-time, off-campus training in business or government organization. Oral and written reports required.

Marketing, Minor  
Program Description  
(for Business and Nonbusiness Majors)  
This minor is designed to serve students who are interested in supplementing their major with additional basic knowledge and skills in marketing. A minimum of 12 hours must be taken at Texas A&M University-Corpus Christi. For additional information, contact the academic advisor in the College of Business.

Since MKTG 3310 Principles of Marketing (3 sch) is required for business majors as part of the business core, business majors will take an additional 3 hour course from the electives for the minor in marketing.

Courses

**MKTG 3310 Principles of Marketing**
3 Semester Credit Hours (3 Lecture Hours)
The initial course in Marketing. Description and analysis of the flow of goods, services and ideas to consumers and industrial users. Factors outside the firm are also considered as they affect marketing decisions.
Prerequisite: BUSI 0011.

**MKTG 3311 Professional Selling: Concepts and Practices**
3 Semester Credit Hours (3 Lecture Hours)
An introduction to professional selling as a marketing tool. Emphasis is placed on the theory and application of the professional selling process.

**MKTG 3315 Advertising and Promotional Strategy**
3 Semester Credit Hours (3 Lecture Hours)
The student will learn about the development and implementation of a coordinated and integrated advertising and promotions strategy. Emphasis is placed on the interrelationships among advertising, sales management, and sales promotion activities.
Prerequisite: MKTG 3310.

**MKTG 3320 Basic Advertising**
3 Semester Credit Hours (3 Lecture Hours)
Advertising concepts and a critical analysis of commercial advertising practices. Students apply advertising concepts in projects such as case studies, campaign evaluations, and simulation exercises.

**MKTG 3325 Entrepreneurial Marketing**
3 Semester Credit Hours (3 Lecture Hours)
Entrepreneurial marketing provides entrepreneurs and small business owners with the knowledge needed to successfully perform marketing activities (primarily promotion) on a very low budget. Students will learn the utilization of techniques and the analysis of market characteristics that impact the small entrepreneurial organization, its products and services. Additionally, students will learn how to develop specific yet flexible marketing plans and activities, and the effective management of practices, finances, and obligations associated with the marketing of smaller entrepreneurial firms. Factors inside and outside the firm are researched and analyzed as they affect successful small business marketing decisions.

**MKTG 3330 Consumer Behavior**
3 Semester Credit Hours (3 Lecture Hours)
An examination of the psychological and social influences that affect consumer decision making. Emphasizes the development of marketing programs designed with behavioral considerations in mind.
Prerequisite: MKTG 3310.

**MKTG 3333 Digital Marketing**
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to the theories, strategies, tools, and techniques of effective online marketing. The course emphasizes the essential concepts, methods, technologies, and decision making criteria for business-to-business and business-to-consumer Internet marketing. The broad concepts of ethics, social responsibilities, sustainability, and globalization are integrated through the course. Topics include online marketing research, business intelligence, Web site design, and Internet marketing strategy.

**MKTG 3340 Retail Management**
3 Semester Credit Hours (3 Lecture Hours)
A managerial approach to retailing. Topics such as trade area evaluation, buying, layout, pricing, cost and expense analysis are considered.
Prerequisite: MKTG 3310.

**MKTG 3345 Sales Management**
3 Semester Credit Hours (3 Lecture Hours)
An exploration of the problems and practices of sales and sales management. Organizational structure and development of programs to assure a competent and effective sales force are stressed.
Prerequisite: MKTG 3310.

**MKTG 4310 Distribution Systems in Marketing**
3 Semester Credit Hours (3 Lecture Hours)
An analysis of the development of integrated distribution systems. Topics include retail and wholesale institutions, channel conflict and cooperation, channel control, franchising and emerging developments in distribution channels.
Prerequisite: MKTG 3310.

**MKTG 4320 Marketing Research and Analytics**
3 Semester Credit Hours (3 Lecture Hours)
The study of research in marketing with emphasis on the collection and interpretation of data and its application to the solution of marketing problems.
Prerequisite: ORMS 3310 and MKTG 3310.

**MKTG 4340 International Marketing**
3 Semester Credit Hours (3 Lecture Hours)
A study of the economic, social and cultural environment of international marketing. The course focuses on marketing decision making in this environment.
Prerequisite: MKTG 3310.

**MKTG 4350 Marketing Strategy**
3 Semester Credit Hours (3 Lecture Hours)
The study and application of the strategic marketing planning process to realistic business situations. Topics include: strategies for growth and competitive advantage; market segmentation, targeting and positioning; marketing mix strategies and tactics; customer satisfaction and relationship building; and evaluation and control of marketing strategies. Attention to ethical considerations in marketing and a triple bottom line (TBL) evaluation of marketing outcomes.
Prerequisite: MKTG 3310.

**MKTG 4360 Social Media Marketing**
3 Semester Credit Hours (3 Lecture Hours)
A comprehensive study of Social Marketing strategy and implementation. The course explores the tools, techniques, and strategic logic used in the development and implementation of social media marketing strategy. The course also describes and defines the logic models used for specific plans and programs that affect and are affected by the technology and competitive environments.
Prerequisite: MKTG 3310.
MKTG 4390 Special Topics in Marketing
1-3 Semester Credit Hours (3 Lecture Hours)
Selected topics for special study related to marketing functions, processes, or issues. May be repeated for credit when topics vary.

MKTG 4396 Directed Individual Study
1-3 Semester Credit Hours
Individual supervised study and a final report.

MKTG 4398 Internship in Marketing
3 Semester Credit Hours
Supervised full-time or part-time, off-campus training in business or government organization. Oral and written reports required.

College of Education and Human Development

“Expanding Possibilities, Creating Solutions”

Mission
The College of Education and Human Development at Texas A&M University–Corpus Christi, devoted to excellence in instruction, research, and service, prepares leaders representing diverse backgrounds and experiences, to serve the educational needs in the global community.

Catalog Subject To Change
Our programs may be required to respond to inter-catalog edition mandates for curricular and or policy changes required by outside accreditation, licensing and certification requirements. Required timelines for these responses may not allow for standard college and university-based review process. In such cases, programs will publish and disseminate information about changes on website and current student handbook addenda. Examples include Texas Education Agency (TEA), Texas Coordinating Board for Higher Education (TCBHE), Council for Accreditation of Counseling & Related Educational Programs (CACREP) and the Commission on Accreditation of Athletic Training Education (CAATE).

Undergraduate Programs
The College of Education and Human Development (COEHD) offers the Bachelor of Science Degree with majors in Elementary Education, Kinesiology, and Sport Management. The Bachelor of Applied Arts and Sciences in Childhood Development/Early Childhood Education degree is designed for graduates of Applied Arts and Sciences programs in Child Development, as well as child care providers who seek additional qualifications (see College of Liberal Arts (p. 212) for degree program description). Students may also receive a military commission through the Military Science program and a minor in Military Science.

Field-Based Program
The COEHD is committed to a field-based professional development program. Early in their program, students are required to spend a significant portion of their professional development courses observing and working with experienced teachers in the local school districts. Subsequent course work is taught at the school sites, with the students utilizing the setting to become actively involved in applying the concepts learned in the lectures. The field-based program culminates in the clinical teaching experience, wherein the student is assigned on a one-to-one basis with an experienced master teacher and moves from observation, through cooperative teaching, to full responsibility for a class.

Undergraduate Program General Requirements
General University degree requirements are discussed in the “Undergraduate Programs (p. 42)” section of this catalog. COEHD degree requirements follow:

Total Hours
A minimum of 120 semester hours of credit is required for graduation. Some curricula or combinations of fields require more. No developmental course work may be applied toward the degree.

Grade Point Average
Requirements for graduation include a minimum grade point average of 2.00 on a four-point scale on all academic work attempted, and a minimum grade point average of 2.00 in the major field(s) of study. For admission to and retention in teacher education, the GPA requirement is 2.75 on all any coursework previously attempted or on the last 60 hours attempted at a public or private institution of higher education (TEC 21.0441).

Texas Success Initiative (TSI) Requirement
Before entering the final phase of a teacher education program, the state requires that you demonstrate your critical thinking and analytical skills. The TSI test is designed to evaluate this. The required scores and exemptions are below. Please contact Carol Pike at Carol.Pike@tamucc.edu or 361-825-3074 for exemption clarifications.

<table>
<thead>
<tr>
<th>Score</th>
<th>Section</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

You do not have to take the TSI Assessment test if you:

- have graduated with an associate or baccalaureate degree from an institution of higher education; or
- have transferred from a private or independent institution of higher education or an accredited out-of-state institution of higher education and have satisfactorily completed college-level coursework as determined by the receiving institution; or
- have previously attended any institution of higher education and have been determined to have met college readiness standards by that institution; or
- are student who is enrolled in a certificate program of one year or less (Level-One certificates, 42 or fewer semester credit hours or the equivalent) at a public junior college, a public technical institute, or a public state college; or
- are serving on active duty as a member of the armed forces of the United States, the Texas National Guard, or as a member of a reserve component of the armed forces of the United States and have been serving for at least three years preceding enrollment; or
- on or after August 1, 1990, were honorably discharged, retired, or released from active duty as a member of the armed forces of the United States or the Texas National Guard or service as a member of a reserve component of the armed forces of the United States; or
- are enrolled at TAMU on a temporary basis as a non-degree-seeking or non-certificate-seeking student (must be classified as a “UO” at TAMU)
The following tests can be used to exempt you from one or more parts of the TSI Assessment:

**SAT (administered prior to March 2016):**

- A minimum combined critical reading and mathematics score of 1070 with a minimum score of 500 on the mathematics test for a TSI exemption in math;
- A minimum combined critical reading and mathematics score of 1070 with a minimum score of 500 on the critical reading test for a TSI exemption in both reading and writing

**SAT (administered on or after March 5, 2016):**

- A minimum score of 530 on the Mathematics test for a TSI exemption in math (no combined score required);
- A minimum score of 480 on the Evidenced-Based Reading & Writing (EBRW) for a TSI exemption in both reading and writing (no combined score required)

*Mixing or combining scores from the SAT administered prior to March 2016 and the SAT administered on or after March 5, 2016 is not allowed.*

Students must attend college within five (5) years from the date of the SAT test in order to use the scores for an exemption.

**ACT**

A student must first achieve a minimum composite score of 23 with:

- At least 19 on math for an exemption in math and/or
- At least 19 on English for an exemption in reading and writing

Students must attend college within five (5) years from the date of the test in order to use the scores for an exemption.

**TAKS**

- A minimum score of 2200 in math for an exemption in math and/or
- 2200 in English Language Arts—with a writing sub-score of 3—for an exemption in reading and writing.

Students must attend college within five (5) years from the date of their 11th grade exit-level Texas Assessment of Knowledge and Skills (TAKS) test in order to use the scores for an exemption.

**SSTAAR End-of-Course (EOC) Assessment**

- Algebra II—a minimum score of Level 2 (4000 for the 2016-17 academic year) for an exemption in mathematics
- English III—a minimum score of Level 2 (4000 for the 2016-17 academic year) for an exemption in integrated reading and writing

Students must attend college within five (5) years from the date of their STAAR End-of-Course (EOC) test in order to use the scores for an exemption.

More information is available at the TSI [web site](http://testing.tamucc.edu/tsi_assessment/).

**Degree Plans**

Students interested in seeking a degree offered by the College of Education and Human Development are encouraged to see an academic advisor to discuss their interests. After consultation with the student, the academic advisor will prepare a degree plan and assign a faculty advisor who will mentor the student regarding academic and career interests. Once reviewed by the faculty advisor and the certification officer, the degree plan will be labeled “official” by the academic advisor. The degree plan will follow the student through to graduation. Students are encouraged to visit their academic and faculty advisors once a semester to audit their progress and ensure they are following their designated plan. Students may change official degree plans by seeing an academic advisor and repeating the process.

### Requirements for Programs Leading to Teacher Certification

#### Admission to and Retention in the Teacher Education Program

Students following a degree plan leading to teacher certification must be admitted to the Teacher Education Program at Texas A&M University-Corpus Christi PRIOR to enrolling in any 4000 level EDUC courses. Applications for admission to the teacher education program may be obtained online at COEHD website.

The student expecting to enter a program leading to teacher certification should apply for admission to the Teacher Education Program while enrolled in EDUC 3311 School and Society (3 sch). This application may be accessed from COEHD Student Services and online at the COEHD website at [http://education.tamucc.edu/](http://education.tamucc.edu/).

In addition to the requirements listed below, students must meet any additional requirements set by the specific certification teaching fields. See catalog sections for individual teaching fields (e.g., Mathematics, English, History) for these requirements. Requirements for admission to, and retention in, the Teacher Education Program include:

1. Completion of the application process for admission to teacher education. (If denied admission, the student must reapply.)
2. A minimum grade point average of 2.75 on all academic work attempted or a 2.75 on the last 60 hours attempted.
3. Conduct an interview with Department of Curriculum, Instruction, and Learning Sciences faculty while enrolled in EDUC 3311 School and Society (3 sch).
4. Completion of EDUC 3311 School and Society (3 sch) with a grade of “C” or better.
5. Prerequisite Courses.
6. Thirty-nine hours of the General Education Requirements.
7. A minimum GPA of 2.75 on all academic work taken in the student’s teaching field(s), area of specialization or delivery system. Teaching certificate areas (i.e., History, English, Science and others) may require above the minimum grade point average of 2.75 and may not accept grades below “C”. Students are to check the catalog section that pertains to the certificate area for required GPA’s.
8. Completion of a criminal background check form.
9. Completion of TB screening.
10. Pay the ASEP Technology Fee as directed.

Verified admission to teacher education from another Texas institution of higher education will be accepted, provided that the quantitative standards from such other institutions equaled or exceeded those that existed at Texas A&M University-Corpus Christi at the time the student was admitted at the other institution.

**Note:** A fingerprint-based national criminal background investigation is conducted on all applicants for initial certification by the State Board for Educator Certification in Compliance with State Statute 19 TAC SS 141.5.
Applicants for the Teacher Education program will also be subject to a criminal background check by the partner school district. Districts have the right to refuse any individual access to their schools and/or students at ANY time and Texas A&M University-Corpus Christi is obligated to honor that request. Inability to complete field requirements will preclude an individual from successfully meeting course requirements.

Admission to Clinical Teaching

All teacher preparation programs offered by this University require appropriate professional laboratory experiences. All programs require nine semester hours of clinical teaching experiences. Students may register for clinical teaching during their senior year only after they have been granted admission in writing by the Clinical Experiences Office. Clinical teaching must be completed at Texas A&M University-Corpus Christi, unless the Director of Clinical Experiences has approved a cooperative agreement with another university and written documentation is on file in the Office of Field Experiences.

Requirements that must be fulfilled before admission to clinical teaching can be granted include:

1. Admission to the Teacher Education Program.
2. Completion of a minimum of 100 semester hours of acceptable university work.
3. A minimum grade point average of 2.75 on all academic work attempted.
4. Completion of the required semester hours in general education.
5. Completion of EDUC 3311 School and Society (3 sch), EDUC 4311 Classroom Management (3 sch), and EDUC 4605 Planning, Teaching, Assessment and Technology (6 sch), and any ECED, BIEM, SPED, READ, MATH, KINE courses with a grade of "C" or better.
6. Completion of the courses required in the student's teaching field(s), areas of specialization, or delivery system.
7. A minimum GPA of 2.75 on all academic work taken in the student's teaching field(s), area of specialization, or delivery system. Teaching certificate areas (i.e., History, English, Science and others) may require above the minimum grade point average of 2.75 and may not accept grades below "C". Students are to check the catalog section that pertains to the certificate area for required GPA's.
8. Completion of “Fall Experience” (beginning-of-the-year activities in the public schools) and submission of a written summary is required for ALL students seeking placement. In order to be scheduled for this, candidates should sign up in the Office of Field Experiences during the month of May PRIOR to the fall or spring semester they will student teach.
9. Concurrent enrollment in EDUC 4321 Instructional Design for Special Populations (3 sch), if required in your degree plan, for undergraduate or field-based students only.
10. Students must pass their TExES content test prior to clinical teaching.

Clinical teaching is a Monday through Friday, all-day, all-semester assignment. The demands are equivalent to a full course load.

Program of Field Experiences

Students enrolled in degree programs that lead to teacher certification are required to complete a comprehensive program of structured laboratory experiences. These will range from classroom observations to extensive classroom involvement as the student progresses through his or her program. Courses that are designated as Field-Based will require students to spend a minimum of 51% of the course time in a school setting. Students should check with the instructor to determine the field experience requirements for specific courses.

Texas Examinations of Educator Standards (TExES)

In addition to successful completion of all courses, to be recommended for teacher certification, students must pass all appropriate TExES examinations required by the State Board for Educator Certification.

Certification programs must be completed or permission must be obtained from the program coordinator or designated person from the teaching field on the student's degree plan before permission will be granted to take certification examinations.

Recommendation for Teacher Certification

Teacher certification by the State of Texas is not automatically granted with the completion of an approved program of study. The student must first be recommended for certification by the COEHD. In order to be recommended a student must:

1. Have successfully completed the appropriate degree program.
2. Have successfully completed the appropriate approved certification program with an overall GPA of 2.75.
3. Have completed the appropriate clinical teaching experience with a grade of "C" or better.
4. Have passed all appropriate TExES tests. In addition, students seeking certification in Bilingual Education must have passed the Bilingual Target Language Proficiency Test (BTLPT) and the Bilingual Supplemental Test. Submit an application on line for certification and an application fee to the Texas Education Agency (TEA).

Certification for Persons Holding Degrees

See “Graduate-Level Initial Teaching Certification Program” in the College of Education and Human Development section of the Graduate Catalog.

Undergraduate Courses

The College of Education and Human Development offers undergraduate courses in the following fields:

- Bilingual/ESL/Multicultural (BIEM)
- Early Childhood (ECED)
- Health (HLTH)
- Instructional Design and Educational Technology (IDET)
- Kinesiology (KINE)
- Military Science (MSCI)
- Reading Education (READ)
- Special Education (SPED)
- Sport Management (SMGT)
- Teacher Education (EDUC)

All course descriptions are located in Courses A-Z (p. 640).

Programs

- Bachelor Degree Programs (p. 108)
  - Elementary Education, BS (p. 108)
  - Kinesiology, BS (p. 123)
  - Sport Management, BS (p. 129)
- Teacher Certifications (p. 132)
Bachelor Degree Programs

- Elementary, Teacher Certification (p. 133)
- Secondary/EC-12, Teacher Certification (p. 133)
- Minors (p. 135)
  - Education, Minor (p. 135)
  - Kinesiology, Minor (p. 137)
  - Military Science (p. 140)
  - Military Science, Minor (p. 141)
  - Sport Management, Minor (http://catalog.tamucc.edu/undergraduate/education-human-development/minors/sport-management-minor/)

Elementary Education, BS

Program Description

A minimum of 120 semester hours is required for the BS degree. Degree requirements include University Core Curriculum, the interdisciplinary major, and the professional development sequence. Certification in EC-6 Core Subjects, EC-6 Core Subjects-Bilingual, 4-8 Mathematics, EC-6 Core Subjects Early Childhood and STEM Focus or Reading, and EC-12 Special Education is available with the Bachelor of Science Degree.

Student Learning Outcomes

EC-6 Core Subjects-Bilingual

Students will:
- demonstrate a depth of knowledge of bilingual education;
- demonstrate a depth of speaking ability in Spanish;
- effectively apply the competencies of a bilingual education teacher in their clinical teaching experience.

EC-6 Core Subjects with Early Childhood Delivery with STEM Focus

Students will:
- provide well-designed instruction and assessment for students from a variety of backgrounds;
- develop classroom climates conducive to learning;
- apply in-depth knowledge of processes and practices associated with students' reading and literacy development;
- fulfill professional roles and responsibilities.

EC-6 Core Subjects with Reading Delivery

Students will:
- provide well-designed instruction and assessment for students from a variety of backgrounds;
- develop classroom climates conducive to learning;
- apply in-depth knowledge of processes and practices associated with students' reading and literacy development;
- fulfill professional roles and responsibilities.

4-8 Mathematics

Students will:
- establish a respectful educational environment for diverse middle level learners;
- demonstrate content knowledge by applying mathematics constructs;
- apply knowledge of curriculum standards for mathematics and their relationship to middle level learners within and across mathematical domains;
- engage middle level learners in developmentally appropriate mathematical activities and investigations;
- apply mathematical content and pedagogical knowledge to design lessons and units that facilitate student learning by incorporating a variety of strategies, including mathematics-specific instructional technologies;
- use formative and summative assessments to inform mathematics instruction.

EC-12 Special Education

The Special Education service delivery system in the BS program, prepares preservice special education teachers to meet the needs of students with disabilities and their families, with an emphasis on the provision of services in inclusive environments.

Students will:
- demonstrate a depth of knowledge of understanding individuals with disabilities and evaluating their needs;
- demonstrate a depth of knowledge of fostering learning and development for individuals with disabilities;
- demonstrate a depth of knowledge of foundations of special education and professional roles and responsibilities of the special education teacher;
- effectively apply the competencies of a special education teacher in their clinical teaching experience.

</tbody>
</table>

¹ First-Year Seminars or Electives

Full-time, first time in college students are required to take the first-year seminars.
- UNIV 1101 University Seminar I (1 sch)
- UNIV 1102 University Seminar II (1 sch)
Program Requirements

Interdisciplinary Major Requirements (53-57 semester hours)

The Interdisciplinary major consists of an academic or delivery system specialization and a combination of supporting fields.

1. Interdisciplinary major concentrations may be selected from one of the following areas:
   - EC-6 Core Subjects-Bilingual
   - EC-6 Early Childhood Delivery with STEM Focus
   - EC-6 Core Subjects with Reading Delivery
   - 4-8 Mathematics
   - EC-12 Special Education

2. The combination of supporting fields consists of a combination of three of the following five fields: English, Mathematics, Reading, Science, and Social Studies. A different combination of supporting fields is designated for each concentration. A minimum of 24 of the 53-57 semester hours must be in upper-division courses.

### Code Title Hours

#### Full-time, First-year Students
- First year seminars 0-2
- UNIV 1101 University Seminar I
- UNIV 1102 University Seminar II

### Core Curriculum Program
- University Core Curriculum 42

Students seeking the 4-8 Math Interdisciplinary Degree must take:
- CHEM 1411 General Chemistry I

### Interdisciplinary Major Concentration Requirements

Select one of the following Concentrations: 57-53
- EC-6 Core Subjects-Bilingual (p. 109)
- EC-6 Core Subjects with Early Childhood Delivery with STEM Focus (p. 109)
- EC-6 Core Subjects with Reading Delivery (p. 110)
- 4-8 Mathematics (p. 110)
- EC-12 Special Education (p. 110)

### Professional Development Requirements

Select one of the following Concentrations: 21-25
- EC-6 Core Subjects-Bilingual (p. 109)
- EC-6 Core Subjects with Early Childhood Delivery with STEM Focus (p. 109)
- EC-6 Core Subjects with a Reading Delivery System Specialization (p. 110)
- 4-8 Mathematics (p. 110)
- EC-12 Special Education (p. 110)

Total Hours 120-122

Only 3 hours of BIOL 1406 Biology I (4 sch) will apply to the Core Curriculum Program. The one hour laboratory component will be counted in the major requirements.

### EC-6 Core Subjects-Bilingual

All courses in BIEM and READ must be completed with a grade of “C” or better.

### Non-Certification Track to the BS Degree

The degree will be a BS Degree without certification. Students will follow the same degree plan as one of the five emphasis above (EC-6 Reading, EC-6 Bilingual, EC-6 Early childhood with STEM, EC-12 Special Education or 4-8 Mathematics) except for the last semester, during which they will choose 9 SCH of faculty advisor approved elective courses that will replace the clinical teaching component of the degree.

## Courses

### Bilingual/ESL/Multicultural Education Courses

- **BIEM 4344** The Bilingual Child, Culture, & the Social Studies Curriculum  
  3 Semester Credit Hours (3 Lecture Hours)  
  Studies of the bilingual children, the effect of culture on psychological development, and the challenges of the social studies curriculum.

- **BIEM 4345** Language Acquisition and Development  
  3 Semester Credit Hours (3 Lecture Hours)  
  A study of language acquisition and development with special reference to implications for monolingual and bilingual learners.

- **BIEM 4349** Linguistics for Bilingual Teachers  
  3 Semester Credit Hours (3 Lecture Hours)  
  A study of the phonological, morphological, syntactical, lexical, and semantic characteristics of contemporary Spanish and English. The course focuses on Spanish-English bilingualism.

- **BIEM 4351** The Minority Child  
  3 Semester Credit Hours (3 Lecture Hours)  
  Introduces students to themes and issues associated with the education of the minority child; modes of learning in various curriculum subjects; relation of materials and methods to affective and cognitive aspects of learning; information concerning the learning strengths and needs of children from various minority groups. (May be used to satisfy COE multicultural requirement.)

- **BIEM 4355** Language Arts Studies in the Bilingual Curriculum  
  3 Semester Credit Hours (3 Lecture Hours)  
  Basic methodological strategies and assessment skills required to teach language arts in the elementary bilingual classroom are provided. Emphasis is on teaching in Spanish.

- **BIEM 4356** Content Area Studies in the Bilingual Curriculum  
  3 Semester Credit Hours (3 Lecture Hours)  
  The concepts and skills required to teach mathematics and science in the elementary bilingual classroom are provided.

- **BIEM 4357** Methods of Teaching English as a Second Language  
  3 Semester Credit Hours (3 Lecture Hours)  
  Studies in methodology and techniques available for teaching those whose native language is not English. Testing and assessment of English language learners will be integrated into the course.

- **BIEM 4360** Foundations in Bilingualism  
  3 Semester Credit Hours (3 Lecture Hours)  
  The philosophical and legal foundations of bilingual schooling in the United States through a sociohistorical approach. The rationale for bilingual education is examined, as are the basic program models. An overview of bilingual education in Texas is also provided.

- **BIEM 4393** Field Studies in Family Literacy  
  3 Semester Credit Hours (3 Lecture Hours)  
  Field experiences designed to develop skills regarding the orientation of the adult population to bilingual/ESL purposes and philosophy, improving parental involvement, and English literacy skills.

- **BIEM 4696** Directed Individual Study  
  1-6 Semester Credit Hours (1 Lecture Hour)  
  Programs will be designed for individual cases through special permission of the Department Chair and Dean. May be repeated for credit when the topic varies.

---

1. **NOTE:** Non-Certification Track to the BS Degree  
The degree will be a BS Degree without certification. Students will follow the same degree plan as one of the five emphasis above (EC-6 Reading, EC-6 Bilingual, EC-6 Early childhood with STEM, EC-12 Special Education or 4-8 Mathematics) except for the last semester, during which they will choose 9 SCH of faculty advisor approved elective courses that will replace the clinical teaching component of the degree.
Early Childhood Education Courses
ECED 3324 Child Development
3 Semester Credit Hours (3 Lecture Hours)
Provides the student with an overview of the physical, social, emotional, and psychological development of children from infancy through early childhood.

ECED 3380 Developmentally Appropriate Practice in Early Childhood Education
3 Semester Credit Hours (3 Lecture Hours)
An intensive study of developmentally appropriate practice in early childhood education. Students will learn the components of lesson plans and create several lesson plans. Emphasis will be placed on selecting, defining, developing strategies and techniques, and assessing practices which support developmentally appropriate practices.
Prerequisite: ECED 3324.

ECED 4310 Socialization of the Young Child
3 Semester Credit Hours (3 Lecture Hours)
An intensive study of the social development, the agents of socialization, and the socialization process in early childhood.
Prerequisite: ECED 2310 or 3324.

ECED 4320 The Young Child, Family and Community Resources
3 Semester Credit Hours (3 Lecture Hours)
A study of current family structures, their relationship to the young child, society, and the community. Emphasis will be placed on an inclusive model which addresses the needs of the global community as it relates to the young child.
Prerequisite: ECED 2310 or 3324.

ECED 4330 Health, Nutrition, and Locomotor Concepts for the Young Child
3 Semester Credit Hours (3 Lecture Hours)
The relationship between health, nutrition, and locomotor development in the young child is investigated.

ECED 4340 Communication and Aesthetics
3 Semester Credit Hours (3 Lecture Hours)
A study of language development, early literacy, language arts, and aesthetics. Students will develop an integrated thematic unit plan. Strategies and curriculum materials that are developmentally appropriate for young children will be emphasized to support the Texas Essential Knowledge and Skills (TEKS).
Prerequisite: ECED 3324.

ECED 4345 EC-6 Assessment and Evaluation
3 Semester Credit Hours (3 Lecture Hours)
A study of assessment for children EC-6 utilizing both formal and informal instruments will be addressed. A knowledge of choosing, administering, and reporting developmental assessment will be explored with an emphasis on assessment tools that can be used by teachers of young children. Principles of designing and using assessment and evaluation techniques that are culturally fair, intellectually sound, reliable, and content-valid for young children. Differentiation among criterion-referenced, norm-referenced, individual, informal, authentic, and group assessments will be emphasized. Students will review strategies for using assessment data to design instruction, and match assessment techniques to individual children and learning situations

ECED 4350 EC-6 Social Studies Curriculum
3 Semester Credit Hours (3 Lecture Hours)
This course will expose students to skills and concepts taught in the Social Studies curriculum in the elementary school. Developmentally appropriate strategies, concepts, and curricular materials used in teaching the Social Studies will be emphasized.
Prerequisite: ECED 3324.

Mathematics Courses
MATH 0099 Math Non-Course Based Development
0 Semester Credit Hours
Preparation workshop to help students achieve College Readiness in mathematics under the Texas Success Initiative. Topics include five general areas: fundamental mathematics, algebra, geometry, statistics, and problem solving.

MATH 0200 Brief Developmental Mathematics
1-2 Semester Credit Hours (1-2 Lecture Hours)
Topics as in MATH 0300. For students who have completed most topics in MATH 0300. Requires permission of MATH department. (Not counted toward graduation) Fall, Spring, Maymester, Summer.
Co-requisite: MATH 1314, MATH 1442.

MATH 0214 Brief Developmental Mathematics-Algebra
2 Semester Credit Hours (2 Lecture Hours)
This course is co-requisite course supporting for MATH 1314. Support will focus on essential skills required for success in College Algebra (Math 1314). Supporting topics include review of intermediate algebra, polynomial equations, graphing techniques, and applications. Course provides the necessary academic support for TSI liable students concurrently enrolled in MATH 1314 as the co-requisite with MATH 0214. Students who register for MATH 0214 must co-register in MATH 1314. Math 0214 is not counted toward graduation. Fall, Spring, Summer.
Co-requisite: MATH 1314, UNIV 1102.

MATH 0224 Brief Developmental Mathematics-Business Mathematics
2 Semester Credit Hours (2 Lecture Hours)
This course is the co-requisite course supporting for MATH 1324. Support will focus on essential skills required for success in Business Math (Math 1324). Supporting topics include the use of calculators and technology. Topics focus on basic review of mathematical skills, elementary algebra, mathematical and logical reasoning, probability, and financial management, while providing the necessary academic support for TSI liable students concurrently enrolled in MATH 1324 as the co-requisite with MATH 0224. Students who register for MATH 0224 must co-register in MATH 1324. Math 0224 is not counted toward graduation. Fall, Spring, Summer.
Co-requisite: MATH 1324.

MATH 0232 Brief Developmental Mathematics-Contemporary Mathematics
2 Semester Credit Hours (2 Lecture Hours)
This course is co-requisite course supporting for MATH 1332. Support will focus on essential skills required for success in Contemporary Mathematics (Math 1332). Supporting topics include a basic review of mathematical skills, elementary algebra, mathematical and logical reasoning, probability, and descriptive statistics, while providing the necessary academic support for TSI liable students concurrently enrolled in MATH 1332 as the co-requisite with MATH 0232. Students who register for MATH 0232 must co-register in MATH 1332. Math 0232 is not counted toward graduation. Fall, Spring, Summer.
Co-requisite: MATH 1332.
MATH 0242  Brief Developmental Mathematics-Statistics
2 Semester Credit Hours (2 Lecture Hours)
This course is co-requisite course supporting for MATH 1442. Support will focus on essential skills required for success in Statistics for Life (MATH 1442). Supporting topics include the use of calculators and technology. Topics focus on descriptive and inferential statistics, probabilities including notation, while providing the necessary academic support for TSI liable students concurrently enrolled in MATH 1442 as the co-requisite with MATH 0242. Students who register for MATH 0242 must co-register in MATH 1442. MATH 0242 is not counted toward graduation. Fall, Spring, Summer.
Co-requisite: MATH 1442.

MATH 0300  Developmental Mathematics
3 Semester Credit Hours (3 Lecture Hours)
Topics include number concepts, computation, elementary algebra, geometry, and mathematical reasoning. Also, linear equations and inequalities, rational expressions, exponents and radicals, quadratics and word problems. May be repeated for credit as needed to complete mastery of all topics. (Not counted toward graduation.) Fall, Spring, Summer.

MATH 0310  Developmental Mathematics-Algebra
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
3 sem. hrs. (2:2) Topics include number concepts, computation, elementary algebra, and geometry. Also, linear equations and inequalities, rational expressions, exponents and radicals, quadratics and word problems. May be repeated for credit as needed to complete mastery of all topics. (Not counted toward graduation.) Fall, Spring, Summer.

MATH 0398  Introduction to Algebra
3 Semester Credit Hours (3 Lecture Hours)
Number concepts, computation, elementary algebra, geometry, and mathematical reasoning.

MATH 0399  Intermediate Algebra
3 Semester Credit Hours (3 Lecture Hours)
Topics include linear equations and inequalities, rational expressions, exponents and radicals, quadratics and word problems.
Prerequisite: MATH 0398.

MATH 1314  College Algebra
3 Semester Credit Hours (3 Lecture Hours)
Quadratic equations, inequalities, graphs, logarithms and exponentials, theory of polynomial equations, systems of equations.
Prerequisite: MATH 0300, minimum score of 530 in 'SAT MATH SECTION', minimum score of 19 in 'ACT 1 Math', MATH 0320, minimum score of 350 in 'TSI Math', minimum score of 910 in 'TSIA2 Math' or minimum score of 6 in 'TSIA2 Math Diagnostic'.
TCCNS: MATH 1314

MATH 1316  Trigonometry
3 Semester Credit Hours (3 Lecture Hours)
Trigonometric functions, identities, equations involving trigonometric functions, solutions of right and oblique triangles.
Prerequisite: (MATH 1314, minimum score of 550 in 'SAT MATH SECTION' or minimum score of 21 in 'ACT1 Math') or minimum score of 21 in 'ACT Math'.
TCCNS: MATH 1316

MATH 1324  Mathematics for Business and Social Sciences
3 Semester Credit Hours (3 Lecture Hours)
Students will learn how the properties and language of mathematics can be used in business and real-world problem solving and understand the techniques and applications of finance problems, basic matrix operation, basic counting principles, and probability analysis in modeling real-world scenarios. This course could be taught in 14-weeks 7-weeks semesters and in F2F or fully online formats
Prerequisite: minimum score of 550 in 'SAT MATH SECTION', minimum score of 21 in 'ACT Math' or minimum score of 21 in 'ACT1 Math'.
TCCNS: MATH 1324

MATH 1325  Calculus for Business & Social Sciences
3 Semester Credit Hours (3 Lecture Hours)
Students will develop and combine the concepts in and relationships between Mathematics and Business from the fundamentals of calculus and optimization in all Business fields. Students are expected to learn the materials algebraically with technology. Students will combine the concepts of limits, continuation, differentiation and integration techniques to solve problems in business, economics, and social sciences. This course could be taught in 14-weeks and 7-weeks semesters in F2F and fully online formats
Prerequisite: (MATH 1324 and 1314).
TCCNS: MATH 1325

MATH 1332  Contemporary Mathematics
3 Semester Credit Hours (3 Lecture Hours)
This course serves as a terminal course and supplies a brief overview of several topics in mathematics. Topics may include introductory treatments of sets, logic, number systems, number theory, relations, functions, probability and statistics. Appropriate applications are included. This course emphasizes using critical thinking to make decisions based on information.
TCCNS: MATH 1332

MATH 1390  Introduction to Mathematical Topics
1-3 Semester Credit Hours (1-3 Lab Hours)
A course to introduce students to mathematical topics in a formal setting. The course may support problem solving, or systematic investigations of topics outside the current mathematical catalog. May not be substituted for regularly scheduled offerings.

MATH 1442  Statistics for Life
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
An introduction to statistical concepts and methods used in all disciplines to enhance decision making based on data analysis, including: basic experimental design models, measurement and data collection through sampling; display and summary of information, and assessment of relationship through descriptive techniques; probability concepts leading to estimation and hypothesis testing of means, variance and proportions, regression analysis, one-factor ANOVA and chi-square test of independence; and applications through case studies. The laboratory component of the course offers applications of the theory presented during the classroom sessions.
Prerequisite: MATH 0300, minimum score of 530 in 'SAT MATH SECTION', minimum score of 19 in 'ACT1 Math', MATH 0310, 0320, minimum score of 350 in 'TSI Math' or minimum score of 19 in 'ACT Math'.
TCCNS: MATH 1442
MATH 2305 Discrete Mathematics I  
3 Semester Credit Hours (3 Lecture Hours)  
An introduction to topics in Discrete Mathematics with an emphasis on applications in Mathematics and Computer Science. Topics include formal logic, graphs, trees and related algorithms, and combinatorics and discrete probability.  
Prerequisite: MATH 2413, minimum score of 620 in 'SAT Math', minimum score of 620 in 'SAT I Mathematics', minimum score of 640 in 'SAT MATH SECTION', minimum score of 27 in 'ACT Math' or minimum score of 27 in 'ACT1 Math'.  
TCCNS: MATH 2305

MATH 2312 Precalculus  
3 Semester Credit Hours (3 Lecture Hours)  
A more rapid treatment of the material in MATH 1314 and MATH 1316, this course is designed for students who wish a review of the above material, or who are very well prepared. Functions, graphs, trigonometry, and analytic geometry.  
Prerequisite: MATH 1314, minimum score of 550 in 'SAT MATH SECTION', minimum score of 21 in 'ACT Math' or minimum score of 21 in 'ACT1 Math'.  
TCCNS: MATH 2312

MATH 2413 Calculus I  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
Limits, continuity, derivatives, applications of the derivative, and an introduction to integrals. Contains a laboratory component.  
Prerequisite: MATH 1316, 2312, minimum score of 640 in 'SAT MATH SECTION' or minimum score of 27 in 'ACT1 Math'.  
TCCNS: MATH 2413

MATH 2414 Calculus II  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
Prerequisite: MATH 2413.  
TCCNS: MATH 2414

MATH 2415 Calculus III  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
Vectors and space curves, partial derivatives, multiple integrals, special coordinate systems, line and surface integrals, Green's, Stokes', and the Divergence Theorems. Contains a laboratory component. Vectors and space curves, partial derivatives, multiple integrals, special coordinate systems, line and surface integrals, Green's, Stokes', and the Divergence Theorems. Contains a laboratory component.  
Prerequisite: MATH 2414.  
TCCNS: MATH 2415

MATH 3300 Geospatial Mathematical Techniques  
3 Semester Credit Hours (3 Lecture Hours)  
Characteristics of geographic/spatial information; overview of relevant sections of numbers, algebra and geometry, plane and spherical trigonometry, matrices, determinants and vectors, curves and surfaces, integral and differential calculus, partial derivatives, with an emphasis on geospatial applications. Concepts of geospatial coordinate systems and geospatial coordinate transformations; overview of spatial statistics and best-fit solutions with geospatial applications. Students may not receive credit for both MATH 3300 and GISC 3300.  
Prerequisite: MATH 2413 and 2414.

MATH 3301 Introduction to Complex Analysis  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces functions of a complex variable and their applications. Contents include differentiation and integration; zeros, poles and residues; conformal mappings.  
Prerequisite: (MATH 2415) or (MATH 2414 and 3314).  

MATH 3310 Mathematical Analysis for Mechanical Engineering  
3 Semester Credit Hours (3 Lecture Hours)  
Applications of fundamentals of linear algebra, vector analysis, numerical methods, computer programming and probability and statistics into mechanical engineering. May not count towards the MATH major. Students may not receive credit for both MATH 3310 and MEEN 3310.  
Prerequisite: MATH 3315.

MATH 3311 Linear Algebra  
3 Semester Credit Hours (3 Lecture Hours)  
Fundamentals of linear algebra and matrix theory. Topics include vectors, matrix operations, linear transformations, fundamental properties of vector spaces, systems of linear equations, eigenvalues and eigenvectors. Applications.  
Prerequisite: MATH 2413.

MATH 3312 College Geometry  
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)  
A careful study of the foundations of Euclidean geometry by synthetic methods with an introduction to non-Euclidean geometries. An introduction to transformational geometry.  
Prerequisite: MATH 2413.

MATH 3313 Foundations of Number Theory  
3 Semester Credit Hours (3 Lecture Hours)  
This course assists a student's transition to advanced mathematics. Fundamentals of logic and proof are reviewed and applied to topics from elementary number theory.  
Prerequisite: MATH 2414.

MATH 3314 Foundations of Real Numbers  
3 Semester Credit Hours (3 Lecture Hours)  
This course assists a student's transition to advanced mathematics. Fundamentals of logic and proof are reviewed and applied to development of the real number line.  
Prerequisite: MATH 2414.

MATH 3315 Differential Equations  
3 Semester Credit Hours (3 Lecture Hours)  
An introduction to both theoretical and applied aspects of ordinary differential equations. Topics include: first order equations, linear second order equations, elementary numerical methods, and the Laplace transform.  
Prerequisite: MATH 2414.

MATH 3342 Applied Probability and Statistics  
3 Semester Credit Hours (3 Lecture Hours)  
A calculus based introduction to probability and statistics. Emphasis will be on development of statistical thinking and working with data. Topics include probability theory, descriptive statistics, common distributions, and statistical inference.  
Prerequisite: MATH 2413.
MATH 3345  Statistical Modeling and Data Analysis
3 Semester Credit Hours (3 Lecture Hours)
An introduction to probability/statistical modeling and data analysis techniques to investigate data. Topics include: exploratory data analysis, probability models and simulation, sampling distributions, statistical inference. Applications to real world problems. Students will be expected to present and justify results orally and in writing. Note: MATH 3342 and MATH 3345 cannot both be counted for credit.
Prerequisite: MATH 2413 and (COSC 1330 or 1435).

MATH 3347  Introduction to Probability
3 Semester Credit Hours (3 Lecture Hours)
This is an introduction to probability. In the course, key fundamental concepts of probability, random variables and their distributions, expectations, and conditional probabilities will be covered. Topics include counting rules, combinatorial analysis, sample spaces, axioms of probability, conditional probability and independence, discrete and continuous random variables, jointly distributed random variables, characteristics of random variables, law of large numbers and central limit theorem, random processes, Markov chains, Markov chain-Monte Carlo, Poisson Process and Entropy.
Prerequisite: MATH 2415.

MATH 3385  Linear Optimization and Decisions
3 Semester Credit Hours (3 Lecture Hours)
This course introduces the linear programming and optimization problems arising in many applications. Contents include linear programming models with solutions, the simplex method, duality theory and its use for management decision making, dual simplex method and sensitivity analysis.
Prerequisite: MATH 3311 and 2413.

MATH 3390  Problem Solving in Mathematics
1-3 Semester Credit Hours (1-3 Lecture Hours)
A problem solving course for students who want to participate in math problem solving competitions, train for the actuarial or other professional examinations, work on research aimed at conference presentations, or perform research projects at the junior level that are not at the level of directed independent study material.
Prerequisite: MATH 2414.

MATH 4185  Senior Mathematics Seminar
1 Semester Credit Hour (1 Lecture Hour)
This course introduces a weekly mathematics seminar. Students will generate a viable project for the capstone course.

MATH 4285  Mathematics Major Capstone
2 Semester Credit Hours (2 Lecture Hours)
Development of projects as proposed in MATH 4185, as well as mathematics communication skills. Students will present their projects, and take a national level assessment.
Prerequisite: MATH 4185.

MATH 4301  Introduction to Analysis
3 Semester Credit Hours (3 Lecture Hours)
An advanced treatment of the foundations of calculus stressing rigorous proofs of theorems. Topics include: elements of propositional and predicate logic, topology of the real numbers, sequences, limits, the derivative, and the Riemann integral.
Prerequisite: MATH 2415 and 3314.

MATH 4306  Modern Algebra
3 Semester Credit Hours (3 Lecture Hours)
Fundamentals of set operations, maps and relations, groups, rings and field theory. Topics include permutation groups, cosets, homomorphisms and isomorphisms, direct product of groups and rings, integral domains field of quotients, fundamental properties of integers, the ring of integers modulo n, and rings of polynomials. Applications.
Prerequisite: MATH 3311 and 3313.

MATH 4312  Differential Geometry
3 Semester Credit Hours (3 Lecture Hours)
Differential forms on R1, R2, R3, and Rn; Integration and differentiation of differential forms; Stokes' Theorem; manifolds; Gaussian curvature and the Gauss-Bonnet Theorem.
Prerequisite: MATH 2415.

MATH 4315  Partial Differential Equations
3 Semester Credit Hours (3 Lecture Hours)
An introduction to partial differential equations emphasizing the wave, diffusion and potential (Laplace) equations. A focus on understanding the physical meaning and mathematical properties of solutions of partial differential equations. Methods include fundamental solutions and transform methods for problems on the line, and separation of variables using orthogonal series for problems in regions with boundary. Additional topics include higher dimensional problems and special topics like Harmonic functions, the maximum principle, Green's functions etc.
Prerequisite: MATH 3315 and 2415.

MATH 4321  Applied Regression Analysis
3 Semester Credit Hours (3 Lecture Hours)
Introduction to the formulation of linear models and the estimation of the parameters of such models, with primary emphasis on least squares. Application of multiple regression and curve fitting and the design of experiments for fitting regression models.
Prerequisite: MATH 1342, 2342 or 1470.

MATH 4328  Discrete Mathematics II
3 Semester Credit Hours (3 Lecture Hours)
A continued study of topics from Discrete Mathematics I with additional topics from discrete mathematics that have strong application to the field of computer science. Additional topics include: recurrence relations, formal languages, and finite-state machines.
Prerequisite: MATH 2305 and COSC 2437.

MATH 4342  Introduction to Mathematical Statistics
3 Semester Credit Hours (3 Lecture Hours)
This is a first course in mathematical statistics, topics include: moment-generating functions, functions of random variables, sampling distributions, methods of estimation including Bayesian estimation, characteristics of estimators, interval estimation, hypothesis testing, Neyman-Pearson Lemma, likelihood ratio test, tests involving means and variances, regression and correlation, multiple linear regression, introduction to ANOVA, non-parametric tests.
Prerequisite: MATH 2415.

MATH 4385  Applied Modeling
3 Semester Credit Hours (3 Lecture Hours)
Capstone course for mathematics majors. The construction of mathematical models from areas such as economics, refining, biology and mariculture, etc. Where possible, local phenomena will be modeled with the assistance of outside consultants.
Prerequisite: MATH 3315 and 3342 or MATH 3345.

MATH 4390  Selected Topics
3 Semester Credit Hours (3 Lecture Hours)
Offered on sufficient demand.
MATH 4696 Directed Independent Study
1-6 Semester Credit Hours
See college description.

Reading Courses

READ 0399 Basic Reading and Comprehension
3 Semester Credit Hours (3 Lecture Hours)
This is a reading course for students who need assistance in developing college level reading skills. Emphasis will be on improving reading comprehension, critical reasoning skills, recognition of the organization of ideas in written material, study skills and vocabulary development. The Higher Education Assessment (THEA) reading skills will be covered.

READ 3310 Principles and Practices of Early Reading Instruction
3 Semester Credit Hours (3 Lecture Hours)
This course explores theories of early language and literacy development of children. Course content addresses language development and literacy concepts essential for pre-reading areas, such as phonemic awareness, oral language development, listening comprehension development, and alphabetic knowledge. The course explores ways educators can enhance language and literacy concepts utilizing art, music, and drama. READ 3310 emphasizes development of emergent literacy skills that lead to literacy skills taught in READ 3320.

READ 3320 Principles and Practices of Reading Instruction
3 Semester Credit Hours (3 Lecture Hours)
The purpose of this course is to provide the preservice teacher with a solid foundation for effective literacy instruction. This course will review research-based teaching strategies, instructional materials for phonics, vocabulary, fluency, and comprehension will as methods and assessments for efficacious literacy instruction. The primary focus of course content will be on core (tier 1) classroom instruction with discussions of differentiated instruction and frameworks for responsive intervention also addressed. The targeted grade levels for this course are third through sixth grade.

READ 3321 Principles and Practices of Reading Instruction, Grades 4 – 8
3 Semester Credit Hours (3 Lecture Hours)
This course will emphasize materials, methods, and beliefs for teaching reading in grades 4-8. Components of the course will include but not be limited to the five pillars of reading instruction identified by the National Reading Panel (2000): phonemic awareness, phonics, fluency, vocabulary, and comprehension.

READ 3351 Reading Assessment and Intervention
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to utilizing formal and informal reading assessments and intervention strategies in a classroom setting. Students will administer assessments in the areas of phonemic awareness, phonics, fluency, vocabulary, and comprehension. Students will then select and adapt appropriate scientifically proven instructional strategies, based upon assessment results, for working with readers of varying abilities and implement these through actual lessons.
Prerequisite: READ 3310 and 3320 or READ 3353.

READ 3352 Content Area Reading for Elementary Students
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on recent issues, materials, methods, and strategies considered essential for effective reading instruction in the elementary school content areas. Components of the course will include comprehension strategies, vocabulary development, reading-writing connections, and word study. The course will also include but not be limited to the five pillars of reading instruction identified by the National Reading Panel (2000): phonemic awareness, phonics, fluency, vocabulary, and comprehension.
Prerequisite: READ 3310 and 3320.

READ 3353 Content Area Reading for Secondary Students
3 Semester Credit Hours (3 Lecture Hours)
The skills required of secondary students to deal with subject matter in the various content areas are presented. In addition, developmental and corrective processes that incorporate the identification and remediation of dyslexia and other reading disorders are presented.

READ 3355 Teaching Reading in the Secondary School
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on planning, developing, selecting, and organizing reading materials for secondary reading instruction.
Prerequisite: READ 3353.

READ 3356 Technology and Literacy
3 Semester Credit Hours (3 Lecture Hours)
Various software packages that have been developed for providing initial and tutorial instruction in the language arts are presented. In addition, instructional techniques for using these packages are covered.
Prerequisite: READ 3320 and 3321.

READ 3380 Children's and Adolescents' Literature
3 Semester Credit Hours (3 Lecture Hours)
Provides students with an understanding of children's and adolescent literature. Included in the class is the reading and study of literature and how to promote reading of literature in the schools. Extensive reading is required.

READ 4352 Advanced Practices in Reading/ Language Arts
3 Semester Credit Hours (3 Lecture Hours)
The emphasis is on instructional approaches supported by current theory and research and supervised implementation in a school setting. Attention is given to word study, comprehension, critical reading and reasoning, and reading-writing connections. Components of the course will include but not be limited to the five pillars of reading instruction identified by the National Reading Panel (2000): phonemic awareness, phonics, fluency, vocabulary, and comprehension.
Prerequisite: READ 3320, 3351, 4380 and 4394.
*M May be taken concurrently.

READ 4394 Field Experiences in Reading
3 Semester Credit Hours (3 Lecture Hours)
The culminating experience for those students working toward a specialization in reading. Students are provided supervised experience in field-based activities, in addition to on-campus activities.
Prerequisite: READ 3310, 3320, 3351, 3352 and 4380.

READ 4696 Directed Individual Study
1-6 Semester Credit Hours (1 Lecture Hour)
Programs will be designed for individual cases through special permission of the Department Chair and Dean. May be repeated for credit when the topic varies.
Science/Math and Tech Education Courses

SMTE 0091 Biological Laboratory Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0092 Biomedical Laboratory Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0093 Chemistry Laboratory Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0094 Geology Laboratory Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0095 Physics Laboratory Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0096 Environmental Science Laboratory Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0097 Art Student Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0098 Theatre Student Safety Seminar
0 Semester Credit Hours
This non-credit course is designed as an on-line offering that must be passed by students each semester and at a grade of 100%. Students will be responsible for taking safety courses with different course numbers of SMTE, as each lab must meet different safety requirements as specified by the A&M System, depending on the types of hazardous materials used in each lab. Students will not be charged a fee for taking these courses.

SMTE 0099 Engineering Safety Seminar
0 Semester Credit Hours
SMTE 1350 Fundamentals of Mathematics I
3 Semester Credit Hours (3 Lecture Hours)
The conceptual framework for understanding and applying properties, models, and operations related to various number systems in problem solving settings.
Prerequisite: MATH 1314.
TCCNS: MATH 1350
SMTE 1351 Fundamentals of Mathematics II
3 Semester Credit Hours (3 Lecture Hours)
The conceptual framework for understanding and applying properties, models, and operations related to various data systems in problem solving settings.
Prerequisite: SMTE 1350.
TCCNS: MATH 1351
SMTE 3315 Foundational Approaches to the Physical Sciences
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Physical science topics such as simple machines, atoms, molecules, electricity and magnetism, sound, and light. Laboratory involvement will emphasize techniques of problem solving, data gathering, and data application. The course is taught following an inquiry based format and is recommended for future K-8 level science educators.
Co-requisite: SMTE 0096.
SMTE 3316 Foundational Approaches to the Life Sciences
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Emphasis on biological concepts including cells, plants, invertebrate and vertebrate structural systems. Laboratory investigations focus on techniques of problem solving, data gathering, and data applications. The course is taught following an inquiry based format and is recommended for future K-8 level science educators.
Co-requisite: SMTE 0091.
SMTE 3352 Fundamentals of Mathematics III
3 Semester Credit Hours (3 Lecture Hours)
The conceptual framework for understanding and applying properties, models, and operations related to various geometric systems in problem solving settings.
Prerequisite: SMTE 1351.
SMTE 4217 Secondary Approaches to the Life Sciences
2 Semester Credit Hours (2 Lecture Hours)
Study of secondary science teaching and learning from the standpoints of theory and practice, curriculum objectives, materials and evaluation. The course will emphasize contemporary issues by focusing on biological content ranging across the sub-disciplines of molecular biology, physiology, evolution and environmental science while teaching in a relevant and engaging context that includes web searches, laboratory activities, and student-centered inquiry activities.
actively involved in the learning situation.

serve individuals with disabilities on and off campus. Students will be

This course requires students to participate in schools and programs that

SPED 2397 Special Education Field Experience
3 Semester Credit Hours (3 Lecture Hours)
This course requires students to participate in schools and programs that serve individuals with disabilities on and off campus. Students will be actively involved in the learning situation.

SMTE 4270 Science Education Topics I
2 Semester Credit Hours (2 Lecture Hours)
Presentation of the conceptual framework for understanding and applying science content in life sciences including biology, ecology and evolution using the national standards for science education and Texas Essential Knowledge and Skills (TEKS). The course is taught using scientifically researched literature and content knowledge in an inquiry based format and is recommended for future 4-8 and 7-12 level science educators.

SMTE 4273 Historical Development of the Sciences
2 Semester Credit Hours (2 Lecture Hours)
Study of human endeavors leading to the present body of scientific knowledge placed in a historical and philosophical context. Portions of the materials will be presented in a format conducive to adaptation for middle school and high school.
Prerequisite: BIOL 1407, CHEM 1412 and EDUC 3311.

SMTE 4320 Secondary Science Laboratory Techniques
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to assist the 4-8 and 7-12 future science teacher in developing content knowledge, skills and mastery of designated laboratory and research techniques through scientific experimentation in areas such as chemistry, biology and physics. State and national laboratory safety mandates will also be addressed.
Prerequisite: BIOL 1407, CHEM 1412 and EDUC 3311.
Co-requisite: SMTE 0091.

SMTE 4370 Mathematics Education Topics I
3 Semester Credit Hours (3 Lecture Hours)
Presentations of contemporary issues in mathematics education. Topics include history of mathematics education, state and national standards for mathematics education, cognitive development, the importance of culture, language and gender in learning mathematics, authentic assessment, and interdisciplinary curriculum.

SMTE 4382 Basic Mathematics From An Advanced Viewpoint
3 Semester Credit Hours (3 Lecture Hours)
Capstone course for students pursuing grades 4-8 certification in mathematics. Presents basic mathematical concepts in the context of advanced mathematics courses. The course includes historical development of significant ideas in mathematics and science, interpretations of mathematical topics at multiple levels, and the use of technology to generate and convey understanding of mathematical ideas.
Prerequisite: MATH 2305 and 3312.

SMTE 4490 Selected Topics
1-4 Semester Credit Hours (1-4 Lecture Hours)
Subject materials variable. May be repeated for credit when topics are significantly different.

SMTE 4496 Directed Independent Study
1-4 Semester Credit Hours
Requires a formal proposal of study to be completed in advance of registration and to be approved by the supervising faculty, the Chairperson, and the Dean of the College.

Special Education Courses

SPED 2397 Special Education Field Experience
3 Semester Credit Hours (3 Lecture Hours)
This course requires students to participate in schools and programs that serve individuals with disabilities on and off campus. Students will be actively involved in the learning situation.

SPED 3325 Strategic Instruction for Students with High-Incidence Disabilities
3 Semester Credit Hours (3 Lecture Hours)
This course provides an introduction and demonstration of specific skills necessary for teaching students with high-incidence disabilities.
Prerequisite: SPED 4310.

SPED 3330 Individualized Education Programs for Students with Disabilities
3 Semester Credit Hours (3 Lecture Hours)
This course emphasizes the design and implementation of individualized educational programs (IEP) for students with disabilities.
Prerequisite: SPED 4310.

SPED 3335 Applied Learning Theory
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to develop and extend the student's knowledge of the principles of applied learning theory as it relates to students with extensive and pervasive support needs.
Prerequisite: SPED 4310.

SPED 3340 Individuals with Severe Disabilities
3 Semester Credit Hours (3 Lecture Hours)
This course is an introductory study of the adaptations, approaches, and supports necessary to meet the educational needs of students who have communication, intellectual, motor, sensory, medical impairments, and/or other extensive and pervasive support needs.
Prerequisite: SPED 4310.

SPED 4310 Students with Exceptionalities
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to familiarize the student with the various conditions of individuals with disabilities.

SPED 4315 Motor Development for Students with Exceptional Needs
3 Semester Credit Hours (3 Lecture Hours)
A comparative overview of the physical development and motor-activity needs of students with disabilities.

SPED 4320 Community-based Instruction for the Students with Exceptionalities
3 Semester Credit Hours (3 Lecture Hours)
Strategies and procedures for teaching community-based instruction to individuals with disabilities, including independent living and socialization skills, are discussed.

SPED 4345 Behavioral Supports and Interventions for Students with Disabilities
3 Semester Credit Hours (3 Lecture Hours)
This introductory course will focus on positive behavioral supports and behavior intervention techniques. Course content includes information on: definitions, characteristics, prevalence, causes, assessment, prevention of behavioral difficulties, functional behavior assessment, applied behavior analysis, education service delivery, advocacy, and other current issues in the field.

SPED 4696 Directed Individual Study
1-6 Semester Credit Hours
Programs will be designed for individual cases through special permission of the Department Chair and Dean. May be repeated for credit when the topic varies.
Kinesiology, BS

Program Description

Students seeking a BS in Kinesiology can specialize in EC-12 Physical Education Certification, Exercise Science-Strength & Conditioning, or Pre-Allied Health. All majors must take a minimum of 42 SCH in University Core Courses and a minimum of 23 SCH in Kinesiology Major Requirements.

The Bachelor of Science Degree with a major in Kinesiology coursework includes:

1. General Education Core Requirements,
2. Kinesiology Major Requirements,
3. Special Emphasis Requirements, and

Beyond the General Education Core Requirements, students majoring in kinesiology must complete all courses in sections 2-4 above with a grade of “C” or better. Transfer credit hours into the kinesiology degree plans must adhere to the same grade standard.

EC-12 Physical Education Certification

Students seeking a certificate to teach EC-12 Physical Education must complete the Bachelor of Science Degree in Kinesiology and complete the College of Education and Human Development EC-12 Teacher Certification requirements. Information for students holding a degree and seeking certification may be obtained in the Certification Office.

Exercise Science – Strength & Conditioning Specialization

Students seeking a career in exercise science/strength and conditioning should complete the requirements for the Exercise Science – Strength & Conditioning Specialization of the kinesiology major. This specialization serves as an excellent program for students seeking careers as fitness trainers, exercise specialists, and strength and conditioning coaches. The Exercise Science - Strength & Conditioning Specialization is also an exceptional preparatory program for students pursuing graduate study in Exercise Science (e.g. exercise physiology, kinesiology, biomechanics, measurement/evaluation). Graduates with a BS in Kinesiology with an Exercise Science – Strength & Conditioning Specialization will demonstrate knowledge of structural kinesiology, exercise physiology, biomechanics, sport psychology, and measurement and evaluation.

Pre-Allied Health Professional Specialization

Students seeking a career in allied health fields (e.g. Cardiac Rehabilitation, Dentistry, Medicine, Occupational Therapy, and Physical Therapy) should complete the requirements of the Pre-Allied Health Professional Specialization of the kinesiology major. This specialization serves as an excellent preparatory program for students pursuing graduate study in these fields as well as post baccalaureate study in exercise science. Graduates with a BS in Kinesiology with a Pre-Allied Health Professional Specialization will demonstrate knowledge of basic kinesiology theory and principles as they relate to the fields in allied health.

Student Learning Outcomes

EC-12 Physical Education Certification

Students will:

• create safe, equitable, developmentally-appropriate and enjoyable movement experiences which benefit the participant and encourage life-long participation in movement;
• model a healthy, physically active lifestyle and model a life-long learner seeking opportunities to grow professionally;
• serve the community as a knowledgeable practitioner of the kinesiology profession who meets the needs of all students in a diverse society.

Exercise Science – Strength & Conditioning Specialization

Students will:

• apply the principles of exercise testing and prescription to safely and effectively assess fitness status and appropriately prescribe exercise training programs;
• apply the principles of biomechanics to assess the quantity and quality of human motion;
• apply the principles of sport psychology to enhance human performance;
• apply the principles of measurement and evaluation to collect, analyze, and interpret data.

Pre-Allied Health Professional Specialization

Students will:

• apply the principles of exercise physiology to prescribe safe and effective strength and conditioning programs;
• apply the principles of biomechanics to assess the quantity and quality of human motion;
• apply the principles of sport psychology to enhance human performance;
• apply the principles of measurement and evaluation to collect, analyze, and interpret data.

See “Core Curriculum Program” in this catalog. It is recommended that Kinesiology students take the following courses when fulfilling the Life & Physical Sciences, Math, and Social Sciences requirements of the University Core Curriculum depending on specialization. Please consult your faculty mentor or academic advisor for specific details. These hours are listed in the Foundation Courses of the Degree Requirements.

Select a minimum of 15 hours in a second emphasis area 15

Special Foundations
Select 27 semester hours 27

Total Hours 58

A Blended offering

Special Emphasis
Students completing the EC-12 Physical Education Certification must complete five courses (a minimum of 15 semester hours) in a special emphasis area (second emphasis area) approved by their faculty mentor. Students must pass these courses with a grade of "C" or better. It is strongly recommended that students take at least one additional course beyond the required five in this discipline to better prepare for the TExES certification test taken after state issuance of initial teaching certificate in EC-12 Physical Education.

Special Foundations
(See "College of Education and Human Development Certification Requirements" in this catalog for the EDUC courses required for teacher certification). Prior to being admitted into the Field-based block course, students pursuing EC-12 Certification must complete KINE 3339 Elementary Physical Education Programs (3 sch) and KINE 3341 Secondary Physical Education Programs (3 sch). Students must have a minimum grade point average of 2.75 on all academic work taken in Kinesiology prior to being admitted into the Teacher Education Program.

Special Foundations
Select a minimum of 24 hours of advisor-approved courses 2 24

Total Hours 54

1 To enroll in the Professional Field Experiences students must have departmental approval as well as an overall and Kinesiology GPA of 2.75. Although a 2.75 GPA is the minimum standard for the Professional Field Experiences I and II, students should take note that most allied health graduate programs are extremely competitive. A 3.5 or higher GPA is mostly needed to position themselves for acceptance. This is especially true for Physical Therapy graduate programs that a 3.7 or higher GPA is essential.

2 Students must pass these courses with a grade of “C” or better.

Courses

KINE 1106  Weight Training
1 Semester Credit Hour (1 Lab Hour)
The study and practice of physiological principles related to training programs for the development of muscular strength and endurance.

KINE 1108  Strength Conditioning for Women
1 Semester Credit Hour (1 Lab Hour)
The study and practice of physiological principles relating to training programs for the development of muscular strength and endurance for women.

KINE 1110  Individual/Dual/Lifetime Sports
1 Semester Credit Hour (1 Lab Hour)
Instruction, participation, and practice in a variety of individual, dual, and lifetime sports.

KINE 1112  Personal Self Defense
1 Semester Credit Hour (1 Lab Hour)
Instruction and practice of contemporary techniques of self protection.
KINE 1116 Ranger Leadership Laboratory
1 Semester Credit Hour (1 Lab Hour)
Practical leadership and teamwork training in rappelling, rope bridges, weapons firing, map reading and land navigation, water safety, patrolling, and other ranger skills. Includes a weekend field trip where the techniques learned will be applied in competitive events. Cross listed with MSCI 1172.

KINE 1131 Yoga
1 Semester Credit Hour (1 Lecture Hour)
Instruction and practice of Yoga postures, breathing, meditation and relaxation.

KINE 1133 Tai Chi
1 Semester Credit Hour (1 Lab Hour)

KINE 1135 Army Physical Fitness Training
1 Semester Credit Hour (3 Lab Hours)
Instruction and practice of the skills, techniques and fitness activities that are germane to typical Army training.

KINE 1136 Pilates
1 Semester Credit Hour (3 Lab Hours)
Instruction and practice in the skills, techniques, and principles of Pilates with emphasis on the Classical Pilates matwork.

KINE 2215 First Aid and Safety
2 Semester Credit Hours (2 Lecture Hours)
Basic CPR and first aid instruction leading to American Red Cross certification.

KINE 2225 Sports Conditioning
2 Semester Credit Hours (2 Lecture Hours)
This course addresses the principles and practice of sports conditioning from a coaching perspective. Topics will include athletic needs evaluation, exercise programming, and program implementation. Issues regarding resistance exercise, speed, endurance, explosiveness training, and agility will be addressed.

KINE 2313 Foundations of Kinesiology
3 Semester Credit Hours (3 Lecture Hours)
An overview of the field of physical education which includes the history, philosophy, principles, current concepts of physical education and career options. For kinesiology majors this course must be taken prior to any senior level (4000) kinesiology courses.

KINE 2317 Re-inventing Games
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to introduce a framework for the development of games, sports, and activities through an inclusive and developmentally appropriate process of change, challenge, and choice. A wide array of sports, sports-related games and activities are introduced, deconstructed for their current exclusivity and then reconstructed through a framework which seeks to change the existing exclusivity of the rules, to challenge participating students of all cognitive and physical abilities, and then build in a choice component into the activity. This course is recommended prior to enrolling in KINE 3339 and KINE 3341.

KINE 2325 Physiological Aspects of Kinesiology
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the fundamental principles of human physiology and their application to kinesiology.

KINE 2326 Essentials of Professional Fitness Training
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide theoretical knowledge and practical skills in preparation for a national certification exam in personal training. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the client-trainer relationship, conducting health and fitness assessments, and designing and implementing appropriate exercise programming.

KINE 2375 Nutrition for Human Performance
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to the physiological, anatomical, and psychological aspects of nutrition in relation to human performance and optimal health. Special emphasis is placed on sport and fitness enhancement and achievement of peak training levels, through proper nutrient ingestion.

KINE 3112 Physiology of Exercise Lab
1 Semester Credit Hour (1 Lab Hour)
The required laboratory course with KINE 3312. Demonstration and hands-on learning will introduce students to the scientific basis, techniques, and methods used in exercise physiology. Lab activities will complement lecture materials from KINE 3312. KINE 3112 must be taken concurrently with KINE 3312.

KINE 3301 Outdoor Adventure Programs
3 Semester Credit Hours (3 Lecture Hours)
An introduction to a variety of outdoor adventure activities and basic outdoor skills. In addition to skill acquisition and assessment, this course covers such topics as: history and philosophy of outdoor adventure programs, risk and legal liability and trip planning.

KINE 3312 Physiology of Exercise
3 Semester Credit Hours (3 Lecture Hours)
This course is an application of anatomy and physiology that allows for the understanding of the effects of various forms of exercise and the environment on the body systems and performance. Lab activities will complement lecture materials.

Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313.

Co-requisite: KINE 3112.

KINE 3318 Prevention and Care of Athletic Injuries
3 Semester Credit Hours (3 Lecture Hours)
Provides the general knowledge and general application of theory, principles, and skills used in the prevention, care, and rehabilitation of athletic injuries.

KINE 3320 Introduction to Therapeutic Interventions
3 Semester Credit Hours (3 Lecture Hours)
Provides the student with the general knowledge of current theory and application of various therapeutic interventions used in the treatment of musculoskeletal injuries, including thermal therapy, cryotherapy, manual therapy, and therapeutic exercises.

Prerequisite: KINE 3318.

KINE 3337 Sport and Exercise Psychology
3 Semester Credit Hours (3 Lecture Hours)
This course provides general knowledge of the psychological factors that are associated with participation and performance in sport, exercise, and other types of physical activity with emphasis on motivational techniques, personality dynamics, and mental health serving as focal points.
KINE 3338  Motor Development/Motor Learning  
3 Semester Credit Hours (3 Lecture Hours)  
A study of the fundamental principles related to human motor  
development and the scientific principles related to motor learning.  
KINE 3339  Elementary Physical Education Programs  
3 Semester Credit Hours (3 Lecture Hours)  
The application of the fundamental principles related to human motor  
development, physical fitness, locomotor skills, non-locomotor skills,  
manipulative skills, and rhythmical activities with children at the  
elementary school level. Recommended  
Prerequisite: KINE 2317 and 3338.  
KINE 3341  Secondary Physical Education Programs  
3 Semester Credit Hours (3 Lecture Hours)  
The application of the fundamental principles related to human motor  
development, physical fitness, sports related activities and dance with  
children at the secondary school level. Recommended  
Prerequisite: KINE 3338 and 3339.  
KINE 4127  Biomechanics Lab  
1 Semester Credit Hour (1 Lab Hour)  
The required laboratory course with KINE 4327. The demonstration and  
application of mechanical factors and principles affecting human motion.  
Qualitative and quantitative analysis of human motion with emphasis on  
sport and fitness activities. KINE 4127 must be taken concurrently with  
KINE 4327.  
Prerequisite: KINE 4327*.  
* May be taken concurrently.  
KINE 4311  Measurement and Evaluation  
3 Semester Credit Hours (3 Lecture Hours)  
Use and function of the various tests used in kinesiology together with  
the purpose, scope and techniques of test construction. Development of  
statistical techniques necessary for manipulation and interpretation of  
physical performance data.  
Prerequisite: KINE 2313.  
KINE 4325  Kinetic Anatomy  
3 Semester Credit Hours (3 Lecture Hours)  
An analysis of the skeletal, muscular, and neurological structure and  
functional aspects of human movement with emphasis on sport and  
fitness activities.  
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313.  
KINE 4327  Biomechanics  
3 Semester Credit Hours (3 Lecture Hours)  
An analysis of the mechanical factors and principles influencing human  
motion with emphasis on sport and fitness activities. Recommended  
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313.  
Co-requisite: KINE 4127.  
KINE 4329  Essentials of Strength and Conditioning  
3 Semester Credit Hours (3 Lecture Hours)  
This course is designed to provide a comprehensive overview of strength  
and conditioning. Emphasis is placed on the exercise sciences (including  
anatomy, exercise physiology, and biomechanics) and nutrition, exercise  
technique, program design, organization and administration, and testing  
and evaluation. Additionally, this course is designed to prepare students  
for either the nationally accredited Certified Strength and Conditioning  
Specialist (CSCS) or the NSCA Certified Personal Trainer (CPT) exams.  
Prerequisite: (BIOL 2401, 2402, KINE 4312 and 4327).  
KINE 4339  Special Populations in Kinesiology  
3 Semester Credit Hours (3 Lecture Hours)  
A course designed to direct kinesiology educators toward meeting the  
program needs of the exceptional individual in physical education or  
kinesiology professional setting. Practical teaching application with  
exceptional individuals is stressed.  
Prerequisite: KINE 2313.  
KINE 4340  Exercise Testing and Prescription  
3 Semester Credit Hours (3 Lecture Hours)  
This course provides classroom and hands on experience addressing all  
facets of exercise testing and prescription ranging from health appraisal,  
physical fitness testing, principles of exercise prescription, clinical  
exercise physiology, and special populations.  
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313 and 3312.  
KINE 4390  Seminar in Exercise and Sport  
1-3 Semester Credit Hours (1-3 Lecture Hours)  
Contemporary issues in Exercise and Sport; topics vary with the  
individual. May be repeated for credit when topic varies.  
KINE 4693  Professional Field Experience I  
6 Semester Credit Hours (6 Lecture Hours)  
This course is a field-based experience (minimum of 150 hours) to  
provide the student the opportunity to apply knowledge and theory  
related to the student’s specialization in kinesiology (e.g. Exercise  
Science and Pre-Allied Health Professional). Students must enroll in both  
KINE 4693 and KINE 4694 at the same time. To enroll students must  
have departmental approval as well as a kinesiology GPA of 2.75. The  
field experience is for seniors only and they should enroll during their last  
semester. Students are allowed to enroll in other coursework but not to  
exceed the 18-hour university limit.  
KINE 4694  Professional Field Experience II  
6 Semester Credit Hours (6 Lecture Hours)  
This course is in conjunction with Professional Field Experience I. A  
minimum of 150 hours is required for this portion of the internship  
for a total of 300 hours. Students must enroll in both KINE 4693 and  
KINE 4694 at the same time. All of the requisites and limitations of  
KINE 4693 apply to this course as well.  
KINE 4696  Directed Individual Study  
1-6 Semester Credit Hours  
Investigative study on selected problems by students with particular  
needs through special permission of the Department Chair and Dean.  
May be repeated for credit when topic varies.  

**Sport Management, BS**  

**Program Description**  
The students in the Bachelor of Science in Sport Management will learn  
about the sport and leisure industries in the Coastal Bend region, such  
as ocean-based sport, collegiate athletics, and minor league sports. The  
BSSM curriculum covers comprehensive industry knowledge with a focus  
on sport governance, marketing, finance, and administration as well as  
prepares graduates for employment in a variety of private, nonprofit, and  
public sport settings. This degree can also be used as a stepping  
stone to advanced degrees in sport management, tourism management  
and leisure studies. The BSSM curriculum was developed in accordance  
with the Commission on Sport Management Accreditation (COSMA) and  
A&M-Corpus Christi plans to become the first COSMA accredited program  
among Hispanic-Serving Institutions (HSIs).
Sport Management, BS

The Bachelor of Science in Sport Management (BSSM) is designed for students who desire a broad background in sport management. The Bachelor of Science Degree with a major in Sport Management coursework includes: 1) General Education Core Requirements, 2) Major Requirements, 3) Special Emphasis Requirements, and 4) Directive Elective Requirements. Beyond the General Education Core Requirements, students majoring in Sport Management must complete all courses in sections 2-4 above with a grade of "C" or better. Transfer credit hours into the degree plan must adhere to the same grade standard. The students in the BSSM learn about not only high-profile sports but also sport and leisure sports indigenous to our region, such as ocean-based sport and tourism and developmental and minor league sports. The BSSM curriculum covers comprehensive industry knowledge with a focus on sport governance, marketing, finance and administration. The BSSM prepares graduates for employment in a variety of private, nonprofit, and public sport settings. This degree can also be used as a stepping stone to advanced degrees in sport management, tourism management and leisure studies.

Student Learning Outcomes

Students will demonstrate an understanding of the principles and practices common to the functional areas of sport management and meet the following learning outcomes:

- Utilize problem solving, critical thinking and decision-making skills in a variety of sport management settings and situations.
- Utilize effective leadership and management strategies in a variety of environments.
- Demonstrate accountability within the legal and ethical parameters of the sport management field.
- Integrate communication skills into roles as a professional.
- Utilize technology in the sport business practices.
- Explore historical and contemporary social determinants of sport that shape behavior and inequalities.

SMGT 4693  Professional Field Experiences I 1,2 6
SMGT 4694  Professional Field Experiences II 1,2 6

Any TWO 3-hour KINE courses. 6

Sport Management Directive Electives

Students are required to choose 18 semester hours of Directed Electives. Courses can be chosen from any category below. 18

- Business Administration ³
- Entrepreneurship ³
- Exercise Science ³
- Human Resources Management ³
- Management ³
- Marketing ³
- Public Relations
- Or faculty mentor-approved courses.

Total Hours 120-122

1 Sport management students need to receive both a cumulative and major GPA of 2.75 or above to be able to take the Professional Field Experience courses (SMGT 4693 & SMGT 4694).

2 SMGT 4693 is cross listed with KINE 4693 and SMGT 4694 is cross listed with KINE 4694.

³ Students can elect to minor in the areas above. For additional information regarding minors, please contact academic advisors in the appropriate area. Courses in the minor may require pre-requisites.

**Courses**

**SMGT 2301 Practicum in Sport Organization I**

3 Semester Credit Hours

This course is designed to expose sport management majors to the profession by working with and assisting an organization in the sport or recreational industry. This will provide the student with opportunities to apply knowledge and theory related to sport management and help students to understand expectations and responsibilities and the reality of working in the sport industry. This will include, but is not limited to, performing managerial functions, such as planning, organizing, leading and evaluating, as well as, facility and event management, marketing, promotion, and market research. Students are expected to engage in the professional affiliation experience and complete accompanying academic requirements during the semester that they have made application. This experience will carry 3 hours of academic credit and will require a minimum of 100 contact hours at the fieldwork site.

**SMGT 2314 Introduction to Sport Management**

3 Semester Credit Hours (3 Lecture Hours)

The study of operating principles for programs in intercollegiate athletics, professional sports, recreational sports, and community sport associations. This course is recommended prior to courses in the Sport Management Specialization.

**SMGT 2315 Sport and Social Issues**

3 Semester Credit Hours (3 Lecture Hours)

Students examine the psychosocial and ethical factors involved in effective sport management. This course examines race, gender, social class, politics, religion, and other factors that affect sport in society.
SMGT 3301 Practicum in Sport Organization II
3 Semester Credit Hours
This course is designed to give sport management majors advanced practice and participation in working in the sport and recreational industry. This will include, but is not limited to, performing managerial functions, such as planning, organizing, leading and evaluating, as well as, facility and event management, marketing, promotion, and market research. Students are expected to engage in the professional affiliation experience and complete accompanying academic requirements during the semester that they have made application. This is an experiential course that allows the mid-level sport management major to build on the competencies developed SMGT 2301 through experience in hands-on supervisory and leadership positions and focused reflection through academic work. Students may have the opportunities available in the course to develop more advanced knowledge, skills and values held by professionals in the sport management industry. The practical work for this course is predominately completed on campus.
Prerequisite: (SMGT 2301).

SMGT 3320 Sport Communication
3 Semester Credit Hours (3 Lecture Hours)
The purpose of this course is two-fold: (a) to explore sport communication theories and how they relate to current issues and topics within the sport communication realm, particularly as they address mass media communication and the larger sport environment; and (b) to examine more practical concepts, activities, and behaviors related to sport communication and apply them to professional and collegiate sports.

SMGT 3325 Governance and Ethics in Sport
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide knowledge and awareness of the structures, rules and laws governing various sport organizations as well the participants.

SMGT 3330 Promotion of Sport
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide the sport manager with an understanding of the main marketing issues within the sport industry. Special emphasis is placed on the application and assessment of marketing sport within the private and public sectors.

SMGT 3335 Legal Issues in Sport
3 Semester Credit Hours (3 Lecture Hours)
Provides general knowledge of judicial system and current legal issues in sport including risk management, eligibility, discrimination, drug testing, and Title IX.

SMGT 3366 Managing Sport and Leisure Services
3 Semester Credit Hours (3 Lecture Hours)
Introduction of issues related to managing sport and leisure services in a variety of settings such as universities, municipal recreation, corporate wellness centers, in government or private sectors.

SMGT 3367 Sport Tourism
3 Semester Credit Hours (3 Lecture Hours)
The course is designed to provide an introduction to sport events from a tourism strategic planning marketing perspective. Throughout this course, students will be exposed to sport event production strategies for tourism and their impacts on event stakeholders. Students will examine specific sport tourism events and analyze their strategies for destination branding; sport tourism facility and event financing; host-guest interactions; environmental, political, economic, and socio-cultural impacts.

SMGT 4308 Sport Facilities and Event Management
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on the major components of both facility and event management – planning, financing, marketing, implementation and evaluation. This course will provide a working knowledge of how to manage sport facilities and how to plan, manage, implement and evaluate sport events
Prerequisite: SMGT 2314.

SMGT 4309 Finance Management in Sport
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide knowledge of financial planning and administration. This includes, but not limited to, basic budget terminology, sources of financing for operating and capital expenditures, expenditure policies, auditing and the grant process.
Prerequisite: SMGT 2314.

SMGT 4351 Sport Entrepreneurship
3 Semester Credit Hours (3 Lecture Hours)
This course will provide an analysis of entrepreneurship in sport and the sport industry. Emphasis will be placed on the structure and framework of entrepreneurial endeavors and the theory and practice of entrepreneurs in sport. Topics covered will include: idea generation, business strategy, entrepreneurial activities, establishing business operations, venture capitalism, business plan writing, financing and marketing a start-up and the legal challenges of growing a business.
Prerequisite: (SMGT 2314).

SMGT 4365 Managing Personnel in Sport Organizations
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to expand the student's understanding of various management techniques and their application to sport organizations and administration. Topics include organizational behavior, human resources management and labor policies.
Prerequisite: SMGT 2314.

SMGT 4693 Professional Field Experiences I
6 Semester Credit Hours
The professional field experience (minimum of 150 hours) is designed to provide the student the opportunity to apply knowledge and theory related to kinesiology, health, physical fitness and sport. The underlying objective behind the fieldwork and internship assignments is for students to gain on-the-job opportunities to integrate their classroom knowledge with professional responsibilities. Students must enroll in both SMGT 4693 - Professional Field Experience I and complete requirements of this course.

SMGT 4694 Professional Field Experiences II
6 Semester Credit Hours
(minimum 150 hours) is designed to provide the student with additional opportunities to apply knowledge and theory related to kinesiology, health, physical fitness and sport that was gained in SMGT 4393 Professional Field Experience I. Students must be enrolled in SMGT 4693 Professional Field Experience I simultaneously with SMGT 4694 Professional Field Experience II.

Teacher Certifications
- Elementary, Teacher Certification (p. 133)
- Secondary/EC-12, Teacher Certification (p. 133)
**Elementary, Teacher Certification**

**Program Description**

Students who complete the requirements for the Bachelor of Science degree and who successfully pass the appropriate TExES tests will fulfill simultaneously all requirements for either EC-6 Core Subjects with a Reading Specialization, EC-6 Core Subjects-Bilingual, 4-8 Mathematics or EC-12 Special Education teacher certification.

**Secondary/EC-12, Teacher Certification**

**Program Description**

Students seeking certification to teach in the secondary schools of Texas, or at all levels in the fields of art, music, physical education, Spanish, and theatre must:

1. major in an approved teaching field and complete all major study and related requirements for a baccalaureate degree in that field, and
2. comply with teacher certification requirements.

Requirements to establish a major field of study are located within the individual college sections of the catalog.

In addition to these requirements, students seeking a certificate to teach in the secondary schools of Texas must complete:

1. The baccalaureate degree with an academic major.
2. The University's General Education requirements, including the Core Curriculum Program. (See "General Education Requirements" in the "Undergraduate Programs (p. 42)" section of this catalog; see also "Core Curriculum Program (http://catalog.tamucc.edu/undergraduate/university-college/programs/core-curriculum-program/)"
3. Three semester hours of reading; READ 3353 Content Area Reading for Secondary Students (3 sch).
4. Either secondary or EC-12 course work
5. A passing score on the appropriate TExES tests

**Program Requirements**

Select either Secondary or EC-12 course work as listed below:

EDUC 2307 Schooling in a Democracy
3 Semester Credit Hours
A course to enable citizens, parents, and prospective professional educators to synthesize their general education experiences/courses with current issues and practices related to teaching and learning in the United States. Career opportunities and personal commitments to the teaching profession will be explored. The systematic process of admission to the teacher education program will be initiated. Field observations in communities and schools will be required.
TCCNS: EDUC 1301

EDUC 3311 School and Society
3 Semester Credit Hours (3 Lecture Hours)
The characteristics, organization, and management of the American School System including: The history of the development of American schools, legal and ethical issues, teaching as a profession, influence of cultural background on instruction of students, characteristics and needs of special populations, and adapting curriculum and instruction for students from special populations. A student interview with Department of Teacher Education faculty will be required. Field experiences required.

EDUC 4311 Classroom Management
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment, and Technology.

EDUC 4312 Classroom Management: Grades 7-12
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment and Technology for Grades 7-12 Teachers.

EDUC 4313 Classroom Management: Grades 4-8
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment and Technology for Grades 4-8 Teachers.
EDUC 4314 Classroom Management: Grades EC-6
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment and Technology for Grades EC-6 Teachers.

EDUC 4321 Instructional Design for Special Populations
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with clinical teaching.

EDUC 4322 Instructional Design for Special Populations: Grades 7-12
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with student teaching.

EDUC 4323 Instructional Design for Special Populations: Grades 4-8
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with student teaching.

EDUC 4324 Instructional Design for Special Populations: Grades EC-6
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with student teaching.

EDUC 4390 Special Topics
1-3 Semester Credit Hours (1 Lecture Hour)
Topics in Curriculum and Pedagogy will be explored at the request of participants or faculty with the approval of the Department Chair, Dean, and Curriculum Coordinating Committee (CCC).

EDUC 4392 Student Teaching: EC-Grade 6
3 Semester Credit Hours (3 Lecture Hours)
Laboratory experiences and directed teaching in grades EC-Grade 6.

EDUC 4393 Student Teaching: Grades 7-12
3 Semester Credit Hours (3 Lecture Hours)
Laboratory experiences and directed teaching in grades 7-12.

EDUC 4394 Student Teaching: EC-Grade 6
3 Semester Credit Hours (3 Lecture Hours)
Laboratory experiences and directed teaching in grades EC-Grade 6.

Prerequisite: EDUC 4693.

* May be taken concurrently.

EDUC 4605 Planning, Teaching, Assessment and Technology
6 Semester Credit Hours (6 Lecture Hours)
A study of planning, teaching, assessment and technology as they relate to teaching. Lesson planning, teaching, reflection, observation, and collaboration with site professors and cooperating teachers in the field are integral parts of the course.

EDUC 4606 Planning, Teaching, Assessment and Technology for Grades 7-12 Teachers
6 Semester Credit Hours
A study of planning, teaching, assessment and technology as they relate to teaching in grades 7-12. Planning will include general curriculum issues, the lesson cycle, multiple intelligences, learning styles and resources. Teaching will include methods and strategies for delivery of instruction and classroom environment. Assessment will focus on traditional and authentic alternative assessment. Technology will cover media and techniques from transparencies to computer technology, and will incorporate the skills and knowledge for using the microcomputer to plan and develop presentations, instructional materials, and learning activities in the public school curriculum. Observation and collaboration with professional teachers in the field, as well as journal writing, will be integral parts of the course. Two full days per week are required at a partner school site. A student may enroll in this course for a maximum of 2 times only; and it must be completed during the Fall or Spring semesters in order to successfully complete all requirements.

EDUC 4607 Planning, Teaching, Assessment and Technology for Grades 4-8 Teachers
6 Semester Credit Hours
A study of planning, teaching, assessment and technology as they relate to teaching in grades 4-8. Planning will include general curriculum issues, the lesson cycle, multiple intelligences, learning styles and resources. Teaching will include methods and strategies for delivery of instruction and classroom environment. Assessment will focus on traditional and authentic alternative assessment. Technology will cover media and techniques from transparencies to computer technology, and will incorporate the skills and knowledge for using the microcomputer to plan and develop presentations, instructional materials, and learning activities in the public school curriculum. Observation and collaboration with professional teachers in the field, as well as journal writing, will be integral parts of the course. Two full days per week are required at a partner school site. A student may enroll in this course for a maximum of 2 times only; and it must be completed during the Fall or Spring semesters in order to successfully complete all requirements.

EDUC 4608 Planning, Teaching, Assessment and Technology for Grades EC-6 Teachers
6 Semester Credit Hours
A study of planning, teaching, assessment and technology as they relate to teaching in grades EC-6. Planning will include general curriculum issues, the lesson cycle, multiple intelligences, learning styles and resources. Teaching will include methods and strategies for delivery of instruction and classroom environment. Assessment will focus on traditional and authentic alternative assessment. Technology will cover media and techniques from transparencies to computer technology, and will incorporate the skills and knowledge for using the microcomputer to plan and develop presentations, instructional materials, and learning activities in the public school curriculum. Observation and collaboration with professional teachers in the field, as well as journal writing, will be integral parts of the course. Two full days per week are required at a partner school site. A student may enroll in this course for a maximum of 2 times only; and it must be completed during the Fall or Spring semesters in order to successfully complete all requirements.
EDUC 4693  Student Teaching: Grades 7-12
6 Semester Credit Hours (6 Lecture Hours)
Laboratory experiences and directed teaching in grades 7-12 in the student’s teaching field(s).

EDUC 4694  Student Teaching: EC-Grade 6
6 Semester Credit Hours (6 Lecture Hours)
Laboratory experiences and directed teaching in grades EC-Grade 6.
Prerequisite: EDUC 4393*
* May be taken concurrently.

EDUC 4696  Directed Individual Study
1-6 Semester Credit Hours (1 Lecture Hour)
Programs will be designed for individual cases through special permission of the Department Chair and Dean. May be repeated for credit when the topic varies.

EDUC 4699  Teaching Internship
6 Semester Credit Hours
An internship designed for inservice teachers seeking certification under the post baccalaureate program. Grade assigned will be "credit" (CR) or "no credit" (NC).

EDUC 4992  Student Teaching: Grades 4-8
9 Semester Credit Hours
Laboratory experiences and directed teaching in grades 4-8 in the student’s teaching field(s).

EDUC 4993  Student Teaching: Grades 7-12
9 Semester Credit Hours
Laboratory experiences and directed teaching in grades 7-12.

EDUC 4994  Student Teaching: EC grade 6
9 Semester Credit Hours (9 Lecture Hours)
Laboratory experiences and directed teaching in an EC-Grade 6 classroom.

EDUC 4995  Clinical Teaching
9 Semester Credit Hours
Laboratory experiences and directed teaching in student’s certification area(s).

**Minors**

- Education, Minor (p. 135)
- Kinesiology, Minor (p. 137)

- Military Science, Minor (p. 141)
- Sport Management, Minor (http://catalog.tamucc.edu/undergraduate/education-human-development/minors/sport-management-minor/)

**Education, Minor**

**Program Description**
The College of Education and Human Development minor is designed to provide foundational and experiential knowledge of the pedagogy and professional responsibilities of teaching in grades 4-8 and 7-12. There are career avenues beyond the public or private PK-12 education setting for which integrated coursework in Education offers excellent preparation and opportunity. For example, College of Business graduates often require teaching and communication skills in the private and non-profit sectors of management and training. Others graduating with degrees in content areas like Mathematics, Chemistry, Physics, English or Sociology often seek graduate degrees in Education so that they may eventually become instructors in community colleges and professors at the university or college level. Persons who select the minor must declare the minor with a College of Education and Human Development academic advisor.

Undergraduates seeking a minor in Teacher Education may not qualify for the ASCENT program.

**Program Requirements**
The minor will consist of 18 hours in education. A minimum grade point average of 2.0 ("C") on a 4-point scale is required in all courses for successful completion of the minor. The minor will consist of the following course work:

<table>

</table>

Total Hours: 18

1

Students seeking a Minor in Education must take EDUC 4605 Planning, Teaching, Assessment and Technology (6 sch) during the Fall or Spring semester only.

2

Prerequisites required for the EDUC 4605 Planning, Teaching, Assessment and Technology (6 sch) course include Criminal Background check and TB Screening; and a minimum grade point average of 2.75 on all academic work attempted in the student’s teaching field(s), area of specialization or delivery system or a 2.75 on the last 60 hours attempted.

^ Blended offering

Please note that many teaching certificate areas (i.e. History, English, Science and others) may require above the minimum GPA of 2.75 and may not accept grades below “C”. Students are to check the undergraduate catalog section that pertains to the certificate area for required GPA’s.

**Courses**

EDUC 2307  Schooling in a Democracy
3 Semester Credit Hours
A course to enable citizens, parents, and prospective professional educators to synthesize their general education experiences/courses with current issues and practices related to teaching and learning in the United States. Career opportunities and personal commitments to the teaching profession will be explored. The systematic process of admission to the teacher education program will be initiated. Field observations in communities and schools will be required.

TCCNS: EDUC 1301

[^]: May be taken concurrently.
EDUC 3311  School and Society
3 Semester Credit Hours (3 Lecture Hours)
The characteristics, organization, and management of the American School System including: The history of the development of American schools, legal and ethical issues, teaching as a profession, influence of cultural background on instruction of students, characteristics and needs of special populations, and adapting curriculum and instruction for students from special populations. A student interview with Department of Teacher Education faculty will be required. Field experiences required.

EDUC 4311  Classroom Management
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment, and Technology.

EDUC 4312  Classroom Management: Grades 7-12
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment and Technology for Grades 8-12 Teachers.

EDUC 4313  Classroom Management: Grades 4-8
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment and Technology for Grades 4-8 Teachers.

EDUC 4314  Classroom Management: Grades EC-6
3 Semester Credit Hours (3 Lecture Hours)
A study of classroom organization and management as related to basic principles of human development and learning. Preventative discipline techniques utilizing both group and individual processes are emphasized. This course is to be taken concurrently with Planning, Teaching, Assessment and Technology for Grades EC-6 Teachers.

EDUC 4321  Instructional Design for Special Populations
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with clinical teaching.

EDUC 4322  Instructional Design for Special Populations: Grades 7-12
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with student teaching.

EDUC 4323  Instructional Design for Special Populations: Grades 4-8
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with student teaching.

EDUC 4324  Instructional Design for Special Populations: Grades EC-6
3 Semester Credit Hours (3 Lecture Hours)
A study of the characteristics and needs of special student populations in a culturally diverse society. Special populations emphasized will include special education, gifted and talented, at-risk, and bilingual. Instructional strategies, differentiating curriculum, and diversifying assessment will be examined in relation to special populations. This course is to be taken concurrently with student teaching.

EDUC 4390  Special Topics
1-3 Semester Credit Hours (1 Lecture Hour)
Topics in Curriculum and Pedagogy will be explored at the request of participants or faculty with the approval of the Department Chair, Dean, and Curriculum Coordinating Committee (CCC).

EDUC 4392  Student Teaching: EC-Grade 6
3 Semester Credit Hours (3 Lecture Hours)
Laboratory experiences and directed teaching in grades EC-Grade 6.

EDUC 4393  Student Teaching: Grades 7-12
3 Semester Credit Hours (3 Lecture Hours)
Laboratory experiences and directed teaching in grades 7-12.

EDUC 4394  Student Teaching: EC-Grade 6
3 Semester Credit Hours (3 Lecture Hours)
Laboratory experiences and directed teaching in grades EC-Grade 6.

Prerequisite: EDUC 4693*.
* May be taken concurrently.

EDUC 4605  Planning, Teaching, Assessment and Technology
6 Semester Credit Hours (6 Lecture Hours)
A study of planning, teaching, assessment and technology as they relate to teaching. Lesson planning, teaching, reflection, observation, and collaboration with site professors and cooperating teachers in the field are integral parts of the course.

EDUC 4606  Planning, Teaching, Assessment and Technology for Grades 7-12 Teachers
6 Semester Credit Hours
A study of planning, teaching, assessment and technology as they relate to teaching in grades 7-12. Planning will include general curriculum issues, the lesson cycle, multiple intelligences, learning styles and resources. Teaching will include methods and strategies for delivery of instruction and classroom environment. Assessment will focus on traditional and authentic alternative assessment. Technology will cover media and techniques from transparencies to computer technology, and will incorporate the skills and knowledge for using the microcomputer to plan and develop presentations, instructional materials, and learning activities in the public school curriculum. Observation and collaboration with professional teachers in the field, as well as journal writing, will be integral parts of the course. Two full days per week are required at a partner school site. A student may enroll in this course for a maximum of 2 times only, and it must be completed during the Fall or Spring semesters in order to successfully complete all requirements.
EDUC 4607 Planning, Teaching, Assessment and Technology for Grades 4-8 Teachers
6 Semester Credit Hours
A study of planning, teaching, assessment and technology as they relate to teaching in grades 4-8. Planning will include general curriculum issues, the lesson cycle, multiple intelligences, learning styles and resources. Teaching will include methods and strategies for delivery of instruction and classroom environment. Assessment will focus on traditional and authentic alternative assessment. Technology will cover media and techniques from transparencies to computer technology, and will incorporate the skills and knowledge for using the microcomputer to plan and develop presentations, instructional materials, and learning activities in the public school curriculum. Observation and collaboration with professional teachers in the field, as well as journal writing, will be integral parts of the course. Two full days per week are required at a partner school site. A student may enroll in this course for a maximum of 2 times only; and it must be completed during the Fall or Spring semesters in order to successfully complete all requirements.

EDUC 4608 Planning, Teaching, Assessment and Technology for Grades EC-6 Teachers
6 Semester Credit Hours
A study of planning, teaching, assessment and technology as they relate to teaching in grades EC-6. Planning will include general curriculum issues, the lesson cycle, multiple intelligences, learning styles and resources. Teaching will include methods and strategies for delivery of instruction and classroom environment. Assessment will focus on traditional and authentic alternative assessment. Technology will cover media and techniques from transparencies to computer technology, and will incorporate the skills and knowledge for using the microcomputer to plan and develop presentations, instructional materials, and learning activities in the public school curriculum. Observation and collaboration with professional teachers in the field, as well as journal writing, will be integral parts of the course. Two full days per week are required at a partner school site. A student may enroll in this course for a maximum of 2 times only; and it must be completed during the Fall or Spring semesters in order to successfully complete all requirements.

EDUC 4693 Student Teaching: Grades 7-12
9 Semester Credit Hours (9 Lecture Hours)
Laboratory experiences and directed teaching in grades 7-12 in the student’s teaching field(s).

EDUC 4694 Student Teaching: EC-Grade 6
9 Semester Credit Hours (9 Lecture Hours)
Laboratory experiences and directed teaching in grades EC-Grade 6.
Prerequisite: EDUC 4393^.
^May be taken concurrently.

EDUC 4695 Clinical Teaching
9 Semester Credit Hours
Laboratory experiences and directed teaching in student’s certification area(s).

Kinesiology, Minor

Program Description
The department allows minors in the 3 specializations (EC-12 Physical Education Certification, Exercise Science, and Sport Management).

EC-12 PE Certification Minor
The minor is designed to serve education students that have or are pursuing a major in another teaching discipline and aspire to achieve an additional certification in Physical Education after issuance of initial teaching certificate. However, non-teaching majors who are interested in supplementing their major area of study with an added knowledge of physical education may also pursue this minor. A minimum of twelve hours must be taken at Texas A&M University-Corpus Christi. For additional information, contact an academic advisor in the College of Education and Human Development.

Exercise Science Minor
The minor is designed to serve students who are interested in supplementing their major area of study with an added knowledge of exercise science. A minimum of twelve hours must be taken at Texas A&M University-Corpus Christi. For additional information, contact an academic advisor in the College of Education and Human Development.

Courses

KINE 1106  Weight Training
1 Semester Credit Hour (1 Lab Hour)
The study and practice of physiological principles related to training programs for the development of muscular strength and endurance.

KINE 1108  Strength Conditioning for Women
1 Semester Credit Hour (1 Lab Hour)
The study and practice of physiological principles relating to training programs for the development of muscular strength and endurance for women.

KINE 1110  Individual/Dual/Lifetime Sports
1 Semester Credit Hour (1 Lab Hour)
Instruction, participation, and practice in a variety of individual, dual, and lifetime sports.

KINE 1112  Personal Self Defense
1 Semester Credit Hour (1 Lab Hour)
Instruction and practice of contemporary techniques of self protection.

KINE 1116  Ranger Leadership Laboratory
1 Semester Credit Hour (1 Lab Hour)
Practical leadership and teamwork training in rappelling, rope bridges, weapons firing, map reading and land navigation, water safety, patrolling, and other ranger skills. Includes a weekend field trip where the techniques learned will be applied in competitive events. Cross listed with MSCI 1172.

KINE 1131  Yoga
1 Semester Credit Hour (1 Lecture Hour)
Instruction and practice of Yoga postures, breathing, meditation and relaxation.

KINE 1133  Tai Chi
1 Semester Credit Hour (1 Lab Hour)

KINE 1135  Army Physical Fitness Training
1 Semester Credit Hour (3 Lab Hours)
Instruction and practice of the skills, techniques and fitness activities that are germane to typical Army training.

KINE 1136  Pilates
1 Semester Credit Hour (3 Lab Hours)
Instruction and practice in the skills, techniques, and principles of Pilates with emphasis on the Classical Pilates matwork.

KINE 2215  First Aid and Safety
2 Semester Credit Hours (2 Lecture Hours)
Basic CPR and first aid instruction leading to American Red Cross certification.

KINE 2225  Sports Conditioning
2 Semester Credit Hours (2 Lecture Hours)
This course addresses the principles and practice of sports conditioning from a coaching perspective. Topics will include athletic needs evaluation, exercise programming, and program implementation. Issues regarding resistance exercise, speed, endurance, explosiveness training, and agility will be addressed.

KINE 2313  Foundations of Kinesiology
3 Semester Credit Hours (3 Lecture Hours)
An overview of the field of physical education which includes the history, philosophy, principles, current concepts of physical education and career options. For kinesiology majors this course must be taken prior to any senior level (4000) kinesiology courses.

TCCNS: PHED 1301

KINE 2317  Re-inventing Games
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to introduce a framework for the development of games, sports, and activities through an inclusive and developmentally appropriate process of change, challenge, and choice. A wide array of sports, sports-related games and activities are introduced, deconstructed for their current exclusivity and then reconstructed through a framework which seeks to change the existing exclusivity of the rules, to challenge participating students of all cognitive and physical abilities, and then build in a choice component into the activity. This course is recommended prior to enrolling in KINE 3339 and KINE 3341.

KINE 2325  Physiological Aspects of Kinesiology
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the fundamental principles of human physiology and their application to kinesiology.

KINE 2326  Essentials of Professional Fitness Training
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide theoretical knowledge and practical skills in preparation for a national certification exam in personal training. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the client-trainer relationship, conducting health and fitness assessments, and designing and implementing appropriate exercise programming.

KINE 2375  Nutrition for Human Performance
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to the physiological, anatomical, and psychological aspects of nutrition in relation to human performance and optimal health. Special emphasis is placed on sport and fitness enhancement and achievement of peak training levels, through proper nutrient ingestion.

KINE 3112  Physiology of Exercise Lab
1 Semester Credit Hour (1 Lab Hour)
The required laboratory course with KINE 3312. Demonstration and hands-on learning will introduce students to the scientific basis, techniques, and methods used in exercise physiology. Lab activities will complement lecture materials from KINE 3312. KINE 3112 must be taken concurrently with KINE 3312.

KINE 3301  Outdoor Adventure Programs
3 Semester Credit Hours (3 Lecture Hours)
An introduction to a variety of outdoor adventure activities and basic outdoor skills. In addition to skill acquisition and assessment, this course covers such topics as: history and philosophy of outdoor adventure programs, risk and legal liability and trip planning.
KINE 3312 Physiology of Exercise
3 Semester Credit Hours (3 Lecture Hours)
This course is an application of anatomy and physiology that allows for
the understanding of the effects of various forms of exercise and the
environment on the body systems and performance. Lab activities will
complement lecture materials.
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313.
Co-requisite: KINE 3112.

KINE 3318 Prevention and Care of Athletic Injuries
3 Semester Credit Hours (3 Lecture Hours)
Provides the general knowledge and general application of theory,
principles, and skills used in the prevention, care, and rehabilitation of
athletic injuries.

KINE 3320 Introduction to Therapeutic Interventions
3 Semester Credit Hours (3 Lecture Hours)
Provides the student with the general knowledge of current theory and
application of various therapeutic interventions used in the treatment of
musculoskeletal injuries, including thermal therapy, cryotherapy, manual
therapy, and therapeutic exercises.
Prerequisite: KINE 3318.

KINE 3337 Sport and Exercise Psychology
3 Semester Credit Hours (3 Lecture Hours)
This course provides general knowledge of the psychological factors
that are associated with participation and performance in sport, exercise,
and other types of physical activity with emphasis on motivational
techniques, personality dynamics, and mental health serving as focal
points.

KINE 3338 Motor Development/Motor Learning
3 Semester Credit Hours (3 Lecture Hours)
A study of the fundamental principles related to human motor
development and the scientific principles related to motor learning.

KINE 3339 Elementary Physical Education Programs
3 Semester Credit Hours (3 Lecture Hours)
The application of the fundamental principles related to human motor
development, physical fitness, locomotor skills, non-locomotor skills,
manipulative skills, and rhythmic activities with children at the
elementary school level. Recommended
Prerequisite: KINE 2317 and 3338.

KINE 3341 Secondary Physical Education Programs
3 Semester Credit Hours (3 Lecture Hours)
The application of the fundamental principles related to human motor
development, physical fitness, sports related activities and dance with
children at the secondary school level. Recommended
Prerequisite: KINE 3338 and 3339.

KINE 4127 Biomechanics Lab
1 Semester Credit Hour (1 Lab Hour)
The required laboratory course with KINE 4327. The demonstration and
application of mechanical factors and principles affecting human motion.
Qualitative and quantitative analysis of human motion with emphasis on
sport and fitness activities. KINE 4127 must be taken concurrently with
KINE 4327.
Prerequisite: KINE 4327*.
*May be taken concurrently.

KINE 4311 Measurement and Evaluation
3 Semester Credit Hours (3 Lecture Hours)
Use and function of the various tests used in kinesiology together with
the purpose, scope and techniques of test construction. Development of
statistical techniques necessary for manipulation and interpretation of
physical performance data.
Prerequisite: KINE 2313.

KINE 4325 Kinetic Anatomy
3 Semester Credit Hours (3 Lecture Hours)
An analysis of the skeletal, muscular, and neurological structure and
functional aspects of human movement with emphasis on sport and
fitness activities.
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313.

KINE 4327 Biomechanics
3 Semester Credit Hours (3 Lecture Hours)
An analysis of the mechanical factors and principles influencing human
motion with emphasis on sport and fitness activities. Recommended
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313.
Co-requisite: KINE 4127.

KINE 4329 Essentials of Strength and Conditioning
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide a comprehensive overview of strength
and conditioning. Emphasis is placed on the exercise sciences (including
anatomy, exercise physiology, and biomechanics) and nutrition, exercise
technique, program design, organization and administration, and testing
and evaluation. Additionally, this course is designed to prepare students
for either the nationally accredited Certified Strength and Conditioning
Specialist (CSCS) or the NSCA Certified Personal Trainer (CPT) exams.
Prerequisite: (BIOL 2401, 2402, KINE 4312 and 4327).

KINE 4339 Special Populations in Kinesiology
3 Semester Credit Hours (3 Lecture Hours)
A course designed to direct kinesiology educators toward meeting the
program needs of the exceptional individual in physical education or
kinesiology professional setting. Practical teaching application with
exceptional individuals is stressed.
Prerequisite: KINE 2313.

KINE 4340 Exercise Testing and Prescription
3 Semester Credit Hours (3 Lecture Hours)
This course provides classroom and hands on experience addressing all
facets of exercise testing and prescription ranging from health appraisal,
physical fitness testing, principles of exercise prescription, clinical
exercise physiology, and special populations.
Prerequisite: (KINE 2325 or BIOL 2401) and KINE 2313 and 3312.

KINE 4390 Seminar in Exercise and Sport
1-3 Semester Credit Hours (1-3 Lecture Hours)
Contemporary issues in Exercise and Sport; topics vary with the
individual. May be repeated for credit when topic varies.

KINE 4693 Professional Field Experience I
6 Semester Credit Hours (6 Lecture Hours)
This course is a field-based experience (minimum of 150 hours) to
provide the student the opportunity to apply knowledge and theory
related to the student’s specialization in kinesiology (e.g. Exercise
Science and Pre-Allied Health Professional). Students must enroll in both
KINE 4693 and KINE 4694 at the same time. To enroll students must
have departmental approval as well as a kinesiology GPA of 2.75. The
field experience is for seniors only and they should enroll during their last
semester. Students are allowed to enroll in other coursework but not to
exceed the 18-hour university limit.
Military Science

Program Description

A four-year ROTC program includes instruction for freshman and sophomore students as well as advanced students. As stated in the introduction of the College of Education and Human Development Handbook, a minor in Military Science is offered, giving the student academic credit for the leadership, critical thinking and military skills training received. At least 19 credit hours are required to receive credit for a minor.

The Advanced Military Science Program

The Advanced Military Science Program at Texas A&M University-Corpus Christi allows qualified students to earn commissions as Second Lieutenants in the active Army, the Army Reserve, or the National Guard.

Entry into the program is restricted to students who have demonstrated scholastic ability, excellent character, and leadership potential. Qualification is based on successful accomplishment of any one of the following:

1. Honorable military service.
2. Completion of the U.S. Army Cadet Command Camp (a 4 week summer compression program).
3. Completion of the first two years of the ROTC four-year program at another institution.

The two-year curriculum is centered on developing leadership and management skills. Training exercises aimed at increasing the students' confidence are practiced throughout the program.

Graduates of this program are appointed in entry management positions in the Army depending upon their preferences, academic majors, and demonstrated leadership.

Courses

MSCI 1170 Introduction to the Army
1 Semester Credit Hour (1 Lecture Hour)
MSCI 1170/MSL 101 Focuses on introduction to the Army and basic soldiers. It introduces Cadets to the Army and the Profession of Arms. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers’ Training Corps (ROTC) program, its purpose in the Army, and its advantages to the student. Cadets also begin learning map reading and land navigation, students will have initial classes on fieldcraft, first and individual/team movement techniques that will include a weekly lab facilitated by MS III Cadets and supervised by MSIV’s and ROTC Cadre.

MSCI 1171 Foundations of Leadership
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)
MSCI 1171/MSL 102 Introduces Cadets to the personal challenges and competencies are critical for effective leadership. Cadets learn the personal development of life skills such as critical thinking, time management, goal setting, and communication. Cadets learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Cadets will begin learning the basics of squad level tactics that will be reinforced during a weekly lab facilitated by MS III Cadets and supervised by ROTC Cadre.

MSCI 1172 Ranger Leadership Laboratory
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)
RANGER LEADERSHIP LABORATORY Practical leadership and teamwork training in rappelling, rope bridges, weapons firing, map reading and land navigation, water safety, patrolling, and other ranger skills. Includes a weekend field trip where the techniques learned will be applied in competitive events. Cross listed with KINE 1116. May be repeated for credit.

MSCI 2270 Leadership and Ethics
2 Semester Credit Hours (2 Lecture Hours)
MSCI 2270/MSL 201 Focuses on leadership and ethics. The course adds depth to the cadets knowledge of the different leadership styles. Cadets will conduct a leadership analysis of famous leaders and self-assessment of their own leadership style. The Army Profession is also stressed through understanding values, ethics and how to apply both different situations they may encounter as a leader. Army values and ethics and their relationship to the law of the land warfare and philosophy of military service are also stressed. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by MSIV’s and ROTC Cadre.
MSCI 2271  Army Doctrine and Decision Making
2 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
MSCI 2271/MSL 202 Focuses on Army doctrine and team development. The course begins the journey to understand and demonstrate competencies as they relate to Army doctrine. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises at squad level. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by Cadre.

MSCI 3301  American Military History
3 Semester Credit Hours (3 Lecture Hours)
A comprehensive, but brief account of the U.S. Army from past to present. Integrates the basic knowledge of American military history into the future officer's education. This is an Army standardized, mandatory course that is a part of pre-commissioning training for contracted U.S. Army ROTC cadets. Employs American military history as a tool for studying military professionalism and applying critical-thinking skills and decision-making skills to military problems. Analyzes the definition of Military History, the theory and practice of war, and the American Military System as an intellectual framework for applying critical-thinking skills and problem-solving skill to the study of historical, military problems. Prerequisite: (MSCI 1170, 1171, 2271 and 2270).

MSCI 3403  Training Management and the Warfighting Functions
4 Semester Credit Hours (4 Lecture Hours)
MSCI 3304/MSL 301 Focuses on training management and the warfighting functions. It is an academically challenging course where you will study, practice and apply the fundamental of Training Management and how the Army operates through the Warfighting functions. At the conclusion of this course, the Cadet will be capable of planning, preparing, and executing training for a squad, conducting small unit tactics. Includes a lab per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre.

MSCI 3404  Applied Leadership in Small Unit Operations
4 Semester Credit Hours (3 Lecture Hours, 1 Lab Hour)
MSCI 3404/MSL 302 Focuses on applied leadership in small unit operations. It is an academically challenging course where the cadet will study, practice, and apply the fundamentals of direct-level leadership and small unit tactics at the platoon level. At the conclusion of this course, the Cadet will be capable of planning, coordinating, navigating, motivating, and leading a platoon in the execution of a mission. Includes a lab per week using peer facilitation overseen by MSL IVs, supervised by ROTC cadre. Successful completion of this course will help prepare for the Cadet Summer Training Advance Camp to be attended in the summer at Fort Knox, KY.

MSCI 3499  Leadership Development Assessment Course (LDAC)
4 Semester Credit Hours (4 Lecture Hours)
Four weeks of instruction and practical application in field training, demonstration of leadership capabilities, and leadership opportunities of problem analysis, decision making, and troop-leading. CR/NC only. Prerequisite: MSCI 3303 and 3304.

MSCI 4305  Advanced Problem Solving
3 Semester Credit Hours (3 Lecture Hours)
Military Science special problems course designed for individual study in modern day military structure and policies.

MSCI 4403  The Army Officer
4 Semester Credit Hours (3 Lecture Hours, 1 Lab Hour)
MSCI 4403/MSL 401 Focuses on development of the Army Officer. It is an academically challenging course where the Cadet will develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. The Cadet will also learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, the Cadet will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre.

MSCI 4404  Company Grade Leadership
4 Semester Credit Hours (3 Lecture Hours, 1 Lab Hour)
MSCI 4404/MSL 402 An academically challenging course where the Cadet will develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the knowledge of how well the Cadet will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing for the BOLC B course and is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre.

MSCI 4696  Military Science Directed Individual Study
1-6 Semester Credit Hours
Programs will be designed for individual cases through special permission of the Department Chair and Dean. May be repeated for credit when the topic varies.

Courses

MSCI 1170  Introduction to the Army
1 Semester Credit Hour (1 Lecture Hour)
MSCI 1170/MSL 101 Focuses on introduction to the Army and basic soldiers. It introduces Cadets to the Army and the Profession of Arms. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of the Army Leadership Requirements Model while gaining a complete understanding of the Reserve Officers' Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. Cadets also begin learning map reading and land navigation, students will have initial classes on fieldcraft, first and individual/team movement techniques that will include a weekly lab facilitated by MS III Cadets and supervised by MSIV's and ROTC Cadre.

MSCI 1171  Foundations of Leadership
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)
MSCI 1171/MSL 102 Introduces Cadets to the personal challenges and competencies are critical for effective leadership. Cadets learn the personal development of life skills such as critical thinking, time management, goal setting, and communication. Cadets learn the basics of the communications process and the importance for leaders to develop the essential skills to effectively communicate in the Army. Cadets will begin learning the basics of squad level tactics that will be reinforced during a weekly lab facilitated by MS III Cadets and supervised by ROTC Cadre.

MSCI 2270  Leadership and Ethics
2 Semester Credit Hours (2 Lecture Hours)
MSCI 2270/MSL 201 Focuses on leadership and ethics. The course adds depth to the cadets knowledge of the different leadership styles. Cadets will conduct a leadership analysis of famous leaders and self-assessment of their own leadership style. The Army Profession is also stressed through understanding values, ethics, career planning, and legal responsibilities. At the conclusion of this course, the cadet will be capable of understanding and being able to articulate the Army Values, Army Ethics, and leadership competencies as they relate to Army doctrine. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by ROTC Cadre.

MSCI 2271  Army Doctrine and Decision Making
2 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
MSCI 2271/MSL 202 Focuses on Army doctrine and team development. The course begins the journey to understand and demonstrate competencies as they relate to Army doctrine. Army Values, Teamwork, and Warrior Ethos and their relationship to the Law of Land Warfare and philosophy of military service are also stressed. The ability to lead and follow is also covered through Team Building exercises at squad level. Students are then required to apply their knowledge outside the classroom in a hands-on performance-oriented environment during a weekly lab facilitated by MSL III Cadets and supervised by Cadre.

MSCI 3301  American Military History
3 Semester Credit Hours (3 Lecture Hours)
A comprehensive, but brief account of the U.S. Army from past to present. Integrates the basic knowledge of American military history into the future officer’s education. This is an Army standardized, mandatory course that is a part of pre-commissioning training for contracted U.S. Army ROTC cadets. Employs American military history as a tool for studying military professionalism and applying critical-thinking skills and decision-making skills to military problems. Analyzes the definition of Military History, the theory and practice of war, and the American Military System as an intellectual framework for applying critical-thinking skills and problem-solving skill to the study of historical, military problems.
Prerequisite: (MSCI 1170, 1171, 2271 and 2270).

MSCI 3403  Training Management and the Warfighting Functions
4 Semester Credit Hours (4 Lecture Hours)
MSCI 3304/MSL 301 Focuses on training management and the warfighting functions. It is an academically challenging course where you will study, practice and apply the fundamentals of Training Management and how the Army operates through the Warfighting functions. At the conclusion of this course, the Cadet will be capable of planning, preparing, and executing training for a squad, conducting small unit tactics. Includes a lab per week using peer facilitation overseen by MSL IVs, supervised by ROTC Cadre.

MSCI 4305  Advanced Problem Solving
3 Semester Credit Hours (3 Lecture Hours)
Military Science special problems course designed for individual study in modern day military structure and policies.

MSCI 4403  The Army Officer
4 Semester Credit Hours (3 Lecture Hours, 1 Lab Hour)
MSCI 4403/MSL 401 Focuses on development of the Army Officer. It is an academically challenging course where the Cadet will develop knowledge, skills, and abilities to plan, resource, and assess training at the small unit level. The Cadet will also learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities. At the conclusion of this course, the Cadet will be familiar with how to plan, prepare, execute, and continuously assess the conduct of training at the company or field grade officer level. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre.
MSci 4404 Company Grade Leadership
4 Semester Credit Hours (3 Lecture Hours, 1 Lab Hour)

MSci 4404/MSL 402 An academically challenging course where the Cadet will develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Unified Land Operations and Company Grade Officer roles and responsibilities. This course includes reading assignments, homework assignments, small group assignments, briefings, case studies, practical exercises, a mid-term exam, and an Oral Practicum as the final exam. The Oral Practicum explores the knowledge of how well the Cadet will be prepared for the 20 Army Warfighting Challenges (AWFC) covered throughout the ROTC Advanced Course. Successful completion of this course will assist in preparing for the BOLC B course and is a mandatory requirement for commissioning. Includes a lab per week overseeing MSL III lesson facilitation and supervised by ROTC Cadre.

MSci 4696 Military Science Directed Individual Study
1-6 Semester Credit Hours

Programs will be designed for individual cases through special permission of the Department Chair and Dean. May be repeated for credit when the topic varies.

**College of Engineering**

The College of Engineering offers undergraduate and graduate degrees in basic and applied sciences to support the technical requirements of our post-industrial society. In addition, the College provides many courses supporting the science literacy requirements of non-majors. Specialized course offerings and degree sequences support Education majors seeking science and mathematics teaching certifications. The office of the Dean is located in Center for Instruction, Suite 350.

**Purpose Statement**

The College of Science is committed to maintaining an academic environment in which students may develop as productive citizens who will contribute to society. In this regard, the faculty recognizes the need to prepare individuals who have an understanding of the foundations and principles of their respective fields and professions. The administration of the College encourages and supports the faculty in meeting their responsibility to continue their professional development and to contribute to the University, the community, and their chosen fields.

In order to accomplish this purpose, the administration and faculty of the College share the following objectives:

- To provide the opportunity for each student to assimilate and apply the body of knowledge required by a chosen discipline through a clearly defined sequence of courses.
- To develop each student’s ability to think critically and to communicate effectively through creative and challenging educational experiences.
- To encourage each student to become a well-rounded, educated person through exposure to other disciplines within the University.
- To contribute to the greater body of knowledge in specialized disciplines through research, scholarship, and professional endeavor.
- To serve as a professional and educational resource to the local area and larger community by providing consultation and special services.

**Centers for Research and Continuing Education**

The College of Engineering is the academic home to several major research units, which are physically housed in the Natural Resources Center on the west end of campus.

The National Spill Control School, established in 1977, promotes education on environmental issues. The primary focus of its programs is in presenting continuing education short courses on-campus or on-site for personnel involved in spill prevention and the control of oil, hazardous materials, and hazardous waste. Other areas of interest include allied safety concerns and improving knowledge in these fields through research and targeted education programs.

The Center for Coastal Studies, established in 1984, is an interdisciplinary research unit of the College of Science and Engineering at Texas A&M University-Corpus Christi. The main purpose of the Center is to perform coastal ecosystem research and contract studies on the Padre/Mustang barrier island chain, the Laguna Madre, and the Nueces/Corpus Christi Bay Complex. Currently, cooperative agreements with several branches of the U.S. Fish and Wildlife Service and the Texas Parks and Wildlife Department provide research and practical training experience for Texas A&M University-Corpus Christi science students.

The Conrad Blucher Institute for Surveying and Science, dedicated in 1987, encourages scientific research and education, with a special emphasis on surveying. To provide for the unique needs of Texas surveyors, the Institute is developing strong continuing education and research programs in surveying. As funds and resources permit, the Institute will also promote research and education in all of the supporting sciences. Science education is a vital base for surveyors and scientists. The Institute supports activities to improve these areas and help create professional and student interest in surveying and science.

The Center for Water Supply Studies was established in 1991. The Center provides science students with the opportunity to pursue research in the broad areas of water resources. The Center also provides regional governmental entities with an academic organization through which studies of issues relating to water supply may be carried out.

The Center for Information Assurance, Statistics, and Quality Control (CIASQC) leverages the skills of university experts working together with community leaders to meet the increasing demands for secured information environments and improved quality of education, government, health care and business. The mission of CIASQC is to become the primary South Texas and Gulf of Mexico resource of information assurance, modeling, statistical and quality improvement services, and software engineering for the education, government, health care, and private sectors.

In 2000, Texas A&M University-Corpus Christi received a $46 million pledge from publisher Ed Harte to create the Harte Research Institute for Gulf of Mexico Studies. The Institute supports the Ph.D. programs in Coastal and Marine System Science and Marine Biology offered through the College of Science and Engineering.

**Engineering Degree Programs**

The College of Engineering offers course work leading to the following Bachelor of Science, Master of Science, and Doctor of Philosophy degrees:
• Civil Engineering CEEN, BS
• Computer Science COSC, BS, MS
• Electrical Engineering EENE, BS
• Geographic Information Science GISC, BS
• Geography GEOG (minor only)
• Geospatial Computer Science GCSC, PhD
• Geospatial Systems Engineering GSEN, MS
• Industrial Engineering IEEN, BS
• Mechanical Engineering MEEN, BS
• Mechanical Engineering Technology ENTC, BS

See the university Graduate Catalog for information on graduate programs.

Undergraduate Programs

A minimum of 120 semester hours of credit are required. Most curricula require more. Please consult the academic advisor and/or faculty advisor for specific details.

Specific Requirements for the College of Engineering

Each student entering the College must comply with the curriculum requirements of the University Core Curriculum Program and University degree requirements. Transfer students can meet some or all of these requirements by transfer of courses/core curricula taken and completed prior to entry. Please consult the University Core Curriculum Program advisors.

Upper-Division Hours

A minimum of 45 semester hours of upper-division credit (courses numbered in the 3000 and 4000 series) is required.

Residence Requirements

A minimum of 36 hours of upper-division course work required for graduation must be successfully completed in residence at Texas A&M University-Corpus Christi to obtain a baccalaureate degree. A minimum of 12 hours of these 36 hours must be in the major. See “Degree Requirements” in the general section of this catalog for additional university requirements.

Grade-Point Average (GPA)

A minimum cumulative grade-point average of 2.0 (“C”) on a 4 point scale (4.0 = A) in all work taken and a minimum grade-point average of 2.25 in all courses in the major field of study taken at this University are required. The courses in the major field of study are defined for each major, and can be found on the pages for that major. For teacher certification and certain majors in the college, grade point average requirements are higher. Refer to “Teacher Certification Programs” in this section, and/or the requirements of the major of interest.

Directed Independent Study (DIS)

Each area of the College offers courses in directed independent study. These courses appear with 4X96 numbers in the course offerings of each discipline and may carry variable credit depending upon the course design. The student must register for a specific number of hours according to a course plan approved by the instructor, the Department Chairperson, and the Dean in advance of registration. The 4X96 courses may be repeated for credit.

Graduation Under a Particular Catalog

In accordance with general University policy, the student may receive the baccalaureate degree upon satisfying the requirements of the chosen degree area in the College of Engineering, upon satisfying the requirements of the catalog under which credit was first earned in this university, or upon satisfying the requirements of the catalog governing any subsequent year in which credit was earned as a student in the university. In the case of courses which are no longer offered, the faculty will prescribe substitutions. Students who do not complete the degree to which they have been admitted within 6 years will be subject to review and may, if necessary, be required to update knowledge and meet catalog requirements currently in effect.

Minors

Course requirements for a minor are determined by the faculty in each corresponding academic discipline, and variations in the minor requirements are subject to the approval of the faculty in that area. Therefore, the student should consult the description of the minor in the section of the catalog dedicated to that discipline. Questions about the minor course work should be directed to the appropriate advisor within the minor discipline.

Civil Engineering, BS
Program Description
Civil engineers oversee construction projects, including designing, constructing, supervising, and maintaining road systems and the accompanying infrastructure, buildings, airports, and systems for water treatment, hydroelectricity, and more. Because there are so many different aspects of civil engineering, many civil engineers choose to pursue a specialty. Popular specialties include construction engineering, geotechnical engineering, structural engineering, geospatial surveying engineering, environmental engineering, water resources engineering, transportation engineering, and coastal engineering. The Civil Engineering curriculum prepares graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry, and at least one additional area of basic science; to apply probability and statistics to address uncertainty; to analyze and solve problems in technical areas appropriate to civil engineering; to conduct experiments in technical areas of civil engineering and analyze and interpret the resulting data; to design a system, component, or process in civil engineering contexts; to include principles of sustainability in design; to explain basic concepts in project management, business, public policy, and leadership; and to analyze issues in professional ethics.

Program Educational Objectives
In accordance with ABET accreditation requirements, the Program Educational Objectives (PEOs) describe the professional accomplishments that Civil Engineering graduates are expected to achieve, within a few years of graduation. The PEOs are:

1. Within two years of graduation from TAMU-CC, our graduates who have chosen to pursue a career in engineering or a related field will be working in industry, government, construction, or other professional service as civil engineers, or will be pursuing graduate degrees in civil engineering or post-baccalaureate degrees in other fields, such as law, business, or medicine.
2. Within five years of graduation from TAMU-CC our graduates who have chosen to pursue a career in engineering or a related field will have
   • advanced in their careers as indicated by obtaining promotions and positions of leadership, awards, recognitions as subject matter experts, and/or registration as professional engineers or in other professional disciplines; or by entrepreneurial activities, products or processes developed, patents, and/or publications;
   • demonstrated the ability to increase their knowledge and expertise through continuing education or advanced degrees; and
   • contributed to the improvement of the profession and of society through research, national and/or international collaboration, and/or professional and public service including mentoring.

Student Learning Outcomes
Graduates will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Fundamentals of Engineering (FE) Exam
All civil engineering students are encouraged to take the Fundamentals of Engineering (FE) exam. This is an exam is an important step toward licensure as a Professional Engineer (P.E.), which many civil engineers find useful and necessary in their careers. Close to the end of the B.S. degree program is an excellent time to take the exam, because the student has the best preparation for the exam at that point in the student’s academic career.

Admission from pre-engineering
For all students admitted into a pre-engineering program at TAMU-CC who wish to transfer into one of the TAMU-CC engineering programs (CEEN, EEEN, IEEN, MEEN), the cumulative GPA for all MATH, CHEM, PHYS, ENGR, COSC, CEEN, EEEN, IEEN, or MEEN courses that appear in the CEEN, EEEN, IEEN, or MEEN program curricula, plus any ENTC courses, taken at TAMU-CC, or their equivalents taken at other institutions, should be 2.5 or greater to be admitted into the CEEN, EEEN, IEEN, or MEEN programs at TAMU-CC. There should be a minimum of at least 12 hours of such courses taken at TAMU-CC or elsewhere before a transfer / admission to CEEN, EEEN, IEEN, or MEEN may be considered. All such students must also meet the requirements to take MATH 2413 Calculus I (4 sch) if they have not already done so.

Master of Business Administration (MBA) Option
Civil engineering students who have completed 96 credit hours toward the Civil Engineering B.S. degree and earned a cumulative GPA of 3.0 or higher may elect the MBA option in senior year. Students who elect the MBA option are required to take three MBA foundation courses to satisfy the Technical Elective Block requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 5312</td>
<td>Foundations of Accounting</td>
<td>3</td>

<tr>
<td>ECON 5311</td>
<td>Foundations in Economics</td>
<td>3</td>
</tr>
<tr>
<td>FINA 5311</td>
<td>Financial Management Concepts</td>
<td>3</td>
</tr>
</tbody>
</table>
Students who plan to elect the MBA Option are encouraged to have summer internship experience before senior year, and will be able to complete an MBA degree study with 2 regular semesters and 1 summer session beyond a Civil Engineering B.S. degree study.

**General Requirements**

The Civil Engineering curriculum consists of a minimum of 123 credit hours. It can be divided into five main areas:

**Requirements**

<table>
<thead>
<tr>
<th>Requirements</th>

**Technical Electives Block**

These electives provide students with the option to take courses that apply to their field of study. Students must complete 9 hours of elective courses. These may include upper-division Engineering and 4000-level Engineering Technology courses outside of the required courses in their degree plans, any 4000-level MATH, COSC, BIOL, CHEM, or PHYS courses, the specified courses in the 5-year BS/MBA program, and other courses approved by the Department of Engineering.

The 3 lecture hours in MATH 2413 Calculus I (4 sch), CHEM 1411 General Chemistry I (4 sch), and PHYS 2425 University Physics I (4 sch) satisfy the required 3 and 6 core curriculum hours in math and science, respectively. The 1 lab hour from each of these three courses, and the 3 lecture hours from MATH 2414 Calculus II (4 sch), satisfy the 6-hour component area option requirement in the core curriculum. Students transferring to Texas A&M University - Corpus Christi from other institutions may have various means for fulfilling the core curriculum. Please refer to the “General Education Requirement (https://client-snap.dev8.leepfrog.com/tamucc/catalog.tamucc.edu/index7ef1.html?catoid=128&navoid=424&amp;General_Education_Requirement)” in the catalog section entitled “Undergraduate Programs.”

**Capstone Project**

All civil engineering students must complete a senior-level capstone project in ENGR 4370 Capstone Projects (3 sch) (3 sem. hrs.). Students will work with practicing engineers and engineering faculty. The Capstone Project will give engineering students practical, professional experience to prepare them for careers in civil engineering.

**Note:** Total Hours: 126 (128 with UNIV 1101 & 1102)

## Civil Engineering Courses

**CEEN 2315 Geomatics and Surveying Engineering**

3 Semester Credit Hours (3 Lecture Hours)

(3:0) Concepts, principles, and applications of surveying methods and technology for planar measurement, geo-positioning and mapping, and civil engineering project design and management are introduced. Topics include: land surveying methods for field measurement; principles of distances, elevation and angles; geodetic datums and coordinate systems; topographic mapping; basic error theory in measurement and computational adjustments; traverse calculations; introduction to Global Positioning System (GPS). Computational exercises to process, analyze, and adjust survey data will provide practical experience in civil survey design and assessment.

**Prerequisite:** MATH 1316 or 2413.

**CEEN 3320 Geotechnical Engineering I**

3 Semester Credit Hours (3 Lecture Hours)

(3:0) Geotechnical engineering focuses on how soil supports and affects the performance of structures built on or below the earth's surface. This course will introduce the terminology used in geotechnical engineering and provide a basic understanding of important geotechnical principles and analytic methods. The topics to be covered in this class includes: index soil properties and soil classification; soil permeability and pore water movement; soil stresses; soil compressibility, consolidation and settlement; shear strength of soil; engineering soil properties and measurement.

**Prerequisite:** ENGR 3315 and 3320.

**CEEN 3330 GIS for Civil and Environmental Engineering**

3 Semester Credit Hours (3 Lecture Hours)

(3:0) Introductory design principles presented on the use of geographic information system (GIS) technology for modeling and analysis of civil and environmental engineering systems. Introduction to the integration of geospatial data and analysis for decision making and management for site selection, mitigation, change analysis, modeling and assessment. Topics covered include map projections and georeferencing, vector and raster data models, acquisition and manipulation of data, cartography, current topics, data quality, and basic spatial analysis. The course integrates commercial GIS software (ESRI ArcGIS) for performing engineering analysis and problem solving. Students will participate in both individual software labs and team projects.

**Prerequisite:** COSC 1330 and CEEN 2315.
CEEN 4302 Remote Sensing
3 Semester Credit Hours (3 Lecture Hours)
Provides the foundations to interpret, process, and apply remotely sensed data acquired by satellites and sub-orbital platforms (aircraft, UAVs) for mapping and analysis of our natural and built environment. Principles of electromagnetic energy-matter interaction, remote sensing systems and data characteristics, digital image processing, and information extraction methods will be covered. Included is treatment of: aerial photogrammetry; multispectral, thermal, and hyperspectral sensing; earth observation satellites; radar and lidar; emergent topics. Emphasis will be on their use for geospatial and environmental applications. Offered Fall.
Prerequisite: PHYS 2425 and GISC 3300.

CEEN 4304 Civil and Construction Materials
3 Semester Credit Hours (3 Lecture Hours)
(3:0) The course provides instruction on civil and construction engineering materials used in the construction of highway structures such as pavements, bridges, retaining walls, box culverts, etc. In particular, the course concentrates on the engineering properties of aggregates, metals, portland cement concrete (PCC) and hot-mix asphalt (HMA) as well as the mixture design of PCC and HMA. The course targets those interested in civil engineering or construction engineering and management.
Prerequisite: ENGR 3320.

CEEN 4306 Transportation Engineering
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This course will give an introduction to the basic concepts, theory, and practice of transportation engineering as related to planning, design, and operations of the transportation system. The topics to be covered in this class includes: fundamental principles in planning, design and operation of transportation systems; issues and challenges in transportation; driver and vehicle performance capabilities; highway geometric and pavement design principles; traffic analysis and transportation planning.
Prerequisite: CEEN 2315.

CEEN 4310 Water Resources Engineering
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This course will give an overview of the basic concepts, analysis methods, and design procedure. The topics to be covered includes: hydraulic processes, hydrological cycle, streamflow prediction, uncertainty analysis, water demands, water distribution systems, reservoir and dams, urban stormwater drainage, and water resources planning and management.
Prerequisite: ENGR 3315.

CEEN 4312 Principles of Hydraulics and Hydrology
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This course will give an introduction to the basic concepts, theory, and analytic methods of hydraulics and hydrology. The topics to be covered in this class includes: water flow through pipes and pumping systems, water flow through open channels and hydraulic structures, watershed hydrology, and urban sewer systems.
Prerequisite: ENGR 3315.

CEEN 4322 Geotechnical Engineering II – Coastal Environment
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This course introduces key concepts and basic analysis and design techniques in geotechnical engineering for coastal environments. Emphasis is on the interaction between oceanic dynamic processes (waves, currents, tides, and sediment transport) and coastal regions (harbors, structures, beaches and estuaries) and on the engineering approaches necessary to prevent adverse effects caused by this interaction. Geotechnical aspects of coastal engineering projects will include design of traditional structures and exposure to softer coastal engineering techniques.
Prerequisite: CEEN 3320.

CEEN 4324 Structural Engineering
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This class will provide students with a solid background on principles of structural engineering. Students will be exposed to the theories and concepts of both concrete and steel design and analysis both at the element and system levels. Hands-on design experience and skills will be gained and learned through problem sets and a comprehensive design project. An understanding of real-world open-ended design issues will be developed.
Prerequisite: ENGR 3320 and MATH 3315.

CEEN 4330 Introduction to Bridge and Pavement Engineering
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This course focuses on the materials, technology and procedures used to design and manage road pavements, with reference to the National Roads Authority (NRA) Design Manual for roads and bridges, and guidelines issued by the Department of Transport, Tourism and Sport (DTTS).
Prerequisite: CEEN 4304.

CEEN 4332 Traffic Engineering
3 Semester Credit Hours (3 Lecture Hours)
(3:0) The purpose of this course is to introduce fundamentals of traffic engineering including data collection, analysis, and design. Emphasis is on the safe and efficient operations of roadway intersections. Traffic engineering studies traffic control devices, capacity and level of service analysis of freeways and urban roads. Applications of traffic operations include computer simulation models to the design of isolated intersection and coordinated traffic signal control systems.
Prerequisite: CEEN 4306.

CEEN 4342 Construction Management
3 Semester Credit Hours (3 Lecture Hours)
The course focuses on management techniques to solve the unique problems associated with a construction project. Study of Construction Management functions including Project Management, Cost Management, Time Management, Quality Management, Contract Administration, and Safety Management will be covered. Emphasis is put on the application of each function throughout the project phases.
Prerequisite: CEEN 4304.

CEEN 4396 Directed Independent Study
1-3 Semester Credit Hours
(1-3) Requires a formal proposal of study to be completed in advance of registration, approval of supervising faculty and department chairperson.
Engineering Courses

ENGR 1201 Introduction to Engineering
2 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)
Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving and design; other topics include computer applications and programming; visualization, orthographic drawings and CAD tools; introduction to electrical circuits, semiconductor devices, digital logic, communications and their application in systems; Newton's laws, unit conversions, statistics, Excel; basic graphics skills. Offering: Fall and Spring.
Prerequisite: MATH 1314.

ENGR 1312 Engineering Graphics I
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Topics include, depending on the major: emphasis on computer applications and programming and solids modeling using CAD tools or other software; fundamentals of engineering science; advanced graphic skills. Pre-req: MATH 1314 - College Algebra or equivalent academic preparation. Offered Fall and Spring.
Prerequisite: MATH 1314.
TCCNS: ENGR 1304

ENGR 2105 Electrical Circuits Laboratory
1 Semester Credit Hour (3 Lab Hours)
Laboratory experiments supporting theoretical principles presented in ENGR 2305 involving DC and AC circuit theory, network theorems, time, and frequency domain circuit analysis. Introduction to principles and operation of basic laboratory equipment; laboratory report preparation.
Prerequisite: ENGR 2305.
May be taken concurrently.
Co-requisite: ENGR 2305, SMTE 0099.

ENGR 2106 Digital Systems Laboratory
1 Semester Credit Hour (1 Lab Hour)
Basic laboratory experiments supporting theoretical principles presented in ENGR 2306 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports.
Prerequisite: MATH 1314.
Co-requisite: ENGR 2306, SMTE 0099.

ENGR 2305 Electrical Circuits
3 Semester Credit Hours (3 Lecture Hours)
Principles of electrical circuits and systems. Basic circuit elements (resistance, inductance, mutual inductance, capacitance, independent and dependent controlled voltage, and current sources). Topology of electrical networks; Kirchhoff's laws; node and mesh analysis; DC circuit analysis; operational amplifiers; transient and sinusoidal steady-state analysis; AC circuit analysis; first- and second-order circuits; Bode plots; and use of computer simulation software to solve circuit problems.
Prerequisite: PHYS 2426 and MATH 2414.
Co-requisite: ENGR 2105.

ENGR 2306 Digital Systems
3 Semester Credit Hours (3 Lecture Hours)
Introduction to theory and design of digital logic, circuits, and systems. Number systems, operations and codes; logic gates; Boolean Algebra and logic simplification; Karnaugh maps; combinational logic; functions of combinational Logic; flip-flops and related devices; counters; shift registers; sequential logic; memory and storage.
Prerequisite: MATH 1314 and 2305.
* May be taken concurrently.
Co-requisite: ENGR 2106.

ENGR 2325 Statics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving forces, moments, and couples on stationary structures; equilibrium in two and three dimensions; free body diagrams; truss analysis; friction; centroids; centers of gravity and moments of inertia.
Prerequisite: PHYS 2425 and MATH 2414.
* May be taken concurrently.
TCCNS: ENGR 2301

ENGR 2326 Dynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving the motion of particles, rigid bodies and systems of particles; Newton's Laws; work and energy relationships; principles of impulse and momentum; application of kinetics and kinematics to the solution of engineering problems.
Prerequisite: ENGR 2325.
TCCNS: ENGR 2302

ENGR 2460 Circuit Analysis
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
This course covers principles of electronics: charge, voltage, resistance, current, and power; Ohm's Law; Kirchhoff's voltage and current laws; RC and LC circuits; periodic functions, average and RMS measurements; transformers, electrical measurement instruments. The laboratory provides hands-on experience with devices and circuits discussed in the classroom.
Prerequisite: (PHYS 2426, MATH 2414 and 3315).
* May be taken concurrently.
Co-requisite: SMTE 0099.
TCCNS: ENGR 2305

ENGR 3315 Fluid Mechanics
3 Semester Credit Hours (3 Lecture Hours)
Fluid properties, fluid statics, dynamics, and kinematics, conservation of energy and momentum incompressible, laminar and turbulent flow. Similitude and dimensional analysis, and viscous flow. Prerequisite or Prerequisite: (MATH 3315) and ENGR 2326 and MATH 2415.

ENGR 3316 Thermodynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; gas, vapor and refrigeration cycles.
Prerequisite: (PHYS 2425 and MATH 2414).
ENGR 3320  Strength of Materials
3 Semester Credit Hours (3 Lecture Hours)
Concepts in strength of materials, stress, strain; deformation under load, direct, shear, and combined stresses; stress concentrations, bending stresses and torsional shear stresses, deflection in beams and shafts; columns, and pressure vessels.
Prerequisite: ENGR 2325 and 3322 or ENGR 2322.

ENGR 3322  Materials Science
3 Semester Credit Hours (3 Lecture Hours)
Structure and properties of metallic and nonmetallic materials; microstructure, mechanical testing, phase diagrams, heat treatment, testing, ceramics, polymers, composites, construction materials, failure analysis, nondestructive evaluation, corrosion and thermal properties of materials.
Prerequisite: (CHEM 1411) and (PHYS 2425).
Co-requisite: SMTE 0099.

ENGR 3350  Manufacturing Processes
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to metal and non-metallic manufacturing processes; casting, forging, rolling, extrusion, sheet metal forming, cutting tools turning and milling operations, abrasive machining, welding and joining, powder compaction, molding, forming of plastics, surface treatment, human factors and safety.
Prerequisite: ENGR 1312 and 3322.
Co-requisite: SMTE 0099.

ENGR 4240  Project Management
2 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Foundations of engineering economy, cash flow and equivalence, and project justification. Introduction to project management, planning, scheduling, and control, use of project management software, GANTT charts, PERT charts, and critical path. Students prepare proposals, including specifications, timelines, schedule, and budget, for projects to be implemented in ENGR 4370 - Capstone Projects. This course should be taken the semester preceding ENGR 4370 - Capstone Projects.
Prerequisite: (MEEN 3330) and (MEEN 3345) or (EEEN 3330) or (EEEN 3310) and (EEEN 3350).
Co-requisite: SMTE 0099.

ENGR 4350  Machine Vision and Image Processing Applications
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to automated vision systems and components, camera models, testing and measurement, and fundamentals of image processing. Topics include image analysis and processing in binary, gray scale and color images in spatial- and frequency-domain. Texture and shape analysis, hyperspectral imaging, other transforms, and filters are discussed and applied.
Prerequisite: (COSC 1330 or 1435) and ENGR 2460 and MATH 2414.

ENGR 4370  Capstone Projects
3 Semester Credit Hours (1 Lecture Hour, 5 Lab Hours)
This course allows students to employ the knowledge attained in other courses to implement (including building, testing, and documenting) an approved project, within budget and on schedule. Course requirements include a written report and oral presentations.
Prerequisite: (ENGR 4240) and (MEEN 4360) and (MEEN 4365) or (EEEN 4333, CEEN 4304 or IEEEN 4310).
* May be taken concurrently.
Co-requisite: SMTE 0099.

ENGR 4390  Special Topics in Engineering
1-3 Semester Credit Hours (1 Lecture Hour)
Subject material variable. May be repeated for credit when topics are different.

ENGR 4420  Engineering Lab Measurements
4 Semester Credit Hours (2 Lecture Hours, 4 Lab Hours)
Principles of physical measurements; standards, calibration, error estimation; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. The purpose of this course is for students to gain proficiency in designing, assembling, and operating an experiment; and analyzing and presenting experimental results. This encompasses skills such as an understanding control and data acquisition electronics, operation and limitation of modern sensors, calibration and error analysis, assessing applicability of theory and the impact of secondary experimental variables, and writing and presenting reports and analysis.
Prerequisite: ENGR 2460.
Co-requisite: SMTE 0099.

Computer Science, BS

Program Description
The computer science degree program is applied in nature and is designed to prepare students to begin or advance computing careers in business, industry, government, or education, or to pursue further study in computer science. The curriculum is thorough, current, and oriented toward the technical competencies required of a modern computer professional with emphasis on the development, evaluation, and integration of software systems.

Mission
The mission of the Computer Science program is to educate undergraduate and graduate students in the principles of computer science and to extend the understanding and use of those principles by conducting research and service in support of the people and economy of south Texas, the state of Texas as a whole, and the nation, consistent with the program’s function within a Hispanic-serving institution.

Program Educational Objectives
Based on the mission statements of the university, college, department, and program, we have derived the following objectives for the computer science undergraduate program. The objectives are to graduate students from the baccalaureate program in computer science who:

1. Contribute productively in a computer science discipline using state of the art technologies and progress towards their career goals and/or pursue their academic goals in graduate education.
2. Communicate effectively and interact or collaborate productively with team members of diverse backgrounds, such as race, religion, culture, ethnicity, and gender.
3. Continually improve their knowledge and skills in technical areas and broadening their global perspective of the field of computer science.
4. Uphold and enhance their sense of professional ethics and responsibilities towards individuals, organizations, and society.

Student Learning Outcomes
In order to prepare students to attain the program educational objectives, the BS CS degree program has been structured to ensure that all
students, by the time of their graduation, will have been enabled to meet the following outcomes:

1. Analyze a complex computing problem, and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program’s discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

**Fast Track from Bachelor's Degree to Master's Degree**

The university allows the opportunity for high-achieving students to count a select number of graduate credits toward their undergraduate degree and thereby obtain a graduate degree at an accelerated pace. For more information, see Fast Track Computer Science, BS and Computer Science, MS (p. 194).

**General Requirements**

The requirements for a Bachelor of Science degree in Computer Science include a total of 120-122 semester hours. The total is divided among the following groups: University Core Curriculum, Major Curriculum, and Electives.

There are four options for the degree, the Systems Programming Option, the Cyber Security and Infrastructure Option, the Computer Game Programming Option, and the Computer Information Systems Option. Besides the University Core Curriculum, all options also share a common major curriculum that consists of 38 semester hours in computer science and mathematics.

For information about the minor, please see the Computer Science Minor (p. 204) section.

All Computer Science options require one or more courses that also satisfy the University Core curriculum. Before choosing a course to satisfy your University Core, verify that you will not be satisfying that part of the core with a required course.
These are supporting courses that can be used toward a Mathematics Minor.

**Systems Programming Option**

This option is for those who intend to pursue careers as systems programmers or pursue advanced study in computer science. The degree program has an emphasis in system software programming and requires a one-year sequence in a physical science with a laboratory component.

**Science sequence (included in University Core)**

Select one sequence from the following:

- **Biology**
  - BIOL 1406 | Biology I
  - & BIOL 1407 | and Biology II

- **Chemistry**
  - CHEM 1411 | General Chemistry I
  - & CHEM 1412 | and General Chemistry II

- **Geology**
  - GEOL 1403 | Physical Geology
  - & GEOL 1404 | and Historical Geology

- **Physics**
  - PHYS 2425 | University Physics I
  - & PHYS 2426 | and University Physics II

**Computer Game Programming Option**

This option is for those who intend to pursue careers as game programmers. The degree program has an emphasis on the skills necessary for creating and programming computer games.

**Computer Information Systems Option**

The Computer Information Systems option is intended for those who want to develop and maintain information systems. In this option, the student learns to develop software systems and function as a computer professional. The student should choose electives to link the application-independent foundations and processes of computing and information systems to the needs of a particular application area. The student will gain knowledge of the particular application area by choosing a minor in an academic discipline highly related to the application area.

The minor should be appropriate as an application area for computer information systems and must consist of at least 18 semester hours. The coursework that satisfies the minor is determined by the faculty in the minor subject.
12 hours of approved upper-division Computer Science electives  12
18 hours of Minor Courses  18
Total Hours  40

### Courses

**COSC 1315 Computer Literacy**  
**3 Semester Credit Hours (3 Lecture Hours)**
A balanced introduction to the use and application of computers in modern society involving both descriptive information and hands-on laboratory participation. Includes a discussion of the general principles of operation of a computer and a brief history of the development of computing. The use of a personal computer operating system, common application software, and simple computer programming concepts are introduced. Satisfies university computer literacy requirement.  
**TCCNS:** COSC 1301

**COSC 1320 C Programming**  
**3 Semester Credit Hours (3 Lecture Hours)**
Introduces the fundamental concepts of structured programming in the C language. Topics include data types; control structures; functions, structures, arrays, pointers, pointer arithmetic, unions, and files; the mechanics of running, testing, and debugging programs; introduction to programming; and introduction to the historical and social context of computing.  
**Prerequisite:** (MATH 1314).

**COSC 1330 Programming for Scientists, Engineers, and Mathematicians**  
**3 Semester Credit Hours (3 Lecture Hours)**
Introduction to computer programming for solving discipline specific problems using computers. Emphasis on the fundamentals of structured design, development, testing, implementation, and documentation. Includes coverage of language syntax, data and file structures, input/output devices, and disks/files.  
**TCCNS:** ENGR 2304
COSC 1435 Introduction to Problem Solving with Computers I
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course introduces the fundamental concepts of problem
solving and algorithms. A brief introduction to computers and the
programming life cycle is covered. The C++ programming language is
used to develop basic computer programs demonstrating data types,
fundamental control structures, functions, and arrays. MATH 1314 or
placement beyond MATH 1314. Offered Fall, Spring, Summer.
Prerequisite: MATH 1314.
TCCNS: COSC 1435

COSC 1436 Introduction to Problem Solving with Computers II
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course is a continuation of COSC 1435. An introduction to
abstract data types and object-oriented programming is covered. Topics
include basic searching and sorting algorithms, dynamic allocation,
linked lists, inheritance, polymorphism, and recursion.
Prerequisite: COSC 1435.
TCCNS: COSC 1437

COSC 2325 Game Design
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
This course will teach students the techniques for computer game
design and how to work as part of a game development team from
initial conception through release, including the game design process,
game concepts, how and why we play games, character development,
storytelling, user experience, game play, and core mechanics of games.

COSC 2334 Computer Architecture
3 Semester Credit Hours (3 Lecture Hours)
A concentrated study of internal computer concepts. Computer
organization, machine and assembly language are emphasized.
Prerequisite: (COSC 1435 and MATH 2305).

COSC 2348 Introduction to Scripting
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to Windows and Unix/Linux shell
scripting. The course covers basic scripting concepts including decision
statements, control statements, functions and files manipulation.
Advanced scripting tools such as grep, awk and sed are covered in this
course.
Prerequisite: (COSC 1435).

COSC 2390 Selected Topics I
1.3 Semester Credit Hours (1.3 Lecture Hours)
Variable content. May be repeated for credit depending on topic. Offered
on sufficient demand. Does not count toward total hours required for BS in
Computer Science.

COSC 2391 Selected Topics II
1-3 Semester Credit Hours (1-3 Lecture Hours)
This is a selected topics course with no lab component. Variable content.
May be repeated for credit depending on topic. Offered on sufficient
demand. Does not count toward total hours required for BS in Computer
Science.

COSC 2393 Linux Systems
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on providing students with essential knowledge
and skills to implement, administer, and troubleshoot servers in a
networked environment. Operating system concepts, such as installing
a standalone system, file systems authentication, and user support
services are explored. Topics will include security issues, user and
group administration, active directory services, DHCP, DNS, SSH, backup
and restoration strategies and techniques, integrated mass storage
technologies and alternative client technologies.
Prerequisite: COSC 1435.

COSC 2465 Linux Systems
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course focuses on the standards and technologies used to establish
inter-network structures that will support a TCP/IP data stream for higher-
level services to operate over. This course introduces local area networks
(LAN) and wide area networks (WAN). Topics include the TCP/IP and
open system interconnection (OSI) models, cabling, switches, routers,
protocols, subnetting, and networking hardware and software. Initial
switch and router configuration will be examined and evaluated.
Prerequisite: (COSC 1435 and 2465).

COSC 2470 COBOL Programming
4 Semester Credit Hours (4 Lecture Hours)
A concentrated study of the COBOL language as applied to fundamental
business computing problems and other data management applications.
Prerequisite: COSC 1435.

COSC 3100 Skills for Computing Professionals I
1 Semester Credit Hour (1 Lecture Hour)
This course focuses on beginning to develop professional skills
that computer scientists will need to be successful in their careers
and lives. Communication skills will include writing and giving oral
presentations. Ethical issues will be explored. This is a class for
computing professionals. As such, professional decorum will be required
at all times.

COSC 3301 Cyber Security
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to cyber security. A broad range of cyber
security issues will be covered, including social engineering attacks,
secure coding, computer security, Internet of Things (IoT) security,
mobile security, data security, network security, physical security and
forensics. This course will cover the concepts of prevention, detection,
and response to cyber security threats.
Prerequisite: COSC 1435.
COSC 3324  Object-oriented Programming  
3 Semester Credit Hours (3 Lecture Hours)  
A study of concepts, terminology, and methodologies used in object-oriented systems, languages, and applications. Students will design and implement software systems using object-oriented analysis and design techniques.  
Prerequisite: COSC 2437.

COSC 3325  Game Programming  
3 Semester Credit Hours (3 Lecture Hours)  
This course will introduce the student to techniques and tools used for all aspects of programming games. Topics will include game graphics, game physics, game AI, and sound. The course will contain lectures and hands-on labs. Students will work independently and in teams.  
Prerequisite: COSC 2437.

COSC 3335  Programming for Unmanned Aircraft Systems  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces software development for Unmanned Systems (US). Students will be introduced to a variety of relevant topics including the different US platforms, design and implementation of algorithms for US, user interface for US, and state-of-the-art US applications, challenges & solutions.  
Prerequisite: (COSC 1435 or 1330) and (MEEN 3335).

COSC 3336  Introduction to Database Systems  
3 Semester Credit Hours (3 Lecture Hours)  
A study of contemporary database management system concepts, terminology, and methodology for use and implementation. Commercially available systems are discussed and used with emphasis upon the relational model.  
Prerequisite: COSC 2437.

COSC 3346  Operating Systems  
3 Semester Credit Hours (3 Lecture Hours)  
Introduction to operating systems concepts, principles, and design. Topics include: processes and threads, CPU scheduling, mutual exclusion and synchronization, deadlock, memory management, file systems, security and protection, networking, and distributed systems. Selected existing operating systems are discussed, compared, and contrasted.  
Prerequisite: (COSC 2437 and 2334).

COSC 3351  Internet Programming  
3 Semester Credit Hours (3 Lecture Hours)  
Study of prominent web technologies with a focus on creating interactive web applications. Both client-side and server-side programming will be covered. Students will design and implement a web based project using technologies covered in class.  
Prerequisite: COSC 3336 or 3336.*  
*May be taken concurrently.

COSC 3352  Mobile Programming  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces software development for mobile platforms. Students will learn skills for creating and deploying mobile applications. Includes software engineering topics as related to mobile programming, primarily in how software design differs on mobile platforms.  
Prerequisite: COSC 2437.

COSC 3353  Survey of Programming Languages  
3 Semester Credit Hours (3 Lecture Hours)  
A study of selected programming languages for students familiar with programming. Students will write programs in a variety of languages.  
Prerequisite: COSC 2437.

COSC 3360  Human-computer Interaction  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces concepts and techniques for Human Computer Interaction. Particular emphasis will be placed on vision, audio, and language solutions for use in human-computer interactive systems. In addition, the students will learn how to apply the methods to solve simple HCI problems.  
Prerequisite: COSC 1436.

COSC 3370  Software Engineering  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to software engineering principles for the development and maintenance of high quality large software systems. Topics include: software life cycle, delivering on time and within budget, and the development and application of processes and tools for managing the complexities inherent in creating these systems.  
Prerequisite: COSC 2437.

COSC 3371  Computer Information Systems Economics  
3 Semester Credit Hours (3 Lecture Hours)  
An introduction to concepts in information technology and software engineering with a focus on economics and managerial issues. Topics include cost benefit analysis, software and effort estimation, feasibility analysis, information systems proposals, software team coordination, and project management. May not be used as a CS elective for CS majors.

COSC 3372  Network Security  
3 Semester Credit Hours (3 Lecture Hours)  
This course provides an introduction to the fundamentals of computer and network security and security laws and ethics, topics include, identification of vulnerabilities, forms of attack, appropriate countermeasures, and the detection and defense of the same. Techniques for the securing of hardware, software and data, including physical security are covered.  
Prerequisite: COSC 2465.

COSC 3373  Software Project Management  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to the principles for software project management for small and medium-size projects. Many aspects of software project management, including management process, scope definition, time and cost estimation, quality control, human resources, communication, risks and project procurement management will be discussed. A number of applications and tools will be used to implement a class project.  
Prerequisite: (COSC 3370).

COSC 3385  Numerical Methods  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces concepts for solving problems numerically using computers. Students will learn about number systems, errors of finite representation, and iteration. A survey of basic numerical methods including: solutions to nonlinear equations, solutions to linear systems, approximation, interpolation, zeros of functions, numerical differentiation and integration, and Monte-Carlo methods.  
Prerequisite: MATH 2413 and (COSC 1330 or 1435).
COSC 3400 Skills for Computing Professionals
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course focuses on the professional skills that computer scientists will need to be successful in their careers. There are two key areas of study: communication skills needed by computer scientists and their ethical responsibilities. Communication skills will include: technical writing from a computer science perspective, presentation skills, client interviewing, and reading technical articles. Ethical issues will be explored from a computer science perspective.
Prerequisite: ENGL 1302.

COSC 3474 Cyber Defense I
4 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
This course covers cryptographic tools, cryptographic algorithms, types of malicious software, forms of attacks and software security. Strengths and weaknesses of cryptographic systems are covered as well as the types of attacks on cryptographic systems. Malicious activity signatures, analysis as well as detection will be covered. This course will also cover secure coding principles and types of software issues.
Prerequisite: COSC 3372.

COSC 4100 Skills for Computing Professionals II
1 Semester Credit Hour (2 Lab Hours)
This course focuses on technical writing, workplace scenarios and professional skills that computer scientists will need to be successful in their careers and lives. This is a class for computing professionals. As such, professional decorum will be required at all times.
Prerequisite: COSC 1100 and ENGL 3310.

COSC 4310 Digital Forensics
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce undergraduate students to the fundamentals of computer forensics and cyber-crime scene analysis. The various laws and regulations dealing with computer forensic analysis will be discussed. Students will be introduced to the emerging international standards for computer forensic analysis, as well as a formal methodology for conducting computer forensic investigations. Several Forensics tools such as Encase and FTK will be used to conduct digital forensics investigations.
Prerequisite: COSC 2437.

COSC 4324 Image Processing
3 Semester Credit Hours (3 Lecture Hours)
This course introduces concepts and techniques for image processing. The objective of this course is to introduce the fundamental techniques and algorithms used for processing and extracting useful information from digital images. The students will learn how to apply the image processing methods to solve real-world problems.
Prerequisite: COSC 2437.

COSC 4325 Advanced Game Programming
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce advanced concepts for game programming to the student. Topics will include game physics, game AI, advanced shaders, 3D techniques, multiplayer techniques, and networking. The course will contain lectures and hands-on labs.
Prerequisite: COSC 3325.

COSC 4328 Computer Graphics
3 Semester Credit Hours (3 Lecture Hours)
Basic principles and techniques for computer graphics on modern graphics hardware. Students will gain experience in interactive computer graphics using the OpenGL API. Topics include: 2D viewing, 3D viewing, perspective, lighting, and geometry.
Prerequisite: COSC 2437 and MATH 2413.

COSC 4330 Introduction to Artificial Intelligence
3 Semester Credit Hours (3 Lecture Hours)
Foundations, directions, and applications of artificial intelligence including search algorithms, knowledge acquisition, representation, and processing. Students will gain practical experience by implementing many of the basic algorithms.
Prerequisite: COSC 2437.

COSC 4342 Computer Networks
3 Semester Credit Hours (3 Lecture Hours)
Computer-based communication systems. Topics include: advanced computer network architectures, protocols, and programming.
Prerequisite: (COSC 2437 and MATH 2413).

COSC 4343 Algorithms
3 Semester Credit Hours (3 Lecture Hours)
Advanced programming techniques for algorithmic and heuristic solutions of problems. Topics include: analysis and design of algorithms, testing of algorithms, optimum and exhaustive solutions, and recursion.
Prerequisite: (COSC 2437 and MATH 2413).

COSC 4345 Introduction to Machine Learning
3 Semester Credit Hours (3 Lecture Hours)
This course gives a broad introduction to machine learning with more emphasis on intelligent system design. Topics to be covered include linear and logistic regression, neural networks, clustering, classification, decision tree, evolutionary computation, feature selection, and reinforcement learning. The courses will explore various applications of machine learning to computer science, process modeling, pattern and speech recognition, data mining, and bioinformatics.

COSC 4348 Systems Programming
3 Semester Credit Hours (3 Lecture Hours)
The design and implementation of system software such as device drivers, application support libraries, and interprocess communication. Students will study and use systems programming tools.
Prerequisite: COSC 3346 and (COSC 3353 or 3324).

COSC 4353 Compiler Construction
3 Semester Credit Hours (3 Lecture Hours)
This course introduces the basic concepts and mechanisms traditionally employed in language translators, with emphasis on compilers. Topics include: strategies for syntactic and semantic analysis, techniques of code optimization and approaches toward code generation.
Prerequisite: COSC 3353.

COSC 4354 Senior Capstone Project
3 Semester Credit Hours (3 Lecture Hours)
Teamwork and formal methods of systems analysis and design are emphasized. Students will complete a large team project. Fall, Spring.
Prerequisite: (COSC 3370, 3336 and ENGL 3310).

COSC 4360 Theory of Programming Languages
3 Semester Credit Hours (3 Lecture Hours)
The study of programming language design including syntax, semantics, behavior, and implementation issues in imperative, functional, logic, and object-oriented languages. Other topics include type theory, concurrency, data dependency, and nondeterminism.
Prerequisite: COSC 2437.
COSC 4365  Windows Security
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on advanced system administration topics. An in depth understanding of various concepts such as operating systems, servers, file systems authentication, and user support services are explored. Topics include security issues, user and group administration, server and work-station integration, central repositories for updates, Active directory, DMZ, web servers, email servers, electronic system update and maintenance, backup and restoration strategies and techniques, integrated mass storage technologies and alternative client technologies.
Prerequisite: (COSC 2348) and (COSC 2465).

COSC 4367  Firewall and Intrusion Detection Systems
3 Semester Credit Hours (3 Lecture Hours)
This is an applied course which focuses on the standards and technologies used to establish inter-network structures that will support a TCP/IP data stream for higher-level services to operate over. This course introduces firewalls, Intrusion Prevention Systems (IPS), and Intrusion Detection Systems (IDS) technology. Topics include Windows, Linux, Check Point and Cisco firewalls, TCP/IP and open system interconnection (OSI) models, attack traffic analysis, and network based and host based hardware and software. Device configuration will be examined and evaluated with appropriate exercises.
Prerequisite: (COSC 4365) and COSC 3372.

COSC 4368  Penetration Testing
3 Semester Credit Hours (3 Lecture Hours)
This course focuses to increase the students understanding of how to recognize a potential cyber attacker and identify vulnerabilities through the use of vulnerability analysis tools. Students will audit, monitor, and revise system security to ensure appropriate levels of protection are achieved. Incident response and handling, security log analysis, attacker identification, system recovery and postmortem procedures will be addressed.
Prerequisite: (COSC 3474) and (COSC 4365).

COSC 4369  Incident Response
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on the standards and technologies used to establish organization structures that will support information technology incident response, business continuity and disaster recovery efforts. This course introduces incident response, business continuity and disaster recovery planning concepts as well as tools and techniques. Topics include the development and implementation of incident response, business continuity and disaster recovery plans, attack traffic analysis, and network-based and host-based hardware and software. Concepts will be examined and evaluated with appropriate exercises.
Prerequisite: (COSC 2437) and (COSC 3365) and (COSC 3466) and (COSC 4365).

COSC 4370  Models of Computation
3 Semester Credit Hours (3 Lecture Hours)
A study of formal languages, grammars, and associated abstract machine models. Topics include regular and context-free languages and grammars, finite state automata, Turing machines, and the Chomsky hierarchy.
Prerequisite: MATH 2305.

COSC 4396  Directed Independent Study
3 Semester Credit Hours
See College description. Offered on sufficient demand.

COSC 4590  Selected Topics
1-5 Semester Credit Hours (1-5 Lecture Hours)
Variable content. May be repeated for credit depending on topic. Offered on sufficient demand.
Prerequisite: COSC 4365.

COSC 4690  Contracted Field Experience in Computer Science
1-6 Semester Credit Hours (6 Lecture Hours)
Individual contract agreement involving student, faculty, and cooperating agency to gain practical experience in off-campus setting.

Electrical Engineering, BS

Program Description
Electrical Engineers develop electrical systems using knowledge of physics, mathematics, circuit design, electromagnetic theory, communication theory, control systems and signal processing. Electrical engineering historically involved how the generation, transmission and utilization of electrical energy. Today, electrical engineering applications also include control systems, robotics, automation, plasma, sensors, computers and imaging. The Bachelor of Science in Electrical Engineering (BSEE) program emphasizes service, systems-based knowledge, and sustainability with an eye toward the interface of traditional electrical engineering with new and emerging fields, in particular unmanned aircraft systems, maritime sciences and marine biology that directly impact the Gulf Coast.

Program Educational Objectives
The Program Educational Objectives (PEOs) describe the professional accomplishments that Electrical Engineering graduates are expected to achieve, within a few years of graduation. The PEOs are:

1. Within two years of graduation from TAMU-CC, our graduates who have chosen to pursue a career in engineering or a related field will be working in industry, government, construction, or other professional service as electrical engineers, or will be pursuing graduate degrees in electrical engineering or post-baccalaureate degrees in other fields, such as law, business, or medicine.
2. Within five years of graduation from TAMU-CC our graduates who have chosen to pursue a career in engineering or a related field will have
   - advanced in their careers as indicated by obtaining promotions and positions of leadership, awards, recognitions as subject matter experts, and/or registration as professional engineers or in other professional disciplines; or by entrepreneurial activities, products or processes developed, patents, and/or publications;
   - demonstrated the ability to increase their knowledge and expertise through continuing education or advanced degrees; and
   - contributed to the improvement of the profession and of society through research, national and/or international collaboration, and/or professional and public service including mentoring.

Student Learning Outcomes
Graduates will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
3. an ability to communicate effectively with a range of audiences;
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Fundamentals of Engineering Exam**

Students are encouraged to take the NCEES (National Council for Examiners for Engineering and Surveying) Fundamentals of Engineering (FE) exam (https://ncees.org/engineering/fe/) during their senior year. The FE exam is the first step in the process that leads to licensure as a Professional Engineer (P.E.).

**Admission from pre-engineering**

For all students admitted into a pre-engineering program at TAMU-CC who wish to transfer into one of the TAMU-CC engineering programs (CEEN, EEEN, IEEN, or MEEN), the cumulative GPA for all MATH, CHEM, PHYS, ENGR, COSC, CEEN, EEEN, IEEN, or MEEN courses that appear in the CEEN, EEEN, IEEN, or MEEN program curricula, plus any ENTC courses, taken at TAMU-CC, or their equivalents taken at other institutions, should be 2.5 or greater to be admitted into the CEEN, EEEN, IEEN, or MEEN programs at TAMU-CC. There should be a minimum of at least 12 hours of such courses taken at TAMU-CC or elsewhere before a transfer / admission to CEEN, EEEN, IEEN, or MEEN may be considered. All such students must also meet the requirements to take MATH 2413 Calculus I (4 sch) if they have not already done so.

**Master of Business Administration (MBA) Option**

Electrical engineering students who have completed 96 credit hours toward the Electrical Engineering B.S. degree and earned a cumulative GPA of 3.0 or higher may elect the MBA option in senior year. Students who elect the MBA option are required to take three MBA foundation courses to satisfy the Technical Elective Block requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 5312</td>
<td>Foundations of Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ECON 5311</td>
<td>Foundations in Economics</td>
<td>3</td>
</tr>
<tr>
<td>FINA 5311</td>
<td>Financial Management Concepts</td>
<td>3</td>
</tr>
</tbody>
</table>

Students who plan to elect the MBA Option are encouraged to have summer internship experience before senior year, and will be able to complete an MBA degree study with 2 regular semesters and 1 summer session beyond an Electrical Engineering B.S. degree study.

**General Requirements**

The Electrical Engineering curriculum consists of a minimum of 128 credit hours. It can be divided into four main areas:

**Requirements**

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Curriculum Program (<a href="http://catalog.tamucc.edu/undergraduate/university-college/programs/core-curriculum-program/">http://catalog.tamucc.edu/undergraduate/university-college/programs/core-curriculum-program/</a>)</td>

</table>

1. Full-time, first time in college students are required to take the first-year seminars.
   - UNIV 1101 University Seminar I (1 sch)
   - UNIV 1102 University Seminar II (1 sch)

Transfer students with 24 or more hours are exempt from First-Year Seminar.

### Technical Electives Block

Students must complete 9 hours of elective courses. These may include upper-division Engineering and 4000-level Engineering Technology courses outside of the required courses in their degree plans, any 4000-level MATH, COSC, BIOL, CHEM, or PHYS courses, the specified courses in the 5-year BS/MBA program, and other courses approved by the Department of Engineering.

### Capstone Project

All electrical engineering students must complete a senior-level capstone project in ENGR 4370 Capstone Projects (3 sch). Students will work with practicing engineers and mechanical engineering faculty. The Capstone Project will give engineering students practical, professional experience to prepare them for careers in electrical engineering.

**Total Hours for Fourth Year: 18**

Electrical Engineering students must take two courses in physics even if the natural science portion of the core curriculum is satisfied by other means. Students transferring to Texas A&M University - Corpus Christi from other institutions may have various means for fulfilling the core curriculum. Please refer to the “General Education Requirement” in the catalog section entitled “Undergraduate Programs (p. 42).”
Electrical Engineering Courses

EEEN 3310 Electromagnetic Theory
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the theory of static and dynamic electromagnetic fields with a focus on engineering applications. Principles will be illustrated with applications in various areas. Topics include computational electromagnetics, transmission lines, antennas, electromagnetic interference, and signal propagation in high speed circuits.
Prerequisite: PHYS 2426, MATH 2415, 3315 and EEEN 3315.

EEEN 3315 Electrical Circuits II
3 Semester Credit Hours (3 Lecture Hours)
AC circuit analysis principles: AC generation, periodic functions, complex numbers, phasors, impedance and admittance, network theorems, power, frequency response, filters, transformers, and balanced three-phase systems; and use of analysis software.
Prerequisite: (ENGR 2305) or (ENGR 2460).

EEEN 3320 Introduction to Communication Theory and Systems
3 Semester Credit Hours (3 Lecture Hours)
Frequency domain and time domain response of linear systems; analog modulation methods including amplitude modulation, frequency modulation and phase modulation; signal and noise modeling using probabilistic descriptions; narrowband random processes and the performance of analog modulation techniques in the presence of noise; design of communication links.
Prerequisite: (ENGR 2305 and 2105 or ENGR 2460) and MATH 3345.

EEEN 3330 Control Systems I
3 Semester Credit Hours (3 Lecture Hours)
Introduction to control systems; open and feedback; Laplace transform and frequency response; control valves; electric motors; P, PI, and PID modes of control; analog and digital controllers Process characteristics; analysis of control systems; gain and phase margin; stability.
Prerequisite: (ENGR 2305 or 2460).

EEEN 3345 Electronic Devices and Circuits
3 Semester Credit Hours (3 Lecture Hours)
The applications of electronic devices, including linear and non-linear Op-Amp circuits, oscillators, wave-shaping circuits, active filters, rectifiers, voltage regulators, and power supplies; industrial electronics. Offered Fall and Spring.
Prerequisite: EEEN 3315.

EEEN 3350 Electronic Systems Design
3 Semester Credit Hours (3 Lecture Hours)
Principles of engineering design of electronic circuits and systems; time and frequency responses; network analysis; systems specifications; evaluation, testing, and verification; use of electronic design automation tools. Offered Fall and Spring.
Prerequisite: (ENGR 2305 or 2460) and (ENGR 2306 and EEEN 3315).

EEEN 3355 Electronic Systems Design
3 Semester Credit Hours (3 Lecture Hours)
Principles of engineering design of electronic circuits and systems; time and frequency responses; network analysis; systems specifications; evaluation, testing, and verification; use of electronic design automation tools. Offered Fall and Spring.
Prerequisite: (ENGR 2305 or 2460) and (ENGR 2306 and EEEN 3315).

EEEN 3361 Linear Feedback Systems
3 Semester Credit Hours (3 Lecture Hours)
Vibration analysis; feedback control system design; feedback system stability; root locus analysis; frequency response; state space modeling; state space methods; state space analysis; modal analysis; and nonparametric identification in the frequency domain.
Prerequisite: (ENGR 2305 and 2460 or ENGR 2305 or PHYS 2426).

EEEN 3363 Introduction to Control Systems
3 Semester Credit Hours (3 Lecture Hours)
Introduction to control systems; open and closed loop control; Laplace transform and frequency response; control valves; electric motors; P, PI, and PID modes of control; analog and digital controllers Process characteristics; analysis of control systems; gain and phase margin; stability.
Prerequisite: (ENGR 2305 or 2460).

EEEN 3364 Control Systems III
3 Semester Credit Hours (3 Lecture Hours)
Discrete time systems; z-transforms, discrete Fourier transform, flow graph and matrix representation of digital filters, digital filter design techniques and computation of the fast Fourier transform (FFT). MATLAB software package is heavily utilized in this course.
Prerequisite: EEEN 3320 and EEEN 3330.

EEEN 3365 Signal Processing
3 Semester Credit Hours (3 Lecture Hours)
Discrete time signals & systems; z-transform, discrete Fourier transform, flow graph and matrix representation of digital filters, digital filter design techniques and computation of the fast Fourier transform (FFT). MATLAB software package is heavily utilized in this course.
Prerequisite: EEEN 3320 and EEEN 3330.

EEEN 3366 Power Transmission and Distribution
3 Semester Credit Hours (3 Lecture Hours)
This course covers principles of power transmission and distribution. Topics include unbalanced distribution; point to point measurements, operation control of systems; power systems; transmission lines; fault analysis; line modeling and unit analysis. Offered Fall or Spring.
Prerequisite: EEEN 3315.

EEEN 4330 Introduction to Plasma Engineering and Applications
3 Semester Credit Hours (3 Lecture Hours)
Physical, electrical, chemical properties of plasmas; differences in properties of thermal and non-thermal plasmas, direct and alternating current plasma sources, inductive and capacitive coupled plasma sources, diagnostics and applications of plasmas.
Prerequisite: (ENGR 2322 and 2460 or ENGR 2305 or PHYS 2426).

EEEN 4331 Power Transmission and Distribution
3 Semester Credit Hours (3 Lecture Hours)
This course covers principles of power transmission and distribution. Topics include unbalanced distribution; point to point measurements, operation control of systems; power systems; transmission lines; fault analysis; line modeling and unit analysis. Offered Fall or Spring.
Prerequisite: EEEN 3315.

EEEN 4332 Power Protection Systems
3 Semester Credit Hours (3 Lecture Hours)
Course topics include safety, reliability and availability in power systems; breaker operation; relay operation and relay circuit design; fault tolerance; cost analysis; control systems and system surveillance. Offered in Fall.
Prerequisite: EEEN 3315.

EEEN 4333 Machine Vision and Image Processing
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to automated vision systems and components, camera models, testing and measurement, and fundamentals of image processing. Topics include image analysis and processing in binary, gray scale and color images in spatial- and frequency-domain. Texture and shape analysis, hyperspectral imaging, other transforms, and filters are discussed and applied.
Prerequisite: (COSC 1320, 1435, ENGR 2460 or 2305) and MATH 2414 and (EEEN 4310).

EEEN 4334 Control Systems II
3 Semester Credit Hours (3 Lecture Hours, 1 Lab Hour)
Model identification and parameter estimation (least-square identification of an auto-regressive model; nonparametric identification in the time domain; and nonparametric identification in the frequency domain); Robust Control (Nyquist-plots, small-gain, and passivity); Optimal control (LQR/LQG for state-space systems and time-optimal controller for the positioning of a mass using force actuation); Nonlinear control (Lyapunov's stability method; feedback linearization controller for a fully actuated 2nd order mechanical system; backstepping for triangular nonlinear systems; actuator limitations); writing and presenting reports and analysis.
Prerequisite: EEEN 3330 or ENTC 4446.
EEEN 4345 Sensors and Systems
3 Semester Credit Hours (3 Lecture Hours)
(3:0) This course introduces sensors and sensing systems, and the acquisition, processing, and interpretation of signals obtained with selected sensors and systems. The course will also cover sensing modalities, signal transmission and reception. Measurement and uncertainty in sensors and systems will be discussed as applied to signal noise and interference. Filtering and estimation will be introduced. Sensing systems for vision, monitoring, and control applications will be surveyed. Sensor interfacing, signal conditioning and transforms will be applied. Other topics include multidimensional signal and image processing, object tracking, multisensor data fusion, applications in environmental monitoring, remote sensing and surveillance. Offered in alternating Fall semesters.
Prerequisite: (MATH 2414 and ENGR 2460).

EEEN 4396 Directed Independent Study
1-3 Semester Credit Hours
(1-3) Requires a formal proposal of study to be completed in advance of registration, approval of supervising faculty and department chairperson.

EEEN 4453 Mechatronics
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course introduces a multidisciplinary field that combines electrical engineering, mechanical engineering, control systems, and computer science. It presents key aspects in the design of systems, devices and products and it aims at the analysis of the behavior and control of the systems. Topics covered in this course bring together different areas of technology involving actuation systems, computer-aided design, sensors, signal conditioning, data acquisition, and programming. Course includes lab sessions related to acquiring experience with electronics, computer-aided design, programming, and control systems.

Engineering Courses
ENGR 1201 Introduction to Engineering
2 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)
Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving and design; other topics include computer applications and programming; visualization, orthographic drawings and CAD tools; introduction to electrical circuits, semiconductor devices, digital logic, communications and their application in systems; Newton’s laws, unit conversions, statistics, Excel; basic graphics skills. Offering: Fall and Spring.
Prerequisite: MATH 1314.

ENGR 1312 Engineering Graphics I
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Topics include, depending on the major: emphasis on computer applications and programming and solids modeling using CAD tools or other software; fundamentals of engineering science; advanced graphic skills. Pre-req: MATH 1314 - College Algebra or equivalent academic preparation. Offered Fall and Spring.
Prerequisite: MATH 1314.
TCCNS: ENGR 1304

ENGR 2105 Electrical Circuits Laboratory
1 Semester Credit Hour (1 Lab Hour)
Basic laboratory experiments supporting theoretical principles presented in ENGR 2305 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports.
Prerequisite: MATH 1314.
Co-requisite: ENGR 2306, SMTE 0099.

ENGR 2305 Digital Systems Laboratory
1 Semester Credit Hour (1 Lab Hour)
Basic laboratory experiments supporting theoretical principles presented in ENGR 2305 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports.
Prerequisite: MATH 1314.
Co-requisite: ENGR 2306, SMTE 0099.

ENGR 2312 Dynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving the motion of particles, rigid bodies and systems of particles; Newton’s Laws; work and energy relationships; principles of impulse and momentum; application of kinetics and kinematics to the solution of engineering problems.
Prerequisite: ENGR 2325.
TCCNS: ENGR 2302

ENGR 2325 Statics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving forces, moments, and couples on stationary structures; equilibrium in two and three dimensions; free body diagrams; truss analysis; friction; centroids; centers of gravity and moments of inertia.
Prerequisite: PHYS 2425 and MATH 2414.*
* May be taken concurrently.

ENGR 2326 Circuits Analysis
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
This course covers principles of electronics: charge, voltage, resistance, current, and power; Ohm’s Law; Kirchhoff’s voltage and current laws; RC and LC circuits; periodic functions, average and RMS measurements; transformers, electrical measurement instruments. The laboratory provides hands-on experience with devices and circuits discussed in the classroom.
Prerequisite: (PHYS 2426, MATH 2414 and 3315*).
* May be taken concurrently.
Co-requisite: SMTE 0099.
TCCNS: ENGR 2305
ENGR 3315  Fluid Mechanics
3 Semester Credit Hours (3 Lecture Hours)
Fluid properties, fluid statics, dynamics, and kinematics, conservation of energy and momentum incompressible, laminar and turbulent flow. Similitude and dimensional analysis, and viscous flow. Prerequisite or Pre-requisite: (MATH 3315) and ENGR 2326 and MATH 2415.

ENGR 3316  Thermodynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; gas, vapor and refrigeration cycles.
Prerequisite: (PHYS 2425 and MATH 2414).

ENGR 3320  Strength of Materials
3 Semester Credit Hours (3 Lecture Hours)
Concepts in strength of materials, stress, strain; deformation under load, direct, shear, and combined stresses; stress concentrations, bending stresses and torsional shear stresses, deflection in beams and shafts; columns, and pressure vessels.
Prerequisite: ENGR 2325 and 3322 or ENGR 2322.

ENGR 3322  Materials Science
3 Semester Credit Hours (3 Lecture Hours)
Structure and properties of metallic and nonmetallic materials; microstructure, mechanical testing, phase diagrams, heat treatment, testing, ceramics, polymers, composites, construction materials, failure analysis, nondestructive evaluation, corrosion and thermal properties of materials.
Prerequisite: (CHEM 1411) and (PHYS 2425).
Co-requisite: SMTE 0099.

ENGR 3350  Manufacturing Processes
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to metal and non-metallic manufacturing processes; casting, forging, rolling, extrusion, sheet metal forming, cutting tools turning and milling operations, abrasive machining, welding and joining, powder compaction, molding, forming of plastics, surface treatment, human factors and safety.
Prerequisite: ENGR 1312 and 3322.
Co-requisite: SMTE 0099.

ENGR 4240  Project Management
2 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Foundations of engineering economy, cash flow and equivalence, and project justification. Introduction to project management, planning, scheduling, and control, use of project management software, GANTT charts, PERT charts, and critical path. Students prepare proposals, including specifications, timelines, schedule, and budget, for projects to be implemented in ENGR 4370 - Capstone Projects. This course should be taken the semester preceding ENGR 4370 - Capstone Projects.
Prerequisite: (MEEN 3330) and (MEEN 3345) or (EEEN 3330) or (EEEN 3310) and (EEEN 3350).
Co-requisite: SMTE 0099.

ENGR 4350  Machine Vision and Image Processing Applications
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to automated vision systems and components, camera models, testing and measurement, and fundamentals of image processing. Topics include image analysis and processing in binary, gray scale and color images in spatial- and frequency-domain. Texture and shape analysis, hyperspectral imaging, other transforms, and filters are discussed and applied.
Prerequisite: (COSC 1330 or 1435) and ENGR 2460 and MATH 2414.

ENGR 4370  Capstone Projects
3 Semester Credit Hours (1 Lecture Hour, 5 Lab Hours)
This course allows students to employ the knowledge attained in other courses to implement (including building, testing, and documenting) an approved project, within budget and on schedule. Course requirements include a written report and oral presentations.
Prerequisite: (ENGR 4240) and (MEEN 4360') and (MEEN 4365') or (EEEN 4333', CEEN 4304' or IEEEN 4310').
* May be taken concurrently.
Co-requisite: SMTE 0099.

ENGR 4390  Special Topics in Engineering
1-3 Semester Credit Hours (1 Lecture Hour)
Subject material variable. May be repeated for credit when topics are different.

ENGR 4420  Engineering Lab Measurements
4 Semester Credit Hours (2 Lecture Hours, 4 Lab Hours)
Principles of physical measurements; standards, calibration, error estimation; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. The purpose of this course is for students to gain proficiency in designing, assembling, and operating an experiment; analyzing and presenting experimental results. This encompasses skills such as understanding control and data acquisition electronics, operation and limitation of modern sensors, calibration and error analysis, assessing applicability of theory and the impact of secondary experimental variables, and writing and presenting reports and analysis.
Prerequisite: ENGR 2460.
Co-requisite: SMTE 0099.

Geographic Information Science, BS

Program Description
The Geographic Information Science Program prepares graduates with knowledge and skills for a variety of career paths related to the acquisition, analysis, and management of geospatial data and information. Career paths include pursuing advanced degrees and employment in the fields of Geomatics and Geospatial Information Systems.

Program Objectives
- Geographic Information Science program graduates will demonstrate growth and advancement in the surveying profession or geospatial sciences.
- Students will be capable of continuing paths towards graduate studies and/or employment in the fields of Geomatics and Geographic Information Systems.
- Students will be prepared to become Registered Professional Land Surveyors and/or GIS Professionals.
Student Learning Outcomes

Graduates of the program will have:

1. An ability to identify, formulate, and solve broadly-defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
2. An ability to formulate or design a system, process, procedure or program to meet desired needs.
3. An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
4. An ability to communicate effectively with a range of audiences.
5. An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.
6. An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.

Program

The Geographic Information Science Program provides broad-based expertise and cutting-edge skills that span the growing geospatial field and helps to alleviate the shortage of well-educated geospatial professionals. The program is intended for those seeking to become surveyors, engineers and other geospatial professionals with knowledge and skills in using and managing rapidly developing geospatial technologies.

Our GIS and Geomatics curriculum covers a wide range of geospatial principles. Students engage in activities using a systematic approach to integrate all means of capturing and managing spatial data required for scientific, administrative, legal, and technical operations involved in the production and management of spatial information. These activities include, but are not limited to, cartography, control surveying, digital mapping, geodesy, geographic information systems, hydrography, land information management, land surveying, mining surveying, photogrammetry, and remote sensing.

The curriculum also focuses on computer-based solutions to problems involving the collection, synthesis, analysis, and communication of spatially related information within a geographic jurisdiction or area. It meets the needs of local, state, and federal government agencies and private industries’ transitioning to highly automated graphics systems that integrate digital mapping with computerized databases.

The program prepares graduates for careers in industry and/or science. Students are required to complete a Capstone Project related to one of the above areas of interest. The Capstone Project will be evaluated under the Geospatial Systems Project GISC 4351 Geospatial Systems Project (3 sch) course. Students who complete the program have a comprehensive understanding of these disciplines that empowers them to advance their careers in geospatial technologies or to continue their studies to further advance the science.

**Designated Electives**

Select one of the following: 3

- GISC 4320 Hydrography
- GISC 4590 Selected Topics (Approved by GIS faculty)

**Total Hours** 128

1

Math can be any division math courses. Note: The course(s) satisfies a Mathematics Minor is a good choice.

Science can be any Natural Science course (based on scientific method) above 2000, or any Natural Science course that satisfies the laboratory science group (cannot satisfy both).

Sciences are disciplines focused on knowledge or understanding of the fundamental aspects of natural phenomena. Sciences course(s) consist of chemistry and physics besides the degree required core and other natural sciences including life, Earth, and space sciences.

* Online offering

^ Blended offering

**Note:** A minimum 2.25 TAMUCC-CC major GPA is required in core required classes and designated electives for GISC.

Courses

GISC 1301 Physical Geography
3 Semester Credit Hours (3 Lecture Hours)
The goal of this course is to encourage you to think geographically, examining the interactions between physical systems and human activities. Introduction to topics covered include elements of Physical Geography (studies of atmosphere, ocean and land surface environments), Geographic Information Systems (computer systems that capture, analysis, and display of geographic information), and human environmental interactions. Cross listed with GEOG 1301.

TCCNS: GEOG 1301

GISC 1470 Geospatial Systems I
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Introduction to geographic information systems (GIS) and its theoretical foundations. Topics covered include vector and raster data models, acquisition and manipulation of data, cartography, current topics, data quality, and basic spatial analysis. Principles and uses of GIS software also covered. Fall and Spring.

GISC 2250 Field Camp I
2 Semester Credit Hours (6 Lab Hours)
A one-week field camp with intensive field data collection and computations. Traversing between control points. Digital contour data and leveling control. Detail spatial data by total station. Construction set out using total station and steel band. Taken during the sophomore or junior year. Spring.
Prerequisite: GISC 2470.

GISC 2301 Geospatial Systems II
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
An intermediate level course in the concepts and applications of geographic information systems (GIS). Topics covered include spatial database design and management, raster analysis, terrain mapping, analysis, and applications. Spring.
Prerequisite: (GISC 1470).

GISC 2438 Geospatial Software Systems I
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Introduction to the design and development of GIS software to solve spatial problems. Topics covered include programming basics, design and implementation common tasks in GIS applications. Fall.
Prerequisite: GISC 1470 and COSC 1435 or COSC 1330.

GISC 2470 Geospatial Plane Measurement I
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Historical introduction to field measurement and mapping; distance measurement using electronic distance meters; calibration and reduction. Leveling instruments; principles, construction, testing and adjustment; ancillary equipment. Optical and electronic theodolites. Traverse computations and adjustment. Coordinate systems. Map projections. Fall.
Prerequisite: MATH 1316 or 2413.

GISC 3300 Geospatial Mathematical Techniques
3 Semester Credit Hours (3 Lecture Hours)
Characteristics of geographic/spatial information; overview of relevant sections of numbers, algebra and geometry, plane and spherical trigonometry, matrices, determinants and vectors, curves and surfaces, integral and differential calculus, partial derivatives, with an emphasis on geospatial applications. Concepts of geospatial coordinate systems and geospatial coordinate transformations; overview of spatial statistics and best-fit solutions with geospatial applications.
Prerequisite: MATH 2413 and 3342.

GISC 3325 Geodetic Science
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470.

GISC 3412 Geospatial Plane Measurement II
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Principles and reduction of observations and errors in spatial measurement. Techniques of horizontal and vertical angle measurement for precise positioning. Trigonometric heighting and vertical staff tacheometry. Setting out of structures. Design and computation of horizontal and vertical curves. Spring.
Prerequisite: (GISC 2470 and 1336).
*May be taken concurrently.

GISC 3420 Geospatial Software Systems II
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Advanced programming course focusing on the design and implementation of GIS scripts and GIS web applications. Topics covered include GIS web applications, web mashups, GIS scripts, GIS tool creation, and advanced user interface design and implementation. Spring.
Prerequisite: GISC 2438.

GISC 4180 Geospatial Systems Internship
1 Semester Credit Hour (1 Lecture Hour)
Internship education requires work with approved Geospatial Systems related industry employer. Students provide weekly written reports and final presentation to program at the end of internship. Must have completed 60 semester hours before attempting. Fall, Spring, and Summer.
GISC 4305  Legal Aspects of Spatial Information  
3 Semester Credit Hours  (3 Lecture Hours)  
Legal ownership of spatial data and information collected in the public sector. Public access to large digital databases. Copyright law as applied to spatial data. Legal issues related to property boundaries, statutory boundaries, voter district boundaries, and jurisdictional boundaries. Government fees and charges for access to spatial data. Social and economic value of spatial data. Spring.  
Prerequisite: GISC 2470.

GISC 4315  Satellite Positioning  
3 Semester Credit Hours  (2 Lecture Hours, 2 Lab Hours)  
Prerequisite: GISC 2470 and MATH 2413.

GISC 4318  Cadastral Systems  
3 Semester Credit Hours  (3 Lecture Hours)  
Land ownership recording systems used in Texas and U.S. Investigation and research for artificial and natural boundaries. Title searches at the county courthouse, title plants, and other sources for cadastral research. Riparian and littoral boundaries. Boundary marking and preparation of cadastral plans. Metes and bounds descriptions. Writing field notes. Urban and rural cadastral issues. Use of coordinate systems in cadastral mapping. Fall.  
Prerequisite: GISC 2470.

GISC 4320  Hydrography  
3 Semester Credit Hours  (2 Lecture Hours, 2 Lab Hours)  
Introduction to offshore and inshore hydrographic mapping. Tidal datums and their computation. Review of hydrographic and nautical charts. Electronic position finding and bathymetric data collection. Echo sounding, side scan sonar. Seafloor mapping and underwater locating. Beach (combined land and hydrographic) mapping. Spring even years.  
Prerequisite: GISC 2470 and MATH 2413.

GISC 4326  Geomatics Professional Practice  
3 Semester Credit Hours  (3 Lecture Hours)  
An intensive one-week summer course presented by practicing geomatics professionals covering many of the aspects of operating a professional surveying practice in the State of Texas. Topics cover surveyor responsibility and liability, the surveyor in court, standards of practice, surveying mathematics, Texas coordinate system, celestial observations, and project control.  
Prerequisite: GISC 2250.

GISC 4335  Geospatial Systems III  
3 Semester Credit Hours  (2 Lecture Hours, 2 Lab Hours)  
Advanced spatial analysis and modeling in GIS. Topics covered include exploratory analysis of spatial data, network analysis, spatial point patterns, area objects and spatial autocorrelation, and spatial interpolation. Also covers new approaches to spatial analysis. Fall.  
Prerequisite: GISC 2301 and MATH 3342.

GISC 4340  Geospatial Computations and Adjustment  
3 Semester Credit Hours  (3 Lecture Hours)  
Prerequisite: GISC 2470, MATH 3342 and GISC 3300.

GISC 4350  Field Camp II  
3 Semester Credit Hours  (6 Lab Hours)  
A one-week field camp undertaking projects in cadastral, engineering, hydrographic, and geodetic positioning. Reduction of digital field data to produce final plans and reports. Taken during the senior year. Spring.  
Prerequisite: GISC 3412, 4318 and 2250.

GISC 4351  Geospatial Systems Project  
3 Semester Credit Hours  
This course allows students to employ knowledge attained in other courses to create a project to spatially analyze information of interest to you and your field of study. Students will either undertake a GIS project to manage, analyze, and visualize spatial data, or a survey project in cadastral, topographic, engineering, hydrographic, or geodetic positioning survey. Spring. Students who enroll in the project course will need permission from the instructor.  
Prerequisite: GISC 4590 or (GISC 3421 and 4335).

GISC 4371  History of Land Ownership  
3 Semester Credit Hours  (3 Lecture Hours)  
This course prepares students by providing proper knowledge of how land transferred throughout history and techniques for researching land ownership in the present. Students receive an overview of legal aspects and other topics relative to land issues applicable for Land Surveyors, Civil Engineers, and GIS professionals, among others. Spring.  
Prerequisite: GISC 3412.

GISC 4431  Remote Sensing and Photogrammetry  
4 Semester Credit Hours  (3 Lecture Hours, 3 Lab Hours)  
Provides the foundations to interpret, process, and apply remotely sensed data acquired by satellites and sub-orbital platforms (aircraft, UAVs) for mapping and analysis of our natural and built environment. Principles of electromagnetic energy-matter interaction, remote sensing systems and data characteristics, digital image processing, and information extraction methods will be covered. Included is treatment of: aerial photogrammetry; multispectral, thermal, and hyperspectral sensing; earth observation satellites; radar and lidar; emergent topics. Emphasis will be on their use for geospatial and environmental applications. Fall.  
Prerequisite: (PHYS 2425, MATH 3342 and GISC 3300) or (MEEN 3310 and PHYS 2425).

GISC 4590  Selected Topics  
1-5 Semester Credit Hours  (1-5 Lecture Hours)  
May be repeated for credit depending on topic. Variable content.  

GISC 4596  Directed Independent Study  
1-5 Semester Credit Hours  
See College description. Offered on request. May be repeated for credit.  

GISC 4690  Co-operative Education  
1 Semester Credit Hour  (1 Lecture Hour)  
Co-op education allows students to take time off their full-time studies to gain valuable experience-based learning with employers willing to put on students for a semester (14 weeks), six months, or over the summer. The Co-op program allows students to maintain their full-time status as a student (continue health insurance coverage with parents, not effect student loan repayment, access to college activities, etc.) while undertaking work in their field of interest. The Co-op program is a partnership between the employer, the student, and the university.

**Industrial Engineering, BS**

**Program Description**

The Industrial Engineering curriculum prepares graduates to design, develop, implement, and improve integrated systems that include people,
Industrial Engineering, BS

Industrial Engineers apply science, mathematics, and engineering methods to complex system integration and operations. Because these systems are so large and complex, IEs need to have knowledge and skills in a wide variety of disciplines, the ability to work well with people, and a broad, systems perspective. Industrial engineers use their knowledge and skills to improve systematic processes through the use of statistical analysis, interpersonal communication, design, planning, quality control, operations management, computer simulation, and problem solving.

The Industrial Engineering curriculum prepares graduates to design, develop, implement, and improve integrated systems that include people, materials, information, equipment and energy. The curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analytical, computational, and experimental practices.

Program Educational Objectives

In accordance with ABET accreditation requirements, the Program Educational Objectives (PEOs) describe the professional accomplishments that Industrial Engineering graduates are expected to achieve, within a few years of graduation. The PEOs are:

1. Within two years of graduation from TAMU-CC, our graduates who have chosen to pursue a career in engineering or a related field will be working in industry, government, construction, or other professional service as industrial engineers, or will be pursuing graduate degrees in industrial engineering or post-baccalaureate degrees in other fields, such as law, business, or medicine.

2. Within five years of graduation from TAMU-CC our graduates who have chosen to pursue a career in engineering or a related field will have:
   - advanced in their careers as indicated by obtaining promotions and positions of leadership, awards, recognitions as subject matter experts, and/or registration as professional engineers or in other professional disciplines; or by entrepreneurial activities, products or processes developed, patents, and/or publications;
   - demonstrated the ability to increase their knowledge and expertise through continuing education or advanced degrees; and
   - contributed to the improvement of the profession and of society through research, national and/or international collaboration, and/or professional and public service including mentoring.

Student Learning Outcomes

Graduates will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Fundamentals of Engineering (FE) Exam

All engineering students are encouraged to take the Fundamentals of Engineering (FE) exam. This is exam is an important step toward licensure as a Professional Engineer (P.E.), which many engineers find useful and necessary in their careers. Close to the end of the B.S. degree program is an excellent time to take the exam, because the student has the best preparation for the exam at that point in the student’s academic career.

Admission from pre-engineering

For all students admitted into a pre-engineering program at TAMU-CC who wish to transfer into one of the TAMU-CC engineering programs (CEEN, EEEN, IEEN, MEEN), the cumulative GPA for all MATH, CHEM, PHYS, ENGR, COSC, CEEN, EEEN, IEEN, or MEEN courses that appear in the CEEN, EEEN, IEEN, or MEEN program curricula, plus any ENTC courses, taken at TAMU-CC, or their equivalents taken at other institutions, should be 2.5 or greater to be admitted into the CEEN, EEEN, IEEN, or MEEN programs at TAMU-CC. There should be a minimum of at least 12 hours of such courses taken at TAMU-CC or elsewhere before a transfer / admission to CEEN, EEEN, IEEN, or MEEN may be considered.

All such students must also meet the requirements to take MATH 2413 Calculus I (4 sch) if they have not already done so.

Master of Business Administration (MBA) Option

Industrial engineering students who have completed 96 credit hours toward the Industrial Engineering B.S. degree and earned a cumulative GPA of 3.0 or higher may elect the MBA option in senior year. Students who elect the MBA option are required to take three MBA foundation courses to satisfy the Technical Elective Block requirements:

<table>

</tr>
</tbody>
</table>

Students who plan to elect the MBA Option are encouraged to have summer internship experience before senior year, and will be able to complete an MBA degree study with 2 regular semesters and 1 summer session beyond an Industrial Engineering B.S. degree study.

General Requirements

The Industrial Engineering curriculum consists of a minimum of 123 credit hours. It can be divided into five main areas:

Technical Electives Block

Students must complete 9 hours of elective courses. These may include upper-division Engineering and 4000-level Engineering Technology courses outside of the required courses in their degree plans, any 4000-level MATH, COSC, BIOL, CHEM, or PHYS courses, the specified courses in the 5-year BS/MBA program, and other courses approved by the Department of Engineering.

Capstone Project

Total Hours 125

The 3 lecture hours in MATH 2413 Calculus I (4 sch), CHEM 1411 General Chemistry I (4 sch), and PHYS 2425 University Physics I (4 sch) satisfy the required 3 and 6 core curriculum hours in math and science, respectively. The 1 lab hour from each of these three courses, and the 3 lecture hours from MATH 2414 Calculus II (4 sch), satisfy the 6-hour component area option requirement in the core curriculum. Students transferring to Texas A&M University - Corpus Christi from other institutions may have various means for fulfilling the core curriculum. Please refer to the “General Education Requirement” in the catalog section entitled “Undergraduate Programs (p. 42).”

Hours 17
## Courses

### Engineering Courses

**ENGR 1201 Introduction to Engineering**  
2 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)  
Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving and design; other topics include computer applications and programming; visualization, orthographic drawings and CAD tools; introduction to electrical circuits, semiconductor devices, digital logic, communications and their application in systems; Newton’s laws, unit conversions, statistics, Excel; basic graphics skills. Offering: Fall and Spring.  
**Prerequisite:** MATH 1314.

**ENGR 1312 Engineering Graphics I**  
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)  
Topics include, depending on the major: emphasis on computer applications and programming and solids modeling using CAD tools or other software; fundamentals of engineering science; advanced graphic skills. Pre-req: MATH 1314 - College Algebra or equivalent academic preparation. Offered Fall and Spring.  
**Prerequisite:** MATH 1314.  
**TCCNS:** ENGR 1304

**ENGR 2105 Electrical Circuits Laboratory**  
1 Semester Credit Hour (3 Lab Hours)  
Laboratory experiments supporting theoretical principles presented in ENGR 2305 involving DC and AC circuit theory, network theorems, time, and frequency domain circuit analysis. Introduction to principles and operation of basic laboratory equipment; laboratory report preparation.  
**Prerequisite:** ENGR 2305*.  
* May be taken concurrently.  
**Co-requisite:** ENGR 2105, SMTE 0099.

**ENGR 2106 Digital Systems Laboratory**  
1 Semester Credit Hour (1 Lab Hour)  
Basic laboratory experiments supporting theoretical principles presented in ENGR 2306 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports.  
**Prerequisite:** MATH 1314.  
**Co-requisite:** ENGR 2106, SMTE 0099.

**ENGR 2305 Electrical Circuits**  
3 Semester Credit Hours (3 Lecture Hours)  
Principles of electrical circuits and systems. Basic circuit elements (resistance, inductance, mutual inductance, capacitance, independent and dependent controlled voltage, and current sources). Topology of electrical networks; Kirchhoff’s laws; node and mesh analysis; DC circuit analysis; operational amplifiers; transient and sinusoidal steady-state analysis; AC circuit analysis; first- and second-order circuits; Bode plots; and use of computer simulation software to solve circuit problems.  
**Prerequisite:** PHYS 2426 and MATH 2414.  
**Co-requisite:** ENGR 2105.
ENGR 2306  Digital Systems
3 Semester Credit Hours (3 Lecture Hours)
Introduction to theory and design of digital logic, circuits, and systems. Number systems, operations and codes; logic gates; Boolean Algebra and logic simplification; Karnaugh maps; combinational logic; functions of combinational Logic; flip-flops and related devices; counters; shift registers; sequential logic; memory and storage.
Prerequisite: MATH 1314 and 2305.
* May be taken concurrently.
Co-requisite: ENGR 2106.

ENGR 2325  Statics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving forces, moments, and couples on stationary structures; equilibrium in two and three dimensions; free body diagrams; truss analysis; friction; centroids; centers of gravity and moments of inertia.
Prerequisite: PHYS 2425 and MATH 2414.
* May be taken concurrently.

ENGR 2326  Dynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving the motion of particles, rigid bodies and systems of particles; Newton's Laws; work and energy relationships; principles of impulse and momentum; application of kinetics and kinematics to the solution of engineering problems.
Prerequisite: ENGR 2325.

ENGR 2460  Circuit Analysis
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
This course covers principles of electronics: charge, voltage, resistance, current, and power; Ohm's Law; Kirchhoff's voltage and current laws; RC and LC circuits; periodic functions, average and RMS measurements; transformers, electrical measurement instruments. The laboratory provides hands-on experience with devices and circuits discussed in the classroom.
Prerequisite: (PHYS 2426, MATH 2414 and 3315).
* May be taken concurrently.
Co-requisite: SMTE 0099.
TCCNS: ENGR 2302

ENGR 3315  Fluid Mechanics
3 Semester Credit Hours (3 Lecture Hours)
Fluid properties, fluid statics, dynamics, and kinematics, conservation of energy and momentum incompressible, laminar and turbulent flow. Similarity and dimensional analysis, and viscous flow. Prerequisite or

ENGR 3316  Thermodynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; gas, vapor and refrigeration cycles.
Prerequisite: (PHYS 2425 and MATH 2414).

ENGR 3320  Strength of Materials
3 Semester Credit Hours (3 Lecture Hours)
Concepts in strength of materials, stress, strain; deformation under load, direct, shear, and combined stresses; stress concentrations, bending stresses and torsional shear stresses, deflection in beams and shafts; columns, and pressure vessels.
Prerequisite: ENGR 2325 and 3322 or ENGR 2322.

ENGR 3322  Materials Science
3 Semester Credit Hours (3 Lecture Hours)
Structure and properties of metallic and nonmetallic materials; microstructure, mechanical testing, phase diagrams, heat treatment, testing, ceramics, polymers, composites, construction materials, failure analysis, nondestructive evaluation, corrosion and thermal properties of materials.
Prerequisite: (CHEM 1411) and (PHYS 2425).
Co-requisite: SMTE 0099.

ENGR 4240  Project Management
2 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Foundations of engineering economy, cash flow and equivalence, and project justification. Introduction to project management, planning, scheduling, and control, use of project management software, GANTT charts, PERT charts, and critical path. Students prepare proposals, including specifications, timelines, schedule, and budget, for projects to be implemented in ENGR 4370 - Capstone Projects. This course should be taken the semester preceding ENGR 4370 - Capstone Projects.
Prerequisite: (MEEN 3330) and (MEEN 3345) or (EEEN 3330) or (EEEN 3310) and (EEEN 3350).
Co-requisite: SMTE 0099.

ENGR 4350  Manufacturing Processes
3 Semester Credit Hours (3 Lecture Hours)
Introduction to metal and non-metallic manufacturing processes; casting, forging, rolling, extrusion, sheet metal forming, cutting tools turning and milling operations, abrasive machining, welding and joining, powder compaction, molding, forming of plastics, surface treatment, human factors and safety.
Prerequisite: ENGR 1312 and 3322.
Co-requisite: SMTE 0099.

ENGR 4350  Machine Vision and Image Processing Applications
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to automated vision systems and components, camera models, testing and measurement, and fundamentals of image processing. Topics include image analysis and processing in binary, gray scale and color images in spatial- and frequency-domain. Texture and shape analysis, hyperspectral imaging, other transforms, and filters are discussed and applied.
Prerequisite: (COSC 1330 or 1435) and ENGR 2460 and MATH 2414.

ENGR 4370  Capstone Projects
3 Semester Credit Hours (1 Lecture Hour, 5 Lab Hours)
This course allows students to employ the knowledge attained in other courses to implement (including building, testing, and documenting) an approved project, within budget and on schedule. Course requirements include a written report and oral presentations.
Prerequisite: (ENGR 4240) and (MEEN 4360) or (MEEN 4365) or (EEEN 4333, CEEN 4304 or IEEEN 4310).
* May be taken concurrently.
Co-requisite: SMTE 0099.
ENGR 4390  Special Topics in Engineering
1-3 Semester Credit Hours (1 Lecture Hour)
Subject material variable. May be repeated for credit when topics are different.

ENGR 4420  Engineering Lab Measurements
4 Semester Credit Hours (2 Lecture Hours, 4 Lab Hours)
Principles of physical measurements; standards, calibration, error estimation; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. The purpose of this course is for students to gain proficiency in designing, assembling, and operating an experiment; and analyzing and presenting experimental results. This encompasses skills such as an understanding control and data acquisition electronics, operation and limitation of modern sensors, calibration and error analysis, assessing applicability of theory and the impact of secondary experimental variables, and writing and presenting reports and analysis.
Prerequisite: ENGR 2460.
Co-requisite: SMTE 0099.

Industrial Engineering Courses

IEEN 2302  Engineering Economics
3 Semester Credit Hours (3 Lecture Hours)
(3:0) Engineering management relies on the knowledge of engineering economics to be able to evaluate projects from a financial perspective. Optimizing financial performance of a project is a key responsibility of the engineer in the decision-making process. Examples of engineering projects would include but not limited to equipment replacement analysis, planning a new product line, and waste management. This course is designed to present engineering students the major concepts and techniques of engineering economic analysis that are needed in the decision-making process. The emphasis of this course is on the analytical analysis of money and its impact on decision making.
Prerequisite: MATH 2413.

IEEN 3302  Operations Research
3 Semester Credit Hours (3 Lecture Hours)
Introduction to operations research, linear programming, duality, other algorithms for linear programming, the transportation and assignment problems, dynamic programming, integer programming; offered: Fall and Spring.
Prerequisite: MATH 2414 and (MATH 3311 or MEEN 3310).

IEEN 3320  Human Factors
3 Semester Credit Hours (3 Lecture Hours)
The principles of the life sciences, engineering, and mathematics are applied to the investigation of existing and proposed socio-technical systems. Methods for the reduction of fatigue and human error are taught. Various fields of human factors and the fundamental concepts of the discipline are introduced. This course provides the basics of human perceptual, cognitive, and motor abilities relevant to human factors. This course also offers class project opportunities gain experience using human factors knowledge in actual applied settings. Offered: Fall and Spring.
Prerequisite: ENGR 1312.
Co-requisite: MATH 3342.

IEEN 3324  Human Computer Interface
3 Semester Credit Hours (3 Lecture Hours)
The emphasis of this course is the design of the human-computer interface. The fundamental concepts of human-computer interaction and user centered design thinking are taught, through working in teams on an interaction design project, supported by lectures, readings, and discussions. The variety of evaluation methods and design principles of usable and appropriate computer interfaces are introduced based on psychological, social, and technical analysis. Topics will include usability and affordances, direct manipulation, systematic design methods, user conceptual models and interface metaphors, design languages and genres, human cognitive models, physical ergonomics, information and interactivity structures, and design tools and environments. Offered: Fall and Spring.
Prerequisite: ENGR 1312.
Co-requisite: IEEN 3320.

IEEN 3330  Robotics and Automation
3 Semester Credit Hours (3 Lecture Hours)
This course covers topics of concepts, principles, and relationships of automated assembly devices, computer aided drafting/design (CADD), computer-aided manufacturing (CAM), industrial robots, numerical control (NC), industrial lasers, programmable logic controllers (PLCs), automated guided vehicles (AGVs), flexible manufacturing systems (FMS), and computer-integrated manufacturing (CIM). Offered: Fall and Spring.
Prerequisite: ENGR 2460.

IEEN 4310  Process Engineering
3 Semester Credit Hours (3 Lecture Hours)
This course covers introduction to software design paradigms, system and software requirements, computer aided software engineering, and software design fundamentals using existing documentation for a proposed system. Relevant topics include in-depth survey of data flow-oriented, object-oriented, data-oriented, and real-time design. Team project involving the implementation of the proposed system using structured programming, information hiding, and strength and coupling measures is required. Each student will be required to make an oral presentation as part of the team project. Offered: Fall.
Prerequisite: IEEN 3330.

IEEN 4312  Experimental Design and Analysis
3 Semester Credit Hours (3 Lecture Hours)
Main coverage: Basic principles of experimental design; Randomization; Completely randomized design; Paired design; Randomized blocks, Latin Squares, Greco-Latin Squares and related designs; Factorial design; Blocking in factorial design; 2k factorial design; Extension of 2k factorials; Blocking and confounding in 2k factorials; Partial confounding; Fractional factorial designs; Blocking in fractional factorials; Nested and split-plot designs; Replicated and un-replicated designs; Regression, ANOVA, and follow-up analysis; Sample size determination; Response surface model. Offered: Fall and Spring
Prerequisite: IEEN 3302 and 3320.
IEEN 4322 Cognitive Ergonomics
3 Semester Credit Hours (3 Lecture Hours)
This course is concerned with mental processes, such as perception, decision making, memory, reasoning, and response execution, as they affect interactions among humans and other elements of a work system. Relevant topics include skilled performance, attention, distraction, human error, work stress, risk perception, and Kansai engineering as these may relate to human-system design, safety and productivity. Assessment methodologies include hierarchical task analysis, cognitive task analysis, mental workload, human error identification/accident investigation, and situation awareness assessment. Offered: Fall.
Prerequisite: IEEN 3320.

IEEN 4324 Human Factors and Autonomous Systems
3 Semester Credit Hours (3 Lecture Hours)
This course introduces the survey of human factors and ergonomics with particular reference to human functions in human-machine systems and principles of human factors to demonstrate and apply a broad knowledge of various modern industrial engineering methods and tools associated with designing autonomous systems in manufacturing and other related fields. Applications of engineering design methods to represent, integrate and solve problems, including the ability to recognize problem context and integrate knowledge and skills appropriate sources are provided. Knowledge of basic human capabilities and the ways that these capabilities are taken into account in the design of human-machine systems and work environments. Offered: Fall.
Prerequisite: IEEN 3320.

IEEN 4326 Airborne Design of Experiments
3 Semester Credit Hours (3 Lecture Hours)
Definitions, concepts, and history, Aviation Human Factors, management, and the organization, Human performance in aviation operations, Human information processing and operational decision-making. Human error and threat management, Threat and Error Management (TEM) in flight operations, air traffic control and cabin operations, Resource management training on the flight deck and in air traffic control, Automation in the workplace, The design of Standard Operating Procedures (SOPs) and checklists. Offered: Fall and Spring.
Prerequisite: IEEN 3302.

IEEN 4330 Digital Systems Simulation
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Introduction (definitions and types of simulations), Mechanism of discrete event simulation, Random number/variate generation, Input data analysis (input distribution modeling), Simulation modeling using Arena package, Review of probability and statistics, Simulation output analysis, Monte Carlo simulation, Modeling continuous processes, Verification and validation of simulation models, Read/write simulation data from/to external files. Offered: Fall and Spring.
Prerequisite: IEEN 3302.

IEEN 4332 Distribution Center Design and Operation
3 Semester Credit Hours (3 Lecture Hours)
Introduction (issues, equipment, processes), layout, order-picking, automation, special topics: crossdocking, warehouse performance. Offered: Fall and Spring.
Prerequisite: IEEN 3330.

IEEN 4334 Scheduling and Sequencing
3 Semester Credit Hours (3 Lecture Hours)
Introduction and overview, EOQ Models, MRP job shop scheduling rules & Gantt chart, algorithms for one machine problems, implicit enumerations & dynamic program, branch and bound, heuristics approaches, project Scheduling, parallel Machine Scheduling, relaxation of Assumptions, batch processing, sequence dependence, project presentations.&nbsp;Offered: Fall and Spring.
Prerequisite: IEEN 3302.

IEEN 4342 Construction Management
3 Semester Credit Hours (3 Lecture Hours)
The course focuses on management techniques to solve the unique problems associated with a construction project. Study of Construction Management functions including Project Management, Cost Management, Time Management, Quality Management, Contract Administration, and Safety Management will be covered. Emphasis is put on the application of each function throughout the project phases. Offering: Spring.
Prerequisite: IEEN 2302 and 3320.

IEEN 4396 Directed Independent Study
1-3 Semester Credit Hours
Requires a formal proposal of study to be completed in advance of registration, approval of supervising faculty and department chairperson. Offered Fall, Spring, and Summer.

Mechanical Engineering Technology, BS

Program Description
The Engineering Technology Council of the American Society for Engineering Education defines Engineering Technology as the profession in which knowledge of mathematics and natural sciences gained by higher education, experience, and practices is devoted primarily to the implementation and extension of existing technology for the benefit of humanity. Engineering technology focuses on the applied aspects of science and engineering to prepare graduates for practice in product improvement, manufacturing, and engineering operational functions. Engineering technologists are suited for industries that deal with application, manufacturing, implementation, engineering operation, sales, and production.

The Mechanical Engineering Technology degree is offered in both the traditional face-to-face format and an online format for the upper-division courses. The fully-online courses form a competency-based education program in which students receive credit for courses when specific competencies are demonstrated, and receive the degree when all degree-level competencies are demonstrated. In some cases, students may be able to take traditional courses for credit in the competency-based education program.

The goal of Engineering Technology is to prepare well educated, highly skilled, and socially and professionally responsible engineering technologists from a diverse population of students to create productive and rewarding careers. Graduates will be well grounded in the fundamentals of engineering, mathematics, science, communications, and problem solving. To create continuous improvement, the program uses input from employers, alumni, and the Industrial Advisory Committee. Engineering Technology is accredited by the Engineering

Contact Information
Engineering Technology Program, Texas A&M University-Corpus Christi, Corpus Christi, TX 78412-5797. Phone: (361) 825-5849. Web: http://entc.tamucc.edu/

Mechanical Engineering Technology
Mechanical Engineering Technology graduates will exemplify the attributes previously described.

Student Learning Outcomes
By the time of graduation, students in the Mechanical Engineering Technology program will have demonstrated

1. an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
2. an ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
3. an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
4. an ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and
5. an ability to function effectively as a member as well as a leader on technical teams.

Program Educational Objectives
1. Within two years of graduation from TAMU-CC, our graduates who have chosen to pursue a career in mechanical engineering technology or a related field will be working in industry, government, construction, or other professional service in the areas of design, manufacture, sales, installation, operation and/or maintenance of complex, high-value systems.
2. Within five years of graduation from TAMU-CC our graduates who have chosen to pursue a career in mechanical engineering technology or a related field will have
   • advanced in their careers as indicated by obtaining promotions and positions of leadership, awards, recognitions as subject matter experts, and/or registration as professional engineers or in other professional disciplines; or by entrepreneurial activities, products or processes developed, or patents;
   • demonstrated the ability to increase their knowledge and expertise through continuing education or advanced degrees; and
   • contributed to the improvement of the profession and of society through participation and service in professional and public organizations and through mentoring.

Academic advisors and faculty mentors are available to assist students with their academic endeavors.

Competency-Based Education Program for BS Mechanical Engineering Technology (CBE MCET)
A competency-based education (CBE) program is one in which specific, concrete competencies are defined. The top-level competencies are the ABET student learning outcomes listed above. Subject-specific sub-competencies are identified and assessed in each of the CBE MCET courses. When a student demonstrates the competencies for a specific course, the student passes the course. When all of the competencies for the degree have been demonstrated, the student receives the degree. The CBE MCET program is being offered for the upper-division (3000- and 4000-level) courses. Once a student has completed the first two years of the traditional MCET BS program as described below, the student may opt for the CBE MCET program. Each of the courses in the CBE MCET program, with the exception of certain laboratory classes described below, may be completed online.

A student must apply for the CBE program in MCET. The student
• Must be admitted as a student to TAMU-CC.
• Must indicate a positive decision to apply for the CBE MCET program, either through ApplyTexas or a change of major form if student is already at TAMU-CC.
• Must have completed all core courses and all lower-division courses as listed below under “Prior Course Completion.”
• Must have a 2.5 GPA in all coursework that applies to the program (core courses and lower-division courses that will be counted towards the program), whether taken at TAMU-CC or elsewhere.

Credit By Examination: Some courses will have an online pre-test that students can take to earn college credit for that course. The test will be the equivalent of a comprehensive final exam that will test students on all competencies related to the course. The pre-test will be proctored according to the same standard as all other tests taken in the course. If students pass the pre-test, they will receive credit and not be required to take the course. The fee for taking the pre-test in each course must be paid by the student and may range up to $300 per exam. The student should contact the office of the Department of Engineering or the Office of Distance Education and Learning Technologies at TAMU-CC to determine the exact cost of the pre-test.

Credit By Portfolio: For the courses listed below, it is possible that through experience on the job (such as running a process unit in a plant or working in a machine shop), the student might have acquired the competencies in a particular course and therefore be able to obtain credit by submitting examples of work, certified by a supervisor, that illustrate the competencies in the course. The competencies for these courses may be found on the program website, and students given the opportunity to submit portfolios for evaluation (at the cost of an evaluation fee up to $300). The supervisor must be approved by the Engineering faculty as having the necessary qualifications to validate the work submitted by the student. The portfolio(s) submitted by the student must demonstrate that the student has mastered the competencies in the class, as published on the program website.

<table>

<td>Manufacturing Processes</td>
<td>3</td>
</tr>
<tr>
<td>ENTC 4210</td>
<td>Solid Mechanics Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>
Because of the nature of the last two courses, credit by portfolio must be obtained for both courses and cannot be obtained for each course individually.

**Student Learning Outcomes**

The student learning outcomes for the CBE MCET program are the same as for the traditional BS in MCET. These student outcomes will be met by the demonstration of specific competencies in each of the courses in the CBE MCET program.

**General Requirements**

A summary of the hours necessary for graduation follows:

The specific requirements for each aspect of the Bachelor of Science degree in Mechanical Engineering Technology are indicated below.

<table>

¹ Full-time, first time in college students are required to take the first-year seminars.

- UNIV 1101 University Seminar I (1 sch)
- UNIV 1102 University Seminar II (1 sch)

Transfer students with 24 or more hours are exempt from First-Year Seminar.

**Program Requirements**

The courses that are considered to be in the major field of study are all MATH, CHEM, PHYS, COSC, ENTC, ENGR, EEN, and MEEN courses in the curriculum listed below (any ENGR, MEEN, or EEN courses taken to fulfill MCET degree requirements must be approved by the program coordinator and the department chair).

The specific requirements for each aspect of the Bachelor of Science degree in Mechanical Engineering Technology are indicated below. Students are encouraged to take the NCEES (National Council of Examiners for Engineering and Surveying) Fundamentals of Engineering (FE) exam during their senior year. The FE exam, [link](http://ncees.org/exams/fe-exam), is the first step in the process that leads to the PE. license.

**Technical Electives**

Four courses or 12-13 sem. hrs.

Students choose one from any upper-division (3000-level or 4000-level) 3-hour credit Math, Science, or Engineering courses.
Students must complete at least 9 hours of technical elective courses. These may include any upper-division (3000-level or 4000-level) Engineering (CEEN, EEEN, IENE, MEEN) or Engineering Technology (ENTC) courses outside of the required courses in the Mechanical Engineering Technology degree plan, or any 4000-level MATH, COSC, BIOL, CHEM, or PHYS courses.

| Total Hours | 122-123 |

Engineering Technology students must take two courses in Physics even if the natural science portion of the core curriculum is satisfied by other means. Students transferring to A&M-Corpus Christi from other institutions may have various means for fulfilling the core curriculum. Please refer to the “General Education Requirement” in the catalog section entitled “Undergraduate Programs (p. 42).” Three hours of the Component Area Option of the University Core Curriculum are satisfied by the fourth (lab) hour of each of MATH 2413 Calculus I (4 sch), PHYS 2425 University Physics I (4 sch), and PHYS 2426 University Physics II (4 sch) (the first three lecture hours of each are used to satisfy the mathematics and natural science components of the Core). The other three hours of the Component Area Option of the Core are satisfied by the three lecture hours of MATH 2414 Calculus II (4 sch).

Competency-Based Education Program for BS Mechanical Engineering Technology (CBE MCET)

Prior Course Completion

A student must apply for admission to the CBE MCET program. Prior to being admitted to the program, the student must complete all TAMU-CC core curriculum requirements and the following courses or their equivalents (those courses which satisfy the core requirements for mathematics, life and physical sciences, and the component area option (CAO) are also listed, for completeness).

| Hours | 12 |

| Total Hours | 122 |
ENTC 3323  Robotics and Automation
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Automation in a manufacturing and assembly setting, material handling systems, remote guided vehicles, automated storage and retrieval systems, computer numerical machine tools, robotics. Offered: Spring.
Prerequisite: ENTC 3415.
Co-requisite: SMTE 0099.

ENTC 3350  Human Factors Engineering
3 Semester Credit Hours (3 Lecture Hours)
Application of human factors engineering principles utilized in mechanical system and product design. Overview of human characteristics and research and design techniques.
Prerequisite: (ENTC 3302 or 3302a).
* May be taken concurrently.

ENTC 3455  Solid Modeling and Finite Elements
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Use of computer aided design and solid modeling tools in engineering design and manufacturing including: solid modeling, stress, flow and heat transfer analysis using finite element methods, and rapid prototyping. Offered: Spring.
Prerequisite: ENTC 3308.

ENTC 4210  Solid Mechanics Laboratory
2 Semester Credit Hours (4 Lab Hours)
Prerequisite: (ENTC 4330).
* May be taken concurrently.
Co-requisite: SMTE 0099.

ENTC 4320  Heat Transfer
3 Semester Credit Hours (3 Lecture Hours)
Fundamental study of convection, conduction and radiation as applied to heat transfer, heat exchangers, boilers, other heat transfer equipment. Offered: Spring.
Prerequisite: ENTC 3306 and 3320.

ENTC 4322  Programmable Logic Controllers
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to PLCs and their use in industrial automation. Topics include programming, counters, timers, interrupts, and process control applications. Offered: As needed.
Prerequisite: ENTC 3416.
Co-requisite: SMTE 0099.

ENTC 4330  Design of Machine Elements
3 Semester Credit Hours (3 Lecture Hours)
Stress analysis of deformable bodies and mechanical elements; stress transformation; combined loading; failure modes; material failure theories; fracture and fatigue; deflections and instabilities; thick cylinders; curved beams; design of structural/mechanical members; design processes for shafts, bearings, springs, fasteners, and mechanical joints.
Prerequisite: ENTC 3308.

ENTC 4331  Unit Processes
3 Semester Credit Hours (3 Lecture Hours)
Principles and methods for staged separation processes including distillation, absorption and stripping, extraction, and adsorption systems. Offered in Fall and Spring
Prerequisite: ENTC 4320.

ENTC 4332  Process Modeling and Control
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: ENTC 3306.

ENTC 4333  Chemical Reaction Engineering
3 Semester Credit Hours (3 Lecture Hours)
Fundamental principles of chemical reaction engineering and application to design and analysis of basic chemical reactors containing both homogeneous and heterogeneous reactions. Offered Fall and Spring.
Prerequisite: ENTC 4331 and 4332.

ENTC 4335  Energy Conversion
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Installation, design characteristics, operational performance, and maintenance of motors, turbines, pumps and compressors. Introduction to global energy concerns; fossil and nuclear fuels; energy consumption analysis; energy management and conservation techniques; renewable and alternative energy sources. Modern energy conversion devices such as fuel cells, photovoltaic cells, and micro-power turbines.
Prerequisite: ENTC 3320.

ENTC 4350  Capstone Projects
3 Semester Credit Hours (1 Lecture Hour, 5 Lab Hours)
This course allows students to employ the knowledge attained in other courses to implement (including building, testing, and documenting) the project approved in ENTC 4415 - Project Justification and Management , within budget and on schedule. Course requirements include a written report and oral presentations. Normally taken in the student's last semester.
Prerequisite: ENTC 4415.
Co-requisite: SMTE 0099.

ENTC 4360  Mechanical System Design
3 Semester Credit Hours (3 Lecture Hours)
Analysis, management and cost, team work, optimal design, and computer simulation of mechanical systems and components; Applications in fluid flow and heat transfer, machine elements, and stress analysis. Selected course topics are assigned as projects.
Prerequisite: ENTC 4330.

ENTC 4415  Project Justification and Management
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Foundations of engineering economy, cash flow and equivalence, and project justification. Introduction to project management, planning, scheduling, and control, use of project management software, GANTT charts, PERT charts, critical path. Students prepare proposals, including specifications, timelines, schedule, and budget, for projects to be implemented in ENTC 4350 - Capstone Projects.
Co-requisite: SMTE 0099.

ENTC 4446  Control Systems I
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Introduction to control systems; open and feedback; Laplace transform and frequency response; control valves; electric motors; P, PI, and PID modes of control; analog and digital controllers Process characteristics; analysis of control systems; gain and phase margin; stability.
Prerequisite: ENTC 2414.
ENTC 4490 Selected Topics
1-4 Semester Credit Hours (1-4 Lecture Hours)
Subject material variable. May be repeated for different topics.

ENTC 4496 Directed Independent Study
1-4 Semester Credit Hours
Requires a formal proposal of study to be completed in advance of registration, approval of supervising faculty and chairperson.

# Mechanical Engineering, BS

## Program Description

Mechanical Engineering is an engineering discipline that requires an understanding of mechanics, kinematics, thermodynamics and energy, and involves the application of principles of physics and mathematics to develop mechanical systems. The American Society of Mechanical Engineers (ASME) defines mechanical engineering as the branch of engineering that serves society through the analysis, design, and manufacture of systems that convert a source of energy to useful work. The Bachelor of Science in Mechanical Engineering (BSME) program emphasizes service, systems-based knowledge, and sustainability with an eye toward the interface of traditional mechanical engineering with new and emerging fields, in particular unmanned aircraft systems, maritime sciences and marine biology that directly impact the Gulf Coast.

The program educational objectives of this program are:

1. Within two years of graduation from TAMU-CC, our graduates who have chosen to pursue a career in engineering or a related field will be working in industry, government, construction, or other professional service as mechanical engineers, or will be pursuing graduate degrees in mechanical engineering or post-baccalaureate degrees in other fields, such as law, business, or medicine.

2. Within five years of graduation from TAMU-CC our graduates who have chosen to pursue a career in engineering or a related field will have
   - advanced in their careers as indicated by obtaining promotions and positions of leadership, awards, recognitions as subject matter experts, and/or registration as professional engineers or in other professional disciplines; or by entrepreneurial activities, products or processes developed, patents, and/or publications;
   - demonstrated the ability to increase their knowledge and expertise through continuing education or advanced degrees; and
   - contributed to the improvement of the profession and of society through research, national and/or international collaboration, and/or professional and public service including mentoring.

## Student Learning Outcomes

Graduates will have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Admission from pre-engineering

For all students admitted into a pre-engineering program at TAMU-CC who wish to transfer into one of the TAMU-CC engineering programs (CEEN, EEEN, IEEN, MEEN), the cumulative GPA for all MATH, CHEM, PHYS, ENGR, COSC, CEEN, EEEN, IEEN, or MEEN courses that appear in the CEEN, EEEN, IEEN, or MEEN program curricula, plus any ENTC courses, taken at TAMU-CC, or their equivalents taken at other institutions, should be 2.5 or greater to be admitted into the CEEN, EEEN, IEEN, or MEEN programs at TAMU-CC. There should be a minimum of at least 12 hours of such courses taken at TAMU-CC or elsewhere before a transfer / admission to CEEN, EEEN, IEEN, or MEEN may be considered. All such students must also meet the requirements to take MATH 2413 Calculus I (4 sch) if they have not already done so.

## Master of Business Administration (MBA) Option

Mechanical Engineering students who have completed 96 credit hours toward the Mechanical Engineering B.S. degree and earned a cumulative GPA of 3.0 or higher may elect the MBA option in senior year. To satisfy the Technical Elective Block requirements, students who elect the MBA option are required to take

1. any upper division 3-credit hour math/physics/chemistry/biology course (MATH 3342 Applied Probability and Statistics (3 sch) preferred) and
2. three MBA foundation courses:

<table>

<tr>
<td>ECON 5311</td>
<td>Foundations in Economics</td>
<td>3</td>
</tr>
<tr>
<td>FINA 5311</td>
<td>Financial Management Concepts</td>
<td>3</td>
</tr>
</tbody>
</table>

Students who plan to elect the MBA Option are encouraged to have summer internship experience before senior year, and will be able to complete an MBA degree study with 2 regular semesters and 1 summer session beyond a Mechanical Engineering B.S. degree study.

## General Requirements

The mechanical engineering curriculum consists of a minimum of 128 credit hours and can be divided into four main areas: University Core requirements, mathematics and science requirements, engineering requirements, technical electives, and capstone project.

Because courses in mechanical engineering tend to be sequential, it is very important that students have the proper prerequisites. When in doubt, students should check with their faculty mentor.
Program Requirements

The courses that are considered to be in the major field of study are all MATH, CHEM, PHYS, COSC, ENGR, MEEN, EEEN, and ENTC courses in the curriculum listed below (any EEEN or ENTC courses taken to fulfill MEEN degree requirements must be approved by the program coordinator and the department chair). Students who have been admitted as pre-mechanical engineering (PREM) majors must have a cumulative GPA of at least 2.5 in all MATH, CHEM, PHYS, COSC, and ENGR courses taken from the list below before they will be allowed to transfer into the Mechanical Engineering BS program and to take any upper-division coursework outside the major.

Note:

The specific requirements of the Bachelor of Science in Mechanical Engineering degree are indicated below. Students are encouraged to take the NCEES (National Council of Examiners for Engineering and Surveying) Fundamentals of Engineering (FE) exam during their senior year. The FE exam, http://ncees.org/exams/fe-exam/, is the first step in the process that leads to the PE license.

**Core Curriculum Program**

- University Core Curriculum 42
- Mechanical Engineering students should take: 1
  - MATH 2413 Calculus I (3 hour lecture component)
  - PHYS 2425 University Physics I (3 hour lecture component)
  - PHYS 2426 University Physics II (3 hour lecture component)

**Common Engineering, Math and Science Courses**

- MATH 2413 Calculus I (hours counting in core)
- PHYS 2425 University Physics I (hours counting in core)

**Transfer Students**

Transfer students with 24 or more hours are exempt from First-Year Seminars.
- UNIV 1101 University Seminar I (1 sch)
- UNIV 1102 University Seminar II (1 sch)

**Program Requirements**

Full-time, first time in college students are required to take the first-year seminars.
- UNIV 1101 University Seminar I (1 sch)
- UNIV 1102 University Seminar II (1 sch)

**Total Hours**

1

Mechanical engineering students must take two courses in physics even if the natural science portion of the core curriculum is satisfied by other means. Students transferring to A&M-Corpus Christi from other institutions may have various means for fulfilling the core curriculum. Please refer to the “General Education Requirement” in the catalog section entitled “Undergraduate Programs (p. 42).”

Three hours of the Component Area Option of the University Core Curriculum are satisfied by the fourth (lab) hour of each of MATH 2413 Calculus I (4 sch), PHYS 2425 University Physics I (4 sch), and PHYS 2426 University Physics II (4 sch) (the first three lecture hours of each are used to satisfy the mathematics and natural science components of the Core, as described above). The other three hours of the Component Area Option of the Core are satisfied by the three lecture hours of MATH 2414 Calculus II (4 sch).
Students must complete 9 hours of elective courses. These may include upper-division Engineering and 4000-level Engineering Technology courses outside of the required courses in their degree plans, any 4000-level MATH, COSC, BIOL, CHEM, or PHYS courses, the specified courses in the 5-year BS/MBA program, and other courses approved by the Department of Engineering.

**Capstone Project**
All mechanical engineering students must complete a senior-level capstone project in ENGR 4370 Capstone Projects (3 sch). Students will work with practicing engineers and mechanical engineering faculty. The capstone project will give engineering students practical, professional experience to prepare them for careers in mechanical engineering.

### Courses

#### Engineering Courses

- **ENGR 1201 Introduction to Engineering**
  2 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)
  Introduction to the engineering profession, ethics, and disciplines; development of skills in teamwork, problem solving and design; other topics include computer applications and programming; visualization, orthographic drawings and CAD tools; introduction to electrical circuits, semiconductor devices, digital logic, communications and their application in systems; Newton’s laws, unit conversions, statistics, Excel; basic graphics skills. Offering: Fall and Spring.
  **Prerequisite:** MATH 1314.

- **ENGR 1312 Engineering Graphics I**
  3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
  Topics include, depending on the major: emphasis on computer applications and programming and solids modeling using CAD tools or other software; fundamentals of engineering science; advanced graphic skills. Pre-req: MATH 1314 - College Algebra or equivalent academic preparation. Offered Fall and Spring.
  **Prerequisite:** MATH 1314.

  **TCCNS:** ENGR 1304
ENGR 2105  Electrical Circuits Laboratory
1 Semester Credit Hour (3 Lab Hours)
Laboratory experiments supporting theoretical principles presented in ENGR 2305 involving DC and AC circuit theory, network theorems, time, and frequency domain circuit analysis. Introduction to principles and operation of basic laboratory equipment; laboratory report preparation.
Prerequisite: ENGR 2305.
May be taken concurrently.
Co-requisite: ENGR 2035, SMTE 0099.

ENGR 2106  Digital Systems Laboratory
1 Semester Credit Hour (1 Lab Hour)
Basic laboratory experiments supporting theoretical principles presented in ENGR 2306 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports.
Prerequisite: MATH 1314.
Co-requisite: ENGR 2306, SMTE 0099.

ENGR 2305  Electrical Circuits
3 Semester Credit Hours (3 Lecture Hours)
Principles of electrical circuits and systems. Basic circuit elements (resistance, inductance, mutual inductance, capacitance, independent and dependent controlled voltage, and current sources). Topology of electrical networks; Kirchhoff’s laws; node and mesh analysis; DC circuit analysis; operational amplifiers; transient and sinusoidal steady-state analysis; AC circuit analysis; first- and second-order circuits; Bode plots; and use of computer simulation software to solve circuit problems.
Prerequisite: PHYS 2426 and MATH 2414.
Co-requisite: ENGR 2105.

ENGR 2306  Digital Systems
3 Semester Credit Hours (3 Lecture Hours)
Introduction to theory and design of digital logic, circuits, and systems. Number systems, operations and codes; logic gates; Boolean Algebra and logic simplification; Karnaugh maps; combinational logic; functions of combinational Logic; flip-flops and related devices; counters; shift registers; sequential logic; memory and storage.
Prerequisite: MATH 1314 and 2305.
May be taken concurrently.
Co-requisite: ENGR 2106.

ENGR 2325  Statics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving forces, moments, and couples on stationary structures; equilibrium in two and three dimensions; free body diagrams; truss analysis; friction; centroids; centers of gravity and moments of inertia.
Prerequisite: PHYS 2425 and MATH 2414.
May be taken concurrently.
TCCNS: ENGR 2301

ENGR 2326  Dynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory of engineering mechanics involving the motion of particles, rigid bodies and systems of particles; Newton's Laws; work and energy relationships; principles of impulse and momentum; application of kinetics and kinematics to the solution of engineering problems.
Prerequisite: ENGR 2325.
TCCNS: ENGR 2302

ENGR 2335  Fluid Mechanics
3 Semester Credit Hours (3 Lecture Hours)
Fluid properties, fluid statics, dynamics, and kinematics, conservation of energy and momentum incompressible, laminar and turbulent flow. Similarity and dimensional analysis, and viscous flow. Prerequisite or
Prerequisite: (MATH 3315) and ENGR 2326 and MATH 2415.

ENGR 2460  Circuit Analysis
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
This course covers principles of electronics: charge, voltage, resistance, current, and power; Ohm’s Law; Kirchhoff’s voltage and current laws; RC and LC circuits; periodic functions, average and RMS measurements; transformers, electrical measurement instruments. The laboratory provides hands-on experience with devices and circuits discussed in the classroom.
Prerequisite: (PHYS 2426, MATH 2414 and 3315).
May be taken concurrently.
Co-requisite: SMTE 0099.
TCCNS: ENGR 2305

ENGR 3315  Fluid Mechanics
3 Semester Credit Hours (3 Lecture Hours)
Principles of fluid mechanics covering fluid properties, fluid statics, dynamics, and kinematics, conservation of energy and momentum incompressible, laminar and turbulent flow. Similarity and dimensional analysis, and viscous flow. Prerequisite or
Prerequisite: (PHYS 2425 and MATH 2414).

ENGR 3320  Strength of Materials
3 Semester Credit Hours (3 Lecture Hours)
Concepts in strength of materials, stress, strain; deformation under load, direct, shear, and combined stresses; stress concentrations, bending stresses and torsional shear stresses, deflection in beams and shafts; columns, and pressure vessels.
Prerequisite: ENGR 2325 and 3322 or ENGR 2322.

ENGR 3322  Materials Science
3 Semester Credit Hours (3 Lecture Hours)
Structure and properties of metallic and nonmetallic materials; microstructure, mechanical testing, phase diagrams, heat treatment, testing, ceramics, polymers, composites, construction materials, failure analysis, nondestructive evaluation, corrosion and thermal properties of materials.
Prerequisite: (CHEM 1411) and (PHYS 2425).
Co-requisite: SMTE 0099.

ENGR 3350  Manufacturing Processes
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to metal and non-metallic manufacturing processes; casting, forging, rolling, extrusion, sheet metal forming, cutting tools turning and milling operations, abrasive machining, welding and joining, powder compaction, molding, forming of plastics, surface treatment, human factors and safety.
Prerequisite: ENGR 1312 and 3322.
Co-requisite: SMTE 0099.
ENGR 4240 Project Management
2 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Foundations of engineering economy, cash flow and equivalence, and project justification. Introduction to project management, planning, scheduling, and control, use of project management software, GANTT charts, PERT charts, and critical path. Students prepare proposals, including specifications, timelines, schedule, and budget, for projects to be implemented in ENGR 4370 - Capstone Projects. This course should be taken the semester preceding ENGR 4370 - Capstone Projects.
Prerequisite: (ENGR 4240) and (MEEN 3330) or (EEEN 3330) or (EEEN 3310) and (EEEN 3350).
Co-requisite: SMTE 0099.

ENGR 4350 Machine Vision and Image Processing Applications
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to automated vision systems and components, camera models, testing and measurement, and fundamentals of image processing. Topics include image analysis and processing in binary, gray scale and color images in spatial- and frequency-domain. Texture and shape analysis, hyperspectral imaging, other transforms, and filters are discussed and applied.
Prerequisite: (COSC 1330 or 1435) and ENGR 2460 and MATH 2414.

ENGR 4370 Capstone Projects
3 Semester Credit Hours (1 Lecture Hour, 5 Lab Hours)
This course allows students to employ the knowledge attained in other courses to implement (including building, testing, and documenting) an approved project, within budget and on schedule. Course requirements include a written report and oral presentations.
Prerequisite: (ENGR 4240) and (MEEN 4360) and (MEEN 4365) or (EEEN 4330, CEEN 4304 or IEEEN 4310).
May be taken concurrently.
Co-requisite: SMTE 0099.

ENGR 4390 Special Topics in Engineering
1-3 Semester Credit Hours (1 Lecture Hour)
Subject material variable. May be repeated for credit when topics are different.

ENGR 4420 Engineering Lab Measurements
4 Semester Credit Hours (2 Lecture Hours, 4 Lab Hours)
Principles of physical measurements; standards, calibration, error estimation; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. The purpose of this course is for students to gain proficiency in designing, assembling, and operating an experiment; and analyzing and presenting experimental results. This encompasses skills such as an understanding control and data acquisition electronics, operation and limitation of modern sensors, calibration and error analysis, assessing applicability of theory and the impact of secondary experimental variables, and writing and presenting reports and analysis.
Prerequisite: ENGR 2460.
Co-requisite: SMTE 0099.

Mechanical Engineering Courses
MEEN 3320 Solid Mechanics Laboratory
2 Semester Credit Hours (4 Lab Hours)
Prerequisite: MEEN 3330 or 3330.
May be taken concurrently.
Co-requisite: SMTE 0099.

MEEN 3310 Engineering Analysis for Mechanical Engineering
3 Semester Credit Hours (3 Lecture Hours)
Applications of fundamentals of linear algebra, vector analysis, numerical methods, computer programming, and probability and statistics for mechanical engineering. (Cross-listed with MATH 3310 - Mathematical Analysis for Mechanical Engineering)
Prerequisite: MATH 3315.

MEEN 3330 Design of Machine Elements
3 Semester Credit Hours (3 Lecture Hours)
Stress analysis of deformable bodies and mechanical elements; stress transformation; combined loading; failure modes; material failure theories; fracture and fatigue; deflections and instabilities; thick cylinders; curved beams; design of structural/mechanical members; design processes for shafts, bearings, springs, fasteners, and mechanical joints.
Prerequisite: ENGR 3220.

MEEN 3335 Introduction to Unmanned Aircraft Systems
3 Semester Credit Hours (3 Lecture Hours)
Overview of unmanned aerial systems: history, platforms, operations, command and control, sensor systems, payloads, regulations, policy. Current developments in unmanned aerial systems.

MEEN 3340 Solid Modeling and Finite Elements
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Use of computer aided design and solid modeling tools in engineering design, and analysis, and manufacturing including: solid modeling, stress, flow, and heat transfer analysis using finite element methods.
Prerequisite: MEEN 3310 and ENGR 3320.

MEEN 3345 Heat Transfer
3 Semester Credit Hours (3 Lecture Hours)
Steady and unsteady conduction in one- and two-dimensions; forced convection, internal and external flows; heat exchangers; introduction to radiation; elements of thermal system design.
Prerequisite: (ENGR 3316 and 3315).

MEEN 3325 Energy Conversion
3 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Natural resources: fuels, solar, wind, geothermal, wave, and ocean thermal; thermodynamics of power cycles and processes: Rankine, Brayton, gas turbine, IC engines, fuel cell; nuclear power; direct energy conversion: photovoltaic, thermoelectric, thermionic, magnetohydrodynamics; non-reactive processes: wind, wave/tidal, ocean thermal energy, solar thermal; concept of life cycle assessments of carbon foot print. Student teamwork of a class term paper is expected.
Prerequisite: ENGR 3316.

MEEN 3330 Introduction to Plasma Engineering and Applications
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Physical, electrical, chemical properties of plasmas; differences in properties of thermal and non-thermal plasmas, direct and alternating current plasma sources, inductive and capacitive coupled plasma sources, diagnostics and applications of plasmas.
Prerequisite: ENGR 2322 and (ENGR 2460 or PHYS 2426).
Co-requisite: SMTE 0099.

MEEN 3331 Compressible Flow and Introduction to Jet Propulsion
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: (ENGR 3315 or ENTC 3306) and (ENGR 3316 or ENTC 3320).
MEEN 4335 Introduction to Aircraft Aerodynamics and Performance
3 Semester Credit Hours (3 Lecture Hours)
Forces on aircraft; standard atmosphere; steady-state cruise, climb, and turn performance; performance optimization; introduction to aircraft longitudinal stability.
Prerequisite: ENGR 2326 and COSC 1330.

MEEN 4336 Introduction to UAS for Agricultural Applications
3 Semester Credit Hours (3 Lecture Hours)
Provides the foundations to acquire remote sensing data using Unmanned Aircraft Systems (UAS) and to interpret, process, and apply remotely sensed data for agricultural applications. Principles of remote sensing, digital image processing, and geospatial analysis will be covered. Emphasis will be on the use of UAS remote sensing technology for various disciplines in agricultural sciences including plant breeding, plant physiology, crop scouting, pest management and entomology. Offered Spring.
Prerequisite: MEEN 3335.

MEEN 4345 Sensors and Systems
3 Semester Credit Hours (3 Lecture Hours)
This course covers sensors and sensing systems where sensing modalities, analysis of sensed data, data transmission and reception are discussed. Filtering and estimation in sensing systems are considered. The course covers sensors at component level to develop subsystems and more complex sensing systems that monitor physical phenomena in laboratory or marine/terrestrial environments. Other topics include multidimensional signal and image processing, object tracking, multisensory data fusion, applications in environmental monitoring, remote sensing and surveillance.
Prerequisite: MATH 2414, PHYS 2426 and ENGR 2460.

MEEN 4350 Controls, Automation and Robotics
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Automation in a manufacturing and assembly setting for ocean and marine environments, material handling systems, remote guided vehicles, automated storage and retrieval systems, computer numerical machine tools, robotics.
Prerequisite: MATH 3315, ENGR 2326 and 2460.
Co-requisite: SMTE 0099.

MEEN 4351 Dynamical Systems Analysis and Modeling
3 Semester Credit Hours (3 Lecture Hours)
Modeling and analysis of systems that have a time-based response. Transient as well as steady state solutions for SDOF and MDOF systems and computational solutions including time response, Bode plots, phase plots, and other plots relevant to the system. Linear and non-linear modeling of systems will be studied. Modeling of mechanical systems (vibrations), electrical circuits, and thermal/fluid systems will be covered.
Prerequisite: COSC 1330, ENGR 2460 and MEEN 3345.

MEEN 4355 Marine Fabrication
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Advanced topics in manufacturing and fabrication related to ships and offshore platforms and construction.
Prerequisite: ENGR 3350.
Co-requisite: SMTE 0099.

MEEN 4356 Micro-Electronical & Mechanical Manufacturing
3 Semester Credit Hours (3 Lecture Hours)
Basic principles and techniques in microelectronics manufacturing (semiconductor manufacturing and micro-electrical mechanical systems (MEMS). Emphasis will on process descriptions, terminology, equipment requirements, and process controls. Basic micro-fabrication including semiconductor and MEMS physics and process chemistry will be combined with control schemes to arrive at overall systems descriptions.

MEEN 4360 Thermal Systems Design
3 Semester Credit Hours (3 Lecture Hours)
Analysis, management and cost, optimal design, and computer simulation of thermal systems and components; Applications in fluid flow and heat transfer, pumps, turbines and heat exchangers. Selected course topics are assigned as projects.
Prerequisite: MEEN 3345.

MEEN 4365 Mechanical Systems Design
3 Semester Credit Hours (3 Lecture Hours)
Analysis, management and cost, optimal design, and computer simulation of mechanical systems and components; machine elements, and stress analysis. Selected course topics are assigned as projects.
Prerequisite: (MEEN 3330 and ENGR 3350).

MEEN 4375 Fuel Cells
3 Semester Credit Hours (3 Lecture Hours)
Students will acquire an understanding of thermodynamics, transport phenomena and reaction fundamentals that are required to understand the processes and phenomena that pose limits on fuel cell performance.
Prerequisite: ENGR 3316, MEEN 3345 and CHEM 1411.

MEEN 4380 Renewable Energy
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Renewable and alternative energy sources and fuels; modern energy conversion devices, such as offshore wind farms, marine current turbines, fuel cells, photovoltaic cells, and micro-power turbines. Cost and environmental analysis of renewable sources. Installation, design characteristics, operational performance, and maintenance of motors, turbines, pumps and compressors. Introduction to global energy concerns; fossil and nuclear fuels; energy consumption analysis; energy management and conservation techniques.
Prerequisite: ENGR 3316, 2460 and MEEN 4325.
Co-requisite: SMTE 0099.

MEEN 4385 Offshore Energy Management
3 Semester Credit Hours (3 Lecture Hours)
Topics related to the design and energy management of ships and offshore platforms will be covered. Such topics may include oil and gas exploration, wind and marine energy systems, and environmental protection.
Prerequisite: MEEN 3345.

MEEN 4390 Introduction to Computational Fluid Dynamics
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to numerical, computational, modeling and simulation of thermo-fluid systems. Applications related to ships and offshore platforms and structures will be presented.
Prerequisite: MEEN 3345.

MEEN 4395 Offshore Water Exploration and Desalination Systems
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Advanced and future applications of sea floor mapping, under-water acoustics and GIS for fresh water exploration and mining. Renewable energy driven coastal, near-shore, and offshore desalination systems.
Prerequisite: ENGR 3316.
Autonomous Mobility Certificate

Program Description

Advances in autonomous mobility will increase the efficiency of the movement of people and products, whether on the road or in the factory. The Certificate in Autonomous Mobility is designed to provide students with an in-depth introduction to autonomous mobility from a human factors and operations standpoint. The certificate program will address the issues of human-machine interaction with an emphasis on autonomous systems, basic transportation concepts, and the management of processes involving mobility and transportation. The Capstone Projects course will include case studies of autonomous mobility in urban environments, such as working with Corpus Christi Regional Transportation Authority on the feasibility of autonomous bus transport on campus and within the region. Students in the TAMU-CC Industrial Engineering Bachelor of Science (BS-IEEN) program will be able to complete the Autonomous Mobility Certificate while completing their BS degrees by taking the required Capstone Project course ENGR 4370 and the three specific courses listed below as the three technical elective courses (9 hours) required in the BS-IEEN program. All students admitted into the Autonomous Mobility Certificate Program must meet the undergraduate admission requirements for TAMU-CC and must satisfy all prerequisites for courses in the certificate program. Transfer credit for some required courses may be considered. Students are expected to meet all other academic standards. Students must apply for the certificate and complete a Certificate Plan approved by the Director of the School of Engineering and Computing Sciences or a designee.

Coastal Resilience Certificate

Program Description

The Certificate in Coastal Resilience is designed to provide students with an in-depth introduction to the effects of the coastal environment on buildings and infrastructure. The certificate program will build on lessons learned, including examples of two different types of damages that occurred during Hurricane Harvey in 2017: wind damages experienced by Coastal Bend area communities and flood damages experienced by Houston area communities. The courses in the certificate program will address topics including structural resistance to wind loading, hydraulics and hydrology in the context of water retention, and remote sensing. The Capstone Projects course will include case studies aimed at encouraging students to explore innovative solutions to the challenges encountered by coastal communities under extreme weather conditions. Students in the TAMU-CC Civil Engineering Bachelor of Science (BS-CEEN) program will be able to complete the Coastal Resilience Certificate while completing their BS degrees by taking the required Capstone Project course ENGR 4370 and the three specific courses listed below as the three technical elective courses (9 hours) required in the BS-CEEN program. All students admitted into the Coastal Resilience Certificate Program must meet the undergraduate admission requirements for TAMU-CC and must satisfy all prerequisites for courses in the certificate program. Transfer credit for some required courses may be considered. Students are expected to meet all other academic standards. Students must apply for the certificate and complete a Certificate Plan approved by the Director of the School of Engineering and Computing Sciences or a designee.

Unmanned Aircraft Systems Applications, Certificate

Program Description
The Certificate in Unmanned Aircraft Systems Applications is designed to provide students with a basic background in the technologies and applications of unmanned aircraft systems that will prepare them to work in various fields related to unmanned aircraft. Candidates are required to complete 16 credit hours, including 10 hours of required courses and 6 hours chosen from a list of designated electives. All students admitted into the UAS certificate program must meet the undergraduate admission requirements for TAMU-CC and must satisfy all prerequisites for courses in the certificate program. Students working toward an undergraduate degree in engineering, computer science, or geospatial information science may obtain this certificate while completing their degrees, but this may require completing more credit hours than those required for the undergraduate degree. Transfer credit for some required courses may be considered, as may credit for previous experience. Students are expected to meet all other academic standards. Students must apply for the certificate and complete a Certificate Plan approved by the Director of the School of Engineering and Computing Sciences or a designee.

Course Sequencing
Certificate Coordinator: Dr. David Bridges

Students should take the courses in the following sequence to complete in the most timely manner:

First Year
Fall
MEEN 3335 Introduction to Unmanned Aircraft Systems 3
COSC 3335 Programming for Unmanned Aircraft Systems 3

Hours 6
Spring
Elective 1

Hours 3

Second Year
Fall
GISC 4431 Remote Sensing 4

Hours 4
Spring
Elective 2

Hours 3

Total Hours 16

Note: Nothing prevents a student from taking elective courses whenever they are offered, in semesters other than the ones listed above.

Courses
MEEN 3230 Solid Mechanics Laboratory
2 Semester Credit Hours (4 Lab Hours)
Prerequisite: MEEN 3330 or 3330*.
* May be taken concurrently.
Co-requisite: SMTE 0099.

MEEN 3310 Engineering Analysis for Mechanical Engineering
3 Semester Credit Hours (3 Lecture Hours)
Applications of fundamentals of linear algebra, vector analysis, numerical methods, computer programming, and probability and statistics for mechanical engineering. (Cross-listed with MATH 3310 - Mathematical Analysis for Mechanical Engineering)
Prerequisite: MATH 3315.

MEEN 3330 Design of Machine Elements
3 Semester Credit Hours (3 Lecture Hours)
Stress analysis of deforming bodies and mechanical elements; stress transformation; combined loading; failure modes; material failure theories; fracture and fatigue; deflections and instabilities; thick cylinders; curved beams; design of structural/mechanical members; design processes for shafts, bearings, springs, fasteners, and mechanical joints.
Prerequisite: ENGR 3320.
MEEN 3335 Introduction to Unmanned Aircraft Systems
3 Semester Credit Hours (3 Lecture Hours)
Overview of unmanned aerial systems: history, platforms, operations, command and control, sensor systems, payloads, regulations, policy. Current developments in unmanned aerial systems.

MEEN 3340 Solid Modeling and Finite Elements
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Use of computer aided design and solid modeling tools in engineering design, and analysis, and manufacturing including: solid modeling, stress, flow, and heat transfer analysis using finite element methods.
Prerequisite: MEEN 3310 and ENGR 3320.

MEEN 3345 Heat Transfer
3 Semester Credit Hours (3 Lecture Hours)
Steady and unsteady conduction in one- and two-dimensions; forced convection, internal and external flows; heat exchangers; introduction to radiation; elements of thermal system design.
Prerequisite: (ENGR 3316 and 3315).

MEEN 4325 Energy Conversion
3 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Natural resources: fuels, solar, wind, geothermal, wave, and ocean thermal; thermodynamics of power cycles and processes: Rankine, Brayton, gas turbine, IC engines, fuel cell; nuclear power; direct energy conversion; photovoltaic, thermoelectric, thermionic, magnetohydrodynamics; non-reactive processes: wind, wave/tidal, ocean thermal energy, solar thermal; concept of life cycle assessments of carbon foot print. Student teamwork of a class term paper is expected.
Prerequisite: ENGR 3316.

MEEN 4330 Introduction to Plasma Engineering and Applications
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Physical, electrical, chemical properties of plasmas; differences in properties of thermal and non-thermal plasmas, direct and alternating current plasma sources, inductive and capacitive coupled plasma sources, diagnostics and applications of plasmas.
Prerequisite: ENGR 2322 and (ENGR 2460 or PHYS 2426).
Co-requisite: SMTE 0099.

MEEN 4331 Compressible Flow and Introduction to Jet Propulsion
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: (ENGR 3315 or ENTC 3306) and (ENGR 3316 or ENTC 3320).

MEEN 4335 Introduction to Aircraft Aerodynamics and Performance
3 Semester Credit Hours (3 Lecture Hours)
Forces on aircraft; standard atmosphere; steady-state cruise, climb, and turn performance; performance optimization; introduction to aircraft longitudinal stability.
Prerequisite: ENGR 2326 and COSC 1330.

MEEN 4336 Introduction to UAS for Agricultural Applications
3 Semester Credit Hours (3 Lecture Hours)
Provides the foundations to acquire remote sensing data using Unmanned Aircraft Systems (UAS) and to interpret, process, and apply remotely sensed data for agricultural applications. Principles of remote sensing, digital image processing, and geospatial analysis will be covered. Emphasis will be on the use of UAS remote sensing technology for various disciplines in agricultural sciences including plant breeding, plant physiology, crop scouting, pest management and entomology. Offered Spring.
Prerequisite: MEEN 3335.

MEEN 4345 Sensors and Systems
3 Semester Credit Hours (3 Lecture Hours)
This course covers sensors and sensing systems where sensing modalities, analysis of sensed data, data transmission and reception are discussed. Filtering and estimation in sensing systems are considered. The course covers sensors at component level to develop subsystems and more complex sensing systems that monitor physical phenomena in laboratory or marine/terrestrial environments. Other topics include multidimensional signal and image processing, object tracking, multisensory data fusion, applications in environmental monitoring, remote sensing and surveillance.
Prerequisite: MATH 2414, PHYS 2426 and ENGR 2460.

MEEN 4350 Controls, Automation and Robotics
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Automation in a manufacturing and assembly setting for ocean and marine environments, material handling systems, remote guided vehicles, automated storage and retrieval systems, computer numerical machine tools, robotics.
Prerequisite: MATH 3315, ENGR 2326 and 2460.
Co-requisite: SMTE 0099.

MEEN 4351 Dynamical Systems Analysis and Modeling
3 Semester Credit Hours (3 Lecture Hours)
Modeling and analysis of systems that have a time-based response. Transient as well as steady state solutions for SDOF and MDOF systems and computational solutions including time response, Bode plots, phase plots, and other plots relevant to the system. Linear and non-linear modeling of systems will be studied. Modeling of mechanical systems (vibrations), electrical circuits, and thermal/fluuid systems will be covered.
Prerequisite: COSC 1330, ENGR 2460 and MEEN 3345.

MEEN 4355 Marine Fabrication
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Advanced topics in manufacturing and fabrication related to ships and offshore platforms and construction.
Prerequisite: ENGR 3350.
Co-requisite: SMTE 0099.

MEEN 4356 Micro-Electronical & Mechanical Manufacturing
3 Semester Credit Hours (3 Lecture Hours)
Basic principles and techniques in microelectronics manufacturing (semiconductor manufacturing and micro-electrical mechanical systems (MEMS). Emphasis will on process descriptions, terminology, equipment requirements, and process controls. Basic micro-fabrication including semiconductor and MEMS physics and process chemistry will be combined with control schemes to arrive at overall systems descriptions.

MEEN 4360 Thermal Systems Design
3 Semester Credit Hours (3 Lecture Hours)
Analysis, management and cost, optimal design, and computer simulation of thermal systems and components; Applications in fluid flow and heat transfer, pumps, turbines and heat exchangers. Selected course topics are assigned as projects.
Prerequisite: MEEN 3345.

MEEN 4365 Mechanical Systems Design
3 Semester Credit Hours (3 Lecture Hours)
Analysis, management and cost, optimal design, and computer simulation of mechanical systems and components; machine elements, and stress analysis. Selected course topics are assigned as projects.
Prerequisite: (MEEN 3330 and ENGR 3350).
MEEN 4375 Fuel Cells
3 Semester Credit Hours (3 Lecture Hours)
Students will acquire an understanding of thermodynamics, transport phenomena and reaction fundamentals that are required to understand the processes and phenomena that pose limits on fuel cell performance.
Prerequisite: ENGR 3316, MEEN 3345 and CHEM 1411.

MEEN 4380 Renewable Energy
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Renewable and alternative energy sources and fuels; modern energy conversion devices, such as offshore wind farms, marine current turbines, fuel cells, photovoltaic cells, and micro-power turbines. Cost and environmental analysis of renewable sources. Installation, design characteristics, operational performance, and maintenance of motors, turbines, pumps and compressors. Introduction to global energy concerns; fossil and nuclear fuels; energy consumption analysis; energy management and conservation techniques.
Prerequisite: ENGR 3316, 2460 and MEEN 4325.
Co-requisite: SMTE 0099.

MEEN 4385 Offshore Energy Management
3 Semester Credit Hours (3 Lecture Hours)
Topics related to the design and energy management of ships and offshore platforms will be covered. Such topics may include oil and gas exploration, wind and marine energy systems, and environmental protection.
Prerequisite: MEEN 3345.

MEEN 4390 Introduction to Computational Fluid Dynamics
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to numerical, computational, modeling and simulation of thermo-fluid systems. Applications related to ships and offshore platforms and structures will be presented.
Prerequisite: MEEN 3345.

MEEN 4395 Offshore Water Exploration and Desalination Systems
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Advanced and future applications of sea floor mapping, under-water acoustics and GIS for fresh water exploration and mining. Renewable energy driven coastal, near-shore, and offshore desalination systems.
Prerequisite: ENGR 3316.

MEEN 4396 Directed Independent Study
3 Semester Credit Hours
Requires a formal proposal of study to be completed in advance of registration, approval of supervising faculty and chairperson.

Post-Baccalaureate Certificates
- Geographic Information Systems, Post-Baccalaureate Certificate (p. 189)
- Geomatics, Post-Baccalaureate Certificate (p. 192)

Geographic Information Systems, Post-Baccalaureate Certificate

Program Description
The Post-Baccalaureate Certificate in Geographic Information Systems (GIS) is designed for students who hold a bachelor’s degree or master’s degree in fields other than GIS and desire to continue their education in Geographic Information Systems. Candidates for the certificate are required to complete 32 or 33 credit hours of GIS-related courses; 20 of these credit hours must be taken at Texas A&M University-Corpus Christi. Students are required to meet all other academic standards. The Coordinator of the Geographic Information Science program or a designee may waive certain courses if a student has previously completed appropriate GIS courses. Students must apply for the certificate and complete a Certificate Plan approved by the Coordinator of the Geographic Information science program or a designee.

Courses

GISC 1301 Physical Geography
3 Semester Credit Hours (3 Lecture Hours)
The goal of this course is to encourage you to think geographically, examining the interactions between physical systems and human activities. Introduction to topics covered include elements of Physical Geography (studies of atmosphere, ocean and land surface environments), Geographic Information Systems (computer systems that capture, analyze, and display of geographic information), and human environmental interactions. Cross listed with GEOG 1301.

TCCNS: GEOG 1301

GISC 1336 Digital Drafting and Design
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
An introduction to graphic and drafting principles and practices in surveying and mapping science. This course includes the development of the basic drafting skills needed to produce surveying plats and graphical presentations. The elements of descriptive geometry are addressed. A major component of the course is an introduction to the fundamentals of computer-aided drafting and design (CADD). Spring.

GISC 1470 Geospatial Systems I
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Introduction to geographic information systems (GIS) and its theoretical foundations. Topics covered include vector and raster data models, acquisition and manipulation of data, cartography, current topics, data quality, and basic spatial analysis. Principles and uses of GIS software also covered. Fall and Spring.

GISC 2250 Field Camp I
2 Semester Credit Hours (6 Lab Hours)
A one-week field camp with intensive field data collection and computations. Traversing between control points. Digital contour data and leveling control. Detail spatial data by total station. Construction set out using total station and steel band. Taken during the sophomore or junior year. Spring.
Prerequisite: GISC 2470.

GISC 2301 Geospatial Systems II
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
An intermediate level course in the concepts and applications of geographic information systems (GIS). Topics covered include spatial database design and management, raster analysis, terrain mapping, analysis, and applications. Spring.
Prerequisite: (GISC 1470).

GISC 2438 Geospatial Software Systems I
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Introduction to the design and development of GIS software to solve spatial problems. Topics covered include programming basics, design and implementation common tasks in GIS applications. Fall.
Prerequisite: GISC 1470 and COSC 1435 or COSC 1330.

GISC 2470 Geospatial Plane Measurement I
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Historical introduction to field measurement and mapping; distance measurement using electronic distance meters; calibration and reduction. Leveling instruments; principles, construction, testing and adjustment; ancillary equipment. Optical and electronic theodolites. Traverse computations and adjustment. Coordinate systems. Map projections. Fall.
Prerequisite: MATH 1316 or 2413.

GISC 3300 Geospatial Mathematical Techniques
3 Semester Credit Hours (3 Lecture Hours)
Characteristics of geographic/spatial information; overview of relevant sections of numbers, algebra and geometry, plane and spherical trigonometry, matrices, determinants and vectors, curves and surfaces, integral and differential calculus, partial derivatives, with an emphasis on geospatial applications. Concepts of geospatial coordinate systems and geospatial coordinate transformations; overview of spatial statistics and best-fit solutions with geospatial applications.
Prerequisite: MATH 2413 and 3342.

GISC 3325 Geodetic Science
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470.

GISC 3412 Geospatial Plane Measurement II
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Principles and reduction of observations and errors in spatial measurement. Techniques of horizontal and vertical angle measurement for precise positioning. Trigonometric heighting and vertical staff tacheometry. Setting out of structures. Design and computation of horizontal and vertical curves. Spring.
Prerequisite: (GISC 2470 and 1336).

GISC 3420 Geospatial Software Systems II
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Advanced programming course focusing on the design and implementation of GIS scripts and GIS web applications. Topics covered include GIS web applications, web mashups, GIS scripts, GIS tool creation, and advanced user interface design and implementation. Spring.
Prerequisite: GISC 2438.
GISC 3421 Visualization for GIS
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Basic elements of thematic cartography, cartographic theory, and cartographic projections. Integration of cartographic principles with GIS visualization. Principles of map design with GIS data. Spring.
Prerequisite: GISC 2301.

GISC 4180 Geospatial Systems Internship
1 Semester Credit Hour (1 Lecture Hour)
Internship education requires work with approved Geospatial Systems related industry employer. Students provide weekly written reports and final presentation to program at the end of internship. Must have completed 60 semester hours before attempting. Fall, Spring, and Summer.

GISC 4305 Legal Aspects of Spatial Information
3 Semester Credit Hours (3 Lecture Hours)
Legal ownership of spatial data and information collected in the public sector. Public access to large digital databases. Copyright law as applied to spatial data. Legal issues related to property boundaries, statutory boundaries, voter district boundaries, and jurisdictional boundaries. Government fees and charges for access to spatial data. Social and economic value of spatial data. Spring.
Prerequisite: GISC 2470.

GISC 4315 Satellite Positioning
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470 and MATH 2413.

GISC 4318 Cadastral Systems
3 Semester Credit Hours (3 Lecture Hours)
Land ownership recording systems used in Texas and U.S. Investigation and research for artificial and natural boundaries. Title searches at the county courthouse, title plants, and other sources for cadastral research. Riparian and littoral boundaries. Boundary marking and preparation of cadastral plans. Metes and bounds descriptions. Writing field notes. Urban and rural cadastral issues. Use of coordinate systems in cadastral mapping. Fall.
Prerequisite: GISC 2470.

GISC 4320 Hydrography
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Introduction to offshore and inshore hydrographic mapping. Tidal datums and their computation. Review of hydrographic and nautical charts. Electronic position finding and bathymetric data collection. Echo sounding, side scan sonar. Seafloor mapping and underwater locating. Beach (combined land and hydrographic) mapping. Spring even years.
Prerequisite: GISC 2470 and MATH 2413.

GISC 4326 Geomatics Professional Practice
3 Semester Credit Hours (3 Lecture Hours)
An intensive one-week summer course presented by practicing geomatics professionals covering many of the aspects of operating a professional surveying practice in the State of Texas. Topics cover surveyor responsibility and liability, the surveyor in court, standards of practice, surveying mathematics, Texas coordinate system, celestial observations, and project control.
Prerequisite: GISC 2250.

GISC 4335 Geospatial Systems III
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Advanced spatial analysis and modeling in GIS. Topics covered include exploratory analysis of spatial data, network analysis, spatial point patterns, area objects and spatial autocorrelation, and spatial interpolation. Also covers new approaches to spatial analysis. Fall.
Prerequisite: GISC 2301 and MATH 3342.

GISC 4340 Geospatial Computations and Adjustment
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: GISC 2470, MATH 3342 and GISC 3300.

GISC 4350 Field Camp II
3 Semester Credit Hours (6 Lab Hours)
A one-week field camp undertaking projects in cadastral, engineering, hydrographic, and geodetic positioning. Reduction of digital field data to produce final plans and reports. Taken during the senior year. Spring.
Prerequisite: GISC 3412, 4318 and 2250.

GISC 4351 Geospatial Systems Project
3 Semester Credit Hours
This course allows students to employ knowledge attained in other courses to create a project to spatially analyze information of interest to you and your field of study. Students will either undertake a GIS project to manage, analyze, and visualize spatial data, or a survey project in cadastral, topographic, engineering, hydrographic, or geodetic positioning survey. Spring. Students who enroll in the project course will need permission from the instructor.
Prerequisite: GISC 4350 or (GISC 3421 and 4335).

GISC 4371 History of Land Ownership
3 Semester Credit Hours (3 Lecture Hours)
This course prepares students by providing proper knowledge of how land transferred throughout history and techniques for researching land ownership in the present. Students receive an overview of legal aspects and other topics relative to land issues applicable for Land Surveyors, Civil Engineers, and GIS professionals, among others. Spring.
Prerequisite: GISC 3412.

GISC 4431 Remote Sensing and Photogrammetry
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Provides the foundations to interpret, process, and apply remotely sensed data acquired by satellites and sub-orbital platforms (aircraft, UAVs) for mapping and analysis of our natural and built environment. Principles of electromagnetic energy-matter interaction, remote sensing systems and data characteristics, digital image processing, and informaton extraction methods will be covered. Included is treatment of: aerial photogrammetry; multispectral, thermal, and hyperspectral sensing; earth observation satellites; radar and lidar; emergent topics. Emphasis will be on their use for geospatial and environmental applications. Fall.
Prerequisite: (PHYS 2425, MATH 3342 and GISC 3300) or (MEEN 3310 and PHYS 2425).

GISC 4590 Selected Topics
1-5 Semester Credit Hours (1-5 Lecture Hours)
May be repeated for credit depending on topic. Variable content.

GISC 4596 Directed Independent Study
1-5 Semester Credit Hours
See College description. Offered on request. May be repeated for credit.
GISC 4690 Co-operative Education
1 Semester Credit Hour (1 Lecture Hour)
Co-op education allows students to take time off their full-time studies to gain valuable experience-based learning with employers willing to put on students for a semester (14 weeks), six months, or over the summer. The Co-op program allows students to maintain their full-time status as a student (continue health insurance coverage with parents, not effect student loan repayment, access to college activities, etc.) while undertaking work in their field of interest. The Co-op program is a partnership between the employer, the student, and the university.

Geomatics, Post-Baccalaureate Certificate

Program Descriptions
The Post-Baccalaureate Certificate in Geomatics is designed for students who hold a bachelor's degree or master's degree in fields other than Geomatics or Geographic Information Science and desire to continue their education to prepare for the Texas Board of Professional Land Surveying examination to become a Registered Professional Land Surveyor in Texas. Candidates for the certificate are required to complete 33 credit hours of surveying related courses; 20 of these credit hours must be taken at Texas A&M University-Corpus Christi. The Coordinator of the Geographic Information Science program or a designee may waive certain courses if a student has previously completed appropriate surveying courses. Students must apply for the certificate and complete a Certificate Plan approved by the Coordinator of the Geographic Information Science program or a designee.

Total Hours 33

It is assumed that the student has completed all prerequisites and corequisites for the required courses.

Note:
Students must earn at least a 2.5 overall grade point average in all GISC courses.

Course Sequencing
Certificate Coordinator: Dr. Hongzhi Song
Students should take the courses in the following sequence to complete in the most timely manner:

First Year
Fall
- GISC 2470 Geospatial Plane Measurement I 4 Hours
- GISC 3300 or MATH 3342 (Prerequisites for GISC 4340)
  or Applied Probability and Statistics 3 Hours
- GISC 1470 Geospatial Systems I 4 Hours

Total Hours 11

Spring
- GISC 1336 Digital Drafting and Design 3 Hours
- GISC 2250 Field Camp I (Prerequisite for GISC 4350) 2 Hours
- GISC 3412 Geospatial Plane Measurement II 4 Hours

Total Hours 9

Second Year
Fall
- GISC 3325 Geodetic Science 3 Hours
- GISC 4315 Satellite Positioning 3 Hours
- GISC 4318 Cadastral Systems 3 Hours

Total Hours 9

Spring
- GISC 4350 Field Camp II 3 Hours
- GISC 4340 Geospatial Computations and Adjustment 3 Hours
- GISC 4371 History of Land Ownership 3 Hours

Total Hours 9

Total Hours 38

Courses
GISC 1301 Physical Geography
3 Semester Credit Hours (3 Lecture Hours)
The goal of this course is to encourage you to think geographically, examining the interactions between physical systems and human activities. Introduction to topics covered include elements of Physical Geography (studies of atmosphere, ocean and land surface environments), Geographic Information Systems (computer systems that capture, analysis, and display of geographic information), and human environmental interactions. Cross listed with GEOG 1301.
TCCNS: GEOG 1301
GISC 1336 Geospatial Mathematical Techniques
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Characteristics of geographic/spatial information; overview of relevant sections of numbers, algebra and geometry, plane and spherical trigonometry, matrices, determinants and vectors, curves and surfaces, integral and differential calculus, partial derivatives, with an emphasis on geospatial applications. Concepts of geospatial coordinate systems and geospatial coordinate transformations; overview of spatial statistics and best-fit solutions with geospatial applications.
Prerequisite: MATH 2413 and 3342.

GISC 3325 Geodetic Science
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470.

GISC 3412 Geospatial Plane Measurement II
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Principles and reduction of observations and errors in spatial measurement. Techniques of horizontal and vertical angle measurement for precise positioning. Trigonometric heighting and vertical staff tacheometry. Setting out of structures. Design and computation of horizontal and vertical curves. Spring.
Prerequisite: (GISC 2470 and 1336).

GISC 4180 Geospatial Systems Internship
1 Semester Credit Hour (1 Lecture Hour)
Internship education requires work with approved Geospatial Systems related industry employer. Students provide weekly written reports and final presentation to program at the end of internship. Must have completed 60 semester hours before attempting. Fall, Spring, and Summer.

GISC 4305 Legal Aspects of Spatial Information
3 Semester Credit Hours (3 Lecture Hours)
Legal ownership of spatial data and information collected in the public sector. Public access to large digital databases. Copyright law as applied to spatial data. Legal issues related to property boundaries, statutory boundaries, voter district boundaries, and jurisdictional boundaries. Government fees and charges for access to spatial data. Social and economic value of spatial data. Spring.
Prerequisite: GISC 2470.

GISC 4315 Satellite Positioning
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470 and MATH 2413.
GISC 4318  Cadastral Systems  
3 Semester Credit Hours (3 Lecture Hours)  
Land ownership recording systems used in Texas and U.S. Investigation and research for artificial and natural boundaries. Title searches at the county courthouse, title plants, and other sources for cadastral research. Riparian and littoral boundaries. Boundary marking and preparation of cadastral plans. Metes and bounds descriptions. Writing field notes. Urban and rural cadastral issues. Use of coordinate systems in cadastral mapping. Fall.  
Prerequisite: GISC 2470.  

GISC 4320  Hydrography  
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)  
Introduction to offshore and inshore hydrographic mapping. Tidal datums and their computation. Review of hydrographic and nautical charts. Electronic position finding and bathymetric data collection. Echo sounding, side scan sonar. Seafloor mapping and underwater locating. Beach (combined land and hydrographic) mapping. Spring even years.  
Prerequisite: GISC 2470 and MATH 2413.  

GISC 4326  Geomatics Professional Practice  
3 Semester Credit Hours (3 Lecture Hours)  
An intensive one-week summer course presented by practicing geomatics professionals covering many of the aspects of operating a professional surveying practice in the State of Texas. Topics cover surveyor responsibility and liability, the surveyor in court, standards of practice, surveying mathematics, Texas coordinate system, celestial observations, and project control.  
Prerequisite: GISC 2250.  

GISC 4335  Geospatial Systems III  
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)  
Advanced spatial analysis and modeling in GIS. Topics covered include exploratory analysis of spatial data, network analysis, spatial point patterns, area objects and spatial autocorrelation, and spatial interpolation. Also covers new approaches to spatial analysis. Fall.  
Prerequisite: GISC 2301 and MATH 3342.  

GISC 4340  Geospatial Computations and Adjustment  
3 Semester Credit Hours (3 Lecture Hours)  
Prerequisite: GISC 2470, MATH 3342 and GISC 3300.  

GISC 4350  Field Camp II  
3 Semester Credit Hours (6 Lab Hours)  
A one-week field camp undertaking projects in cadastral, engineering, hydrographic, and geodetic positioning. Reduction of digital field data to produce final plans and reports. Taken during the senior year. Spring.  
Prerequisite: GISC 3412, 4318 and 2250.  

GISC 4351  Geospatial Systems Project  
3 Semester Credit Hours  
This course allows students to employ knowledge attained in other courses to create a project to spatially analyze information of interest to you and your field of study. Students will either undertake a GIS project to manage, analyze, and visualize spatial data, or a survey project in cadastral, topographic, engineering, hydrographic, or geodetic positioning survey. Spring. Students who enroll in the project course will need permission from the instructor.  
Prerequisite: GISC 4350 or (GISC 3421 and 4335).  

GISC 4371  History of Land Ownership  
3 Semester Credit Hours (3 Lecture Hours)  
This course prepares students by providing proper knowledge of how land transferred throughout history and techniques for researching land ownership in the present. Students receive an overview of legal aspects and other topics relative to land issues applicable for Land Surveyors, Civil Engineers, and GIS professionals, among others. Spring.  
Prerequisite: GISC 3412.  

GISC 4431  Remote Sensing and Photogrammetry  
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)  
Provides the foundations to interpret, process, and apply remotely sensed data acquired by satellites and sub-orbital platforms (aircraft, UAVs) for mapping and analysis of our natural and built environment. Principles of electromagnetic energy-matter interaction, remote sensing systems and data characteristics, digital image processing, and information extraction methods will be covered. Included is treatment of: aerial photogrammetry; multispectral, thermal, and hyperspectral sensing; earth observation satellites; radar and lidar; emergent topics. Emphasis will be on their use for geospatial and environmental applications. Fall.  
Prerequisite: (PHYS 2425, MATH 3342 and GISC 3300) or (MEEN 3310 and PHYS 2425).  

GISC 4590  Selected Topics  
1-5 Semester Credit Hours (1-5 Lecture Hours)  
May be repeated for credit depending on topic. Variable content.  

GISC 4596  Directed Independent Study  
1-5 Semester Credit Hours  
See College description. Offered on request. May be repeated for credit.  

GISC 4690  Co-operative Education  
1 Semester Credit Hour (1 Lecture Hour)  
Co-op education allows students to take time off their full-time studies to gain valuable experience-based learning with employers willing to put on students for a semester (14 weeks), six months, or over the summer. The Co-op program allows students to maintain their full-time status as a student (continue health insurance coverage with parents, not effect student loan repayment, access to college activities, etc.) while undertaking work in their field of interest. The Co-op program is a partnership between the employer, the student, and the university.  

Fast Track Programs  
- Fast Track Computer Science, BS and Computer Science, MS (p. 194)  

Fast Track Computer Science, BS and Computer Science, MS  
Program Description  
The university allows the opportunity for high-achieving students to count a select number of graduate credits toward their undergraduate degree and thereby obtain a graduate degree at an accelerated pace. Students interested in the Fast Track in Computer Science must meet the following application criteria:  
- Currently seeking a BS in Computer Science at A&M-Corpus Christi.  
- Minimum of a 3.0 GPA in the last 60 SCH at the time of Fast Track application.  
- Classified as a Senior with successful completion of at least 90 SCH, including
Students accepted into the Fast Track program will be given permission to enroll in up to six hours of prescribed graduate courses during their last semester of undergraduate studies. The hours for these graduate courses will “double-count” toward both the undergraduate and graduate programs. The BS and MS degrees will be awarded sequentially (i.e., upon completion of each degree) and not simultaneously. Students will be allowed to continue enrollment in the graduate program upon successful completion of the undergraduate degree.

Admissions Requirements

Applicants must provide the following at the time of application:

- A completed application form. Application fees are waived for Fast Track applicants.
- Official transcripts of all college and university coursework.
- An essay (500-1000 words) discussing why you wish to get a Master’s degree and your areas of interest.
- Identify a faculty member willing to serve as their graduate advisor. Applicants will not be admitted to the program without a graduate advisor.

No criterion is weighted more heavily than any other criterion. Applications received or completed after the deadline for admission during one semester may be considered for admission in the following semester at the applicant’s request. Applicants will be notified of the outcome of their application by email.

Academic Preparation

A student entering the program is expected to have adequate preparation in computer science and mathematics from their undergraduate degree. For computer science, this preparation must include successful completion of coursework in data structures, a high level programming language, computer architecture, operating systems, and software engineering. In mathematics, students must have successfully completed course work in discrete mathematics, calculus, plus one additional junior level or higher mathematics course such as linear algebra, numerical analysis, or applied probability and statistics.

Fast Track Curriculum in the Senior Year

BS Computer Science students accepted in the Fast Track will have up to six hours of undergraduate elective credit replaced with six hours of graduate credit during the final semester of the senior year. A Fast Track student can choose from any of the classes in the MS Computer Science degree plan, as long as the prerequisites are met.

See the Graduate Catalog for a complete description of the degree requirements for the MS in Computer Science.

Courses

COSC 1315  Computer Literacy
3 Semester Credit Hours (3 Lecture Hours)
A balanced introduction to the use and application of computers in modern society involving both descriptive information and hands-on laboratory participation. Includes a discussion of the general principles of operation of a computer and a brief history of the development of computing. The use of a personal computer operating system, common application software, and simple computer programming concepts are introduced. Satisfies university computer literacy requirement.
TCCNS: COSC 1301

COSC 1320  C Programming
3 Semester Credit Hours (3 Lecture Hours)
Introduces the fundamental concepts of structured programming in the C language. Topics include data types; control structures; functions, structures, arrays, pointers, pointer arithmetic, unions, and files; the mechanics of running, testing, and debugging programs; introduction to programming; and introduction to the historical and social context of computing.
Prerequisite: (MATH 1314).

COSC 1330  Programming for Scientists, Engineers, and Mathematicians
3 Semester Credit Hours (3 Lecture Hours)
Introduction to computer programming for solving discipline specific problems using computers. Emphasis on the fundamentals of structured design, development, testing, implementation, and documentation. Includes coverage of language syntax, data and file structures, input/output devices, and disks/files.
TCCNS: ENGR 2304

COSC 1435  Introduction to Problem Solving with Computers I
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course introduces the fundamental concepts of problem solving and algorithms. A brief introduction to computers and the programming life cycle is covered. The C++ programming language is used to develop basic computer programs demonstrating data types, fundamental control structures, functions, and arrays. MATH 1314 or placement beyond MATH 1314. Offered Fall, Spring, Summer.
Prerequisite: MATH 1314.
TCCNS: COSC 1436

COSC 1436  Introduction to Problem Solving with Computers II
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course is a continuation of COSC 1435. An introduction to abstract data types and object-oriented programming is covered. Topics include basic searching and sorting algorithms, dynamic allocation, linked lists, inheritance, polymorphism, and recursion.
Prerequisite: COSC 1435.
TCCNS: COSC 1437

COSC 2325  Game Design
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
This course will teach students the techniques for computer game design and how to work as part of a game development team from initial conception through release, including the game design process, game concepts, how and why we play games, character development, storytelling, user experience, game play, and core mechanics of games.
COSC 2334  Computer Architecture  
3 Semester Credit Hours (3 Lecture Hours)  
A concentrated study of internal computer concepts. Computer organization, machine and assembly language are emphasized.  
Prerequisite: (COSC 1435 and MATH 2305).

COSC 2348  Introduction to Scripting  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to Windows and Unix/Linux shell scripting. The course covers basic scripting concepts including decision statements, control statements, functions and files manipulation. Advanced scripting tools such as grep, awk and sed are covered in this course.  
Prerequisite: (COSC 1435).

COSC 2390  Selected Topics I  
1,3 Semester Credit Hours (1,3 Lecture Hours)  
Variable content. May be repeated for credit depending on topic. Offered on sufficient demand. Does not count toward total hours required for BS in Computer Science.

COSC 2391  Selected Topics II  
1-3 Semester Credit Hours (1-3 Lecture Hours)  
This is a selected topics course with no lab component. Variable content. May be repeated for credit depending on topic. Offered on sufficient demand. Does not count toward total hours required for BS in Computer Science.

COSC 2437  Data Structures  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
This course provides a thorough study of standard structures used in the storing and retrieving of data and the processes by which these structures are created and manipulated. Topics include: object oriented design, linked lists, classes, trees, graphs, hashing, stacks, queues, sorting, searching, and recursion. A grade of C or better is required in the course to receive credit towards the Computer Science BS program.  
Prerequisite: (COSC 1436) and (MATH 2305 or 2305*).  
* May be taken concurrently.

TCCNS: COSC 2436

COSC 2465  Linux Systems  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
This course focuses on providing students with essential knowledge and skills to implement, administer, and troubleshoot servers in a networked environment. Operating system concepts, such as installing a standalone system, file systems authentication, and user support services are explored. Topics will include security issues, user and group administration, active directory services, DHCP, DNS, SSH, backup and restoration strategies and techniques, integrated mass storage technologies and alternative client technologies.  
Prerequisite: COSC 1435.

COSC 2466  Network Systems  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
This course focuses on the standards and technologies used to establish inter-network structures that will support a TCP/IP data stream for higher-level services to operate over. This course introduces local area networks (LAN) and wide area networks (WAN). Topics include the TCP/IP and open system interconnection (OSI) models, cabling, switches, routers, protocols, subnetting, and networking hardware and software. Initial switch and router configuration will be examined and evaluated.  
Prerequisite: (COSC 1435 and 2465).

COSC 2470  COBOL Programming  
4 Semester Credit Hours (4 Lecture Hours)  
A concentrated study of the COBOL language as applied to fundamental business computing problems and other data management applications.  
Prerequisite: COSC 1435.

COSC 3100  Skills for Computing Professionals I  
1 Semester Credit Hour (1 Lecture Hour)  
This course focuses on beginning to develop professional skills that computer scientists will need to be successful in their careers and lives. Communication skills will include writing and giving oral presentations. Ethical issues will be explored. This is a class for computing professionals. As such, professional decorum will be required at all times.

COSC 3301  Cyber Security  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to cyber security. A broad range of cyber security issues will be covered, including social engineering attacks, secure coding, computer security, Internet of Things (IoT) security, mobile security, data security, network security, physical security and forensics. This course will cover the concepts of prevention, detection, and response to cyber security threats.  
Prerequisite: COSC 1435.

COSC 3324  Object-oriented Programming  
3 Semester Credit Hours (3 Lecture Hours)  
A study of concepts, terminology, and methodologies used in object-oriented systems, languages, and applications. Students will design and implement software systems using object-oriented analysis and design techniques.  
Prerequisite: COSC 2437.

COSC 3325  Game Programming  
3 Semester Credit Hours (3 Lecture Hours)  
This course will introduce the student to techniques and tools used for all aspects of programming games. Topics will include game graphics, game physics, game AI, and sound. The course will contain lectures and hands-on labs. Students will work independently and in teams.  
Prerequisite: COSC 2437.

COSC 3335  Programming for Unmanned Aircraft Systems  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces software development for Unmanned Systems (US). Students will be introduced to a variety of relevant topics including the different US platforms, design and implementation of algorithms for US, user interface for US, and state-of-the-art US applications, challenges & solutions.  
Prerequisite: (COSC 1435 or 1330) and (MEEN 3335).

COSC 3336  Introduction to Database Systems  
3 Semester Credit Hours (3 Lecture Hours)  
A study of contemporary database management system concepts, terminology, and methodology for use and implementation. Commercially available systems are discussed and used with emphasis upon the relational model.  
Prerequisite: COSC 2437.

COSC 3346  Operating Systems  
3 Semester Credit Hours (3 Lecture Hours)  
Introduction to operating systems concepts, principles, and design. Topics include: processes and threads, CPU scheduling, mutual exclusion and synchronization, deadlock, memory management, file systems, security and protection, networking, and distributed systems. Selected existing operating systems are discussed, compared, and contrasted.  
Prerequisite: (COSC 2437 and 2334).
COSC 3351 Internet Programming  
3 Semester Credit Hours (3 Lecture Hours)  
Study of prominent web technologies with a focus on creating interactive web applications. Both client-side and server-side programming will be covered. Students will design and implement a web based project using technologies covered in class.  
Prerequisite: COSC 3336 or 3336.  
May be taken concurrently.

COSC 3352 Mobile Programming  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces software development for mobile platforms. Students will learn skills for creating and deploying mobile applications. Includes software engineering topics as related to mobile programming, primarily in how software design differs on mobile platforms.  
Prerequisite: COSC 2437.

COSC 3353 Survey of Programming Languages  
3 Semester Credit Hours (3 Lecture Hours)  
A study of selected programming languages for students familiar with programming. Students will write programs in a variety of languages.  
Prerequisite: COSC 2437.

COSC 3360 Human-computer Interaction  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces concepts and techniques for Human Computer Interaction. Particular emphasis will be placed on vision, audio, and language solutions for use in human-computer interactive systems. In addition, the students will learn how to apply the methods to solve simple HCI problems.  
Prerequisite: COSC 1436.

COSC 3370 Software Engineering  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to software engineering principles for the development and maintenance of high quality large software systems. Topics include: software life cycle, delivering on time and within budget, and the development and application of processes and tools for managing the complexities inherent in creating these systems.  
Prerequisite: COSC 2437.

COSC 3371 Computer Information Systems Economics  
3 Semester Credit Hours (3 Lecture Hours)  
An introduction to concepts in information technology and software engineering with a focus on economics and managerial issues. Topics include: cost benefit analysis, software and effort estimation, feasibility analysis, information systems proposals, software team coordination, and project management. May not be used as a CS elective for CS majors.

COSC 3372 Network Security  
3 Semester Credit Hours (3 Lecture Hours)  
This course provides an introduction to the fundamentals of computer and network security and security laws and ethics, topics include, identification of vulnerabilities, forms of attack, appropriate countermeasures, and the detection and defense of the same. Techniques for the securing of hardware, software and data, including physical security are covered.  
Prerequisite: COSC 2465.

COSC 3373 Software Project Management  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces students to the principles for software project management for small and medium-size projects. Many aspects of software project management, including management process, scope definition, time and cost estimation, quality control, human resources, communication, risks and project procurement management will be discussed. A number of applications and tools will be used to implement a class project.  
Prerequisite: (COSC 3370).

COSC 3385 Numerical Methods  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces concepts for solving problems numerically using computers. Students will learn about number systems, errors of finite representation, and iteration. A survey of basic numerical methods including: solutions to nonlinear equations, solutions to linear systems, approximation, interpolation, zeros of functions, numerical differentiation and integration, and Monte-Carlo methods.  
Prerequisite: MATH 2413 and (COSC 1330 or 1435).

COSC 3400 Skills for Computing Professionals  
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)  
This course focuses on the professional skills that computer scientists will need to be successful in their careers. There are two key areas of study, communication skills needed by computer scientists and their ethical responsibilities. Communication skills will include: technical writing from a computer science perspective, presentation skills, client interviewing, and reading technical articles. Ethical issues will be explored from a computer science perspective.  
Prerequisite: ENGL 1302.

COSC 3474 Cyber Defense I  
4 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)  
This course covers cryptographic tools, cryptographic algorithms, types of malicious software, forms of attacks and software security. Strengths and weaknesses of cryptographic systems are covered as well as the types of attacks on cryptographic systems. Malicious activity signatures, analysis as well as detection will be covered. This course will also cover secure coding principles and types of software issues.  
Prerequisite: COSC 3372.

COSC 4100 Skills for Computing Professionals II  
1 Semester Credit Hour (2 Lab Hours)  
This course focuses on technical writing, workplace scenarios and professional skills that computer scientists will need to be successful in their careers and lives. This is a class for computing professionals. As such, professional decorum will be required at all times.  
Prerequisite: COSC 1100 and ENGL 3310.

COSC 4310 Digital Forensics  
3 Semester Credit Hours (3 Lecture Hours)  
This course will introduce undergraduate students to the fundamentals of computer forensics and cyber-crime scene analysis. The various laws and regulations dealing with computer forensic analysis will be discussed. Students will be introduced to the emerging international standards for computer forensic analysis, as well as a formal methodology for conducting computer forensic investigations. Several Forensics tools such as Encase and FTK will be used to conduct digital forensics investigations.  
Prerequisite: COSC 2437.
COSC 4324  Image Processing  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces concepts and techniques for image processing. The objective of this course is to introduce the fundamental techniques and algorithms used for processing and extracting useful information from digital images. The students will learn how to apply the image processing methods to solve real-world problems.  
Prerequisite: COSC 2437.

COSC 4325  Advanced Game Programming  
3 Semester Credit Hours (3 Lecture Hours)  
This course will introduce advanced concepts for game programming to the student. Topics will include game physics, game AI, advanced shaders, 3D techniques, multiplayer techniques, and networking. The course will contain lectures and hands-on labs.  
Prerequisite: COSC 3325.

COSC 4328  Computer Graphics  
3 Semester Credit Hours (3 Lecture Hours)  
Basic principles and techniques for computer graphics on modern graphics hardware. Students will gain experience in interactive computer graphics using the OpenGL API. Topics include: 2D viewing, 3D viewing, perspective, lighting, and geometry.  
Prerequisite: COSC 2437 and MATH 2413.

COSC 4330  Introduction to Artificial Intelligence  
3 Semester Credit Hours (3 Lecture Hours)  
Foundations, directions, and applications of artificial intelligence including search algorithms, knowledge acquisition, representation, and processing. Students will gain practical experience by implementing many of the basic algorithms.  
Prerequisite: COSC 2437.

COSC 4342  Computer Networks  
3 Semester Credit Hours (3 Lecture Hours)  
Computer-based communication systems. Topics include: advanced computer network architectures, protocols, and programming.  
Prerequisite: (COSC 2437 and MATH 2413).

COSC 4343  Algorithms  
3 Semester Credit Hours (3 Lecture Hours)  
Advanced programming techniques for algorithmic and heuristic solutions of problems. Topics include: analysis and design of algorithms, testing of algorithms, optimum and exhaustive solutions, and recursion.  
Prerequisite: (COSC 2437 and MATH 2413).

COSC 4345  Introduction to Machine Learning  
3 Semester Credit Hours (3 Lecture Hours)  
This course gives a broad introduction to machine learning with more emphasis on intelligent system design. Topics to be covered include linear and logistic regression, neural networks, clustering, classification, decision tree, evolutionary computation, feature selection, and reinforcement learning. The courses will explore various applications of machine learning to computer science, process modeling, pattern and speech recognition, data mining, and bioinformatics.

COSC 4348  Systems Programming  
3 Semester Credit Hours (3 Lecture Hours)  
The design and implementation of system software such as device drivers, application support libraries, and interprocess communication. Students will study and use systems programming tools.  
Prerequisite: COSC 3346 and (COSC 3353 or 3324).

COSC 4353  Compiler Construction  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces the basic concepts and mechanisms traditionally employed in language translators, with emphasis on compilers. Topics include: strategies for syntactic and semantic analysis, techniques of code optimization and approaches toward code generation.  
Prerequisite: COSC 3353.

COSC 4354  Senior Capstone Project  
3 Semester Credit Hours (3 Lecture Hours)  
Teamwork and formal methods of systems analysis and design are emphasized. Students will complete a large team project. Fall, Spring.  
Prerequisite: (COSC 3370, 3336 and ENGL 3310).

COSC 4360  Theory of Programming Languages  
3 Semester Credit Hours (3 Lecture Hours)  
The study of programming language design including syntax, semantics, behavior, and implementation issues in imperative, functional, logic, and object-oriented languages. Other topics include type theory, concurrency, data dependency, and nondeterminism.  
Prerequisite: COSC 2437.

COSC 4365  Windows Security  
3 Semester Credit Hours (3 Lecture Hours)  
This course focuses on advanced system administration topics. An in-depth understanding of various concepts such as operating systems, servers, file systems authentication, and user support services are explored. Topics include security issues, user and group administration, server and work-station integration, central repositories for updates, Active directory, DMZ, web servers, email servers, electronic system update and maintenance, backup and restoration strategies and techniques, integrated mass storage technologies and alternative client technologies.  
Prerequisite: (COSC 2348) and (COSC 2465).

COSC 4367  Firewall and Intrusion Detection Systems  
3 Semester Credit Hours (3 Lecture Hours)  
This is an applied course which focuses on the standards and technologies used to establish inter-network structures that will support a TCP/IP data stream for higher-level services to operate over. This course introduces firewalls, Intrusion Prevention Systems (IPS), and Intrusion Detection Systems (IDS) technology. Topics include Windows, Linux, Check Point and Cisco firewalls, TCP/IP and open system interconnection (OSI) models, attack traffic analysis, and network based and host based hardware and software. Device configuration will be examined and evaluated with appropriate exercises.  
Prerequisite: (COSC 4365) and COSC 3372.

COSC 4368  Penetration Testing  
3 Semester Credit Hours (3 Lecture Hours)  
This course focuses on increasing the students understanding of how to recognize a potential cyber attacker and identify vulnerabilities through the use of vulnerability analysis tools. Students will audit, monitor, and revise system security to ensure appropriate levels of protection are achieved. Incident response and handling, security log analysis, attacker identification, system recovery and postmortem procedures will be addressed.  
Prerequisite: (COSC 3474) and (COSC 4365).
COSC 4369 Incident Response
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on the standards and technologies used to establish organization structures that will support information technology incident response, business continuity and disaster recovery efforts. This course introduces incident response, business continuity and disaster recovery planning concepts as well as tools and techniques. Topics include the development and implementation of incident response, business continuity and disaster recovery plans, attack traffic analysis, and network-based and host-based hardware and software. Concepts will be examined and evaluated with appropriate exercises.
Prerequisite: (COSC 2437) and (COSC 3365) and (COSC 3466) and (COSC 4365).

COSC 4370 Models of Computation
3 Semester Credit Hours (3 Lecture Hours)
A study of formal languages, grammars, and associated abstract machine models. Topics include regular and context-free languages and grammars, finite state automata, Turing machines, and the Chomsky hierarchy.
Prerequisite: MATH 2305.

COSC 4396 Directed Independent Study
3 Semester Credit Hours
See College description. Offered on sufficient demand.

COSC 4590 Selected Topics
1-5 Semester Credit Hours (1-5 Lecture Hours)
Variable content. May be repeated for credit depending on topic. Offered on sufficient demand.
Prerequisite: COSC 4365.

COSC 4690 Contracted Field Experience in Computer Science
1-6 Semester Credit Hours (6 Lecture Hours)
Individual contract agreement involving student, faculty, and cooperating agency to gain practical experience in off-campus setting.

COSC 5300 Introductory Topics in Computer Science
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to the leveling topics in computer science. This course serves the needs of certain topics students lack for pursuing a Master's degree in computer science. Grade assigned will be "credit" (CR) or "no credit" (NC).
Prerequisite: COSC 4365.

COSC 5312 Foundations of Computer Organization and Architecture
3 Semester Credit Hours (3 Lecture Hours)
A study of internal computer concepts with respect to the functioning of the hardware subsystems and their roles in the computing process. An in-depth study of machine and assembly language. (Does not count toward total hours required for MS in Computer Science.)
Prerequisite: COSC 5313, MATH 2413 and 2305.

COSC 5313 Foundations of Computer Organization and Architecture
3 Semester Credit Hours (3 Lecture Hours)
A study of internal computer concepts with respect to the functioning of the hardware subsystems and their roles in the computing process. An in-depth study of machine and assembly language. (Does not count toward total hours required for MS in Computer Science.)
Prerequisite: COSC 5312, MATH 2413 and 2305.

COSC 5321 Data Structures
3 Semester Credit Hours (3 Lecture Hours)
A study of the logical structures used for the organization, storage and retrieval of data. These structures are addressed from both memory-resident and file-resident points of view. Algorithms for the creation, searching, and manipulation of standard data structures used in computing are stressed. (Does not count toward total hours required for MS in Computer Science.)
Co-requisite: COSC 5312, MATH 2305.

COSC 5324 Digital Image Processing
3 Semester Credit Hours (3 Lecture Hours)
COSC 5326 Computer Vision
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: COSC 5324.

COSC 5327 Introduction to Computer Graphics
3 Semester Credit Hours (3 Lecture Hours)
INTRODUCTION TO COMPUTER GRAPHICS This graduate course provides students with a foundation in basic principles and techniques for computer graphics on modern graphics hardware. Students will gain experience in interactive computer graphics using the OpenGL API. Topics include: graphics hardware, rendering, perspective, lighting, and geometry.

COSC 5328 Advanced Computer Graphics
3 Semester Credit Hours (3 Lecture Hours)
ADVANCED COMPUTER GRAPHICS This course covers advanced computer graphics techniques. Students will be introduced to state-of-the-art methods in computer graphics. This course will focus on techniques for real-time rendering and animation.
Prerequisite: COSC 4328 or 5327.

COSC 5331 Foundations of Computer System Software
3 Semester Credit Hours (3 Lecture Hours)
Introduction to operating systems concepts, principles, and design. Topics include: processes and threads, CPU scheduling, mutual exclusion and synchronization, deadlock, memory management, file systems, security and protection, networking, and distributed systems. Selected existing operating systems are discussed, compared, and contrasted. (Does not count toward total hours required for MS in computer science.)
Prerequisite: COSC 5313.
Co-requisite: COSC 5321.

COSC 5334 The Design and Analysis of Algorithms
3 Semester Credit Hours (3 Lecture Hours)
THE DESIGN AND ANALYSIS OF ALGORITHMS An advanced course that concentrates on the design and analysis of algorithms used to solve a variety of problems. The methods of design covered include such topics as: divide-and-conquer, the greedy method, dynamic programming, search and traversal techniques, and backtracking.
Prerequisite: COSC 5321, MATH 2413 and 2305.

COSC 5336 Database Management Systems
3 Semester Credit Hours (3 Lecture Hours)
DATABASE MANAGEMENT SYSTEMS A study of contemporary database management concepts. Performance (indexing, query optimization, update optimization), concurrency, security and recovery issues are discussed. Also includes the study of front-end environments that access the database.
Prerequisite: COSC 5335 and 5321.

COSC 5337 Data Mining
3 Semester Credit Hours (3 Lecture Hours)
COSC 5340 Human-Computer Interaction
3 Semester Credit Hours (3 Lecture Hours)
HUMAN-COMPUTER INTERACTION Graduate-level survey of the field of Human-Computer Interaction (HCI) focusing on design strategies for making software usable by real-world people for doing real-world work. Topics include the role of HCI in the software product life cycle, task analysis of the user’s work, architectures for human-computer dialogues, new and traditional approaches to user interface design, and user interface standards.
Prerequisite: COSC 5331.

COSC 5350 Advanced Topics in DBMS
3 Semester Credit Hours (3 Lecture Hours)
ADVANCED TOPICS IN DBMS The study of emerging database technologies. Topics are chosen from data warehousing, distributed databases, spatial databases and web-based applications.
Prerequisite: COSC 5336.

COSC 5351 Advanced Computer Architecture
3 Semester Credit Hours (3 Lecture Hours)
COMPUTER ARCHITECTURE An overview of computer architecture, which stresses the underlying design principles and the impact of these principles on computer performance. General topics include design methodology, processor design, control design, memory organization, system organization, and parallel processing.
Prerequisite: COSC 5331.

COSC 5352 Advanced Operating Systems
3 Semester Credit Hours (3 Lecture Hours)
ADVANCED OPERATING SYSTEMS Introduction to advanced concepts in operating systems and distributed systems. Topics include distributed system architectures, interprocess communication, distributed mutual exclusion, distributed synchronization and deadlock, agreement protocols, distributed scheduling and process management, distributed shared memory, distributed file systems, multiprocessor system architectures and operating systems, recovery and fault tolerance.
Prerequisite: COSC 5331.

COSC 5353 Principles of Compiler Construction
3 Semester Credit Hours (3 Lecture Hours)
COMPILER DESIGN AND CONSTRUCTION This course introduces the basic concepts and mechanisms traditionally employed in language translators, with emphasis on compilers. Topics include strategies for syntactic and semantic analysis, techniques of code optimization and approaches toward code generation.
Prerequisite: COSC 5330 and MATH 2305.

COSC 5354 ARTIFICIAL INTELLIGENCE
3 Semester Credit Hours (3 Lecture Hours)
Fundamental concepts and techniques for the design of computer-based, intelligent systems. Topics include: a brief history, methods for knowledge representation, heuristic search techniques, programming in LISP or Prolog.
Prerequisite: COSC 5321 and MATH 2305.

COSC 5355 DATA COMMUNICATIONS NETWORKING
3 Semester Credit Hours (3 Lecture Hours)
DATA COMMUNICATION SYSTEMS Areas studied include principles of computer-based communication systems, analysis and design of computer networks, and distributed data processing.
Prerequisite: COSC 5331.

COSC 5356 THEORY OF COMPUTATION
3 Semester Credit Hours (3 Lecture Hours)
THEORETICAL ASPECTS OF COMPUTING An introduction to theoretical foundations of modern computing. Topics include finite state machine concepts, formal grammars, and basic computability concepts.
Prerequisite: COSC 5321 and MATH 2305.

COSC 5357 WIRELESS SENSOR NETWORKS
3 Semester Credit Hours (3 Lecture Hours)
This is a graduate level course on wireless sensor networks; one of the fastest developing areas in computer science and engineering. The focus of this course is on the design of optimized architectures and protocols for such unique networks. Topics include the design principles of wireless sensor networks, energy management, MAC protocols, naming and addressing, localization, routing protocols, applications of wireless sensor networks, and associated challenges and measures.

COSC 5360 CONCURRENCY: PARALLEL AND DISTRIBUTED PROCESSING
3 Semester Credit Hours (3 Lecture Hours)
PARALLEL COMPUTING Introduction to the hardware and software issues in parallel computing. Topics include motivation and history, parallel architectures, parallel algorithm design, and parallel performance analysis. Students will be introduced to a variety of parallel computing paradigms including message passing systems and shared memory systems.
Prerequisite: COSC 5331.

COSC 5362 MOBILE SOFTWARE DEVELOPMENT
3 Semester Credit Hours (3 Lecture Hours)
Survey of software development on mobile platforms including both native and cross-platform applications with topics such as: prototyping, programming, testing, debugging, and deploying. Coverage of software life cycle on mobile platforms and how mobile hardware differs from traditional computers. COSC 5321

COSC 5370 ADVANCED SOFTWARE ENGINEERING
3 Semester Credit Hours (3 Lecture Hours)
Areas studied include engineering principles and their application to the design, development, testing, and maintenance of large software systems, tools and processes for managing the complexities inherent in creating and maintaining large software systems.
Prerequisite: COSC 5321.

COSC 5374 COMPUTER FORENSICS
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce students to the fundamentals of computer forensics and various software tools used in cyber-crime analysis. Students will be introduced to established methodologies for conducting computer forensic investigations, as well as to emerging international standards for computer forensics. Applicable laws and regulations dealing with computer forensic analysis will also be discussed.
Prerequisite: COSC 5312.

COSC 5375 INFORMATION ASSURANCE
3 Semester Credit Hours (3 Lecture Hours)
An introduction to information security and assurance. This course covers the basic notions of confidentiality, integrity, availability, authentication models, protection models, secure programming, audit, intrusion detection and response, operational security issues, physical security issues, personnel security, policy formation and enforcement, access controls, information flow, legal and social issues, classification, trust modeling, and risk assessment.
Prerequisite: COSC 5312.
COSC 5376 NETWORK SECURITY
3 Semester Credit Hours (3 Lecture Hours)
This course is a study of networking basics and security essentials with respect to information services provided over a computer network. The course covers the technical details of security threats, vulnerabilities, attacks, policies, and countermeasures such as firewalls, honeypots, intrusion detection systems, and cryptographic algorithms for confidentiality and authentication and the development of strategies to protect information services and resources accessible on a computer network.
Prerequisite: COSC 5375.

COSC 5377 APPLIED CRYPTOGRAPHY
3 Semester Credit Hours (3 Lecture Hours)
This course includes an introduction to cryptographic algorithms and protocols for encrypting information securely, techniques for analyzing vulnerabilities of protocols, approaches to digital signatures and information digests, and implementation approaches for the most significant cryptographic methodologies.
Prerequisite: COSC 5312.

COSC 5379 ADVANCED INFORMATION ASSURANCE
3 Semester Credit Hours (3 Lecture Hours)
This course encompasses a broad range of topics involving information security, communications security, network security, risk analysis, operational security, health information privacy, criminal justice digital forensics, homeland security, the human element and social engineering, and applicable national and international laws. An in-depth information assurance capstone project or research paper will be required of each student to satisfy the information assurance graduate option requirements.
Prerequisite: COSC 5375.

COSC 5390 Internship
3 Semester Credit Hours
Individual contract agreement involving student, faculty, and cooperating agency (discipline-related business, nonprofit organization, or government agency) to gain practical experience appropriate to computer science in off-campus setting. Grade assigned will be “credit” (CR) or “no credit” (NC).

COSC 5393 RESEARCH METHODS IN COMP SCIEN
3 Semester Credit Hours (3 Lecture Hours)
RESEARCH METHODS IN COMPUTER SCIENCE This course provides students with a range of experiences in conducting and communicating research. Students will learn major research methods and techniques. Experiences will be gained in all stages of research: reviewing literature, writing a proposal, designing an approach, and reporting results. Critical-reading/writing assignments and class discussions on state-of-the-art research in Computer Science will provide students with major research aspects. Fall, Spring

COSC 5395 GRADUATE PROJECT AND TECHNICAL REPORT
3 Semester Credit Hours
An applied research project in computing from problem definition to implementation in an area of particular interest to the student that relates to the course of study.
Prerequisite: COSC 5393 and 5370.

COSC 5396 DIRECTED INDEPENDENT STUDY
1-3 Semester Credit Hours
Study in areas of current interest. (A maximum of six hours may be counted toward the MS degree.) Fall, Spring, Summer.

COSC 5398 Thesis I
3 Semester Credit Hours (3 Lecture Hours)
This course is for Computer Science MS students choosing the thesis option. Upon choosing a thesis advisor, students will register for this course. This course is only credit/no credit. Students will be given a grade of In-Progress until successfully completing their thesis.
Prerequisite: COSC 6393.

COSC 5399 Thesis II
3 Semester Credit Hours (3 Lecture Hours)
This course is for Computer Science MS students choosing the thesis option. Students will continually register for this course until successful completion of their thesis. A grade of In-Progress will be assigned until either successful completion or failing to register. If failing to register students will receive a grade of No Credit for all 5399 and 5398 courses.
Prerequisite: COSC 5398.

COSC 5590 SELECTED TOPICS
1-5 Semester Credit Hours (1-5 Lecture Hours)
Variable content study of specific areas of computer and information systems. May be repeated for credit when topics vary. Offered on sufficient demand.

COSC 5599 Advanced Research in Computer Science
1-9 Semester Credit Hours (1-9 Lecture Hours)
Advanced work in a specialized area of computer science. Does not count as credit toward a degree in computer science. Course is taken as credit/non-credit.

COSC 6324 Digital Image Processing
3 Semester Credit Hours
This course introduces concepts and techniques for image processing. The objective of this course is to introduce the fundamental techniques and algorithms used for processing and extracting useful information from digital images. The students will learn how to apply the image processing methods to solve real-world problems.

COSC 6326 Computer Vision
3 Semester Credit Hours
This graduate course introduces concepts and techniques for machine vision. Particular emphasis will be placed on methods used for object recognition, machine learning, content-based image retrieval, image matching, 3D vision, tracking and motion analysis.
Prerequisite: COSC 6324.

COSC 6327 Introduction to Computer Graphics
3 Semester Credit Hours
This graduate course provides students with a foundation in basic principles and techniques for computer graphics on modern graphics hardware. Students will gain experience in interactive computer graphics using the OpenGL API. Topics include: graphics hardware, rendering, perspective, lighting, and geometry.

COSC 6328 Advanced Computer Graphics
3 Semester Credit Hours
This course covers advanced computer graphics techniques. Students will be introduced to state-of-the-art methods in computer graphics. This course will focus on techniques for real-time rendering and animation.
Prerequisite: COSC 4328 or 6327.
COSC 6334 Design and Analysis of Algorithms
3 Semester Credit Hours (3 Lecture Hours)
An advanced course that concentrates on the design and analysis of algorithms used to solve a variety of problems. The methods of design covered include such topics as: divide-and-conquer, the greedy method, dynamic programming, search and traversal techniques, and backtracking.
Prerequisite: COSC 5321, MATH 2413 and 2305.

COSC 6336 Database Management Systems
3 Semester Credit Hours (3 Lecture Hours)
A study of contemporary database management concepts. Performance (storage and indexing) and Big Data techniques (management, processing, and analysis) are discussed. Also includes the study of spatial data management.
Prerequisite: COSC 5321.

COSC 6337 Data Mining
3 Semester Credit Hours
An introduction to fundamental strategies and methodologies for data mining. Topics include data preprocessing, mining frequent data patterns, classification, clustering, and outlier detection.

COSC 6338 Machine Learning
3 Semester Credit Hours (3 Lecture Hours)
Machine learning is a set of techniques that have been successfully used in the past few decades for data analysis, process automation, function optimization, model building, and many others. These techniques have been explored in a diversity of fields such as robotics, self-driving cars, big data, control of autonomous systems, image analysis, object recognition, data mining, business, and financial forecasting, transportation systems, antenna design, medical care systems, and many others. ML is a subdivision of artificial intelligence that gives machines the ability to learn and adapt with different acquired knowledge and experience. In this course, a student will learn about state of the art on machine learning and get to know how they can carry out these evolving learning algorithms. ML algorithms attempt to mimic how the human brain works. We plan to develop many exercises on how these ML algorithms work in practical applications in both industry and basic science. We plan to cover topics such as artificial network networks, fuzzy logic, hybrid systems, search and optimization, classification, clustering and deep learning. Students will gain experiences on some programming tools and a variety of applications of machine learning.

COSC 6339 Deep Learning
3 Semester Credit Hours (3 Lecture Hours)
This course introduces concepts and techniques for deep learning. The objective of this course is to introduce the fundamental theory and application of deep learning. Particular emphasis will be placed on regularization and optimization of deep learning models, Convolutional network, recurrent neural networks, autoencoders and generative models. In addition, the students will learn how to apply the methods to solve real-world problems in several areas including remote sensing, geospatial, and medical applications and develop the insight necessary to use the tools and techniques to solve any new problem.

COSC 6340 Human-Computer Interaction
3 Semester Credit Hours (3 Lecture Hours)
This graduate course introduces concepts and techniques for Human Computer Interaction. Attention will be paid to using non-traditional inputs such as cameras and microphones. Students will learn tools for using these inputs to create interactions with users.
Prerequisite: COSC 5331.

COSC 6350 Advanced Topics in DBMS
3 Semester Credit Hours (3 Lecture Hours)
The study of emerging database technologies. Topics are chosen from data warehousing, distributed databases, spatial databases and web-based applications.
Prerequisite: COSC 6336.

COSC 6351 Advanced Computer Architecture
3 Semester Credit Hours
An overview of computer architecture, which stresses the underlying design principles and the impact of these principles on computer performance. General topics include design methodology, processor design, control design, memory organization, system organization, and parallel processing.
Prerequisite: COSC 5331.

COSC 6352 Advanced Operating Systems
3 Semester Credit Hours (3 Lecture Hours)
Introduction to advanced concepts in operating systems and distributed systems. Topics include distributed system architectures, interprocess communication, distributed mutual exclusion, distributed synchronization and deadlock, agreement protocols, distributed scheduling and process management, distributed shared memory, distributed file systems, multiprocessor system architectures and operating systems, recovery and fault tolerance.
Prerequisite: COSC 5331.

COSC 6353 Compiler Design and Construction
3 Semester Credit Hours
This course introduces the basic concepts and mechanisms traditionally employed in language translators, with emphasis on compilers. Topics include strategies for syntactic and semantic analysis, techniques of code optimization and approaches toward code generation.
Prerequisite: MATH 2305.

COSC 6354 Artificial Intelligence
3 Semester Credit Hours
Fundamental concepts and techniques for the design of computer-based intelligent systems. Topics include: a brief history, methods for knowledge representation, heuristic search techniques, programming in LISP or Prolog.
Prerequisite: COSC 5321 and MATH 2305.

COSC 6355 Data Communications and Networking
3 Semester Credit Hours (3 Lecture Hours)
Areas studied include principles of computer-based communication systems, analysis and design of computer networks, and distributed data processing.
Prerequisite: COSC 5331.

COSC 6356 Theory of Computation
3 Semester Credit Hours
An introduction to theoretical foundations of modern computing. Topics include finite state machine concepts, formal grammars, and basic computability concepts.
Prerequisite: COSC 5321 and MATH 2305.

COSC 6357 Wireless Sensor Networks
3 Semester Credit Hours
This is a graduate level course on wireless sensor networks; one of the fastest developing areas in computer science and engineering. The focus of this course is on the design of optimized architectures and protocols for such unique networks. Topics include the design principles of wireless sensor networks, energy management, MAC protocols, naming and addressing, localization, routing protocols, applications of wireless sensor networks, and associated challenges and measures.
COSC 6360  Parallel Computing
3 Semester Credit Hours
Introduction to the hardware and software issues in parallel computing. Topics include motivation and history, parallel architectures, parallel algorithm design, and parallel performance analysis. Students will be introduced to a variety of parallel computing paradigms including message passing systems and shared memory systems.
Prerequisite: COSC 5331.

COSC 6361  Parallel Algorithms
3 Semester Credit Hours (3 Lecture Hours)
Introduces and evaluates important models of parallel and distributed computation. Topics include a selection of parallel algorithms for various models of parallel computation, combinational circuits, parallel prefix computation, divide and conquer, pointer based data structures, linear arrays, meshes and related models, and hypercubes.

COSC 6362  Mobile Software Development
3 Semester Credit Hours
Survey of software development on mobile platforms including both native and cross-platform applications with topics such as: prototyping, programming, testing, debugging, and deploying. Coverage of software life cycle on mobile platforms and how mobile hardware differs from traditional computers.
Prerequisite: COSC 5321.

COSC 6365  Current Trends in Programming
3 Semester Credit Hours (3 Lecture Hours)
This is a survey of current trends in computer programming. The focus of this course is on the development of computer programs utilizing the latest technologies and paradigms. Topics include state-of-the-art in problem solving and software development, programming techniques and approaches, programming languages, development tools and environments, and software deployment methods.
Prerequisite: COSC 5321.

COSC 6370  Advanced Software Engineering
3 Semester Credit Hours
Areas studied include engineering principles and their application to the design, development, testing, and maintenance of large software systems, tools and processes for managing the complexities inherent in creating and maintaining large software systems.
Prerequisite: COSC 5321.

COSC 6374  Computer Forensics
3 Semester Credit Hours
This course will introduce students to the fundamentals of computer forensics and various software tools used in cyber-crime analysis. Students will be introduced to established methodologies for conducting computer forensic investigations, as well as to emerging international standards for computer forensics. Applicable laws and regulations dealing with computer forensic analysis will also be discussed.

COSC 6375  Information Assurance
3 Semester Credit Hours (3 Lecture Hours)
An introduction to information security and assurance. This course covers the basic notions of confidentiality, integrity, availability, authentication models, protection models, secure programming, audit, intrusion detection and response, operational security issues, physical security issues, personnel security, policy formation and enforcement, access controls, information flow, legal and social issues, classification, trust modeling, and risk assessment.

COSC 6376  Network Security
3 Semester Credit Hours
This course is a study of networking basics and security essentials with respect to information services provided over a computer network. The course covers the technical details of security threats, vulnerabilities, attacks, policies, and countermeasures such as firewalls, honeypots, intrusion detection systems, and cryptographic algorithms for confidentiality and authentication and the development of strategies to protect information services and resources accessible on a computer network.
Prerequisite: COSC 6375.

COSC 6377  Applied Cryptography
3 Semester Credit Hours
This course includes an introduction to cryptographic algorithms and protocols for encrypting information securely, techniques for analyzing vulnerabilities of protocols, approaches to digital signatures and information digests, and implementation approaches for the most significant cryptographic methodologies.

COSC 6379  Advanced Information Assurance
3 Semester Credit Hours
This course encompasses a broad range of topics involving information security, communications security, network security, risk analysis, operational security, health information privacy, criminal justice digital forensics, homeland security, the human element and social engineering, and applicable national and international laws. An in-depth information assurance capstone project or research paper will be required of each student to satisfy the information assurance graduate option requirements.
Prerequisite: COSC 6375.

COSC 6380  Data Analytics
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce state-of-the-art techniques to process and analyze different types of data, generate insights and knowledge from data, and make data-based decisions and predictions. Real-world examples will be used to familiarize students with the theory and applications. Main topics include data preprocessing, probability theory, tests of hypothesis, and various data analysis techniques (e.g., clustering, classification, prediction/forecasting, etc.) for different types of data including static, time-series, spatial, and spatiotemporal.

COSC 6393  Research Methods in Computer Science
3 Semester Credit Hours
This course provides students with a range of experiences in conducting and communicating research. Students will learn major research methods and techniques. Experiences will be gained in all stages of research: reviewing literature, writing a proposal, designing an approach, and reporting results. Critical-reading/writing assignments and class discussions on state-of-the-art research in Computer Science will provide students with major research aspects. Spring

COSC 6396  Directed Independent Study
3 Semester Credit Hours
Study in areas of current interest. (A maximum of six hours may be counted toward the MS degree.) Fall, Spring, Summer.

COSC 6590  Selected Topics
3 Semester Credit Hours (3 Lecture Hours)
Variable content study of specific areas of computer and information systems. May be repeated for credit when topics vary. Offered on sufficient demand.
Minors

- Computer Science, Minor (p. 204)
- Geographic Information Science, Minor (p. 208)
- Geography, Minor (p. 210)
- Mechanical Engineering Technology, Minor (p. 210)

Computer Science, Minor

Program Requirements

Students majoring in other academic fields who wish to complete a minor in computer science must complete at least 18 hours of computer science, of which at least 6 semester hours must be at or above the 3000 level. The content of the course work for the minor must include the equivalent of:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COSC 1315</td>
<td>Computer Literacy</td>
<td>3</td>
</tr>
<tr>
<td>COSC 1435</td>
<td>Introduction to Problem Solving with Computers I</td>
<td>4</td>
</tr>
<tr>
<td>COSC 1436</td>
<td>Introduction to Problem Solving with Computers II</td>
<td>4</td>
</tr>
<tr>
<td>COSC 2437</td>
<td>Data Structures</td>
<td>4</td>
</tr>
</tbody>
</table>

Electives

Select 6 hours of Approved Computer Science electives (at or above the 3000 level) (p. 204)

Total Hours 18

It is assumed that the student has completed all mathematics prerequisites and corequisites for the required courses.

Approved Electives

Any 3000 level COSC course will satisfy except:

<table>
<thead>
<tr>
<th>Code</th>

</table>

Courses

COSC 1315 Computer Literacy
3 Semester Credit Hours (3 Lecture Hours)

A balanced introduction to the use and application of computers in modern society involving both descriptive information and hands-on laboratory participation. Includes a discussion of the general principles of operation of a computer and a brief history of the development of computing. The use of a personal computer operating system, common application software, and simple computer programming concepts are introduced. Satisfies university computer literacy requirement.

TCCNS: COSC 1301

COSC 1320 C Programming
3 Semester Credit Hours (3 Lecture Hours)

Introduces the fundamental concepts of structured programming in the C language. Topics include data types; control structures; functions, structures, arrays, pointers, pointer arithmetic, unions, and files; the mechanics of running, testing, and debugging programs; introduction to programming; and introduction to the historical and social context of computing.

Prerequisite: (MATH 1314).

COSC 1330 Programming for Scientists, Engineers, and Mathematicians
3 Semester Credit Hours (3 Lecture Hours)

Introduction to computer programming for solving discipline specific problems using computers. Emphasis on the fundamentals of structured design, development, testing, implementation, and documentation. Includes coverage of language syntax, data and file structures, input/ output devices, and disks/files.

TCCNS: ENGR 2304

COSC 1435 Introduction to Problem Solving with Computers I
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)

This course introduces the fundamental concepts of problem solving and algorithms. A brief introduction to computers and the programming life cycle is covered. The C++ programming language is used to develop basic computer programs demonstrating data types, fundamental control structures, functions, and arrays. MATH 1314 or placement beyond MATH 1314. Offered Fall, Spring, Summer.

Prerequisite: MATH 1314.

TCCNS: COSC 1436

COSC 1436 Introduction to Problem Solving with Computers II
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)

This course is a continuation of COSC 1435. An introduction to abstract data types and object-oriented programming is covered. Topics include basic searching and sorting algorithms, dynamic allocation, linked lists, inheritance, polymorphism, and recursion.

Prerequisite: COSC 1435.

TCCNS: COSC 1437

COSC 2325 Game Design
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)

This course will teach students the techniques for computer game design and how to work as part of a game development team from initial conception through release, including the game design process, game concepts, how and why we play games, character development, storytelling, user experience, game play, and core mechanics of games.

TCCNS: COSC 2334

Computer Architecture
3 Semester Credit Hours (3 Lecture Hours)

A concentrated study of internal computer concepts. Computer organization, machine and assembly language are emphasized.

Prerequisite: (COSC 1435 and MATH 2305).

COSC 2348 Introduction to Scripting
3 Semester Credit Hours (3 Lecture Hours)

This course introduces students to Windows and Unix/Linux shell scripting. The course covers basic scripting concepts including decision statements, control statements, functions and files manipulation. Advanced scripting tools such as grep, awk and sed are covered in this course.

Prerequisite: (COSC 1435).
COSC 2390  Selected Topics I
1,3 Semester Credit Hours (1,3 Lecture Hours)
Variable content. May be repeated for credit depending on topic. Offered on sufficient demand. Does not count toward total hours required for BS in Computer Science.

COSC 2391  Selected Topics II
1-3 Semester Credit Hours (1-3 Lecture Hours)
This is a selected topics course with no lab component. Variable content. May be repeated for credit depending on topic. Offered on sufficient demand. Does not count toward total hours required for BS in Computer Science.

COSC 2437  Data Structures
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course provides a thorough study of standard structures used in the storing and retrieving of data and the processes by which these structures are created and manipulated. Topics include: object oriented design, linked lists, classes, trees, graphs, hashing, stacks, queues, sorting, searching, and recursion. A grade of C or better is required in the course to receive credit towards the Computer Science BS program.

Prerequisite: (COSC 1436) and (MATH 2305 or 2305*).

TCCNS: COSC 2436

COSC 2465  Linux Systems
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course focuses on providing students with essential knowledge and skills to implement, administer, and troubleshoot servers in a networked environment. Operating system concepts, such as installing a standalone system, file systems authentication, and user support services are explored. Topics will include security issues, user and group administration, active directory services, DHCP, DNS, SSH, backup and restoration strategies and techniques, integrated mass storage technologies and alternative client technologies.

Prerequisite: COSC 1435.

COSC 2466  Network Systems
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
This course focuses on the standards and technologies used to establish inter-network structures that will support a TCP/IP data stream for higher-level services to operate over. This course introduces local area networks (LAN) and wide area networks (WAN). Topics include the TCP/IP and open system interconnection (OSI) models, cabling, switches, routers, protocols, subnetting, and networking hardware and software. Initial switch and router configuration will be examined and evaluated.

Prerequisite: (COSC 1435 and 2465).

COSC 2470  COBOL Programming
4 Semester Credit Hours (4 Lecture Hours)
A concentrated study of the COBOL language as applied to fundamental business computing problems and other data management applications.

Prerequisite: COSC 1435.

COSC 3100  Skills for Computing Professionals I
1 Semester Credit Hour (1 Lecture Hour)
This course focuses on beginning to develop professional skills that computer scientists will need to be successful in their careers and lives. Communication skills will include writing and giving oral presentations. Ethical issues will be explored. This is a class for computing professionals. As such, professional decorum will be required at all times.

COSC 3301  Cyber Security
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to cyber security. A broad range of cyber security issues will be covered, including social engineering attacks, secure coding, computer security, Internet of Things (IoT) security, mobile security, data security, network security, physical security and forensics. This course will cover the concepts of prevention, detection, and response to cyber security threats.

Prerequisite: COSC 1435.

COSC 3324  Object-oriented Programming
3 Semester Credit Hours (3 Lecture Hours)
A study of concepts, terminology, and methodologies used in object-oriented systems, languages, and applications. Students will design and implement software systems using object-oriented analysis and design techniques.

Prerequisite: COSC 2437.

COSC 3325  Game Programming
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce the student to techniques and tools used for all aspects of programming games. Topics will include game graphics, game physics, game AI, and sound. The course will contain lectures and hands-on labs. Students will work independently and in teams.

Prerequisite: COSC 2437.

COSC 3335  Programming for Unmanned Aircraft Systems
3 Semester Credit Hours (3 Lecture Hours)
This course introduces software development for Unmanned Systems (US). Students will be introduced to a variety of relevant topics including the different US platforms, design and implementation of algorithms for US, user interface for US, and state-of-the-art US applications, challenges & solutions.

Prerequisite: (COSC 1435 or 1330) and (MEEN 3335).

COSC 3336  Introduction to Database Systems
3 Semester Credit Hours (3 Lecture Hours)
A study of contemporary database management system concepts, terminology, and methodology for use and implementation. Commercially available systems are discussed and used with emphasis upon the relational model.

Prerequisite: COSC 2437.

COSC 3346  Operating Systems
3 Semester Credit Hours (3 Lecture Hours)
Introduction to operating systems concepts, principles, and design. Topics include: processes and threads, CPU scheduling, mutual exclusion and synchronization, deadlock, memory management, file systems, security and protection, networking, and distributed systems. Selected existing operating systems are discussed, compared, and contrasted.

Prerequisite: (COSC 2437 and 2334).

COSC 3351  Internet Programming
3 Semester Credit Hours (3 Lecture Hours)
Study of prominent web technologies with a focus on creating interactive web applications. Both client-side and server-side programming will be covered. Students will design and implement a web based project using technologies covered in class.

Prerequisite: COSC 3336 or 3336*.

* May be taken concurrently.
COSC 3352 Mobile Programming
3 Semester Credit Hours (3 Lecture Hours)
This course introduces software development for mobile platforms. Students will learn skills for creating and deploying mobile applications. Includes software engineering topics as related to mobile programming, primarily in how software design differs on mobile platforms.
Prerequisite: COSC 2437.

COSC 3353 Survey of Programming Languages
3 Semester Credit Hours (3 Lecture Hours)
A study of selected programming languages for students familiar with programming. Students will write programs in a variety of languages.
Prerequisite: COSC 2437.

COSC 3360 Human-computer Interaction
3 Semester Credit Hours (3 Lecture Hours)
This course introduces concepts and techniques for Human Computer Interaction. Particular emphasis will be placed on vision, audio, and language solutions for use in human-computer interactive systems. In addition, the students will learn how to apply the methods to solve simple HCI problems.
Prerequisite: COSC 1436.

COSC 3370 Software Engineering
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to software engineering principles for the development and maintenance of high quality large software systems. Topics include: software life cycle, delivering on time and within budget, and the development and application of processes and tools for managing the complexities inherent in creating these systems.
Prerequisite: COSC 2437.

COSC 3371 Computer Information Systems Economics
3 Semester Credit Hours (3 Lecture Hours)
An introduction to concepts in information technology and software engineering with a focus on economics and managerial issues. Topics include cost benefit analysis, software and effort estimation, feasibility analysis, information systems proposals, software team coordination, and project management. May not be used as a CS elective for CS majors.

COSC 3372 Network Security
3 Semester Credit Hours (3 Lecture Hours)
This course provides an introduction to the fundamentals of computer and network security and security laws and ethics, topics include, identification of vulnerabilities, forms of attack, appropriate countermeasures, and the detection and defense of the same. Techniques for the securing of hardware, software and data, including physical security are covered.
Prerequisite: COSC 2465.

COSC 3373 Software Project Management
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to the principles for software project management for small and medium-size projects. Many aspects of software project management, including management process, scope definition, time and cost estimation, quality control, human resources, communication, risks and project procurement management will be discussed. A number of applications and tools will be used to implement a class project.
Prerequisite: (COSC 3370).

COSC 3385 Numerical Methods
3 Semester Credit Hours (3 Lecture Hours)
This course introduces concepts for solving problems numerically using computers. Students will learn about number systems, errors of finite representation, and iteration. A survey of basic numerical methods including: solutions to nonlinear equations, solutions to linear systems, approximation, interpolation, zeros of functions, numerical differentiation and integration, and Monte-Carlo methods.
Prerequisite: MATH 2413 and (COSC 1330 or 1435).

COSC 3400 Skills for Computing Professionals
4 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
This course focuses on the professional skills that computer scientists will need to be successful in their careers. There are two key areas of study, communication skills needed by computer scientists and their ethical responsibilities. Communication skills will include: technical writing from a computer science perspective, presentation skills, client interviewing, and reading technical articles. Ethical issues will be explored from a computer science perspective.
Prerequisite: ENGL 1302.

COSC 3474 Cyber Defense I
4 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
This course covers cryptographic tools, cryptographic algorithms, types of malicious software, forms of attacks and software security. Strengths and weaknesses of cryptographic systems are covered as well as the types of attacks on cryptographic systems. Malicious activity signatures, analysis as well as detection will be covered. This course will also cover secure coding principles and types of software issues.
Prerequisite: COSC 3372.

COSC 4100 Skills for Computing Professionals II
1 Semester Credit Hour (2 Lab Hours)
This course focuses on technical writing, workplace scenarios and professional skills that computer scientists will need to be successful in their careers and lives. This is a class for computing professionals. As such, professional decorum will be required at all times.
Prerequisite: COSC 1100 and ENGL 3310.

COSC 4310 Digital Forensics
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce undergraduate students to the fundamentals of computer forensics and cyber-crime scene analysis. The various laws and regulations dealing with computer forensic analysis will be discussed. Students will be introduced to the emerging international standards for computer forensic analysis, as well as a formal methodology for conducting computer forensic investigations. Several Forensics tools such as Encase and FTK will be used to conduct digital forensics investigations.
Prerequisite: COSC 2437.

COSC 4324 Image Processing
3 Semester Credit Hours (3 Lecture Hours)
This course introduces concepts and techniques for image processing. The objective of this course is to introduce the fundamental techniques and algorithms used for processing and extracting useful information from digital images. The students will learn how to apply the image processing methods to solve real-world problems.
Prerequisite: COSC 2437.
COSC 4325  Advanced Game Programming  
3 Semester Credit Hours (3 Lecture Hours)  
This course will introduce advanced concepts for game programming to the student. Topics will include game physics, game AI, advanced shaders, 3D techniques, multiplayer techniques, and networking. The course will contain lectures and hands-on labs.  
Prerequisite: COSC 3325.

COSC 4328  Computer Graphics  
3 Semester Credit Hours (3 Lecture Hours)  
Basic principles and techniques for computer graphics on modern graphics hardware. Students will gain experience in interactive computer graphics using the OpenGL API. Topics include: 2D viewing, 3D viewing, perspective, lighting, and geometry.  
Prerequisite: COSC 2437 and MATH 2413.

COSC 4330  Introduction to Artificial Intelligence  
3 Semester Credit Hours (3 Lecture Hours)  
Foundations, directions, and applications of artificial intelligence including search algorithms, knowledge acquisition, representation, and processing. Students will gain practical experience by implementing many of the basic algorithms.  
Prerequisite: COSC 2437.

COSC 4342  Computer Networks  
3 Semester Credit Hours (3 Lecture Hours)  
Computer-based communication systems. Topics include: advanced computer network architectures, protocols, and programming.  
Prerequisite: COSC 2437 and MATH 2413.

COSC 4343  Algorithms  
3 Semester Credit Hours (3 Lecture Hours)  
Advanced programming techniques for algorithmic and heuristic solutions of problems. Topics include: analysis and design of algorithms, testing of algorithms, optimum and exhaustive solutions, and recursion.  
Prerequisite: (COSC 2437 and MATH 2413).

COSC 4345  Introduction to Machine Learning  
3 Semester Credit Hours (3 Lecture Hours)  
This course gives a broad introduction to machine learning with more emphasis on intelligent system design. Topics to be covered include linear and logistic regression, neural networks, clustering, classification, decision tree, evolutionary computation, feature selection, and reinforcement learning. The course will explore various applications of machine learning to computer science, process modeling, pattern and speech recognition, data mining, and bioinformatics.

COSC 4348  Systems Programming  
3 Semester Credit Hours (3 Lecture Hours)  
The design and implementation of system software such as device drivers, application support libraries, and interprocess communication. Students will study and use systems programming tools.  
Prerequisite: COSC 3346 and (COSC 3353 or 3324).

COSC 4353  Compiler Construction  
3 Semester Credit Hours (3 Lecture Hours)  
This course introduces the basic concepts and mechanisms traditionally employed in language translators, with emphasis on compilers. Topics include: strategies for syntactic and semantic analysis, techniques of code optimization and approaches toward code generation.  
Prerequisite: COSC 3353.

COSC 4354  Senior Capstone Project  
3 Semester Credit Hours (3 Lecture Hours)  
Teamwork and formal methods of systems analysis and design are emphasized. Students will complete a large team project. Fall, Spring.  
Prerequisite: (COSC 3370, 3336 and ENGL 3310).

COSC 4360  Theory of Programming Languages  
3 Semester Credit Hours (3 Lecture Hours)  
The study of programming language design including syntax, semantics, behavior, and implementation issues in imperative, functional, logic, and object-oriented languages. Other topics include type theory, concurrency, data dependency, and nondeterminism.  
Prerequisite: COSC 2437.

COSC 4365  Windows Security  
3 Semester Credit Hours (3 Lecture Hours)  
This course focuses on advanced system administration topics. An in depth understanding of various concepts such as operating systems, servers, file systems authentication, and user support services are explored. Topics include security issues, user and group administration, server and work-station integration, central repositories for updates, Active directory, DMZ, web servers, email servers, electronic system update and maintenance, backup and restoration strategies and techniques, integrated mass storage technologies and alternative client technologies.  
Prerequisite: (COSC 2348) and (COSC 2465).

COSC 4367  Firewall and Intrusion Detection Systems  
3 Semester Credit Hours (3 Lecture Hours)  
This is an applied course which focuses on the standards and technologies used to establish inter-network structures that will support a TCP/IP data stream for higher-level services to operate over. This course introduces firewalls, Intrusion Prevention Systems (IPS), and Intrusion Detection Systems (IDS) technology. Topics include Windows, Linux, Check Point and Cisco firewalls, TCP/IP and open system interconnection (OSI) models, attack traffic analysis, and network based and host based hardware and software. Device configuration will be examined and evaluated with appropriate exercises.  
Prerequisite: (COSC 4365) and COSC 3372.

COSC 4368  Penetration Testing  
3 Semester Credit Hours (3 Lecture Hours)  
This course focuses to increase the students understanding of how to recognize a potential cyber attacker and identify vulnerabilities through the use of vulnerability analysis tools. Students will audit, monitor, and revise system security to ensure appropriate levels of protection are achieved. Incident response and handling, security log analysis, attacker identification, system recovery and postmortem procedures will be addressed.  
Prerequisite: (COSC 3474) and (COSC 4365).

COSC 4369  Incident Response  
3 Semester Credit Hours (3 Lecture Hours)  
This course focuses on the standards and technologies used to establish organization structures that will support information technology incident response, business continuity and disaster recovery efforts. This course introduces incident response, business continuity and disaster recovery planning concepts as well as tools and techniques. Topics include the development and implementation of incident response, business continuity and disaster recovery plans, attack traffic analysis, and network-based and host-based hardware and software. Concepts will be examined and evaluated with appropriate exercises.  
Prerequisite: (COSC 2437) and (COSC 3365) and (COSC 3466) and (COSC 4365).
COSC 4370 Models of Computation
3 Semester Credit Hours (3 Lecture Hours)
A study of formal languages, grammars, and associated abstract
machine models. Topics include regular and context-free languages and
grammars, finite state automata, Turing machines, and the Chomsky
hierarchy.
Prerequisite: MATH 2305.

COSC 4396 Directed Independent Study
3 Semester Credit Hours
See College description. Offered on sufficient demand.

COSC 4590 Selected Topics
1-5 Semester Credit Hours (1-5 Lecture Hours)
Variable content. May be repeated for credit depending on topic. Offered
on sufficient demand.
Prerequisite: COSC 4365.

COSC 4690 Contracted Field Experience in Computer Science
1-6 Semester Credit Hours (6 Lecture Hours)
Individual contract agreement involving student, faculty, and cooperating
agency to gain practical experience in off-campus setting.

Geographic Information Science, Minor

Program Requirements
Students majoring in other academic fields who wish to earn a minor in
Geographic Information Science must complete the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

<td>19-23</td>
</tr>
</tbody>
</table>

It is assumed that the student has completed all prerequisites and
corequisites for the required courses.

Courses

GISC 1301 Physical Geography
3 Semester Credit Hours (3 Lecture Hours)
The goal of this course is to encourage you to think geographically,
examining the interactions between physical systems and human
activities. Introduction to topics covered include elements of
Physical Geography (studies of atmosphere, ocean and land surface
environments), Geographic Information Systems (computer systems that
capture, analysis, and display of geographic information), and human
environmental interactions. Cross listed with GEOG 1301.
TCCNS: GEOG 1301

GISC 1336 Digital Drafting and Design
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
An introduction to graphic and drafting principles and practices in
surveying and mapping science. This course includes the development of
the basic drafting skills needed to produce surveying plats and graphical
presentations. The elements of descriptive geometry are addressed. A
major component of the course is an introduction to the fundamentals of
computer-aided drafting and design (CADD). Spring.

GISC 1470 Geospatial Systems I
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Introduction to geographic information systems (GIS) and its theoretical
foundations. Topics covered include vector and raster data models,
aquisition and manipulation of data, cartography, current topics, data
quality, and basic spatial analysis. Principles and uses of GIS software
also covered. Fall and Spring.

GISC 2250 Field Camp I
2 Semester Credit Hours (6 Lab Hours)
A one-week field camp with intensive field data collection and
computations. Traversing between control points. Digital contour data
and leveling control. Detail spatial data by total station. Construction set
out using total station and steel band. Taken during the sophomore or
junior year. Spring.
Prerequisite: GISC 2470.

GISC 2301 Geospatial Systems II
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
An intermediate level course in the concepts and applications of
geospatial information systems (GIS). Topics covered include spatial
database design and management, raster analysis, terrain mapping,
analysis, and applications. Spring.
Prerequisite: (GISC 1470).

GISC 2438 Geospatial Software Systems I
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Introduction to the design and development of GIS software to solve
spatial problems. Topics covered include programming basics, design
and implementation common tasks in GIS applications. Fall.
Prerequisite: GISC 1470 and COSC 1435 or COSC 1330.

GISC 2470 Geospatial Plane Measurement I
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Historical introduction to field measurement and mapping; distance
measurement using electronic distance meters; calibration and
reduction. Leveling instruments; principles, construction, testing and
adjustment; ancillary equipment. Optical and electronic theodolites.
Traverse computations and adjustment. Coordinate systems. Map
projections. Fall.
Prerequisite: MATH 1316 or 2413.

GISC 3300 Geospatial Mathematical Techniques
3 Semester Credit Hours (3 Lecture Hours)
Characteristics of geographic/spatial information; overview of relevant
sections of numbers, algebra and geometry, plane and spherical
trigonometry, matrices, determinants and vectors, curves and surfaces,
integral and differential calculus, partial derivatives, with an emphasis on
geospatial applications. Concepts of geospatial coordinate systems and
geospatial coordinate transformations; overview of spatial statistics and
best-fit solutions with geospatial applications.
Prerequisite: MATH 2413 and 3342.
GISC 3325 Geodetic Science
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470.

GISC 3412 Geospatial Plane Measurement II
4 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Principles and reduction of observations and errors in spatial measurement. Techniques of horizontal and vertical angle measurement for precise positioning. Trigonometric heighting and vertical staff tacheometry. Setting out of structures. Design and computation of horizontal and vertical curves. Spring.
Prerequisite: (GISC 2470 and 1336).

GISC 3420 Geospatial Software Systems II
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Advanced programming course focusing on the design and implementation of GIS scripts and GIS web applications. Topics covered include GIS web applications, web mashups, GIS scripts, GIS tool creation, and advanced user interface design and implementation. Spring.
Prerequisite: GISC 2438.

GISC 3421 Visualization for GIS
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Basic elements of thematic cartography, cartographic theory, and cartographic projections. Integration of cartographic principles with GIS visualization. Principles of map design with GIS data. Spring.
Prerequisite: GISC 2301.

GISC 4180 Geospatial Systems Internship
1 Semester Credit Hour (1 Lecture Hour)
Internship education requires work with approved Geospatial Systems related industry employer. Students provide weekly written reports and final presentation to program at the end of internship. Must have completed 60 semester hours before attempting. Fall, Spring, and Summer.

GISC 4305 Legal Aspects of Spatial Information
3 Semester Credit Hours (3 Lecture Hours)
Legal ownership of spatial data and information collected in the public sector. Public access to large digital databases. Copyright law as applied to spatial data. Legal issues related to property boundaries, statutory boundaries, voter district boundaries, and jurisdictional boundaries. Government fees and charges for access to spatial data. Social and economic value of spatial data. Spring.
Prerequisite: GISC 2470.

GISC 4315 Satellite Positioning
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Prerequisite: GISC 2470 and MATH 2413.

GISC 4318 Cadastral Systems
3 Semester Credit Hours (3 Lecture Hours)
Land ownership recording systems used in Texas and U.S. Investigation and research for artificial and natural boundaries. Title searches at the county courthouse, title plants, and other sources for cadastral research. Riparian and littoral boundaries. Boundary marking and preparation of cadastral plans. Metes and bounds descriptions. Writing field notes. Urban and rural cadastral issues. Use of coordinate systems in cadastral mapping. Fall.
Prerequisite: GISC 2470.

GISC 4320 Hydrography
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Introduction to offshore and inshore hydrographic mapping. Tidal datums and their computation. Review of hydrographic and nautical charts. Electronic position finding and bathymetric data collection. Echo sounding, side scan sonar. Seafloor mapping and underwater locating. Beach (combined land and hydrographic) mapping. Spring even years.
Prerequisite: GISC 2470 and MATH 2413.

GISC 4326 Geomatics Professional Practice
3 Semester Credit Hours (3 Lecture Hours)
An intensive one-week summer course presented by practicing geomatics professionals covering many of the aspects of operating a professional surveying practice in the State of Texas. Topics cover surveyor responsibility and liability, the surveyor in court, standards of practice, surveying mathematics, Texas coordinate system, celestial observations, and project control.
Prerequisite: GISC 2250.

GISC 4335 Geospatial Systems III
3 Semester Credit Hours (2 Lecture Hours, 2 Lab Hours)
Advanced spatial analysis and modeling in GIS. Topics covered include exploratory analysis of spatial data, network analysis, spatial point patterns, area objects and spatial autocorrelation, and spatial interpolation. Also covers new approaches to spatial analysis. Fall.
Prerequisite: GISC 2301 and MATH 3342.

GISC 4340 Geospatial Computations and Adjustment
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: GISC 2470, MATH 3342 and GISC 3300.

GISC 4350 Field Camp II
3 Semester Credit Hours (6 Lab Hours)
A one-week field camp undertaking projects in cadastral, engineering, hydrographic, and geodetic positioning. Reduction of digital field data to produce final plans and reports. Taken during the senior year. Spring.
Prerequisite: GISC 3412, 4318 and 2250.

GISC 4351 Geospatial Systems Project
3 Semester Credit Hours
This course allows students to employ knowledge attained in other courses to create a project to spatially analyze information of interest to you and your field of study. Students will either undertake a GIS project to manage, analyze, and visualize spatial data, or a survey project in cadastral, topographic, engineering, hydrographic, or geodetic positioning survey. Spring. Students who enroll in the project course will need permission from the instructor.
Prerequisite: GISC 4350 or (GISC 3421 and 4335).
GISC 4371 History of Land Ownership
3 Semester Credit Hours (3 Lecture Hours)
This course prepares students by providing proper knowledge of how land transferred throughout history and techniques for researching land ownership in the present. Students receive an overview of legal aspects and other topics relative to land issues applicable for Land Surveyors, Civil Engineers, and GIS professionals, among others. Spring.
Prerequisite: GISC 3412.

GISC 4431 Remote Sensing and Photogrammetry
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Provides the foundations to interpret, process, and apply remotely sensed data acquired by satellites and sub-orbital platforms (aircraft, UAVs) for mapping and analysis of our natural and built environment. Principles of electromagnetic energy-matter interaction, remote sensing systems and data characteristics, digital image processing, and information extraction methods will be covered. Included is treatment of: aerial photogrammetry; multispectral, thermal, and hyperspectral sensing; earth observation satellites; radar and lidar; emergent topics. Emphasis will be on their use for geospatial and environmental applications. Fall.
Prerequisite: (PHYS 2425, MATH 3342 and GISC 3300) or (MEEN 3310 and PHYS 2425).

GISC 4590 Selected Topics
1-5 Semester Credit Hours (1-5 Lecture Hours)
May be repeated for credit depending on topic. Variable content.

GISC 4596 Directed Independent Study
1-5 Semester Credit Hours
See College description. Offered on request. May be repeated for credit.

GISC 4690 Co-operative Education
1 Semester Credit Hour (1 Lecture Hour)
Co-op education allows students to take time off their full-time studies to gain valuable experience-based learning with employers willing to put on students for a semester (14 weeks), six months, or over the summer. The Co-op program allows students to maintain their full-time status as a student (continue health insurance coverage with parents, not effect student loan repayment, access to college activities, etc.) while undertaking work in their field of interest. The Co-op program is a partnership between the employer, the student, and the university.

Geography, Minor

Program Description

Introduction
An Interdisciplinary Geography minor offers undergraduate students in-depth study of Geography. The purpose of the Geography minor is to give students an understanding of the breadth of the discipline of geography, the tools of geography, and an appreciation for human and environmental spatial interactions. Students electing a minor in Geography should, prior to completing 6 hours of course work for the program, contact the College of Science and Engineering to be assigned an advisor for the minor. The advisor will aid the student in filing a minor plan.

Program Requirements
The minor must contain at least 19 semester hours of course work from the below courses. All courses used to satisfy the minor requirement must be passed with a grade of “C” or better.

Cooperative Education
3 Semester Credit Hours (3 Lecture Hours)
Co-op education allows students to take time off their full-time studies to gain valuable experience-based learning with employers willing to put on students for a semester (14 weeks), six months, or over the summer. The Co-op program allows students to maintain their full-time status as a student (continue health insurance coverage with parents, not effect student loan repayment, access to college activities, etc.) while undertaking work in their field of interest. The Co-op program is a partnership between the employer, the student, and the university.

Mechanical Engineering Technology, Minor

Program Requirements
This minor is designed to serve students who are interested in supplementing their major with technical skills in alternative energy technologies. A minimum of 12 hours must be taken at Texas A&M University-Corpus Christi. For additional information contact an academic advisor in the College of Science and Engineering.

Code | Title | Hours
--- | --- | ---
ENTC 3302 | Manufacturing Processes | 3
ENGR 2325 | Statics | 3
ENGR 2326 | Dynamics | 3
ENTC 2414 | Circuit Analysis I | 4
ENTC 3320 | Thermodynamics | 3
Courses

ENTC 2414  Circuit Analysis I
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Fundamental aspects of DC circuit analysis: charge, voltage, resistance, current, and power; Ohm's Law; methods of analysis; series and parallel circuits; Kirchhoff's voltage and current laws; Thevenin and Norton Theorems; electrical measurement instruments; and use of analysis software. Offered: Fall/Spring.
Prerequisite: MATH 2413.
Co-requisite: PHYS 2426, SMTE 0099.
TCCNS: ENGT 1401

ENTC 2490  Special Topics
1-4 Semester Credit Hours (1-4 Lecture Hours, 3 Lab Hours)
Subject material variable. May be repeated for different topics.

ENTC 3220  Thermal-Fluids Laboratory
2 Semester Credit Hours (4 Lab Hours)
Application of measurement instrumentation and experimental techniques utilized in thermodynamics and fluid mechanics. Experiments and project in hydrostatics, hydrodynamics, and thermodynamics. Offered in Spring.
Prerequisite: (ENTC 3306 and 3320).
* May be taken concurrently.
Co-requisite: SMTE 0099.

ENTC 3302  Manufacturing Processes
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to metal and non-metallic manufacturing processes; casting, forging, rolling, extrusion, sheet metal forming, cutting tools turning and milling operations, abrasive machining, welding and joining, powder compaction, molding, forming of plastics, surface treatment, human factors and safety. Offered: Fall/Spring.
Prerequisite: ENGR 1312 and 3322.
Co-requisite: SMTE 0099.

ENTC 3306  Fluid Mechanics
3 Semester Credit Hours (3 Lecture Hours)
Fluid properties, fluid statics, dynamics, and kinematics, conservation of energy and momentum incompressible, laminar and turbulent flow. Similitude and dimensional analysis, and viscous flow. Offered: Fall (Spring as needed).
Prerequisite: (ENTC 2326 or ENGR 2326).

ENTC 3308  Strength of Materials
3 Semester Credit Hours (3 Lecture Hours)
Concepts in strength of materials, stress, strain; torsion; deformation under load; direct, shear, and combined stresses; shear and moment diagrams; Mohr's circle; stress concentrations, bending stresses and torsional shear stresses, deflection in beams and shafts; columns, connections, and pressure vessels. Offered: Fall (Spring as needed).
Prerequisite: (ENTC 2325 or ENGR 2325) and (ENTC 3410).

ENTC 3320  Thermodynamics
3 Semester Credit Hours (3 Lecture Hours)
Theory and application of energy methods in engineering; conservation of mass and energy; energy transfer by heat, work and mass; thermodynamic properties; analysis of open and closed systems; the second law of thermodynamics and entropy; gas, vapor and refrigeration cycles. Offered: Fall/Spring.
Prerequisite: PHYS 2425 and MATH 2414.

ENTC 3323  Robotics and Automation
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Automation in a manufacturing and assembly setting, material handling systems, remote guided vehicles, automated storage and retrieval systems, computer numerical machine tools, robotics. Offered: Spring.
Prerequisite: ENTC 3415.
Co-requisite: SMTE 0099.

ENTC 3350  Human Factors Engineering
3 Semester Credit Hours (3 Lecture Hours)
Application of human factors engineering principles utilized in mechanical system and product design. Overview of human characteristics and research and design techniques.
Prerequisite: (ENTC 3302 or 3302*).
* May be taken concurrently.

ENTC 3455  Solid Modeling and Finite Elements
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Use of computer aided design and solid modeling tools in engineering design and manufacturing including: solid modeling, stress, flow and heat transfer analysis using finite element methods, and rapid prototyping. Offered: Spring.
Prerequisite: ENTC 3308.

ENTC 4210  Solid Mechanics Laboratory
2 Semester Credit Hours (4 Lab Hours)
Prerequisite: (ENTC 4330*).
* May be taken concurrently.
Co-requisite: SMTE 0099.

ENTC 4320  Heat Transfer
3 Semester Credit Hours (3 Lecture Hours)
Fundamental study of convection, conduction and radiation as applied to heat transfer, heat exchangers, boilers, other heat transfer equipment. Offered: Spring.
Prerequisite: ENTC 3306 and 3320.

ENTC 4322  Programmable Logic Controllers
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Introduction to PLCs and their use in industrial automation. Topics include programming, counters, timers, interrupts, and process control applications. Offered: As needed.
Prerequisite: ENTC 3416.
Co-requisite: SMTE 0099.

ENTC 4330  Design of Machine Elements
3 Semester Credit Hours (3 Lecture Hours)
Stress analysis of deformable bodies and mechanical elements; stress transformation; combined loading; failure modes; material failure theories; fracture and fatigue; deflections and instabilities; thick cylinders; curved beams; design of structural/mechanical members; design processes for shafts, bearings, springs, fasteners, and mechanical joints.
Prerequisite: ENTC 3308.

ENTC 4331  Unit Processes
3 Semester Credit Hours (3 Lecture Hours)
Principles and methods for staged separation processes including distillation, absorption and stripping, extraction, and adsorption systems. Offered in Fall and Spring.
Prerequisite: ENTC 4320.
ENTC 4332 Process Modeling and Control
3 Semester Credit Hours (3 Lecture Hours)
Prerequisite: ENTC 3306.

ENTC 4333 Chemical Reaction Engineering
3 Semester Credit Hours (3 Lecture Hours)
Fundamental principles of chemical reaction engineering and application to design and analysis of basic chemical reactors containing both homogeneous and heterogeneous reactions. Offered Fall and Spring.
Prerequisite: ENTC 4331 and 4332.

ENTC 4335 Energy Conversion
3 Semester Credit Hours (2 Lecture Hours, 3 Lab Hours)
Installation, design characteristics, operational performance, and maintenance of motors, turbines, pumps and compressors. Introduction to global energy concerns; fossil and nuclear fuels; energy consumption analysis; energy management and conservation techniques; renewable and alternative energy sources. Modern energy conversion devices such as fuel cells, photovoltaic cells, and micro-power turbines.
Prerequisite: ENTC 3320.

ENTC 4350 Capstone Projects
3 Semester Credit Hours (1 Lecture Hour, 5 Lab Hours)
This course allows students to employ the knowledge attained in other courses to implement (including building, testing, and documenting) the project approved in ENTC 4415 - Project Justification and Management within budget and on schedule. Course requirements include a written report and oral presentations. Normally taken in the student's last semester.
Prerequisite: ENTC 4415.
Co-requisite: SMTE 0099.

ENTC 4360 Mechanical System Design
3 Semester Credit Hours (3 Lecture Hours)
Analysis, management and cost, team work, optimal design, and computer simulation of mechanical systems and components; Applications in fluid flow and heat transfer, machine elements, and stress analysis. Selected course topics are assigned as projects.
Prerequisite: ENTC 4330.

ENTC 4415 Project Justification and Management
4 Semester Credit Hours (3 Lecture Hours, 2 Lab Hours)
Foundations of engineering economy, cash flow and equivalence, and project justification. Introduction to project management, planning, scheduling, and control, use of project management software, GANTT charts, PERT charts, critical path. Students prepare proposals, including specifications, timelines, schedule, and budget, for projects to be implemented in ENTC 4350 - Capstone Projects.
Co-requisite: SMTE 0099.

ENTC 4446 Control Systems I
4 Semester Credit Hours (3 Lecture Hours, 3 Lab Hours)
Introduction to control systems; open and feedback; Laplace transform and frequency response; control valves; electric motors; P, PI, and PID modes of control; analog and digital controllers Process characteristics; analysis of control systems; gain and phase margin; stability.
Prerequisite: ENTC 2414.

ENTC 4490 Selected Topics
1-4 Semester Credit Hours (1-4 Lecture Hours)
Subject material variable. May be repeated for different topics.

ENTC 4496 Directed Independent Study
1-4 Semester Credit Hours
Requires a formal proposal of study to be completed in advance of registration, approval of supervising faculty and chairperson.

College of Liberal Arts

The College of Liberal Arts offers undergraduate and graduate study in the humanities, the social sciences, and the visual and performing arts. The College strives to prepare students for productive lives in a diverse multicultural world by developing intellectual and creative, communication, and critical thinking skills. It provides majors and minors in specialized subjects in the arts, humanities, and social sciences. Teaching provides advanced knowledge and skills in a setting that emphasizes interaction among students and faculty. The College seeks to develop habits of learning and a commitment to lifelong inquiry and intellectual growth.

College of Liberal Arts

• Our college values learning that results from purposeful relationships within vibrant and dynamic communities.
• Our college values learning that affects the whole individual through all aspects of our humanity (from the emotive to the rational).
• Our college values learning that produces responsible citizens who engage in the communities around them.
• Our college values learning that engages in research and produces scholarship which extends knowledge and, through this, our regional, national, and global reputations.

School of Arts, Media, and Communication (SAMC)
The mission of the School of Arts, Media & Communication is to develop and promote collaboration, innovation, and creation among students and faculty in visual arts, music, theatre, dance, media, and communication. SAMC students engage in experiential learning, develop leadership, teamwork, and organizational skills, and apply 21st century technology in service of expressing and understanding human experience. SAMC offers cultural enrichment and collaborative opportunities to all university students and members of the South Texas community. To support this mission, the School of Arts, Media & Communication subscribes to the highest academic, artistic, and ethical standards.

Pre-Law
Pre-law students should consult with a pre-law advisor about the proper selection of a major and of elective courses. Students may choose to minor in pre-law, but it is not a requirement to obtain pre-law advising. Advising includes providing information about law schools, admission requirements, and the Law School Admissions Test (LSAT).

Specialized Accreditation and Approval
The Texas A&M University-Corpus Christi music program is an accredited institutional member of the National Association of Schools of Music.
Baccalaureate Degree Requirements

Total Hours
A minimum of 120 semester hours of credit is required for the baccalaureate degree. Some curricula or combinations of fields require more. No remedial coursework may apply toward the degree.

Upper-Division Hours
A minimum of 45 semester hours of upper-division credit (junior- and senior-level course hours) is required for the baccalaureate degree.

Major-Study Requirements
A student must attain a minimum of 30 semester hours in the major field of study, not including any coursework taken as part of the Core Curriculum Program. At least 18 of these 30 hours must be upper-division (numbered 3000 or above) courses. Some curricula or combinations of fields require more. Specific course and major-study hour requirements for each discipline are given in the discipline course listing section of this catalog. Please consult that section for specific requirements that must be met for each disciplinary major. The BA and BS in University Studies and the BAAS degree do not have these requirements.

Minor-Study Requirements
To attain a minor in the College of Liberal Arts, a student must complete the program designed for that minor. Each minor consists of a minimum of 18 semester hours, at least 12 semester hours of which must be at the upper-division level. Some specific fields may require more. Only 6 semester hours that count towards a major may be applied to a minor or certificate. At least 9 semester hours in the minor must be taken in residence at A&M-Corpus Christi. The student must have an overall GPA of 2.0 in the minor field. Specific course and major-study hour requirements for each discipline are given in the discipline course listing section of this catalog. Please consult that section for specific requirements that must be met for each disciplinary minor. Requirements for interdisciplinary minors are listed in this section of the catalog.

Course Requirements
Students are expected to meet all course requirements indicated in the course syllabus.

Residence Requirement
The term “residence” is here defined as “coursework completed at the degree granting institution.” To be granted a baccalaureate degree from A&M-Corpus Christi, a student must successfully complete at least 30 semester hours of upper-division coursework from this university. A minimum of 12 hours of these 30 must be in the major. Hours earned by credit by examination may not be used to fulfill the residence requirement. Hours earned through credit by examination at another institution will likewise not affect the residence requirement calculation.

Grade-Point Average
A minimum grade-point average of 2.0 ("C") on a 4-point scale in all work taken at this University is required for graduation. Additionally, a minimum grade-point average of 2.0 ("C") is required in all courses applied to the student’s declared major field of study, and in all courses applied to any declared minor field of study for conferral of degree. Individual disciplinary fields, however, may set higher standards than the College minimum for their majors and minors.

Activity Courses
A maximum of 4 semester hours of Kinesiology activity coursework may be included as elective credit in the BA, BM, BFA and BS degree programs.

General Education Requirement
Students must meet the University’s General Education requirements, which include the 42 hour core curriculum (see sections entitled “Undergraduate Programs (p. 42)” and “Core Curriculum Program (http://catalog.tamucc.edu/undergraduate/university-college/programs/core-curriculum-program/)”) and First-Year Seminars.

College Language Requirement
All students majoring in degree programs offered by this college, other than the BFA in Art, specific concentrations under the BM in Music (Instrumental Teacher Certification, Vocal Teacher Certification and Instrumental Performance), the BAAS degree, and the BA and BS in University Studies, are required to take 6 college-level hours of a second language. Placement in a language course will be at the student’s proficiency level as determined by an assessment test, if available at the College of Liberal Arts. Students may also obtain credit by any of the alternative means described below. Language means a language in the traditional sense; i.e., a language with a culture, such as Spanish or French. American Sign Language is accepted. Language does not include artificial or computer languages.

One may satisfy this requirement in one of two ways:

1. earning a CLEP, AP, or ACTFL test score equivalent to one year of language study at A&M-Corpus Christi;
2. successfully completing two semesters of a single foreign language at the University.

Spanish Placement Test
If students decide to meet this requirement by taking two semesters in Spanish at this university, they must take the Spanish Placement test prior to registering in order to enroll in the appropriate language course. The test will be used to determine whether the student should register for Spanish 1311, 1312, 2311, 2313 or any upper division Spanish classes. This test does not give you university credits, nor does it provide a waiver for the requirement. The test is free of charge to registered TAMU-CC students and can be taken from any computer with network access to Blackboard. After taking the test, students will be contacted via Blackboard, My Grades. Soon after taking and submitting the test, students will be contacted with information about the most appropriate class for them based on their test results.

Students who score 1-40 will be automatically placed in SPAN 1311. Those who score 41-60 will be automatically placed in SPAN 1312. Finally, students with scores 61 and above will be evaluated by Spanish faculty, who will contact students with further information about appropriate course placement and registration.

Further information about the Spanish Placement Test can be obtained from the Spanish Program (https://www.tamucc.edu/liberal-arts/departments/humanities/spanish/) in the College of Liberal Arts or by visiting its web site under Spanish Placement Test (https://www.tamucc.edu/liberal-arts/departments/humanities/spanish/placement-test-instructions.php).

All ARAB, CHIN, FREN, GERM, and SPAN courses will meet this requirement.
Foreign students who have successfully taken the Test of English as a Foreign Language (TOEFL) may elect to choose English as their second language. English is considered to be the first language for all other students. Additionally, international and naturalized students who have provided proof of completion of high school in a foreign language (their native language) and who have successfully completed the English Composition and Oral Communication components of the University Core Curriculum Program may choose English as their second language to meet this requirement. English is considered to be the first language for all other students.

**Degree Plan**

The degree plan is the formal statement of requirements that must be completed before a degree will be granted. When the student is prepared to declare a major program of study within a particular discipline, the student should prepare a formal degree plan. It is recommended that the student have decided on a major program of study and prepare a degree plan no later than the second semester of the sophomore year. If the student is transferring into the University at a point after the second semester of the sophomore year, it is recommended that a degree plan be prepared during the student’s first semester of residence.

Degree plans are prepared in the CLA Academic Advising Center. The University uses an online Degree Audit system. Any amendment must be approved by the Department Chair and the Office of the Dean. All courses and requirements specified in the final degree plan audit must be completed before a degree will be granted.

**Interdisciplinary Minors**

In order to fulfill the general objectives of Liberal Arts, the College offers a number of interdisciplinary minors. Minors require a minimum of 18 semester hours beyond the Core, a minimum of 12 semester hours at the upper-division level, and a minimum of 9 semester hours in residence. See alphabetized program listing for descriptions of the following interdisciplinary minors:

- Digital Journalism (p. 448)
- Latin American Studies (p. 406)
- Mexican American Studies (p. 415)
- Pre-Law (p. 424)
- Public Relations (p. 455)
- Social Work (p. 430)
- Technical and Professional Writing (p. 435)
- Women's, Gender, and Sexuality Studies (p. 440)

For a description of the Minor in Geography, please see the College of Science and Engineering (http://catalog.tamucc.edu/undergraduate/science-engineering/) section of this catalog.

**Teacher Certification Programs**

Students seeking certification in secondary fields or in all levels in art, music, Spanish or theatre must major in an approved teaching field and complete all major study and related requirements for a baccalaureate degree in that field. Students must also meet teacher certification requirements as stipulated by the College of Education and Human Development. Students are urged to consult the Certification Office of the College of Education and Human Development for complete and current information about teacher certification requirements.

Major study programs in the College of Liberal Arts offering teacher certification are:

- Art
- Art - Grades EC-12
- English
- English Language Arts/Reading - Grades 7-12
- English Language Arts/Reading - Grades 4-8
- History
- History Grades 7-12
- Social Studies Grades 7-12
- Social Studies Grades 4-8
- Music
- Music Grades EC-12
- Spanish
- Spanish Grades EC-12
- Theatre
- Theatre Arts Grades EC-12

Major study and course requirements for teacher certification are detailed in the discipline course listing sections of this catalog. For more information regarding teacher certification, please consult the College of Education and Human Development (p. 105) section of this catalog.

In addition to the academic specializations discussed above, teacher certification programs require the following in general education and professional development:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Core Curriculum Program</td>
<td>42 hrs</td>
</tr>
<tr>
<td></td>
<td>First-Year Seminar (if required)</td>
<td>0-2 hrs</td>
</tr>
<tr>
<td></td>
<td>Professional Development Courses</td>
<td>27-30 hrs</td>
</tr>
</tbody>
</table>

Please see the Certification Office in the College of Education and Human Development for Professional Development courses needed for certifications.

**Grade Point Average**

A minimum grade point average of 2.75 in all academic work or last 60 hours of 2.75 attempted and no grade below “C” in education courses within the professional education block of courses is required. (See College of Education and Human Development, “Admission to Teacher Education” and “Admission to Student Teaching” for other requirements.) Specific disciplines may require a higher GPA in the field of study than a 2.75. Please refer to the specific certification discipline for GPA requirement in the subject of field.

**Certification Examination**

Upon satisfactory completion of all subject field and professional development courses, a student may register for the subject field certification examination, called TExES (Texas Examinations of Educator Standards). A student wishing to take the TExES prior to program completion must satisfy the following:

1. Make pre-specified acceptable scores on TExES practice tests, or departmental equivalent, and participate in practice test review and analysis session.
2. Provide official permit with signature of Program Coordinator or designated person for each teaching field on the student's certification plan.

Alteration of a Certification Plan
Any amendment to a degree plan originally filed must be approved by the student's academic advisor, the Department Chair, and the Certification Officer of the College of Education and Human Development for the degree to be granted.

Special Courses
Cross-Listed Courses
Some courses may be cross-listed by two or more disciplines. Such courses may be counted as part of the required hours for a particular major by registration for the appropriate course prefix. Cross-listed courses may not be repeated under another prefix for additional credit.

Topics Courses (1-3 sem. hrs.)
Undergraduate topics courses are offered in most areas of study in the College under the 4390 number. The subject of study varies and is announced in the Semester Schedule. These courses may be repeated for credit when topics vary.

Individual Study Courses
Directed Individual Study (DIS) 4396 1-3 sem. hrs.

Directed Individual Study is a carefully planned special study on an academic topic not offered as part of the regular undergraduate curriculum. DIS is carried out as a tutorial under the direction of, and evaluated by, a regular member of the faculty of the College of Liberal Arts. Enrollment is restricted to advanced students who have demonstrated both academic ability and the capacity for independent work. Enrollment is by application only, and must be approved by the instructor and Department Chair in advance of registration. Completed applications must be received in the Dean's Office by the last class day of the semester preceding intended enrollment. Prerequisites: 1) At least 6 semester hours of classroom coursework in the field at Texas A&M University-Corpus Christi. 2) A minimum GPA of 3.0 on all work in the field at Texas A&M University-Corpus Christi. 3) At least one previous classroom course with the supervising instructor. A maximum of 6 semester hours of 4396 credit may be counted towards the baccalaureate degree.

Applied Experience 4398 3 sem. hrs.
Applied Experience is a practical work experience related to the student's major area of study and career goals. It is intended to provide an opportunity for a student to gain first-hand experience in an unfamiliar field. Consequently, Applied Experience credit may not be granted for a student's regular work assignment or for previous work experience. Registration is by application. The application must include a clearly written description of the duties and responsibilities involved in the Applied Experience project, and be signed by the student, the on-site supervisor, and the faculty supervisor. Completed applications must be received in the Dean’s Office by the last class day of the semester preceding intended registration. This course is graded “credit” or “no credit.” No more than three semester hours of Applied Experience credit may be counted toward the baccalaureate degree. Undergraduate Applied Experience course will include no less than one hundred hours and no more than 150 hours of work experience per semester.

Workshop Courses (1-6 sem. hrs.)
Undergraduate workshop courses are offered in many areas of study in the College ending in a 0099 series number. The subjects vary and are announced in the semester schedule. These courses may be repeated when topics vary.

Undergraduate Courses
All course descriptions are located in Courses A-Z (p. 640).

Programs
- Bachelor Degree Programs (p. 216)
  - Applied Arts and Sciences, BAAS (p. 216)
  - Criminal Justice, BS (p. 225)
  - English, BA (p. 229)
  - History, BA (p. 236)
  - Philosophy, BA (p. 242)
  - Political Science, BA (p. 245)
  - Psychology, BA (p. 249)

  - Spanish, BA (p. 257)
  - University Studies, BA (p. 262)
  - University Studies, BS (p. 264)
- Bachelor Degree Programs - School of Arts, Media & Communication (p. 266)
  - Art, BA (p. 266)
  - Art, BFA (p. 271)
  - Communication Studies, BA (p. 276)
  - Graphic Design, BA (p. 281)
  - Media Arts, BA (p. 287)
  - Music, BA (p. 292)
  - Performance (Instrumental), BM (p. 304)
  - Performance (Voice), BM (p. 314)
  - Theatre, BA (p. 323)
- Teacher Certifications (p. 330)
  - English, BA with Secondary Teacher Certification in English Language Arts (Grades 7-12) (p. 330)
  - English, BA with Teacher Certification in English Language Arts (Grades 4-8) (p. 337)
  - History and Social Studies, Teacher Certification (p. 342)
  - Spanish, Teaching Certification EC-12 (p. 350)
- Certification Programs - School of Arts, Media & Communication (p. 354)
  - Art, BFA with Teacher Certification (p. 354)
  - Music, BM with EC-12 Teacher Certification (p. 360)
  - Theatre Arts, Teacher Certification (p. 370)
- Certificate Programs (p. 376)
  - Advanced TESOL, Certificate (p. 376)
  - Spanish/English Translation, Certificate (p. 382)
  - TESOL, Certificate (p. 385)
  - Writing for Non-Profits, Certificate (p. 391)
- Certificate Programs - School of Arts, Media & Communication (p. 392)
  - Dance, Certificate (p. 392)
  - Minors (p. 394)
Students are required to earn a minimum of 120 hours for the Bachelor of Applied Arts and Sciences degree. Students can select one of eight tracks in the BAAS program: Applied Leadership, Childhood Development/Early Childhood Education, Community and Mental Health, Criminal Justice, Environmental and Occupational Safety/Emergency Response, Information Technology, Legal Studies, or Technical Communication.

Double Majors

While Texas A&M University-Corpus Christi allows students to obtain a double major, there are some restrictions which apply for those wishing to double major in BAAS and another TAMU-CC major.

- A course cannot count towards requirements for both a BAAS track and another major.
- Major combinations with significant course overlap are not allowed, and include (but are not limited to) the following:
  - BAAS Childhood Development/Early Childhood Education and College of Education and Human Development Elementary Education degrees
  - BAAS Criminal Justice and College of Liberal Arts Criminal Justice degrees
  - BAAS Information Technology and College of Science and Engineering Computer Science degrees
- BAAS students must receive written approval from both academic advisors before declaring a double major that includes BAAS.

Minors

When declaring a minor in conjunction with the BAAS degree, there are several items to keep in mind:

- Only 6 hours (or two courses) can count towards both the requirements of the BAAS major and the declared minor.
- The minor must have a minimum of 12 credit hours of distinctive coursework that is not used towards the BAAS major course requirements.
- Based on the above specifications, students cannot, for example, complete the BAAS Technical Communication degree and obtain a Technical and Professional Writing Minor.

Applied Arts and Sciences, BAAS Program Description

The Bachelor of Applied Arts and Sciences (BAAS) program at Texas A&M University-Corpus Christi is designed to build on the knowledge and skills that students have gained through vocational and/or technical studies at an accredited institution. The program consists of three component areas: first, the transfer of vocational/technical credit hours (from 3-42 hours); second, the completion of the Core Curriculum Program (42 hours) or the core of another accredited institution; and third, the completion of both a professional track curriculum and UNIV 4350 University Studies Capstone (3 sch) that together provide both academic and professional depth to individuals who possess recognized competence in a vocations or technical field (21-27 hours).
Full-time, first time in college students are required to take the first-year seminars.
• UNIV 1101 University Seminar I (1 sch)
• UNIV 1102 University Seminar II (1 sch)

</tbody>
</table>

Students must consult with the BAAS Advisor to select appropriate electives to meet graduation requirements. All BAAS students must earn a minimum of 120 semester credit hours. The number of electives will be dependent on how many credit hours that student still needs to earn in order to reach 120 hours. Forty-five (45) out of the 120 hours must be upper-division hours and 30 of these upper-division hours must be taken at Texas A&M University-Corpus Christi.

### First Year
#### Fall
- University Core Curriculum 3
- College Core 3
- College Core 3
- UNIV 1101 University Seminar I 1
- POLS 2306 State and Local Government 3

#### Hours 16

### Second Year
#### Fall
- College Core 3
- College Core 3
- HIST 1301 U.S. History to 1865 3
- PSYC 2301 General Psychology 3
- CHEM 1411 General Chemistry I 4

#### Hours 16

### Third Year
#### Fall
- CRIJ 3325 Community-Based Corrections 3
- CRIJ 4313 Criminal Procedure 3
- CRIJ 4320 Offender Rehabilitation 3
- CRIJ 4331 Juvenile Delinquency 3
- CRJ 3302 Police and Society 3

#### Hours 16

### Fourth Year
#### Fall
- UNIV 4350 University Studies Capstone 3
- COMM 4335 Crisis Communication 3
- CHEM 4443 Environmental Chemistry 4
- ESCI 4320 Environmental Health 3
- Upper Divisional Elective 3

#### Hours 16

### Fourth Year
#### Spring
- UNIV 4350 University Studies Capstone 3
- CHEM 4490 Special Topics 4
- ESCI 3443 Environmental Biology 4

#### Hours 17

### Total Hours
- 122

- **Component Area Option Core Requirement** 3
**Hours** 15
Students will:

• Demonstrate an understanding of the operation and purposes of the major components of the criminal justice system (police, courts, and corrections)

• Demonstrate the ability to critically analyze the criminal justice system and its aims and objectives

**Program Requirements**

The Criminal Justice major requires a minimum of 45 semester hours, 27 semester hours of which must be at the upper-division level. Supporting courses related to essential skills totaling 3 hours are also required. Criminal Justice majors are encouraged to take MATH 1442 Statistics for Life (4 sch) to satisfy the Mathematics Core Curriculum Program requirement. Students who do not take MATH 1442 Statistics for Life (4 sch) in the Core Curriculum will be required to do so to fulfill the supporting coursework requirement for majors. The College of Liberal Arts also requires students in Criminal Justice to take at least 6 hours of a second language.

Students seeking the Bachelor of Science in Criminal Justice are expected to develop a breadth of knowledge of the component parts of the criminal justice system. Through their choice of disciplinary electives, students may concentrate on Criminal Justice subfields or broadly explore the discipline and its career options. Students should select a majority of their upper-division elective hours from disciplines which support their choice of specialization.

Students may also register for CRIJ 4398 Applied Experience (3 sch) and participate in the Applied Experience Program to earn course credit while gaining practical work experience in Criminal Justice or a related field. Registration is by application. Interested students should contact the Criminal Justice Applied Experience Coordinator.

Courses
CRIJ 1301 Introduction to Criminal Justice
3 Semester Credit Hours (3 Lecture Hours)
History and philosophy of criminal justice. Overview of criminal justice system: police, prosecution and defense, courts, trial process, and corrections as they affect the individual, as well as their impact on society. The definition, nature, and impact of crime. The functions of criminal justice agencies will be examined in relation to common analytical themes such as ethics and discretion.
TCCNS: CRIJ 1301

CRIJ 1306 Court Systems and Processes
3 Semester Credit Hours (3 Lecture Hours)
Examination of the civil and criminal legal systems and the roles played by political, social and economic factors in the administration of justice. Consideration of the roles and interests of litigants, defendants, police, attorneys, and the judiciary in the process.
TCCNS: CRIJ 1306

CRIJ 1310 Fundamentals of Criminal Law
3 Semester Credit Hours (3 Lecture Hours)
The course will introduce students to the study of criminal law. Major topics include the sources of criminal law, the operation of the criminal courts, constitutional limitations on criminal law, the elements of criminal liability, and the classification of and punishments for different types of criminal offenses. Defenses to criminal liability will also be explored.
TCCNS: CRIJ 1310

CRIJ 2313 Correctional Systems & Practices
3 Semester Credit Hours (3 Lecture Hours)
This course is a survey of institutional and non-institutional corrections. Emphasis will be placed on the organization and operation of correctional systems; treatment and rehabilitation; populations served; Constitutional issues; and current and future issues.
TCCNS: CRIJ 2313

CRIJ 2328 Police Systems and Practices
3 Semester Credit Hours (3 Lecture Hours)
The history and development of police in America. Topics examined include: the police profession, organization of law enforcement systems, the policing role, police discretion, ethics, police-community interaction, current and future issues, and research findings.
TCCNS: CRIJ 2328

CRIJ 3302 Police and Society
3 Semester Credit Hours (3 Lecture Hours)
Examination of policing in a democratic society. A critical review of various professional and community influences on police behavior, together with a consideration of social problems created by such forces, and potential remedial actions.

CRIJ 3310 The Judicial Process
3 Semester Credit Hours (3 Lecture Hours)
The JUDICIAL PROCESS Examination of the civil and criminal legal systems and the roles played by political, social and economic factors in the administration of justice. Consideration of the roles and interests of litigants, defendants, police, attorneys, and the judiciary in the process.

CRIJ 3313 The Juvenile Justice System
3 Semester Credit Hours (3 Lecture Hours)
The administration of the juvenile justice process. Historical and philosophical origins of the juvenile justice system. A systematic analysis of problems and procedures at each stage of the process.

CRIJ 3315 Crime Prevention
3 Semester Credit Hours (3 Lecture Hours)

CRIJ 3320 Issues in Corrections
3 Semester Credit Hours (3 Lecture Hours)
Analysis of contemporary developments, controversies and management concerns in the field of corrections. Includes examination of theoretical foundations of correctional policy.

CRIJ 3325 Community-Based Corrections
3 Semester Credit Hours (3 Lecture Hours)
Examination of the correctional strategies and facilities available in community settings including diversion programs, probation, parole, half-way houses, boot camps, and restitution centers.

CRIJ 3340 Comparative Criminal Justice
3 Semester Credit Hours (3 Lecture Hours)
Comparison of the police in selected countries with the U.S. criminal justice system. Particular emphasis on social, political, and economic factors in the development and change in law enforcement.
CRIJ 3341  Terrorism
3 Semester Credit Hours (3 Lecture Hours)
An examination of political violence from criminological, legal, and political perspectives. Application to contemporary events is emphasized. The sociology, psychology, and organization of terrorist groups are also explored as well as counter-terrorism strategies, methods, and dilemmas.

CRIJ 3360  Organized Crime
3 Semester Credit Hours (3 Lecture Hours)
The course analyzes and discusses how criminal organizations carry out their illegal activities while laundering money through legal enterprises. It discusses why people belong to organized crime syndicates despite the risks of death and imprisonment. The linkages of poverty, lack of education, social and economic inequalities, and the glorification of capitalist ideology by the phenomenon of organized crime are examined.

CRIJ 3361  Drugs, the Drug War, and Criminal Justice
3 Semester Credit Hours (3 Lecture Hours)
This course is an analysis and discussion of drugs, the war on drugs, and how these two phenomena impact the criminal justice system in American society. There is a review of the common assumptions about drugs and its social implications. An examination of the sociocultural interconnections of the nature of drugs, drug use, drug trafficking, and drug policy from a justice perspective is presented.

CRIJ 3365  Sex Crimes
3 Semester Credit Hours (3 Lecture Hours)
This course analyzes the nature, etiology, and theories related to sex offenses and sex offenders. It explores the history and current practices employed by the criminal justice systems to deal with sex offending. The course also examines multiple types of sexual offenses, perpetrators and victims, as well as the legal consequences of sexual offenses and its sociocultural ramifications to grasp the complexity of these crimes.

CRIJ 3370  Crime in the Media
3 Semester Credit Hours (3 Lecture Hours)
This course will cover the portrayal of crime, criminals, the criminal justice system, and criminal justice practitioners in the media. Specifically, the course will address the goals of the media and how those affect their coverage of crime and the CJ system.

CRIJ 3375  Applied Statistics in Criminal Justice
3 Semester Credit Hours (3 Lecture Hours)
This course will teach students the step-by-step process for using statistical techniques that are most applicable in the field of criminal justice. It will teach them when, where, and why each statistical analysis is necessary and/or useful, and it will help students learn those skills by applying them to an actual project.

CRIJ 3380  Victimology
3 Semester Credit Hours (3 Lecture Hours)
is the scientific study of crime victims and focuses on the physical, emotional, and financial harm victims suffer due to crime. The purpose of this course is to examine victim-offender relationships, the interactions between victims and the criminal justice system, and the connections between victims and other institutions (such as the media, advocacy groups, and government). In exploring these connections, students will address the theory, research, legislation, and policy implications related to victimization.
Prerequisite: CRIJ 1301.

CRIJ 4310  Constitutional Law
3 Semester Credit Hours (3 Lecture Hours)
A case study of American constitutional law based on the leading decisions of the U.S. Supreme Court. Examination of the evolution of judicial review and the development of due process and the protection of individual rights.

CRIJ 4312  Law and Evidence
3 Semester Credit Hours (3 Lecture Hours)
A detailed examination of the use, admissibility, and presentation of evidence. Issues and problems dealing with the rules of evidence and the theories on which those rules are based.

CRIJ 4313  Criminal Procedure
3 Semester Credit Hours (3 Lecture Hours)
A detailed examination of the legal constraints on investigation and prosecution of criminal offenses. Analysis of the Texas Code of Criminal Procedure and of Search and Seizure Law under the Fourth Amendment, as well as other due process issues arising under the Fifth and Sixth Amendments.

CRIJ 4320  Offender Rehabilitation
3 Semester Credit Hours (3 Lecture Hours)
Theories of rehabilitation, treatment, and correction of criminal offenders. Includes analysis of the historical development of the rehabilitative ideal and contemporary controversies surrounding it, and a survey of therapeutic models and methods.

CRIJ 4321  American Prisons and Prisoners
3 Semester Credit Hours (3 Lecture Hours)
Analysis of the history, philosophy, and function of prisons. Examination of control and treatment of offenders in institutional settings. Focus is upon current developments, controversies and management problems.

CRIJ 4322  Crime and Punishment in Literature
3 Semester Credit Hours (3 Lecture Hours)
A study of selected literary classics that treat of crime and punishment. The works of literary artists from various cultures which describe experience with crime and the criminal justice system will be placed in historical and theoretical perspective.

CRIJ 4324  Women and Criminal Justice
3 Semester Credit Hours (3 Lecture Hours)
An historical and ideological analysis of the role of women in the criminal justice system as offenders, reformers, and professionals.

CRIJ 4325  Diversity in Criminal Justice
3 Semester Credit Hours (3 Lecture Hours)
This course is an investigation into the impact of social diversity (race, ethnicity, gender, sexual orientation, disability, and more) on crime and the criminal justice system. Students will examine the impact of these factors on both offenders and criminal justice system employees, and will discuss and critically examine historical trends, contemporary events, and criminal justice system policies and laws.

CRIJ 4330  Understanding Criminal Behavior
3 Semester Credit Hours (3 Lecture Hours)
This course examines various aspects of human behavior from a criminal justice perspective and is designed to give students a basic understanding of criminal behavior and psychological disorders which are encountered by criminal justice professionals.
CRIJ 4331 Juvenile Delinquency  
3 Semester Credit Hours (3 Lecture Hours)  
Examination of the nature and extent of juvenile crime today. Analysis of the history and theory of delinquency and society’s response to it. (Credit may not be given for both this course and SOCI 4331.) Cross listed with SOCI 4331.

CRIJ 4335 Criminology  
3 Semester Credit Hours (3 Lecture Hours)  
An examination of the major sociological explanations for crime, criminal behavior, and the social responses to crime. (Credit may not be given for both this course and SOCI 4335.) Cross listed with SOCI 4335.

CRIJ 4340 Criminal Investigation  
3 Semester Credit Hours (3 Lecture Hours)  
Critical examination of investigation methods and comparison of these to research methods. Advanced examination of investigative procedures, theory, supervision, and evaluative research. Some practical applications.

CRIJ 4345 Research Methods in Criminal Justice  
3 Semester Credit Hours (3 Lecture Hours)  
This course is designed to help students gain a working understanding of the research process with direct application to criminal justice research. Attention will focus on various aspects of the research process including quantitative and qualitative methods. Students will complete literature reviews, create research proposals, conduct observations/interviews, and construct surveys in addition to various assignments and activities.  
Prerequisite: CRIJ 1301 or 1313.

CRIJ 4351 Police Supervision and Management  
3 Semester Credit Hours (3 Lecture Hours)  
Study of contemporary theories of management and supervision as they relate to law enforcement. Management concerns considered include planning, motivation, organizational communication, discipline, productivity, ethics, conflict, and job stress.

CRIJ 4360 Intimate Relationship Violence  
3 Semester Credit Hours (3 Lecture Hours)  
Violence involving acquaintance, spouse, child, and elder abuse is examined within a theoretical construct relating violence to social responses. Alternative causal theories, prevention, counseling, administration, innovative programs, and inter-agency coordination are addressed.

CRIJ 4365 White Collar Crime  
3 Semester Credit Hours (3 Lecture Hours)  
Critical examination of widespread forms of offending and offenders typically omitted from traditional criminology and criminal justice courses. Critical exploration of white collar, corporate, environmental and governmental crimes/criminals.

CRIJ 4390 Topics in Criminal Justice  
3 Semester Credit Hours (3 Lecture Hours)  
May be repeated for credit when topics vary.

CRIJ 4396 Directed Individual Study  
1-3 Semester Credit Hours  
See College description.

CRIJ 4398 Applied Experience  
3 Semester Credit Hours  
See College description.

---

**English, BA**

**Program Description**

Grounded in our academic tradition as an Hispanic Serving Institution, the undergraduate English Program at Texas A&M University-Corpus Christi invites students to engage with texts and employ language-related skills to connect with others both locally and globally. We encourage students to explore and integrate three disciplines of English Studies in their work, through the study of literature, applied linguistics, and writing. We challenge students to analyze, think critically about, and compose texts across genres, language varieties, and traditions for communities across cultural and geographic boundaries. In our courses and community events, students develop the advanced critical and creative literacies and language-related skills that prepare them for their future as active and ethical members of diverse communities.

English majors will choose an emphasis in Literary Studies or Writing Studies. The Literary Studies emphasis provides students with the skills to interpret and write about texts, including literary and filmic, within a range of historical and cultural contexts. The Writing Studies emphasis allows students to develop their abilities to use writing in a variety of contexts and for a variety of purposes, and to develop an understanding of how writing operates in the world, through studies in rhetoric, literacy, and writing. Both tracks give students skills as critical thinkers and communicators that will prepare them for a variety of different career paths, including law, business, teaching, and the sciences, as well as for graduate study.¹

¹ Students can also earn certificates in TESOL and Writing for Non-Profits. The coursework necessary for both can be found under the “Certificates” section of the catalog.

**Student Learning Outcomes**

At the end of the program, students will be able to:

- Analyze the characteristics of language in terms of literary or discourse genres, conventions, and linguistic features.
- Apply effective and appropriate literary/rhetorical/linguistic methods and strategies in writing and/or in analyzing texts (spoken, written, and multimodal).
- Demonstrate understanding of literary/rhetorical traditions, as well as the historical and cultural contexts important to those traditions.
- Demonstrate foundational understanding of language systems, language development, and language in use.
- Apply and/or integrate appropriate critical terms and theoretical concepts and perspectives in writing and analyzing texts.
- Demonstrate ability to choose and use appropriate strategies to produce texts in a variety of genres to most effectively achieve specific purposes with specific audiences.
- Demonstrate the ability to locate, select, assess, and analyze information sources, both print and digital, and to integrate and document appropriately those sources in their own work.
- Demonstrate understanding of community and social relations, diverse, multicultural histories; and what it means to live in a global society.

The undergraduate English program offers a major in English, curricula for secondary English certification, minors in Literary Studies and Creative Writing and certificates in Writing for Non-Profits and TESOL.
It also participates in the interdisciplinary minors of Technical and Professional Writing and Women and Gender Studies (see descriptions under "Interdisciplinary Minors"). Upper-level courses in writing studies, linguistics, and literature may satisfy requirements for other disciplines and serve as electives for non-majors who wish to improve their analytic, writing, and technical skills and to broaden their experiences in the liberal arts.

### Courses

#### ENGL 0099 Integrated Reading and Writing Non-Course Based Development

- **0 Semester Credit Hours**
- ENGL 0099 is designed to develop student’s critical reading and academic writing skills on an individualized basis through tutoring. The course fulfills TSI requirements for reading and writing. TSI compliance staff will approve each student for this course. Approval is based on test score and/or by academic standing.

#### ENGL 0399 Integrated Reading and Writing

- **3 Semester Credit Hours (3 Lecture Hours)**
- A portfolio-based course with required tutoring (lab) time focused on the writing and reading processes, including strategies for invention, revision, and editing, and techniques of active reading, such as analysis, inference, summary, and evaluating texts. Students will enter ENGL 0399 through Texas Success Initiative (TSI) mandated remediation. (Not counted toward graduation)
ENGL 1301 Writing and Rhetoric I
3 Semester Credit Hours (3 Lecture Hours)
English 1301 introduces students to writing studies, rhetoric, academic research, and information literacy. Students will critically read and reflect on threshold concepts in writing studies. They will practice recursive writing and research processes for various situations. Sections will be offered both online and in person each semester.
TCCNS: ENGL 1301

ENGL 1302 Writing and Rhetoric II
3 Semester Credit Hours (3 Lecture Hours)
English 1302 builds on the foundation in writing studies, rhetoric, academic research, and information literacy introduced in ENGL 1301. Students will read, apply, and reflect on the current research and scholarship in writing studies and rhetoric. Students will practice transferring, deepening, and extending their ability to use writing into discipline-specific, workplace, and civic contexts. Sections will be offered both online and in person each semester.
Prerequisite: ENGL 1301.
TCCNS: ENGL 1302

ENGL 2303 Introduction to Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
This course will review current scholarship on writing studies, including threshold concepts, activity theory, and genre studies. It will consider various perspectives on the uses of writing to provide students with an intellectual and practical understanding of writing. This course provides a starting point for the more specific studies of writing that occur in other writing studies courses.

ENGL 2316 Literature and Culture
3 Semester Credit Hours (3 Lecture Hours)
Introduction to literatures that raise aesthetic, cultural, social, and/or political issues that affect and reflect the human condition across regions, cultures, and nations. Sample topics: Crossing Borders, The City in Literature, Islands and Islanders, Science and Fiction.
TCCNS: ENGL 2331

ENGL 2332 Literature of the Western World: From the Classics to the Renaissance
3 Semester Credit Hours (3 Lecture Hours)
Study of important literary texts from the Ancient World to the Renaissance.
TCCNS: ENGL 2332

ENGL 2333 Literature of the Western World: From the Enlightenment to the Present
3 Semester Credit Hours (3 Lecture Hours)
Study of important literary texts from the Enlightenment to the present.
TCCNS: ENGL 2333

ENGL 2370 Introduction to Literary Studies
3 Semester Credit Hours
An introduction to literary analysis and scholarship for the intermediate writer. Emphasis placed on genres of literature, literary research, and expository and analytical composition. Familiarizes students with the various disciplines and related conversations within English Studies. Should be taken by sophomore-level English majors in the Literary Studies emphasis, and by Literary Studies and Creative Writing minors.
Prerequisite: ENGL 1302.

ENGL 2371 Exploring Social Media
3 Semester Credit Hours (3 Lecture Hours)
In this course we will examine and discuss current issues related to social media within a rhetorical framework. We will use different social media platforms to share and discuss in order to provide hands-on experience in these environments. Social media will be explored at the micro level as students will review their online social media presence to better understand how readers view them online. From the macro level we will identify current topics that affect the design and use of social media platforms and applications.

ENGL 3167 English as a Second/Foreign Language Tutoring
1 Semester Credit Hour
Students pursuing the Advanced TESOL Certificate will supplement ENGL 3367 (TESOL Seminar: Methods) with practical experience tutoring English learners. Students will write reflectively about those experiences. As needed, students will undergo site-specific training.
Co-requisite: ENGL 3367.

ENGL 3301 Technical and Professional Writing
3 Semester Credit Hours
A course designed to help students gain practical experience in finding and interpreting information and writing reports and documents for specialized audiences in the technical and professional world. ENGL 3301 will be held in a computer-assisted classroom.

ENGL 3302 Techniques of Creative Writing
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to the theoretical knowledge and practical experience used in creative writing. Focuses on poetry, creative nonfiction, and short fiction. For all majors.

ENGL 3310 Technical and Professional Writing for Computer Science
3 Semester Credit Hours (3 Lecture Hours)
Designed specifically for computer science majors, this course focuses on developing students' ability to (1) use writing to communicate effectively with a range of audiences about technology; (2) identify, analyze, and appropriately integrate relevant information in their writing; (3) make informed judgments about their uses of writing based on ACM's and IEEE's code of ethics; and (4) develop their ability to function effectively individually and as members of a team to establish goals, plan tasks, meet deadlines, manage risk, and produce deliverables.

ENGL 3321 Film and Literature
3 Semester Credit Hours (3 Lecture Hours)
3 sem. hrs. Studies the connections between the formal elements of literature and of film, with emphasis on theme, narrative style, and genre. By viewing films based on literary sources, students will analyze how literature is adapted into film as well as identify strategies to view and read critically. For all majors.

ENGL 3323 Young Adult Fiction
3 Semester Credit Hours (3 Lecture Hours)
Literary study of young adult literature through analysis, discussion, and interpretation. The course emphasizes literary issues connected with society, culture, history, and genre.
ENGL 3325 Interdisciplinary Approaches to Literature
3 Semester Credit Hours (3 Lecture Hours)
In recent decades, it has become common to study literature in light of other disciplinary perspectives and to study other disciplines as they are depicted in literature. From these interdisciplinary approaches has emerged a distinct mode of analysis that examines texts within their broader social and cultural milieu. In this course students will earn to use cross-disciplinary methods to interpret literature and culture. Topics will vary, but may include Religion, Medicine, and American Literature, Disability Narratives in the Eighteenth Century, Trauma and the City in Twentieth-Century Literature.

ENGL 3330 Current Events and Literature
3 Semester Credit Hours (3 Lecture Hours)
This course examines literature in the context of current issues and events. Students will place literature in conversation with social, political, and cultural trends as a means of engaging with and understanding these trends and the debates associated with them. Using reading, writing, and discussion as modes of critical inquiry, students will discover the critical role that literature plays in representing, responding to, and shaping current events.

ENGL 3339 Introduction to Linguistics
3 Semester Credit Hours (3 Lecture Hours)
Introductory survey course covering phonetics, morphology, syntax, semantics, sociolinguistics, neurolinguistics, and language acquisition.

ENGL 3340 Grammar
3 Semester Credit Hours (3 Lecture Hours)
Presents a general descriptive overview of English grammar and provides a structural framework for analyzing English sentences.

ENGL 3341 British Literature before 1800
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of poetry, drama, and prose before 1800 with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 2303).  
May be taken concurrently.

ENGL 3345 British Literature since 1800
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of British poetry, drama, and prose since 1800 with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 2303).  
May be taken concurrently.

ENGL 3348 Drama
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of dramatic literature, using a wide range of texts. Variable content.

ENGL 3349 Poetry
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of poetry using a wide range of texts. Variable content.

ENGL 3354 American Literatures before 1900
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of American poetry, drama, and prose from the country’s pre-European beginnings to 1900 with emphasis on historical context and the exploration of literary and cultural values through written texts. 
Prerequisite: (ENGL 2370) or (ENGL 2303) or (ENGL 3303).  
May be taken concurrently.

ENGL 3355 American Literatures since 1900
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of American poetry, drama, and prose from 1900 to the present with emphasis on historical context and the exploration of literary and cultural values through written texts. 
Prerequisite: (ENGL 2370) or (ENGL 2303) or (ENGL 3303).  
May be taken concurrently.

ENGL 3360 Current Approaches to Composition and Literature
3 Semester Credit Hours (3 Lecture Hours)
Prepares prospective teachers to create developmentally appropriate learning environments and tasks that enable student success in writing and the study of literature in Language Arts and English courses. Prepares students to meet the increased writing and reading expectations in all subject areas, including their own writing.

ENGL 3361 Strategies and Genres of Advanced Writing
3 Semester Credit Hours (3 Lecture Hours)
Students will practice-writing in situated contexts (such as their majors, careers, and/or other professional interests) and across genres to develop more advanced and reflective writing strategies. By studying theories of writing; engaging in writing as a craft; and drafting, revising, and editing texts; students will refine and become more reflective in their writing processes.

ENGL 3362 Creative Writing Workshop: Survey and Practice of Genres
3 Semester Credit Hours (3 Lecture Hours)
Develops students’ skills as critics and writers of fiction, poetry, and creative nonfiction in a workshop setting. For all majors.

ENGL 3363 Foundations of Rhetoric
3 Semester Credit Hours (3 Lecture Hours)
This course will study the historical and theoretical development of rhetoric through the works of principal thinkers. Students will analyze rhetorical concepts in their relation to civic, cultural, political, and pedagogical developments and the construction of knowledge and will use rhetorical concepts to produce logical, ethical, and moral arguments.

ENGL 3364 Strategies of Writing Creative Nonfiction
3 Semester Credit Hours (3 Lecture Hours)
Explores the uses of creative nonfiction through reading and writing about published works of experienced writers and scholars in the field and practicing a variety of creative nonfiction techniques and genres (e.g. literary journalism, memoir, and the personal narrative).

ENGL 3365 Second Language Acquisition
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to second language acquisition. The course is designed to be accessible to students from a wide variety of backgrounds and no basic knowledge of the linguistic structure of English will be assumed. This course will address issues related to how second language is learned by both children and adults.

ENGL 3366 Language in Society
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the study of language as a function of several societal variables. Introduces basic concepts of language such as linguistic varieties, dialect, speech communities, and linguistic attitudes.
ENGL 3367  TESOL Seminar
3 Semester Credit Hours (3 Lecture Hours)
This course presents an introduction to and a critique of current and
traditional methodologies of teaching English to speakers of other
languages, with emphasis on aural comprehension; speaking, reading,
and writing skills; testing and assessment; and linguistic-cultural
differences. This course is open to all majors, but is required for students
seeking the Certificate in TESOL.
Prerequisite: ENGL 3365.

ENGL 3369  Topics in Linguistics
3 Semester Credit Hours (3 Lecture Hours)
Exploration of topics such as second language acquisition, language
assessments, history of English, and contrastive analysis. May be
repeated when topics vary.

ENGL 3370  Document Design and Publishing
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the integration of text and visual rhetoric, such as graphics,
for all kinds of professional publications including technical documents,
media, public relations pieces, and advertisements.

ENGL 3375  Writing for the Web
3 Semester Credit Hours (3 Lecture Hours)
Develops students' theoretical knowledge of poetics and practical
practices of a cross-cultural community (latino/a rhetoric, African-
cross cultural writing in industry), or on the linguistic and rhetorical
practices of a cross-cultural community (latino/a rhetoric, African-
American rhetorics, etc).

ENGL 3377  Visual Rhetoric
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the analysis, design, and production of visual representations
and multi-modal texts that integrate visual elements.

ENGL 4123  Nonprofit Writing Project
1 Semester Credit Hour
Students will gain practical experience with a nonprofit agency by
developing a significant project that meets an agency identified need.
Students should take this course in the last semester of their nonprofit
certificate program in conjunction with one of the following: ENGL 3378,
ENGL 3379, ENGL 4322, or ENGL 4321. The students' professor in the
regular course will be the instructor of record for the projects course.

ENGL 4300  Technologies and Cultures of the Book
3 Semester Credit Hours (3 Lecture Hours)
Working with a range of print media, students will learn to analyze the
interplay between the text's content and its formal features. Students
will build the skills to think and write analytically about the materiality of
texts.

ENGL 4305  Major Authors
3 Semester Credit Hours (3 Lecture Hours)
This course studies the significant works of a major literary author. Texts
are viewed through a variety of critical perspectives and placed in the
context of the writer's life and of the society, culture, and history of the
times. May be repeated once for credit when authors vary.

ENGL 4320  Professional Writing Workshop
3 Semester Credit Hours (3 Lecture Hours)
This course is tailored for individual students' writing and publishing
projects in their disciplines.

ENGL 4321  Grants and Proposals
3 Semester Credit Hours (3 Lecture Hours)
This course will teach students the grant proposal writing process,
including identifying sources of funding, conducting research to support
funding applications, and tailoring each proposal to a specific funding
agency. Students will receive experience writing actual proposals on
behalf of local organizations and agencies.

ENGL 4322  Writing in the Nonprofit Agencies
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the specific kinds writing of professionals in the nonprofit
world do, including internal communication in an agency, writing for
the public, document creation, fund raising, board relations, and other
relevant topics.

ENGL 4324  Editing & Style
3 Semester Credit Hours (3 Lecture Hours)
Practice in methods, tools, and principles of editing for nonfiction and
technical publications. Emphasis on a rhetorical understanding of levels
of editing, managing the editorial process, and grammar and style.

ENGL 4325  Writing Across Cultures and Contexts
3 Semester Credit Hours (3 Lecture Hours)
Through writing, students will study how groups perceive, understand,
and communicate with and about each other. The course may focus on
a specific type of writing (cross cultural expository writing, travel writing,
cross cultural writing in industry), or on the linguistic and rhetorical
practices of a cross-cultural community (latino/a rhetoric, African-
American rhetorics, etc).

ENGL 4335  Creative Writing Studio: Development of Craft
3 Semester Credit Hours (3 Lecture Hours)
Develops students' skills as critics and writers of fiction, poetry, and
creative nonfiction in a studio setting. Guides students to focus on a
major project in one genre with sustained practice of techniques and
revision. Open to students of all levels, from the novice to the advanced.
For all majors.

ENGL 4340  The Novel
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of long-form prose fictions, using a wide range of
texts. Variable content.

ENGL 4345  Rhetorics, Literacies, and Writing
3 Semester Credit Hours (3 Lecture Hours)
This course examines the history and major theories of rhetoric, literacy,
and composition, and explores how they influence contemporary cultural
productions.

ENGL 4350  Studies in Poetics: Theory, Form, and Practice
3 Semester Credit Hours (3 Lecture Hours)
Develops students' theoretical knowledge of poetics and practical
experience of writing in traditional forms, from the Anglo-American
tradition to the culturally diverse movements and innovation of form.
Focusing on works written by poets about poetry and poetics primarily
from the 19th to the 21st centuries. For all majors.

ENGL 4351  Senior Capstone: Literature and Writing
3 Semester Credit Hours (3 Lecture Hours)
A study of literature in English for graduating seniors in the Literary
Studies Emphasis. Emphasis is placed on genre, research, and analytical
expository writing.
Prerequisite: ENGL 2370, 3303 or 2303.
ENGL 4352 Capstone in Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
This course is the culminating experience for the Writing Studies emphasis in English. Students review, reflect on, integrate, and apply their learning from previous courses and experiences. Students create digital portfolios for career and publishing opportunities, emphasizing selection, revision, reflection, and presentation. In addition, students identify, evaluate, and annotate texts and resources to include in a curated digital collection/publication that will be available for students in future Writing Studies courses.

ENGL 4360 Gender, Sexuality and Literature
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to literature that explores issues of gender and sexuality. It focuses on relevant literary periods and conventions, as well as on the historical, social, and cultural contexts of artistic productions. Sample topics: women's literature, queer literature, literature and masculinity.

ENGL 4361 Race and Ethnicity in Literature
3 Semester Credit Hours (3 Lecture Hours)
Topics focus on a variety of cross-cultural issues in historical and/or contemporary texts by Caribbean, British Indian, Native American, African American, Chicano/a, and/or other underrepresented authors.

ENGL 4362 Texts and Contexts
3 Semester Credit Hours (3 Lecture Hours)
Study of literary and cultural texts that raise issues of community and social relations, diversity, multiculturalism, and/or globalization. Sample topics: Medicine and Religion in American Literature, Traveling Histories, the Global City, and Literary Regionalism in Transnational Context. May be repeated once for credit when topics vary.

ENGL 4370 Oral Interpretation of Children's Literature
3 Semester Credit Hours (3 Lecture Hours)
A study, primarily through the medium of performance, of various types and forms of literature for children. Strongly oriented toward teaching literature in the elementary school classroom. (Credit may not be given for both this course or THEA 4323.)

ENGL 4380 Critical Approaches to Literature and Culture
3 Semester Credit Hours (3 Lecture Hours)
A study of selected perspectives and critical approaches to literature and culture, including an examination of some of the theoretical assumptions upon which they are based, as well as their implications for the way we think about literature, human identity, and the power of language.
Prerequisite: ENGL 2370.

ENGL 4385 Studies in Creative Writing
3 Semester Credit Hours (3 Lecture Hours)
Students will focus on the craft of a specific genre or type of writing through reading experts' advice, reading and analyzing examples written by practitioners, and engaging in peer-response workshops with classmates. Attention will be paid to publication opportunities available for writers in that genre.

ENGL 4390 Topics in Literary Studies
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary—see S.A.I.L. or advisor for further information.

ENGL 4391 Topics in Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary—see S.A.I.L. or advisor for further information.

ENGL 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description.

ENGL 4398 Applied Experience
3 Semester Credit Hours (3 Lecture Hours)
See College description.

ENGL 4399 TESOL Practicum
3 Semester Credit Hours
Practical experience teaching English to second language learners. Students will observe, plan, and teach ESL lessons. Instructional support provides opportunities to discuss and reflect upon teaching experiences and help students connect theory, methods, and practice. This course enhances the TESOL Certification, but is not required for it. Cannot be repeated for credit.

History, BA

Program Description
The history curriculum offers courses that provide all University students with the opportunity to deepen their understanding and appreciation of the development of the United States, Latin America, Asia, and Europe. These courses also assist students in refining their reading, listening, critical thinking, writing, communication, and research skills. The history curriculum offers integrated perspectives on political, social, economic, cultural, and military factors, which have shaped the city, the state, the nation, the region, Asia, Europe, and Latin America.

The history major is designed for students seeking a greater understanding of the past, teaching certification for grades 4-8 and secondary education, or preparation for careers in public history and graduate-level studies in the humanities and law. Drawing upon the holdings of the Special Collections and Archives Department as well as other library resources, the program also offers graduate courses for students enrolled in the Master of Arts in History program.

Students majoring in history choose one of two tracks, Historical Studies or Public History. With minor exceptions, both tracks share a common core but have different emphases in their upper-division electives. Both require a minimum of 33 semester hours of history coursework, at least 27 of which must be at the upper-division level. Six additional hours of lower-division United States history are required as part of the Core Curriculum Program. The College of Liberal Arts also requires students in history to take at least 6 hours of a second language. Students planning to pursue graduate study should elect additional courses which help achieve proficiency in foreign languages and/or statistics.

Student Learning Outcomes
Students will:
• think critically, read analytically, and write clearly;
• conduct independent research, handle primary sources, and construct an original historical thesis;
• and understand the social, economic, cultural, and political dimensions of historical development.

1 First-Year Seminars or Electives

## Program Requirements

### Code Title Hours

#### Full-time, First-year Students

UNIV 1101 University Seminar I 1
UNIV 1102 University Seminar II 1

#### Core Curriculum Program

University Core Curriculum 42

#### History Core Requirements

See the Core Curriculum Program for information on the requirements for American History. In addition to satisfying these requirements, students in all History B.A. tracks must take six semester credit of English in the core curriculum program, including ENGL 1302 and three hours of Core English Literature.

#### History Tracks

Select one of the following Tracks: 33

- Historical Studies Track (p. 237)
- Public History Track (p. 238)

#### Note:

Students must take at least 3 hours of History ethnicity or gender classes. These classes can be used to satisfy the requirements of other clusters. They include:

- HIST 4336 Mexican American History
- HIST 4337 United States Women's History
- HIST 4340 European Women's History
- HIST 4347 The History of Sexuality in the West
- HIST 4352 Mexican American Women's History
- HIST 4390 Topics in History 1

#### Electives

Select 39 hours of university electives. 39

#### Foreign Language Requirements

See the College of Liberal Arts for the college language requirement. 6

#### Total Hours

122

1 When topic is approved for cluster—see S.A.I.L. or advisor for further information.

</tbody>
</table>

### Lower-division Surveys

Select two of the following: 6

- HIST 2311 Western Civilization I
- HIST 2312 Western Civilization II
- HIST 2322 World History Since 1500

### Upper-division Surveys

Select one of the following: 3

- HIST 3303 Colonial Latin America 1
- HIST 3304 Modern Latin America 1
- HIST 3340 Modern Asia 1
- HIST 4336 Mexican American History 1

#### U.S. History

Select two of the following: 6

- HIST 2301 Texas History
- HIST 3316 Colonial North America
- HIST 3318 The American Revolution
- HIST 3320 Colonial and Revolutionary U.S.
- HIST 3321 The Early American Republic
- HIST 3323 Civil War and Reconstruction
- HIST 3324 U.S. Gilded Age and Progressive Era
- HIST 3325 Emergence of Modern U.S.
- HIST 3326 U.S. Since 2nd World War
- HIST 3335 The U.S. Urban Experience
- HIST 3345 America by Nature
- HIST 3370 Introduction to Public History
- HIST 3373 Oral History and Podcasting
- HIST 4320 U.S. Cultural Experience
- HIST 4327 U.S. Modern Popular Culture
- HIST 4335 The Military and United States History
- HIST 4336 Mexican American History 1
- HIST 4337 United States Women's History
- HIST 4349 Transnational Histories of Asia and the Pacific 1
- HIST 4350 Narratives of World War II in the Pacific 1
- HIST 4352 Mexican American Women's History
- HIST 4390 Topics in History 2

#### European and World History

Select two of the following: 6

- HIST 3301 History of World Religions
- HIST 3303 Colonial Latin America 1
- HIST 3304 Modern Latin America 1
- HIST 3307 The Ancient World
- HIST 3315 Europe 1750-1815
- HIST 3317 Europe 1815-1914
- HIST 3319 Europe 1914 to the Present
- HIST 3340 Modern Asia 1
- HIST 3350 Dictators and Dirty Wars in Latin America
- HIST 4340 European Women's History
HIST 4342  The Holocaust
HIST 4345  European Thought and Culture, 1750-present
HIST 4346  The Search for Modern China: From 1600 to the Present
HIST 4347  The History of Sexuality in the West
HIST 4349  Transnational Histories of Asia and the Pacific
HIST 4350  Narratives of World War II in the Pacific
HIST 4374  Mexico: the National Period
HIST 4375  Cold War Kids: Youth in Modern Latin America
HIST 4390  Topics in History

History Electives
Select 6 hours of upper division HIST courses not required for the major

Total Hours 33

1 May not be used to satisfy requirements in more than one cluster.

2 When topic is approved for cluster—see S.A.I.L. or advisor for further information.

### Courses

**HIST 1301 U.S. History to 1865**

3 Semester Credit Hours (3 Lecture Hours)

A survey of the political, social, economic, military, cultural and intellectual history of the United States from 1492 to 1865.

*TCCNS: HIST 1301*

**HIST 1302 U.S. History Since 1865**

3 Semester Credit Hours (3 Lecture Hours)

A survey of the political, social, economic, military, cultural and intellectual history of the United States from 1865 to the present.

*TCCNS: HIST 1302*

**HIST 2301 Texas History**

3 Semester Credit Hours (3 Lecture Hours)

Spanish colonial period, Mexican statehood, independence, the development of the Republic, annexation and growth as a state.

*TCCNS: HIST 2301*

**HIST 2311 Western Civilization I**

3 Semester Credit Hours (3 Lecture Hours)

Survey of the cultures and civilizations of the Ancient Mediterranean world and the political, social, economic, military, cultural, and intellectual influences shaping the emergence and development of Europe to 1500.

*TCCNS: HIST 2311*

**HIST 2312 Western Civilization II**

3 Semester Credit Hours (3 Lecture Hours)

A survey of the political, social, economic, military, cultural and intellectual development of Europe from 1500 to the present.

*TCCNS: HIST 2312*

**HIST 2322 World History Since 1500**

3 Semester Credit Hours (3 Lecture Hours)

Examines major global issues over the past 500 years. Topics may include European expansion and colonialism, the integration of the Americans into world economic systems, changes in science and technology, decolonization, and modern environmental problems. This course will help students understand historical events within a global framework.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 3301</td>
<td>History of World Religions</td>
<td>3</td>
<td>Surveys the key beliefs, practices, rituals, figures, and historical developments of the world's major religious traditions, including Hinduism, Buddhism, Confucianism, Judaism, Christianity, Islam, and New Age religions. Gives particular attention to their encounter with modernity and their complicated place in today's global, diverse, post-modern world.</td>
</tr>
<tr>
<td>HIST 3303</td>
<td>Colonial Latin America</td>
<td>3</td>
<td>An overview of Latin American history from pre-Columbian times until Independence.</td>
</tr>
<tr>
<td>HIST 3304</td>
<td>Modern Latin America</td>
<td>3</td>
<td>A study of the major political, economic and cultural processes that marked the development of modern Latin America.</td>
</tr>
<tr>
<td>HIST 3307</td>
<td>The Ancient World</td>
<td>3</td>
<td>This course examines the ancient history of the human race. It begins with the evolution of Homo sapiens in Africa and continues through approximately the 4th century CE. Topics examined include the formation of cultures, societies, states, and empires around the world including those in Egypt, Southwest Asia, India, China, and the Mediterranean.</td>
</tr>
<tr>
<td>HIST 3315</td>
<td>Europe 1750-1815</td>
<td>3</td>
<td>Explores the processes which contributes to the establishment of a new political, economic, and social order in Europe. The course includes an in-depth focus upon the causes and consequences of the French Revolution as well as an examination of the European response to Napoleon.</td>
</tr>
<tr>
<td>HIST 3316</td>
<td>Colonial North America</td>
<td>3</td>
<td>Covers early North American history from pre-contact through 1763, with a focus on the territory that would eventually become the United States. Examines the varieties of colonial worlds created by Europeans and native peoples, the nature and impact of European colonization, the development of slave societies, the emergence of regional economies and modern culture, the consolidation of European empires in the early and mid-18th century, and the imperial wars that finally set the stage for the coming of the American Revolution.</td>
</tr>
<tr>
<td>HIST 3317</td>
<td>Europe 1815-1914</td>
<td>3</td>
<td>The evolution of European industrial society from the Congress of Vienna to the outbreak of World War I. Themes include changes in the nature of work and family life, urbanization, and the emergence and growth of liberalism, socialism, nationalism, and romanticism as competing ideologies.</td>
</tr>
<tr>
<td>HIST 3318</td>
<td>The American Revolution</td>
<td>3</td>
<td>Covers the history of the American Revolution from the end of the Seven Years' War in 1763 to the ratification on the new federal constitution in 1789. Covers the political and social history of the independence movement, the Declaration of Independence, the military, social, and indigenous history of the Revolutionary War, and the making of the Constitution.</td>
</tr>
<tr>
<td>HIST 3319</td>
<td>Europe 1914 to the Present</td>
<td>3</td>
<td>Political, social, economic and cultural developments since 1914: includes the impact of World War I, the Russian Revolution, Fascism, the origins of the Cold War, the tension between European unification and growing ethnic tensions and the dissolution of the Soviet empire.</td>
</tr>
<tr>
<td>HIST 3320</td>
<td>Colonial and Revolutionary U.S.</td>
<td>3</td>
<td>Traces regional economic, social, and political change in the Americas from 1607 to the end of the Revolution.</td>
</tr>
<tr>
<td>HIST 3321</td>
<td>The Early American Republic</td>
<td>3</td>
<td>This course examines American history from the end of the revolutionary war to 1850. Political, economic, and social issues including, but not limited to, the creation of the Constitution, the development of the first and second party systems, the market revolution, antebellum reform, the Old South, and westward expansion.</td>
</tr>
<tr>
<td>HIST 3323</td>
<td>Civil War and Reconstruction</td>
<td>3</td>
<td>Background and causes of the Civil War; military, political, diplomatic, and economic developments during the War; Reconstruction and post-war adjustments.</td>
</tr>
<tr>
<td>HIST 3324</td>
<td>U.S. Gilded Age and Progressive Era</td>
<td>3</td>
<td>An examination of the dramatic period when the United States definitively settled the remaining portions of the continent and decisively moved towards becoming an industrial, urban nation with world-wide economic and political influence.</td>
</tr>
<tr>
<td>HIST 3325</td>
<td>Emergence of Modern U.S.</td>
<td>3</td>
<td>Study of American life from World War I through World War II. Topics include America's rise to a world power, the social, cultural, and political effects of corporate enterprise, urbanization, and immigration, women's suffrage, the Twenties, and the New Deal.</td>
</tr>
<tr>
<td>HIST 3326</td>
<td>U.S. Since 2nd World War</td>
<td>3</td>
<td>A study of American life and development as a world power since World War II.</td>
</tr>
<tr>
<td>HIST 3335</td>
<td>The U.S. Urban Experience</td>
<td>3</td>
<td>A general survey of the social, cultural, and political history of the American city, with particular emphasis on Corpus Christi and the ways our city illustrates these larger trends.</td>
</tr>
<tr>
<td>HIST 3340</td>
<td>Modern Asia</td>
<td>3</td>
<td>This course will examine Asia from 1600 to the present. Topics include politics, the nation state, colonialism, empire, war, nationalism, the Cold War and revolution, all in a historical context.</td>
</tr>
<tr>
<td>HIST 3345</td>
<td>America by Nature</td>
<td>3</td>
<td>Examines the role of nature in the nation's past, looking beyond more traditional historical topics to discover how the environment has shaped society and the ways in which humans, in turn, have shaped nature throughout American history. Community-engaged learning component.</td>
</tr>
</tbody>
</table>
HIST 3350 Dictators and Dirty Wars in Latin America
3 Semester Credit Hours (3 Lecture Hours)
Explores the rise of dictatorships and military regimes in twentieth century Latin America. Focuses on human rights struggles and popular movements in Mexico, Central America and the Southern Cone.

HIST 3360 Introduction to Museum Studies
3 Semester Credit Hours (1.5 Lecture Hours)
In this cross-disciplinary class, students of history, sciences, the arts, and more will be introduced to the different departments of a museum and gain experience in programming, exhibits, research, public engagement, and other various aspects of museum management through their participation in a real working museum (Corpus Christi Museum of Science and History).

HIST 3370 Introduction to Public History
3 Semester Credit Hours (3 Lecture Hours)
A Project-centered class that examines public history practices and debates, including the changing field over time, the relationship between history and memory, and the interpretive and sometimes controversial nature of historical sites and exhibits. Students will also learn methods and practices of museums, archives, oral history, digital history, and more. Includes community-engaged learning, workshops, local field trips.

HIST 3373 Oral History and Podcasting
3 Semester Credit Hours (3 Lecture Hours)
A project-based course designed to teach students oral history, audio recording, and editing. Topics include oral history theory and methods, the role of testimony and memory in constructing historical narratives, interview techniques, archival practices, and the technical aspects of audio production, audio storytelling, and podcasting.

HIST 3385 The Art and Practice of History
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to the most significant historiographical problems that face historians, focusing on recent and current controversies that have shaken the profession and been the subject of public and political debate. Provides examples of how historians think about and do history. Prerequisite: (HIST 1301, 1302 and 2311) or (HIST 2312).

HIST 4320 U.S. Cultural Experience
3 Semester Credit Hours (3 Lecture Hours)
Explores ways that the myriad groups who have made up American society from the colonial period to the “information age” understood and expressed themselves and related to each other. (The chronological scope of this course may vary.)

HIST 4327 U.S. Modern Popular Culture
3 Semester Credit Hours (3 Lecture Hours)
The historical development of modern popular culture—including television, movies, fiction, newspapers, music and consumption—and its effect on the structure and experience of U.S. society and work from the nineteenth century to the present.

HIST 4335 The Military and United States History
3 Semester Credit Hours (3 Lecture Hours)
The development of U.S. military strategy and policy from the Colonial Wars through Vietnam.

HIST 4336 Mexican American History
3 Semester Credit Hours (3 Lecture Hours)
Spanish and Mesoamerican backgrounds, conquest and mestizaje, settlement of Aztlán, interaction with Anglo-Americans, 20th century immigration, urbanization, identity, the Chicano Movement, and Mexican American organizational/political development.

HIST 4337 United States Women's History
3 Semester Credit Hours (3 Lecture Hours)
Themes include transformations in the notion of womanhood and of sexual differences, changes in the structure, function, and concept of "family" and "household," and historical factors that have shaped women's role in the work force and public life.

HIST 4340 European Women's History
3 Semester Credit Hours (3 Lecture Hours)
Study of the experiences of European women from the 18th to the 20th centuries. Also addresses the role that gender has played in the development of modern European societies. Some topics covered are women and the French Revolution, gender and class in industrial Europe, feminism and suffrage, and women and fashion.

HIST 4342 The Holocaust
3 Semester Credit Hours (3 Lecture Hours)
Examines the Holocaust by exploring the role of racism and anti-Semitism, the rise of Nazi policies, Jewish responses and resistance to them, deportation and genocide, the role of war, and the aftermath and memory of an event "beyond human imagination."

HIST 4345 European Thought and Culture, 1750-present
3 Semester Credit Hours (3 Lecture Hours)
Survey of the major European intellectual and cultural movements from the Enlightenment to the present. Broader than a traditional course in intellectual history, special attention will be given to the emergence and development of the concepts of "modernity" and the challenges of "postmodernism."

HIST 4346 The Search for Modern China: From 1600 to the Present
3 Semester Credit Hours (3 Lecture Hours)
This course surveys modern Chinese history from the late Ming dynasty to the present, with an emphasis on the late 19th and 20th centuries. Topics include empire, colonialism, nationalism, the nation state, modernization, revolution and the Cold War, all in a historical context.

HIST 4347 The History of Sexuality in the West
3 Semester Credit Hours
This course will examine how ideas about sexuality as well as sexual practices and identities have evolved over time and in different places; how the categories of homosexuality and heterosexuality were created and how they have been perceived. The course will focus on the 19th and 20th centuries in Europe and the United States, and address the themes of gender, body, race, class, image, representation, and the law.

HIST 4349 Transnational Histories of Asia and the Pacific
3 Semester Credit Hours (3 Lecture Hours)
Explores the transnational relations of Asia and the Pacific with the West from the 19th century to the present day. Themes include colonialism and imperialism, diaspora and migration, labor and economy, war and displacement. Topics include the Opium Wars, Immigration and Exclusion, Atomic Bombing of Hiroshima, Military War Brides, Third World Radicalism, Transnational Adoption Complex, and Environmentalism and Globalization.

HIST 4350 Narratives of World War II in the Pacific
3 Semester Credit Hours (3 Lecture Hours)
Examines how the relations between history, memory, and contemporary politics in post-WWII U.S. and Asia-Pacific have shaped the meaning of various contentious issues related to the Pacific War-such as war origins and responsibility, atrocities, racism, reparations, and nationalism-in textbooks, monuments, literature, art, films, political debates, exhibits, commemorative events, and scholarly works in different social and temporal contexts.
to engage in thinking that is critical, disciplined and creative; to express
after they graduate. Among those skills and abilities are the capacities
which students can put to use in their lives, whatever they choose to do
values, and it helps develop a variety of intellectual skills and abilities
The study of philosophy can have a significant impact on one’s beliefs
issues, such as how one ought to live, the existence of God and the
Philosophy, BA
Program Description
Philosophy involves rigorous, persistent reflection on a wide range of
issues, such as how one ought to live, the existence of God and the
problem of evil, the relation between mind and body, and the ways in
which beliefs may be justified. Students in philosophy courses learn to:
• understand important periods, themes, movements, and figures in the
history of philosophy;
• apply ethical theories to major social issues;
• analyze arguments using the principles and methods of logic;
• develop their own philosophical views and arguments;
• evaluate responses to problems in metaphysics, epistemology, and
other areas of philosophy.

The study of philosophy can have a significant impact on one’s beliefs
and values, and it helps develop a variety of intellectual skills and abilities
which students can put to use in their lives, whatever they choose to do
after they graduate. Among those skills and abilities are the capacities
to engage in thinking that is critical, disciplined and creative; to express
oneself effectively and appreciate the ideas and perspectives of others;
to uncover and examine assumptions; to understand, construct, and
evaluate arguments on different sides of issues; and to deal reasonably
with questions to which there are no easy answers.

Studying philosophy also prepares students well for professional careers
in such fields as law, ministry, psychology, business, and medicine, and
for postgraduate work in philosophy. In recent years, philosophy majors
have achieved exceptionally high scores on admissions tests to law
schools and business schools (the LSAT and the GMAT) and on the GRE.
They have been extremely successful in gaining admission to law schools
and medical schools.

Students may select philosophy as a major or as a minor. Philosophy
courses are also offered as electives for students in all fields of study.

Program Requirements
Students majoring in philosophy must complete a minimum of 30
semester hours of philosophy course work, at least 21 of which must be
at the upper-division level.

Metaphysics and Epistemology

HIST 4352  Mexican American Women's History
3 Semester Credit Hours (3 Lecture Hours)
Examines the broad political, economic, social, and cultural trends in the
lives of Mexican American women since 1848.

HIST 4374  Mexico: the National Period
3 Semester Credit Hours (3 Lecture Hours)
Traces economic, social, and political change in Mexico from
independence to the present.

HIST 4375  Cold War Kids: Youth in Modern Latin America
3 Semester Credit Hours (3 Lecture Hours)
An examination of the experiences of Latin American youth in modern
Latin America. Special emphasis on the role of young people in the
revolutions and rebellions that marked the Cold War period.

HIST 4385  Historical Research and Writing
3 Semester Credit Hours (3 Lecture Hours)
The study and writing of history, with emphasis on historical analysis,
research, and writing. Designed as the capstone course for history majors
and prospective social science teachers. This course will feature a senior
research paper, and should be taken during the student’s final year of
undergraduate study.

Prerequisite: HIST 3385 or READ 3353.

HIST 4380  Topics in History
3 Semester Credit Hours (3 Lecture Hours)
Study of significant periods, countries, regions, or themes in history. May
be repeated when topics vary.

HIST 4396  Directed Individual Study
1-3 Semester Credit Hours
See College description.

HIST 4398  Applied Experience
3 Semester Credit Hours
See College description.

HIST 4399  Internship
3 Semester Credit Hours
Best practices and methods in digital archives, museums, and /or public
history through field work at a local organization or museum. Offered on
application. Repeatable up to 6 hours.

Foreign Language Requirements

See the College of Liberal Arts for the college language requirement.

Total Hours 122

1. May not be taken for both Philosophy credit and Core Curriculum credit. Students who take the course for Core Curriculum credit must take an upper level Philosophy course to meet this Basic Philosophy Course requirement.

2. Students are encouraged to take PHIL 1301 Introduction to Philosophy (3 sch) and PHIL 2303 Introduction to Logic and Critical Thinking (3 sch) as early as possible in their pursuit of the major.

3. May count towards either the History of Philosophy requirement or the Metaphysics and Epistemology requirement (but cannot be counted towards both requirements).
Courses

**PHIL 1301 Introduction to Philosophy**
3 Semester Credit Hours (3 Lecture Hours)
An examination of major philosophical issues such as the existence of God, freedom and determinism, moral rights and obligations, and the nature and limits of human knowledge.

**TCCNS:** PHIL 1301

**PHIL 2303 Introduction to Logic and Critical Thinking**
3 Semester Credit Hours (3 Lecture Hours)
Basic principles and techniques used in understanding, constructing, and evaluating arguments. Topics covered may include formal methods of analyzing arguments, informal fallacies, scientific reasoning, and moral arguments.

**TCCNS:** PHIL 2303

**PHIL 2306 Introduction to Ethics**
3 Semester Credit Hours (3 Lecture Hours)
This course includes a study of ethical theories and principles, and application of those theories and principles to ethical issues.

**TCCNS:** PHIL 2306

**PHIL 3306 History of Eastern Philosophy I**
3 Semester Credit Hours (3 Lecture Hours)
An historical and critical examination of traditional Indian philosophical and religious systems (such as various versions of Hinduism, Jainism, and Buddhism) and their relevance for contemporary people and societies.

**PHIL 3307 History of Eastern Philosophy II**
3 Semester Credit Hours (3 Lecture Hours)
A historical and critical examination of some of the philosophical and religious systems developed in China, Tibet, and Japan (such as various schools of Mahayana Buddhism, Taoism, Confucianism, and Zen Buddhism).

**PHIL 3327 American Philosophy**
3 Semester Credit Hours (3 Lecture Hours)
An introduction to American philosophy and the influential movement known as Pragmatism. The course focuses on the works of C.S. Peirce, William James, John Dewey, and George Santayana. Issues addressed include skepticism, the rejection of foundationalism, the role of belief in inquiry, verification and meaning, and the nature of truth.

**PHIL 3342 Philosophy of Love and Sex**
3 Semester Credit Hours (3 Lecture Hours)
This course is a study of the ethics of human relationships. Topics include friendship, romance, marriage, sexual orientation, adultery, promiscuity, sexual consent, sexual harassment, rape, pornography, and prostitution.

**PHIL 3343 Philosophy of Law**
3 Semester Credit Hours (3 Lecture Hours)
An introduction to philosophical issues concerning the law, such as the nature of law, relations between law and morality, theories of legal responsibility, and the role of law in society.

**PHIL 3344 Social and Political Philosophy**
3 Semester Credit Hours (3 Lecture Hours)
A survey of classical and contemporary material in social and political philosophy, covering topics such as individual liberty and government intervention, the role of government, and social justice.

**PHIL 3345 The Meaning of Life**
3 Semester Credit Hours (3 Lecture Hours)
An exploration of a variety of views concerning the meaning of life. Three kinds of responses to the question of life’s meaning will be examined: theistic responses; non-theistic responses focusing on the creation of personal meaning within a natural universe; and responses that challenge the intelligibility of the question regarding the meaning of life.

**PHIL 3346 Elementary Formal Logic**
3 Semester Credit Hours (3 Lecture Hours)
A course on technical methods and foundational issues in Philosophy, Computer Science, and Mathematics. Topics include the Propositional Calculus, First-Order Predicate Calculus, meta-theoretic results (such as consistency, soundness, completeness, and decidability), and Zermelo-Fraenkel Set Theory.

**PHIL 3347 Philosophy and Science Fiction**
3 Semester Credit Hours (3 Lecture Hours)
An exploration of issues in contemporary philosophy such as the nature of life, personhood and self, knowledge and skepticism, time travel, and obligations to the non-human world. The course combines the reading of purely philosophical works with an examination of contemporary works of science fiction (including novels, short stories, and films).

**PHIL 3348 Ethics, War, and Terrorism**
3 Semester Credit Hours (3 Lecture Hours)
Why is it wrong to kill? Is killing an innocent person ever justified? Under what conditions can we justify war? How should we respond to terrorist threats? The course explores ethical theories in application to these and similar issues.

**PHIL 4303 Minds and Machines**
3 Semester Credit Hours (3 Lecture Hours)
A study of the relationship of the mental to the physical as it pertains to the foundations of psychology, artificial intelligence, and robotics.

**PHIL 4304 Metaphysics**
3 Semester Credit Hours (3 Lecture Hours)
An examination of issues in contemporary metaphysics, such as freedom of the will and determinism, the nature of causation, the mind-body problem, and the existence of abstract and concrete entities.
PHIL 4305 Truth, Knowledge, and Justification
3 Semester Credit Hours (3 Lecture Hours)
In this course, we will discuss the following questions among others: What is the nature of truth? Should truth be understood as correspondence with reality? What is it to know something? Is knowledge of the external world possible at all? Can I conclusively rule out the possibility that I might be dreaming right now, or that I might be just a brain in a vat? Are there any privileged beliefs that can be said to constitute the foundation for all of our knowledge? Are the standards for rationality and justification absolute or rather relative to cultural norms? Can there be rational disagreement between equally intelligent people who share the same body of evidence?

PHIL 4321 Ancient Philosophy
3 Semester Credit Hours (3 Lecture Hours)
A survey of the ancient Western philosophical tradition, including the Presocratics, Plato, Aristotle, and the Hellenistic Philosophers.

PHIL 4322 Modern Philosophy
3 Semester Credit Hours (3 Lecture Hours)
A study of some of the major philosophical developments of the 17th -20th centuries, focusing on topics such as the relation between mind and body, religious belief and the problem of evil, rationalism and empiricism, and the limits of human knowledge.

PHIL 4323 Contemporary Philosophy
3 Semester Credit Hours (3 Lecture Hours)
A course on important trends in contemporary philosophy beginning with the Fregean linguistic turn, and examining the major works of philosophers such as Frege, Russell, Wittgenstein, Quine, Davidson, Dummett, Putnam, Kripke, and Lewis.

PHIL 4330 Philosophy and History of Science and Technology
3 Semester Credit Hours (3 Lecture Hours)
An exploration of important issues concerning the natural and formal sciences from the standpoint of historical disputes and technological advances. Issues include the nature of science and of scientific progress, the justification of scientific theories, the possibility of objective knowledge of the world, the distinction between science and pseudo-science, and the relationship between faith and science.

PHIL 4331 Issues in Philosophy of Religion
3 Semester Credit Hours (3 Lecture Hours)
Standard philosophical methods will be used to explore issues such as the existence and nature of God, the problem of evil, and the relationship between morality and religion.

PHIL 4332 Moral Issues in Contemporary Medicine
3 Semester Credit Hours (3 Lecture Hours)
An examination of moral issues that arise in medicine, focusing on topics such as euthanasia, genetic interventions, medical research involving vulnerable subjects, and the distribution of medical resources.

PHIL 4333 Environmental Ethics
3 Semester Credit Hours (3 Lecture Hours)
An examination of our ethical obligations with respect to animals, plants, and environmental systems, and of the foundations of environmental law and policy. Can be cross listed with ESCI 4490, BIOL 4590 or BIMS 4590.

PHIL 4335 Moral Philosophy
3 Semester Credit Hours (3 Lecture Hours)
A study of moral theories, and of moral issues such as whether morality is subjective, whether there are moral facts, and the justification of practices such as capital punishment and abortion.

PHIL 4336 Advanced Seminar in Philosophy
3 Semester Credit Hours (3 Lecture Hours)
In-depth exploration of philosophical topics, designed for philosophy majors, with emphasis on student research and presentations.

PHIL 4337 Philosophy of Language
3 Semester Credit Hours (3 Lecture Hours)
A philosophical investigation into the nature of language. Topics include meaning, truth, theories of mediated reference, theories of direct reference, and speech acts.

PHIL 4390 Topics in Philosophy
3 Semester Credit Hours (3 Lecture Hours)
Study of important philosophical themes and figures. May be repeated for credit when topics vary. Topics may include, for example, Minds and Machines, Eastern Philosophy, Ancient Philosophy, Environmental Ethics, American Philosophy, and Moral Issues in Contemporary Medicine.

PHIL 4396 Directed Individual Study
1-3 Semester Credit Hours
See College description.

Political Science, BA

Program Description
Political science is the study of politics, government, and public policy at the local, state, national, and international levels. It is concerned with the struggle for power and the exercise of power in public institutions. Political science seeks to reveal the patterns of behavior associated with politics, to explain the functioning of political and governmental institutions, to appraise alternative public policies, and to assess government’s role in society.

Political science provides students with the broad-training necessary to become successful professionals in a variety of fields, as well as engaged democratic citizens. As such, the purpose of the political science program is to foster the development of vital skills such as critical thinking, communication, and analytical abilities in our students in order to prepare them for both a broad range of career choices and the pursuit of lifelong learning.

Student Learning Outcomes
Upon completion of the BA in political science, students will be able to:

1. Demonstrate critical thinking skills, to include: creative thinking, innovation, inquiry and analysis, evaluation, and synthesis of information.
2. Demonstrate communication skills, to include: the effective development, interpretation, and expression of ideas through written, oral, and visual communication.
3. Demonstrate empirical and quantitative skills, to include: the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.

Program Requirements
To earn a BA in political science, a student must complete a minimum of 33 semester hours of political science courses beyond the requirements of the Core Curriculum Program. Political science majors are advised to take MATH 1324 Mathematics for Business and Social Sciences (3 sch), MATH 1325 Calculus for Business & Social Sciences (3 sch), or MATH 1442 Statistics for Life (4 sch) to satisfy the Mathematics Core Curriculum Program requirement. Students who do not take MATH 1324
Mathematics for Business and Social Sciences (3 sch), MATH 1325 Calculus for Business & Social Sciences (3 sch), or MATH 1442 Statistics for Life (4 sch) to satisfy the core Math requirement will be required to take one to fulfill the requirements for the major. The department recommends taking MATH 1442 Statistics for Life (4 sch) to satisfy both the Core and major requirement. If students have any questions, they should visit with the social science academic advisor.

## Courses

### POLS 2304 Introduction to Political Science

3 Semester Credit Hours (3 Lecture Hours)

Introductory survey of the discipline of political science focusing on the scope and methods of the field, and the substantive topics in the discipline including the theoretical foundations of politics, political interaction, political institutions and how political systems function.

**TCCNS:** GOVT 2304

### POLS 2305 U.S. Government and Politics

3 Semester Credit Hours (3 Lecture Hours)

A basic survey of American government, including fundamental political institutions, with special attention to the United States and Texas Constitutions.

**TCCNS:** GOVT 2305

### POLS 2306 State and Local Government

3 Semester Credit Hours (3 Lecture Hours)

The politics, government, and administration of American states, counties, cities, and special districts, with special emphasis on Texas.

**TCCNS:** GOVT 2306

### POLS 2311 Mexican American and Latinx Politics

3 Semester Credit Hours (3 Lecture Hours)

The study of Mexican American and Latinx politics within the American political experience. Topics include historical, cultural, socioeconomic, and constitutional issues that pertain to the study of Mexican Americans and other Latinx populations in the United States. Other topics such as political participation, governmental institutions, electoral politics, political representation, demographic trends, and other contemporary public policy debates will also be addressed.

**TCCNS:** GOVT 2311

### POLS 2318 Politics, Groups, & Society

3 Semester Credit Hours (3 Lecture Hours)

This course explores the role of groups in political and social change in society. In doing so, the course explores the formal and informal institutions which aid and constrain group effectiveness. An emphasis is placed on contemporary examples.

### POLS 2319 Religion and Politics

3 Semester Credit Hours (3 Lecture Hours)

The course will examine the intersection of religion and politics historically and during contemporary times with an emphasis on beliefs, behaviors, institutions, and policies.

### POLS 3303 Contemporary Political Analysis

3 Semester Credit Hours (3 Lecture Hours)

Analysis of current problems in national and international politics. Emphasis is on methods of analysis, particularly the use of computers. Includes a segment on career opportunities for political science majors.

### POLS 3311 Women and Politics

3 Semester Credit Hours (3 Lecture Hours)

The course will examine public policies affecting women, political participation, women in public office, and political attitudes of women.
POLS 3312 Campaigns and Elections
3 Semester Credit Hours (3 Lecture Hours)
A survey of the literature on campaigns and elections including theories of voter choice; effects of mass media and campaign finance regulations on the conduct and outcome of elections; effects of elections on policy; emphasis on U.S. national elections.

POLS 3313 The Legislative Process
3 Semester Credit Hours (3 Lecture Hours)
Survey and description of the legislative process in the United States Congress with relevant comparisons to practices within the several states and foreign nations. Emphasis upon the law-making process explained in terms of structure, participants, groups, associations and power relationships.

POLS 3314 Public Opinion
3 Semester Credit Hours (3 Lecture Hours)
An analysis of the kinds and distributions of opinions and attitudes in the mass public and the effects of those opinions on activities of policy makers, with special attention to problems of linking public opinion to public policy.

POLS 3315 Political Parties
3 Semester Credit Hours (3 Lecture Hours)
Organization, history, and activities of political parties and functions they serve in national, state, and local politics in the United States and elsewhere.

POLS 3316 The American Presidency
3 Semester Credit Hours (3 Lecture Hours)
A study of the federal executive branch with an emphasis upon the American Presidency with its relationships to other American political institutions and processes.

POLS 3317 Judicial Politics
3 Semester Credit Hours (3 Lecture Hours)
This course examines the political factors that influence judicial selection, decision-making and the policy-making role of courts. Furthermore, attention is directed at the impact of court decisions and the structure of the judiciary.

POLS 3321 Comparative Politics
3 Semester Credit Hours (3 Lecture Hours)
Concepts, theories and analytical frameworks for comparing different types of political systems around the world. Emphasis is placed on learning about different political systems and using the comparative method to evaluate and develop a richer understanding of politics, political culture, political behavior, and political institutions.

POLS 3331 International Relations
3 Semester Credit Hours (3 Lecture Hours)
Examination of the structure and function of the international system focusing on the power relationships among states, international organizations, and the critical issues animating contemporary international relations.

POLS 3341 Introduction to Public Administration
3 Semester Credit Hours (3 Lecture Hours)
Study of organization and management theories and practices of public administration affecting federal and subnational governments. Bureaucratic structures and procedures will be examined for their effects on policy, program development and evaluation.

POLS 3342 Introduction to Public Policy
3 Semester Credit Hours (3 Lecture Hours)
A survey of the policy process in the United States. The course will examine factors affecting the development, implementation and impact of public policies as well as a discussion of policy alternatives and controversies.

POLS 3343 Bureaucracy
3 Semester Credit Hours (3 Lecture Hours)
Examines the concept of the political role of the bureaucracy and the impact of other government institutions on bureaucratic structures, functions and behavior. The role of bureaucracy in public policy making and the influence of politics on implementation is analyzed.

POLS 3351 Civil Rights & Liberties
3 Semester Credit Hours (3 Lecture Hours)
This course explores the provision of civil rights and liberties, including First Amendment freedoms and criminal rights, through the lens of Supreme Court decisions. While historical cases are examined, special emphasis is put on contemporary Court decisions.

POLS 3361 Western Political Theory
3 Semester Credit Hours (3 Lecture Hours)
The fundamental concepts and problems of political theory, as viewed by the major classical philosophers and contemporary theorists, including justice, power, authority, obligation, freedom, equality.

POLS 3365 Political Theory and Ideologies
3 Semester Credit Hours (3 Lecture Hours)
Major 19th and 20th-Century political theorists and ideological movements. Includes a review of capitalism, socialism, fascism, and liberalism.

POLS 4303 Seminar in Political Science
3 Semester Credit Hours (3 Lecture Hours)
Capstone course for political science majors, examines significant developments and issue in American politics as they are addressed in the professional literature of political science. Offers the opportunity of an intensive study of as selected topic. Emphasis on supervised research on selected topic. Prerequisite: POLS 3303.

POLS 4311 Urban Politics
3 Semester Credit Hours (3 Lecture Hours)
The institutions, political processes and policy issues of urban areas of the United States.

POLS 4312 Government Budgeting and Finance
3 Semester Credit Hours (3 Lecture Hours)
Study of the politics and processes of governmental budgeting at local, state, and federal levels with emphasis on the interrelatedness of governmental units through budgeting.

POLS 4314 Media and Politics
3 Semester Credit Hours (3 Lecture Hours)
Impact of mass media coverage on American political institutions, the election process, and public opinion in general and the appropriate role of media and news in a society.

POLS 4320 The Politics of the European Union
3 Semester Credit Hours (3 Lecture Hours)
Examination of the institutional, economic and political forces that led to the creation and development of the European Union. Emphasis on the impact the European Union has had on world affairs.
POLS 4321  Comparative Politics of Developing Nations
3 Semester Credit Hours (3 Lecture Hours)
Analysis of contemporary issues within and amongst developing nations. Examines various institutions, political processes, and public policy debates in some or all of the following regions: Africa, Latin America, the Middle East, or Asia.

POLS 4322  Transitions to Democracy
3 Semester Credit Hours (3 Lecture Hours)
Analysis of transitions to democracy from authoritarian rule. Various stages of the transition process and theories of democratization are assessed. Emphasis will be placed on "third wave" transitions to democracy.

POLS 4325  Politics in Latin America
3 Semester Credit Hours (3 Lecture Hours)
Latin American governments and politics as related to such topical problems and processes as land reform and expropriation.

POLS 4327  The Politics of War
3 Semester Credit Hours (3 Lecture Hours)
This course will examine the politics of war from ancient times to the present. Included in this survey are great generals and military strategists, from Sun Tzu to Napoleon to generals of the American Civil War. Students will study concepts of international law, the law of nations, and the laws of war. The course further examines military strategy and tactics of the 20th century.

POLS 4361  American Political Thought
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major developments in American political thought from the Colonial period to the present, followed by an analysis of important recent theoretical developments in American political thought.

POLS 4390  Topics in Political Science
3 Semester Credit Hours (3 Lecture Hours)
May be repeated for credit when topic varies.

POLS 4396  Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description.

POLS 4398  Applied Experience
3 Semester Credit Hours (3 Lecture Hours)
NCD.

Psychology, BA

Program Description

Mission
In keeping with the University’s mission, the discipline of Psychology seeks to discover, communicate, and apply knowledge about human behavior in a complex and changing world. The specific mission of the undergraduate program is three-fold:

1. to provide a basic education within the field of psychology as a foundation for graduate work in a professional field of psychology, such as clinical or counseling psychology, cognitive psychology, social psychology, or developmental psychology;

2. to provide disciplinary knowledge through a broadly-based curriculum which can be applied to related careers such as human services, business, communications, and research; and

3. to contribute to the education of students majoring in other areas of study. An on-campus format provides a mix of face-to-face, blended and online courses.

An online format provides all psychology requirements via the web. The course schedule for the online BA in Psychology will differ from on campus offerings and may not include all course options available to on-campus students.

Student Learning Outcomes

- Knowledge Base of Psychology
  Students will demonstrate understanding of the concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

- Research Methods in Psychology
  Students will understand and apply research methods in psychology, including research design, data analysis, and interpretation.

- Critical Thinking Skills in Psychology
  Students will use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems related to behavior and mental processes.

BA Psychology - Online Completion

In keeping with the University's mission, the Psychology department is devoted to discovering, communicating, and applying knowledge in a complex and changing world. The specific mission of the undergraduate program is three-fold: to provide a basic education within the field of psychology as a foundation for graduate work in a professional field of psychology, such as clinical or counseling psychology, cognitive psychology, social psychology, or developmental psychology; to provide disciplinary knowledge through a broadly-based curriculum which can be applied to related careers such as human services, business, communications, and research; and to contribute to the education of students majoring in other areas of study. An on-campus format provides a mix of face-to-face, blended and online courses. An online format provides all psychology requirements via the web. The course schedule for the online BA in Psychology will differ from on campus offerings and may not include all course options available to on-campus students.

Student Learning Outcomes

- Knowledge Base of Psychology
  Students will demonstrate understanding of the concepts, theoretical perspectives, empirical findings, and historical trends in psychology.

- Research Methods in Psychology
  Students will understand and apply research methods in psychology, including research design, data analysis, and interpretation.

- Critical Thinking Skills in Psychology
  Students will use critical and creative thinking, skeptical inquiry, and the scientific approach to solve problems related to behavior and mental process.

Entry Requirements

Students may apply to be accepted into the fully online Psychology BA program after the completion of all University Core Curriculum requirements including the following courses or their equivalents:

Program Requirements

The Bachelor of Arts degree with a major in psychology requires a minimum of 37 semester hours in psychology, including General Psychology. At least 25 of these hours must be at the upper-division level. The College of Liberal Arts also requires students in Psychology to take at least 6 hours of a second language.

To earn a degree with a major in psychology, a student must complete a minimum of 37 semester hours of psychology courses exclusively applied to the major and beyond the requirements of the Core Curriculum Program. Within the College of Liberal Arts, only 6 semester hours that count toward a major can be applied to a minor.

A primary objective of the psychology program is to provide the psychology major with a broadly-based education in the discipline. Therefore, all psychology majors are expected to complete the required curriculum listed below. Remaining coursework will be selected by the student in consultation with the academic advisor and is designed to meet individual students’ needs and interests. The combination of psychology with a minor from another area, such as sociology or communications, often provides more marketable credentials at the bachelor’s level of training.

A course in General Psychology (PSYC 2301 General Psychology (3 sch)) or permission of the instructor is required for admission into all psychology courses beyond the 1000-level.

The TAMU-CC PSYC, PSYO, and SOCI degrees require knowledge of basic statistical theories and applications. This requirement is fulfilled by the successful completion of MATH 1442 or MATH 1342, or transfer courses such as PSYC 2317 or other courses with MATH, MAT, STAT, STA, PSY, AND PSYC prefixes AND the course title which includes Statistics, Quantitative Reasoning and/or Psychological Science Methods.

**Courses**

**PSYC 2301 General Psychology**

3 Semester Credit Hours (3 Lecture Hours)

An introduction to the fundamental concepts and theories in psychology. Topics include biological processes, development, learning, personality, abnormal behavior, therapy, and social interactions.

**TCCNS:** PSYC 2301

**PSYC 2314 Lifespan Developmental Psychology**

3 Semester Credit Hours (3 Lecture Hours)

The study of normal physical, cognitive, social, and emotional development from infancy to late adulthood.

**TCCNS:** PSYC 2314

**PSYC 2319 Social Psychology**

3 Semester Credit Hours (3 Lecture Hours)

The scientific study of how a person's thoughts and behavior are influenced by others. Topics will include social cognition, attitudes, persuasion, interpersonal relationships, and group behavior. (Credit may not be given for both this course and SOCI 2326.) Cross listed with SOCI 2319.

**TCCNS:** PSYC 2319

**PSYC 2390 Topics in Psychology**

3 Semester Credit Hours (3 Lecture Hours)

This is a lower-level special topics course. Various topics, which will change from semester to semester, are presented by Psychology department faculty. They cover topics of special interest which will not be made a regular on-going part of the curriculum. May be repeated for credit.

**Prerequisite:** PSYC 2301.
PSYC 3325 Close Relationships
3 Semester Credit Hours (3 Lecture Hours)
This course is designed as an overview to the field of close relationships. The major theories of close relationships will be emphasized, including examinations of evolutionary, attachment, interdependence, and cognitive approaches. Additional topics include attraction, relationship development and maintenance, infidelity, and relationship violence.

PSYC 3335 Forensic Psychology
3 Semester Credit Hours (3 Lecture Hours)
This course examines the relationship between the practice of psychology and the functioning of the legal system. The course surveys many aspects of clinical forensic psychology, including assessment, treatment, and consultation services.

PSYC 3342 Cognitive Psychology
3 Semester Credit Hours (3 Lecture Hours)
A survey of current research and theory in the field of human cognition, emphasizing the information processing model. Topics include attention, memory, language, and problem solving.

PSYC 3343 Learning and Behavior
3 Semester Credit Hours (3 Lecture Hours)
The study of the fundamental principles of learning through a consideration of theories and constructs, such as associations, reinforcement, punishment, generalization, discrimination, and modeling.

PSYC 3346 Psychology of Language
3 Semester Credit Hours (3 Lecture Hours)
The purpose of the course is to introduce students to a multidisciplinary study of language. This course will provide an introduction to psychological, sociolinguistic, and social-interactive theories of language use, acquisition/development, knowledge, context, perception, disorders, and related cognitive and social processes.

PSYC 3350 Evolutionary Psychology
3 Semester Credit Hours (3 Lecture Hours)
Evolutionary psychologists argue that much of human behavior is the output of neural and psychological adaptations that evolved to solve recurrent problems in human ancestral environments. Some challenges addressed in this course involve survival, mating, familial relationships, and living in social groups.

PSYC 3360 Health Psychology
3 Semester Credit Hours (3 Lecture Hours)
This course will provide an overview of the field of health psychology, examining how psychological theories and research are applied to enhance health and well-being and to prevent and treat illness.

PSYC 3361 Psychology of Personality
3 Semester Credit Hours (3 Lecture Hours)
An introduction to major theories of personality. Personality processes and development are discussed from psychoanalytic, behavioral, humanistic, and other perspectives.

PSYC 3363 Abnormal Psychology
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the study of abnormal behavior. Studies the etiology and characteristics of the major behavioral disorders, including current research findings and treatment practices. Competency in personality psychology, such as that obtained by completing PSYC 3361, is assumed for this course.

PSYC 3370 Psychology of Religion
3 Semester Credit Hours (3 Lecture Hours)
This course examines religious experience and behavior from a psychological perspective. Topics include historical and theoretical perspectives, development of religious beliefs across the lifespan, religious conversion, social and group experiences, and the varieties of religious belief.

PSYC 3374 Human Sexuality
3 Semester Credit Hours (3 Lecture Hours)
The study of human sexual behavior from a biological and psychosocial perspective. Emphasizes current research methods and findings.

PSYC 3375 Introduction to Clinical Psychology
3 Semester Credit Hours (3 Lecture Hours)
A survey of diagnostic and therapeutic strategies employed by clinical psychologists. The scientist-practitioner model is emphasized through the critical analysis of theories and empirical research that provide the foundation for determining effective treatments of mental disorders.

PSYC 3411 Experimental Psychology
4 Semester Credit Hours (4 Lecture Hours)
An introduction to the methods of scientific experimentation in psychology. Skills to critically analyze journal articles, design experiments, collect and analyze data, and write reports in APA style will be developed. Students are required to enroll in a laboratory section of this course. The laboratory component of this course offers applications of the principles discussed in the large lecture.

Prerequisite: MATH 1442.

PSYC 4309 History and Systems of Psychology
3 Semester Credit Hours (3 Lecture Hours)
A study of the development of modern psychology through an examination of major philosophic, scientific, and social-political antecedents. Contemporary positions are discussed within the context of broader theoretical frameworks.

Prerequisite: PSYC 2301.

PSYC 4310 Psychology Capstone Seminar
3 Semester Credit Hours (3 Lecture Hours)
All TAMU-CC Psychology students take a Capstone course in order to graduate. The Psychology Capstone Seminar, the final and required class that completes the Psychology curriculum, provides an opportunity for senior Psychology majors to demonstrate comprehensive learning in Psychology through intensive, integrative work on a specific topic in Psychology at an advanced level. The goal is to provide an enriching and culminating experience at the end of each student’s undergraduate education. Core components of the Capstone courses include reading and discussing peer-reviewed and primary source work, completing a final project, and presentations of ongoing and final projects.

Prerequisite: PSYC 3411.

PSYC 4332 Cross-cultural Psychology
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide students with both a theoretical and practical understanding of the effects of culture on human thinking, values, and behavior. As such, it is focused on the effects of culture on the nature and behavior of individuals, their adaptations to institutions and environments, and their relations with others within and outside their culture. Knowledge presented in the class is drawn from both qualitative and quantitative research.
PSYC 4344 Drug Use and Abuse  
3 Semester Credit Hours (3 Lecture Hours)  
Study of the physiological, psychological, and social effects of drug use and abuse. Following a review of basic neuroanatomy and pharmacology, the actions and known effects of specific drugs of use and abuse will be examined. Treatments and prevention issues related to substance abuse will also be discussed.

PSYC 4352 Physiological Psychology  
3 Semester Credit Hours (3 Lecture Hours)  
This course is an introduction to the physiological mechanisms that underline behavior with emphasis on the nervous, the endocrine and sensory systems.

PSYC 4354 Sensation and Perception  
3 Semester Credit Hours (3 Lecture Hours)  
Basic sensory processes as they relate to the sensory experience and to the construction of our conception of physical reality.

PSYC 4367 Gender issues in Psychology  
3 Semester Credit Hours (3 Lecture Hours)  
This course is designed to introduce the undergraduate student to the theoretical and empirical issues related to the psychology of gender. Both traditional and contemporary theories that focus on the unique aspects in the psychological development of women as well as men will be examined.

PSYC 4370 Feminism & Science  
3 Semester Credit Hours (3 Lecture Hours)  
Science has been and continues to be thought of as the objective, empirical pursuit of natural facts. In this class we will discuss feminist approaches to science that encourage us to question such fundamental tenets, to understand how such an approach is biased, and ironically, quite far from objective in its over-reliance on masculine, patriarchal frameworks.  
**Prerequisite:** PSYC 2301.

PSYC 4372 Psychological Testing  
3 Semester Credit Hours (3 Lecture Hours)  
Statistical and research basis for test construction. Instruction in use of group and individual tests in intelligence, achievement, interest and personality. Understanding of individual measures in these areas.  
**Prerequisite:** MATH 1442.

PSYC 4377 Industrial/Organizational Psychology  
3 Semester Credit Hours (3 Lecture Hours)  
This course will provide an introduction to Industrial and Organizational Psychology, a scientific discipline that studies human behavior in the workplace. Topics will include the history of Industrial/Organizational psychology, job analysis, psychological assessments, personnel decisions, training and development, organizational change, teamwork, motivation, leadership and work stress and health.  
**Prerequisite:** (PSYC 2301).

PSYC 4390 Topics in Psychology  
3 Semester Credit Hours (3 Lecture Hours)  
May be repeated for credit when topics vary.  
**Prerequisite:** PSYC 2301.

PSYC 4395 Undergraduate Research  
3 Semester Credit Hours  
A research project in psychology designed in consultation with a faculty director. The study is to be conducted by the student under the supervision and direction of the faculty member and may culminate in a formal report written in APA journal style.

PSYC 4396 Directed Individual Study  
1-3 Semester Credit Hours  
See College description.

PSYC 4398 Applied Experience  
3 Semester Credit Hours  
See College description.

**Sociology, BA**

**Program Description**

Sociology is the scientific study of human societies. At the macro-level, sociology studies societies as a whole and their social institutions such as the family, economy, religion, polity, and education. At the micro-level, sociology is concerned with everyday interactions within small social groups.

The purpose of the sociology curriculum is to:

1. provide education in the theories, concepts, definitions and language of sociology;
2. cultivate an understanding of the methods of research and interpretation of research findings;
3. prepare students for graduate study in sociology;
4. develop selected skills applicable to careers in the public or private sector.

**Student Learning Outcomes**

Students will:

- Demonstrate an understanding in the theories, concepts, definitions and language of sociology;
- Demonstrate the ability to apply professional standards of writing and research to sociological issues;
- Obtain advanced knowledge for use in the pursuit of graduate study in sociology;
- Complete a sociological research project and present it to a professional audience;
- Obtain advanced knowledge of research and writing skills applicable to careers in the public and private sector.

**General Requirements**

Areas covered in the curriculum include, but are not limited to, development of human societies, the nature of social interactions at the individual and group levels, structures and processes of social organizations, deviant behavior, and research methods and computer applications used in social analysis. Skills acquired from this curriculum are helpful for careers in human services, government, business, and or graduate studies.

The Bachelor of Arts degree with a major in sociology requires a minimum of 37 semester hours in sociology. At least 24 of these hours must be at the upper-division (3300 or 4300) level. The College of Liberal Arts also requires students in sociology to take at least 6 hours of a second language. Sociology majors are encouraged to take MATH 1442 Statistics for Life (4 sch) to satisfy the Mathematics Core Curriculum Program requirement. Students who do not take MATH 1442 Statistics for Life (4 sch) to satisfy the Mathematics Core Curriculum Program requirement will be required to do so in order to fulfill the statistics requirement for the major. Students are also encouraged to select a
minor or elective work in a related field that is pertinent to the student’s career goals.

To earn a degree with a major in sociology, a student must complete a minimum of 37 semester hours of sociology courses exclusively applied to the major and beyond the requirement of the Core Curriculum Program. Within the College of Liberal Arts, only 6 semester hours that count towards a major may be applied to a minor.

The TAMU-CC PSYC, PSYO, and SOCI degrees require knowledge of basic statistical theories and applications. This requirement is fulfilled by the successful completion of MATH 1442 or MATH 1342, or transfer courses such as PSYC 2317 or other courses with MATH, MAT, STAT, STA, PSY, AND PSYC prefixes AND the course title which includes Statistics, Quantitative Reasoning and/or Psychological Science Methods.

### Requirements

**Credit Hours**

- Core Curriculum Program (p. 47): 42
- First-Year Seminars (when applicable): 0-2
- Sociology Major Requirements: 37
- University Electives: 35
- Foreign Language Requirements: 6
- **Total Credit Hours**: 120-122

1. Elective coursework may include courses in Sociology as selected by the student in consultation with a faculty advisor. Electives are designed to meet students’ needs and interests.

### Inequalities courses

Select three from the following:

- SOCI 2301 Social Problems
- SOCI 2350 Sociology of Sexuality
- SOCI 3312 Racial and Ethnic Relations
- SOCI 3320 Sociology of Gender
- SOCI 3321 Mexican American Women
- SOCI 4312 Power, Privilege, and Poverty

### Sociology Electives

Select five from the following:

- SOCI 2319 Social Psychology
- SOCI 3310 Sociology through Film
- SOCI 3340 Sociology of the Family
- SOCI 3349 Sociology of Deviant Behavior
- SOCI 3350 Sociology of Education
- SOCI 4310 Sociology of Work and Occupations
- SOCI 4315 Complex Organizations
- SOCI 4320 Sociology of Sports
- SOCI 4325 Medical Sociology
- SOCI 4335 Criminology
- SOCI 4390 Topics in Sociology
- SOCI 4396 Directed Individual Study
- SOCI 4398 Applied Experience
Courses

SOCI 1301 Introduction to Sociology
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the basic concepts, methods, and theories used in Sociology. Topics illustrate the systematic understanding of social interaction, social organization, and social institutions. Reciprocal relationships between individuals and society are examined. Topics may include — but are not limited to — socialization, culture, social stratification, race and ethnicity, sex and gender, deviance, family, work, and social change.
TCCNS: SOCI 1301

SOCI 2301 Social Problems
3 Semester Credit Hours (3 Lecture Hours)
A survey and exploration of the causes and consequences of major social problems in the U.S. society, including contemporary issues of poverty, unemployment, income inequality, health care, crime, climate change, and other issues of social class, racial, ethnic, and gender inequality.
TCCNS: SOCI 1306

SOCI 2319 Social Psychology
3 Semester Credit Hours (3 Lecture Hours)
The scientific study of how a person's thoughts and behavior are influenced by others. Topics will include social cognition, attitudes, persuasion, interpersonal relationships, and group behavior. (Credit may not be given for both this course and PSYC 2326.) Cross listed with PSYC 2319.
TCCNS: SOCI 2326

SOCI 2350 Sociology of Sexuality
3 Semester Credit Hours (3 Lecture Hours)
An examination of sexuality from a sociological perspective. This course will consider the historical evolution of sexuality, the social construction of sexual identities, sexual inequalities and power, how sexualities and sex acts are defined as normal or deviant, and applications of sociological, queer, and feminist theories.

SOCI 3310 Sociology through Film
3 Semester Credit Hours (3 Lecture Hours)
The examination of film as a culture artifact to illustrate sociological concepts, theories, and perspectives. Specific attention will be given to narratives of film as they illustrate culture, aging, social class, gender, race/ethnicity, identity, and other sociological concepts.

SOCI 3312 Racial and Ethnic Relations
3 Semester Credit Hours (3 Lecture Hours)
The study of cultural, religious, ethnic and racial groups, and the treatment accorded them in society. Prejudice, discrimination and the outcomes of discrimination in relation to both dominant and subordinate groups are considered.

SOCI 3320 Sociology of Gender
3 Semester Credit Hours (3 Lecture Hours)
An examination of the roots, nature and social construction of gender roles including socialization of men and women, gender role relationships from the perspectives of sociology. Issues of family, education, work and the economy, religion, politics and law, feminist organizations, feminist theory, and men's and women's movements will be considered.

SOCI 3321 Mexican American Women
3 Semester Credit Hours (3 Lecture Hours)
A study of the Chicanas and the trends in society and Mexican-American culture affecting their lives and behaviors.
SOCI 3340 Sociology of the Family
3 Semester Credit Hours (3 Lecture Hours)
The study of the family, relationships among its members, and the relationship of family to other social institutions.

SOCI 3349 Sociology of Deviant Behavior
3 Semester Credit Hours (3 Lecture Hours)
A systematic and critical study of the nature, patterns, and processes of violations of significant social norms by members of society. Specific attention is given to violations such as drug abuse, violence in and outside the family, and white-collar offenses.

SOCI 3350 Sociology of Education
3 Semester Credit Hours (3 Lecture Hours)
Employing a sociological lens to examine formal education in the United States and other countries, students will explore various schools of thought and controversies surrounding education in modern societies. They will examine important issues related to formal education, such as the expansion of schooling, equality of educational opportunity, unequal achievement of groups of students, the reproduction of inequality in education, schools' roles in the transmission of culture, and the social organization of schools.

SOCI 4301 Social Theory
3 Semester Credit Hours (3 Lecture Hours)
Combines an analysis of the major ideas and theories in sociology and their relationship to social research with an understanding of social processes and structures.
Prerequisite: SOCI 1301.

SOCI 4310 Sociology of Work and Occupations
3 Semester Credit Hours (3 Lecture Hours)
The study of work as a social phenomenon, including the social organization of work, occupations, and professions in society. The labor force, work culture, workers mobility, career lines, and leisure in contrast to work are considered.

SOCI 4312 Power, Privilege, and Poverty
3 Semester Credit Hours (3 Lecture Hours)
The study of social inequality in society, with emphasis on the social class structure of the United States, its origins, development, and consequences for individuals, groups, and society.

SOCI 4315 Complex Organizations
3 Semester Credit Hours (3 Lecture Hours)
The development of a theoretical and applied understanding of those social institutions where most of us will be employed. Topics include organizational effectiveness, decision making, designs, politics, cultures, as well as gender and racial inequality.

SOCI 4320 Sociology of Sports
3 Semester Credit Hours (3 Lecture Hours)
This course critically examines the relationships between organized sports and the rest of society. It will undertake a sociological analysis of how organized sports affect, and are affected by, major social institutions such as the economy, racial and gender relations, mass media, and religion, to mention but a few.

SOCI 4325 Medical Sociology
3 Semester Credit Hours (3 Lecture Hours)
Examination of the social contexts of physical and mental health, illness and medical care. Topics include the social, environmental, and occupational factors in health and disease; socialization of health care providers; doctor-patient relationships; the structure and processes of health care organizations; and health care and social change.

SOCI 4331 Juvenile Delinquency
3 Semester Credit Hours (3 Lecture Hours)
Examination of the extent and pattern of juvenile crime today. History and theory of delinquency and society's response to it. (Credit may not be given for both this course and CRIJ 4331.) Cross listed with CRIJ 4331.

SOCI 4335 Criminology
3 Semester Credit Hours (3 Lecture Hours)
An examination of the major sociological explanations for crime, criminal behavior, and the social responses to crime. (Credit may not be given for both this course and CRIJ 4335.) Cross listed with CRIJ 4335.

SOCI 4385 Senior Seminar in Sociology
3 Semester Credit Hours
This is a capstone course required of all students graduating with a major in sociology. The course is designed to enable faculty to assess each student's expertise in applying sociological concepts and practices. Students demonstrate this expertise through the completion of a final project that combines a minimum of classroom hours with substantial research activity. The course is team taught by the entire sociology faculty. Students are allowed considerable flexibility in selecting either survey research or evaluation research for their project.(Offered Spring Only.)

SOCI 4390 Topics in Sociology
3 Semester Credit Hours (3 Lecture Hours)
A consideration of various topics on social behavior and social structure. May be repeated when topics vary.

SOCI 4396 Directed Individual Study
1-3 Semester Credit Hours
See College description.

SOCI 4398 Applied Experience
3 Semester Credit Hours (3 Lecture Hours)
See College description.

SOCI 4445 Social Research Methods
4 Semester Credit Hours (4 Lecture Hours)
A survey of the basic research techniques and methods used in sociology including content analysis, field research, sampling, surveys, polls, and computerized data analysis.
Prerequisite: SOCI 1301.

Spanish, BA

Program Description
The Spanish program offers a major and minor in Spanish. The main focus of the program is to develop the student's language proficiency and the literary, cultural, practical application, and translation competencies demanded by many professional fields. To accomplish these goals, the Spanish curriculum includes courses in general Spanish Language, Spanish for the Professions, Hispanic Linguistics, Spanish and Spanish-American Literature and Civilizations, and Translation. These courses are provided for students pursuing a Bachelor of Arts degree in Spanish with or without Secondary Teacher Certification, or Spanish/English Translation Certificate; for those fulfilling Second Language requirements or the Language, Philosophy, and Culture requirement in the Core Curriculum Program, and for those seeking electives to support majors and minors in other fields.

Student Learning Outcomes
Students will:
• demonstrate advanced proficiency in Spanish through performance on examinations, in-class presentations, and research papers;
• demonstrate the ability to understand, analyze, and interpret the cultural, linguistic and literary aspects of the Spanish-speaking countries through in-class presentations, examinations, and research papers;
• demonstrate proficiency in the practice, theory, and ethical aspects of translation and interpretation through in-class presentations, examinations, and translation projects;
• be prepared to teach Spanish and/or continue their studies at the graduate level.

For students planning to register for 3000 or 4000 level courses, Spanish Faculty approval or a prerequisite of two 2000 courses (or equivalent) is required. For Teacher Certification, both the TExES examination (LOTE-613 [Languages Other Than English]) and the PPR-160 (Pedagogy and Professional Responsibilities Test) must be completed. For the Translation Certificate, students must complete 16 credits of Spanish translation related coursework and pass an exit exam.

Students interested in Credit by Examination towards the Spanish major or minor must do so through the AP, IB, CLEP, or ACTFL exams. Students who choose the CLEP exam need to be cleared by a member of the Spanish faculty to apply those credits towards the major (or minor) and enroll in upper-division courses. The Bachelor of Arts in Spanish requires a minimum of 36 semester hours in Spanish, out of which 30 must be upper-division. The distribution of upper and lower-division hours can be found below. Students seeking a B.A. in Spanish must complete the following requirements.

About Upper-Division Spanish Courses
To enroll in upper-division Spanish courses, students must first do one of the following:
• pass two 2000 level Spanish courses.
• receive an equivalent score on the AP, IB, CLEP, or ACTFL tests.
• obtain approval from Spanish Faculty.

About the Teaching Certification and the Translation Certificate
• Students interested in receiving the Teaching Certification in Spanish, see catalog section under Spanish Teaching Certification.
• Students interested in receiving the Spanish/English Translation Certificate, see catalog section under Certificates. Note that only 6 hours from this certificate can be applied to the Spanish major.

About Double-Majors and Double-Degrees
Students who pursue the Spanish major as support for another major or degree in a different discipline are allowed to complete the program with 36 hours, at least 21 of which must be upper-division. Since these students are completing entire programs in another field simultaneously, they are allowed to complete the 36 hours with any distribution of their choice.

**Courses**

**SPAN 1100 Introduction to Service Learning**  
1 Semester Credit Hour  
This is a one-credit course in which students in Spanish 1311 or 1312 may enroll and participate. This service learning course aims to promote collaborative learning between college students learning Spanish and people in the community. Available upon application. Repeatable up to 2 hours.

**SPAN 1311 Spanish I**  
3 Semester Credit Hours (3 Lecture Hours)  
Introduction to listening, speaking, reading and writing skills within a Spanish cultural framework. For students without previous knowledge of the language. (Language laboratory required. One hour per week.) *A lab fee is required for these courses.

**SPAN 1312 Spanish II**  
3 Semester Credit Hours (3 Lecture Hours)  
Continued practice in listening, speaking, reading and writing skills within a Spanish cultural framework. (Language laboratory required. One hour per week.) A lab fee is required for these courses.  
**Prerequisite:** (SPAN 1311).

**SPAN 2311 Spanish III**  
3 Semester Credit Hours (3 Lecture Hours)  
Study of more complex Spanish sentence structure to further listening, speaking, reading and writing skills at an intermediate level within a Spanish cultural framework.  
**Prerequisite:** SPAN 1312.  
**TCCNS:** SPAN 2311

**SPAN 2312 Continuing Spanish**  
3 Semester Credit Hours (3 Lecture Hours)  
Continued development and review of all language skills at an intermediate level within a Spanish framework with an emphasis in the linguistic and cultural perspective.  
**Prerequisite:** SPAN 2311.  
**TCCNS:** SPAN 2312

**SPAN 2313 Spanish for Heritage Speakers**  
3 Semester Credit Hours (3 Lecture Hours)  
An introductory course designed for bilingual students who wish to enhance their linguistic skills (speaking, listening, reading and writing). This course will focus on the cultural and historical aspects related to the heritage Spanish speaker.  
**TCCNS:** SPAN 2313

**SPAN 2315 Language and Culture for Heritage Learners**  
3 Semester Credit Hours (3 Lecture Hours)  
This course is designed to guide Spanish heritage language learners, as well as advanced learners of Spanish, in the development of their oral proficiency, written communication, and grammatical accuracy while exploring different cultural aspects from the Spanish-speaking world. It is highly recommended for students who have taken SPAN 2313 and/or who are transitioning into upper-division Spanish courses.  
**Prerequisite:** SPAN 2313.

**SPAN 3302 Spanish Composition**  
3 Semester Credit Hours (3 Lecture Hours)  
A course designed to develop analytical perspectives in literary criticism and to strengthen reading and writing skills in Spanish through intensive reading of Spanish, Spanish American, and Chicano fiction.  
**Prerequisite:** SPAN 2312.

**SPAN 3303 Spanish Conversation**  
3 Semester Credit Hours (3 Lecture Hours)  
A course designed to strengthen the student's oral proficiency in the language through selected readings, videos and oral presentations.  
**Prerequisite:** SPAN 2312.

**SPAN 3304 Spanish Civilization**  
3 Semester Credit Hours (3 Lecture Hours)  
This course has been designed to provide a general overview of the cultural, linguistic, and historical experience of the Spanish people within its larger European context. Conducted in Spanish unless otherwise stated. This course may be used to satisfy the university core curriculum requirement in Language, Philosophy, and Culture.  
**Prerequisite:** SPAN 2312.

**SPAN 3305 Latin American Civilization**  
3 Semester Credit Hours (3 Lecture Hours)  
This course is designed to provide a general overview of the cultural, linguistic, and historical experience of Latin American people before and after Columbus. Conducted in Spanish unless otherwise stated. This course may be used to satisfy the university core curriculum in Language, Philosophy, and Culture.  
**Prerequisite:** SPAN 2312.

**SPAN 3307 Spanish Literature I**  
3 Semester Credit Hours (3 Lecture Hours)  
A critical approach to the study of early Spanish literature from the Middle Ages through the Eighteenth Century. Literary selections include masterpieces that establish and reflect Spain's literary tradition within its larger European context.

**SPAN 3308 Spanish Literature II**  
3 Semester Credit Hours (3 Lecture Hours)  
A continuation of a critical approach to the study of Spanish literature from the Nineteenth Century through the present. Representative works of Spanish Romanticism, Realism, Naturalism, and contemporary literature are studied within their larger European context.

**SPAN 3309 Spanish American Literature I**  
3 Semester Credit Hours (3 Lecture Hours)  
A critical approach to the study of early Spanish American literature from the Pre-Columbian Period through the Nineteenth Century. Selected readings in all literary genres, major themes, writers, and early literary movements will be studied within their larger Latin American context.

**SPAN 3310 Spanish American Literature II**  
3 Semester Credit Hours (3 Lecture Hours)  
A continuation of a critical approach to the study of Spanish American literature from the Twentieth Century through the present. Representative works of Latin American writers and literary movements: Modernism, Realism, Avant-Garde, Regionalism, Magic-Realism are studied within their larger Latin American context.

**SPAN 3311 Spanish Phonetics**  
3 Semester Credit Hours (3 Lecture Hours)  
A course designed to study the production and discrimination of the Spanish sound system with a general overview of the geographical and social distribution of phonemic and allophonic variants.
SPAN 3312  Spanish Grammar
3 Semester Credit Hours (3 Lecture Hours)
The course will serve to expand vocabulary, further develop writing skills, understand, apply, and use Spanish grammatical structures, and communicate more accurately in written and oral Spanish within a Hispanic cultural context.

SPAN 3313  Introduction to Translation
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to the theory, methods and practice of English to Spanish and Spanish to English translation of general texts from different fields. Challenges related to culture and language, as well as professional ethics will be examined.

SPAN 3315  Civilizations of the Spanish-Speaking World
3 Semester Credit Hours (3 Lecture Hours)
This course has been designed to provide a general overview of the historical, sociocultural and political experience of peoples from the Spanish-Speaking world, both from Spain and Spanish America.
Prerequisite: SPAN 2312.

SPAN 3316  Spanish for the Professions
3 Semester Credit Hours (3 Lecture Hours)
The course stresses Health, Business and Legal terminology in Spanish to enhance communication skills and cultural knowledge that will help to serve the South Texas Spanish speaking population as well as to conduct interactions with Spanish speakers and/or businesses through the United States and the world.

SPAN 3317  Introduction to Hispanic Linguistics
3 Semester Credit Hours (3 Lecture Hours)
This course introduces the study of language, the main subfields of Hispanic linguistics, and their application to other sciences.

SPAN 3320  Introduction to Spanish Literature
3 Semester Credit Hours (3 Lecture Hours)
A critical approach to the study of Spanish literature from the Middle Ages through the present. Representative works of Spanish literature are studied within their larger European context. It is highly recommended that students take any of the following before taking this course: SPAN 2313, 2315, 3302, 3303 have advanced proficiency or faculty permit. Conducted in Spanish, unless otherwise stated. This course may be used to satisfy the University Core Curriculum requirement in Language, Philosophy, and Culture.

SPAN 3325  Introduction to Latin American Literature
3 Semester Credit Hours (3 Lecture Hours)
A critical approach to the study of Latin American literature from the Pre-Columbian Period through the present. Selected readings in all literary genres, major themes, writers, and literary movements will be studied with a wide Latin American context. It is highly recommended that students take any of the following before taking this course: SPAN 2313, 2315, 3302, 3303 have advanced proficiency or faculty permit. Conducted in Spanish, unless otherwise stated. This course may be used to satisfy the University Core Curriculum requirement in Language, Philosophy, and Culture.

SPAN 4100  Service Learning
1 Semester Credit Hour
This is a one-credit course designed specifically for students who are preparing themselves to serve the community using their Spanish language skills. Students in this course will familiarize themselves with the methodology of a particular field (heritage language teaching, translation, interpreting, etc) to be able to interact and serve Spanish-speaking individuals in the community. Available upon application. Repeatable up to 3 hours.

SPAN 4301  Spanish Civil War and Literature
3 Semester Credit Hours (3 Lecture Hours)
Significance of the Civil War for Spanish, European, and world history. Effect of war on literary and cultural life of the country and the response of writers from Spain and Latin America. Conducted in Spanish.

SPAN 4302  Mexican Narrative
3 Semester Credit Hours (3 Lecture Hours)
Examination of representative novels and short stories reflecting the emergence of a post-revolutionary society in Mexico. Conducted in Spanish.

SPAN 4303  Spanish in the Southwest
3 Semester Credit Hours (3 Lecture Hours)
Cultural and linguistic dimensions of Spanish dialects of the Southwestern United States, with special attention to Texas Spanish and its sociolinguistic perspectives in the bilingual community at large.
Prerequisite: SPAN 2312.

SPAN 4304  Miguel de Cervantes’ Don Quijote
3 Semester Credit Hours (3 Lecture Hours)
An advanced course designed to provide an introduction to Miguel de Cervantes’ Don Quijote.

SPAN 4305  Latin American Novel
3 Semester Credit Hours (3 Lecture Hours)
This course explores major novels from Latin America from the 20th century to the present. It examines the different problems, discourses, voices, contexts, and geographies that define this genre in Latin America.

SPAN 4306  Modern Spanish Literature
3 Semester Credit Hours (3 Lecture Hours)
A course that focuses on modern Spanish literature. It is highly recommended that students take any of the following before taking this course: SPAN 2313, 2315, 3302, 3303, have advanced proficiency or faculty permit. Conducted in Spanish, unless otherwise stated.

SPAN 4313  Spanish Interpretation
3 Semester Credit Hours (3 Lecture Hours)
This course presents an introduction to methodologies, requirements, terminology, and practice of interpretation, with emphasis on simultaneous, consecutive, and sight interpretation.

SPAN 4320  Spanish in the Americas
3 Semester Credit Hours (3 Lecture Hours)
A study of the Spanish that was brought to the Americas, its development, propagation and contact with native-American languages, including the sociocultural factors that have contributed to the linguistic variation in contemporary Spanish-speaking societies.

SPAN 4322  Medical, Scientific and Technical Translation
3 Semester Credit Hours (3 Lecture Hours)
An advanced course in translation concentrating on medical, scientific and technical translation. The course is designed to extend student's knowledge of translation theory and consolidate their skills in specialized translation.
Prerequisite: (SPAN 3313).

SPAN 4327  Methods in Foreign Language Instruction
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to study the current methods in foreign languages, their application in maximizing language proficiency, and the role of the students' culture and language during the learning process.
SPAN 4390  Topics in Spanish
3 Semester Credit Hours (3 Lecture Hours)
Study of specialized topics in language or literature. These courses may also be designed to develop terminology and overall Spanish proficiency regarding specific professions: Business, Medical, Criminal Justice, Sociology, etc. May be repeated when topics vary.

SPAN 4396  Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description.

SPAN 4398  Applied Experience
3 Semester Credit Hours
A practical work experience related to the Spanish area and related careers. It is intended to provide an opportunity for a student to gain first-hand experience in an unfamiliar field. Consequently, Applied Experience credit may not be granted for a student's regular work assignment or for previous work experience. Registration is by application. The application must include a clearly written description of the duties and responsibilities involved in the Applied Experience project, and be signed by the student, the on-site supervisor, and the faculty supervisor. Completed applications must be received in the Dean's Office by the last class day of the semester preceding intended registration. This course is graded "credit" or "no credit." No more than three semester hours of Applied Experience credit may be counted toward the baccalaureate degree. Undergraduate Applied Experience course will include no less than one hundred hours and no more than 150 hours of work experience per semester.

SPAN 4421  Business, Commercial, and Legal Translation
4 Semester Credit Hours (4 Lecture Hours)
An advanced course in translation concentrating on business, commercial and legal texts. The course is designed to extend student's knowledge of translation theory and consolidate their skills in specialized translation.
Prerequisite: (SPAN 3313).

University Studies, BA
Program Description
The University Studies degree at Texas A&M University-Corpus Christi (TAMU-CC) is a flexible undergraduate program which allows students to design a course of study that best fits their educational and career goals rather than follow a specific track of coursework prescribed by a major degree. The University Studies degree can be completed as a Bachelor of Arts (BA) or a Bachelor of Science (BS). With a University Studies degree, students will graduate with a breadth of knowledge in a range of academic disciplines, preparing them for the workforce, graduate school, or fulfilling their dreams of obtaining a degree.

In today's marketplace, employers are looking for people who demonstrate leadership skills, who can plan and organize, set priorities and who are result oriented. The University Studies degree at TAMU-CC highlights these skills. Students work closely with an academic advisor to develop their educational path, based on their career goals, and select coursework that will best suit their individual needs.

Who should consider a University Studies degree?
- Current TAMU-CC students with over 60 hours and who are unsure about what major to pursue or whose career goals do not align with an established TAMU-CC major.
- Current TAMU-CC students with over 60 hours who need to accelerate their graduation date and are unable to do so in their stated major due to major specific requirements, course sequencing and/or gpa requirements.
- Former Islanders who would like to return to TAMU-CC to complete their degree.

Students must meet the minimum requirements to obtain a University Studies degree; they are as follows:
1. Completion of the Texas core curriculum
2. At least 24 hours in a primary concentration area; at least 18 of the hours must be upper division hours (3000 and 4000) and 6 may be lower division hours (1000 and 2000). Hours earned before changing majors can be used to satisfy degree requirements. Courses completed as part of the core curriculum may not be used to satisfy the concentration area requirements
3. 21 hours in a secondary concentration area (or 21 additional hours in the primary concentration area); hours in the secondary concentration area may be lower or upper division hours. Hours earned before changing majors can be used to satisfy degree requirements. Courses completed as part of the core curriculum may not be used to satisfy the concentration area requirements.
4. UNIV 4350 University Studies Capstone (3 sch) (Capstone)
5. 45 total upper-division hours; 30 upper-division hours must be taken at TAMU-CC (Students who wish to graduate with honors must have completed at least 45 undergraduate semester hours at Texas A&M University-Corpus Christi.)
6. 120 total hours.
7. Electives – upper and lower division electives to ensure that the student completes 45 total upper division hours and 120 hours overall for the degree requirements.
8. UNIV 1101 University Seminar I (1 sch) & UNIV 1102 University Seminar II (1 sch) (Students with more than 24 hours of transfer work are exempt from this requirement.)
9. Foreign Language (either 2 years in high school or 2 semesters in college)
10. Overall and TAMU-CC GPA of at least 2.0

You may choose your primary and/or secondary concentration areas from the following: Business, Education/Human Development, Liberal Arts, Nursing/Health Sciences, and Science/Engineering.

Please note that some departments have class, major or pre-requisite restrictions on some of the classes that may be taken. When choosing your concentration areas and coursework, it is important to keep this in mind.

All students must complete the UNIV 4350 University Studies Capstone (3 sch) course, which is the capstone course for the University Studies degree. In this course, students will demonstrate, via class projects and assignments, their ability to identify skills which can be used in community settings to assist in problem solving, customer service and the workforce.

Students will begin with an in-depth look at the five main components of solving a problem and practice the skills through a series of a structured exercises. During this process, students will discuss research, assessment of data, brainstorming and creative thinking, planning, time management, leadership and collaboration, effective communication, and evaluating results. Students will then apply the skills learned to their area of interest in a final project.
Residence Requirement
Students must take a minimum of 30 semester hours of upper-division course work from this university to complete a University Studies degree.

Advising and Degree Plans
As soon as students declare their intent to pursue a University Studies degree, they must meet with their academic advisor to discuss their concentration and possible career path.

Courses

UNIV 1100 Career and Academic Planning
1 Semester Credit Hour (2 Lecture Hours)
assists students in confirming career and educational choices based on strengths-based career assessments, research on career interests, and clarification of majors and degree options. Through in-class activities, discussions, and presentations, students will explore the variety of educational opportunities available to them at the university to support their career and academic interests. In addition, students will be introduced to decision-making and goal-setting strategies to identify and set achievable academic and career goals.
UNIV 1101 University Seminar I
1 Semester Credit Hour (2 Lecture Hours)
UNIV 1101 is designed to support students in their transition as new TAMU-CC Islanders. Students are encouraged to reflect on the value of a university education and challenged to adopt strategies for lifelong and integrative learning in an active learning environment with a contextualized curriculum. Required of full-time first-year students and should be taken within the first full year of enrollment at TAMU-CC.

UNIV 1102 University Seminar II
1 Semester Credit Hour (2 Lecture Hours)
UNIV 1102 continues to challenge students to adopt lifelong and integrative learning strategies in an active learning environment. Students are encouraged to reflect upon and refine personal and professional goals through the lens of their intended future. Required of full-time first-year students and should be taken within the first full year of enrollment at TAMU-CC.

UNIV 2490 Current Issues in University Studies
1-4 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
Focused exploration of contemporary interdisciplinary issues for lower-division students. May be repeated when topics vary.

UNIV 3340 Academic and Field Research
3 Semester Credit Hours (3 Lecture Hours)
This course is an examination of the assumptions and questions underlying research methods across disciplines, with special emphasis on how methodologies from different fields (such as science and humanities) can complement each other. The course will involve experts from across the university who will address issues such as 1) the distinct qualities of quantitative and qualitative research, 2) current uses of surveys, interviews, and market research, 3) the construction of new knowledge in various disciplines, from problem to publication, 4) the critical use and evaluation of electronic and print resources, archival materials, government documents, and scholarly list serves.

UNIV 3490 Topics in University Studies
1-4 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
A course that deals with significant contemporary issues that transcend disciplinary boundaries. May be repeated when topics vary.

UNIV 4350 University Studies Capstone
3 Semester Credit Hours (3 Lecture Hours)
This course emphasizes writing, research, professionalization, and workforce preparation. Students will be responsible for developing a reflective writing portfolio that showcases their academic specialization and preparation within the University Studies program. The course will also cover the practical skills of obtaining employment, including writing resumes, effectively interviewing, and effectively searching for available jobs.

UNIV 4490 Seminar in University Studies
1-4 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
Interdisciplinary study of specialized topics and themes transcending the boundaries of a single discipline. May be repeated when topics vary.

University Studies, BS

Program Description
The University Studies degree at Texas A&M University-Corpus Christi (TAMU-CC) is a flexible undergraduate program which allows students to design a course of study that best fits their educational and career goals rather than follow a specific track of coursework prescribed by a major degree. The University Studies degree can be completed as a Bachelor of Arts (BA) or a Bachelor of Science (BS). With a University Studies degree, students will graduate with a breadth of knowledge in a range of academic disciplines, preparing them for the workforce, graduate school, or fulfilling their dreams of obtaining a degree.

In today’s marketplace, employers are looking for people who demonstrate leadership skills, who can plan and organize, set priorities and who are result oriented. The University Studies degree at TAMU-CC highlights these skills. Students work closely with an academic advisor to develop their educational path, based on their career goals, and select coursework that will best suit their individual needs.

Who should consider a University Studies degree?

- Current TAMU-CC students with over 60 hours and who are unsure about what major to pursue or whose career goals do not align with an established TAMU-CC major.
- Current TAMU-CC students with over 60 hours who need to accelerate their graduation date and are unable to do so in their stated major due to major specific requirements, course sequencing and/or GPA requirements.
- Former Islanders who would like to return to TAMU-CC to complete their degree.

Students must meet the minimum requirements to obtain a University Studies degree; they are as follows:

1. Completion of the Texas core curriculum
2. At least 24 hours in a primary concentration area; at least 18 of the hours must be upper division hours (3000 and 4000) and 6 may be lower division hours (1000 and 2000). Hours earned before changing majors can be used to satisfy degree requirements. Courses completed as part of the core curriculum may not be used to satisfy the concentration area requirements.
3. 21 hours in a secondary concentration area (or 21 additional hours in the primary concentration area); hours in the secondary concentration area may be lower or upper division hours. Hours earned before changing majors can be used to satisfy degree requirements. Courses completed as part of the core curriculum may not be used to satisfy the concentration area requirements.
4. UNIV 4350 University Studies Capstone (3 sch) (Capstone)
5. 45 total upper-division hours; 30 upper-division hours must be taken at TAMU-CC (Students who wish to graduate with honors must have completed at least 45 undergraduate semester hours at Texas A&M University-Corpus Christi.)
6. 120 total hours.
7. Electives – upper and lower division electives to ensure that the student completes 45 total upper division hours and 120 hours overall for the degree requirements.
8. UNIV 1101 University Seminar I (1 sch) & UNIV 1102 University Seminar II (1 sch) (Students with more than 24 hours of transfer work are exempt from this requirement.)
9. Foreign Language (either 2 years in high school or 2 semesters in college)
10. Overall and TAMU-CC GPA of at least 2.0

You may choose your primary and/or secondary concentration areas from the following: Business, Education/Human Development, Liberal Arts, Nursing/Health Sciences, and Science/Engineering.

Please note that some departments have class, major or pre-requisite restrictions on some of the classes that may be taken. When choosing
your concentration areas and coursework, it is important to keep this in mind.

All students must complete the UNIV 4350 University Studies Capstone (3 sch) course, which is the capstone course for the University Studies degree. In this course, students will demonstrate, via class projects and assignments, their ability to identify skills which can be used in community settings to assist in problem solving, customer service and the workforce.

Students will begin with an in-depth look at the five main components of solving a problem and practice the skills through a series of structured exercises. During this process, students will discuss research, assessment of data, brainstorming and creative thinking, planning, time management, leadership and collaboration, effective communication, and evaluating results. Students will then apply the skills learned to their area of interest in a final project.

**Residence Requirement**

Students must take a minimum of 30 semester hours of upper-division course work from this university to complete a University Studies degree.

**Advising and Degree Plans**

As soon as students declare their intent to pursue a University Studies degree, they must meet with their academic advisor to discuss their concentration and possible career path.

Courses

UNIV 1100 Career and Academic Planning
1 Semester Credit Hour (2 Lecture Hours)
assists students in confirming career and educational choices based on strengths-based career assessments, research on career interests, and clarification of majors and degree options. Through in-class activities, discussions, and presentations, students will explore the variety of educational opportunities available to them at the university to support their career and academic interests. In addition, students will be introduced to decision-making and goal-setting strategies to identify and set achievable academic and career goals.

UNIV 1101 University Seminar I
1 Semester Credit Hour (2 Lecture Hours)
UNIV 1101 is designed to support students in their transition as new TAMU-CC Islanders. Students are encouraged to reflect on the value of a university education and challenged to adopt strategies for lifelong and integrative learning in an active learning environment with a contextualized curriculum. Required of full-time first-year students and should be taken within the first full year of enrollment at TAMU-CC.

UNIV 1102 University Seminar II
1 Semester Credit Hour (2 Lecture Hours)
UNIV 1102 continues to challenge students to adopt lifelong and integrative learning strategies in an active learning environment. Students are encouraged to reflect upon and refine personal and professional goals through the lens of their intended future. Required of full-time first-year students and should be taken within the first full year of enrollment at TAMU-CC.

UNIV 2490 Current Issues in University Studies
1-4 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
Focused exploration of contemporary interdisciplinary issues for lower-division students. May be repeated when topics vary.

UNIV 3340 Academic and Field Research
3 Semester Credit Hours (3 Lecture Hours)
This course is an examination of the assumptions and questions underlying research methods across disciplines, with special emphasis on how methodologies from different fields (such as science and humanities) can complement each other. The course will involve experts from across the university who will address issues such as 1) the distinct qualities of quantitative and qualitative research, 2) current uses of surveys, interviews, and market research, 3) the construction of new knowledge in various disciplines, from problem to publication, 4) the critical use and evaluation of electronic and print resources, archival materials, government documents, and scholarly list serves.

UNIV 3490 Topics in University Studies
1-4 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
A course that deals with significant contemporary issues that transcend disciplinary boundaries. May be repeated when topics vary.

UNIV 4350 University Studies Capstone
3 Semester Credit Hours (3 Lecture Hours)
This course emphasizes writing, research, professionalization, and workforce preparation. Students will be responsible for developing a reflective writing portfolio that showcases their academic specialization and preparation within the University Studies program. The course will also cover the practical skills of obtaining employment, including writing resumes, effectively interviewing, and effectively searching for available jobs.

UNIV 4490 Seminar in University Studies
1-4 Semester Credit Hours (1 Lecture Hour, 1 Lab Hour)
Interdisciplinary study of specialized topics and themes transcending the boundaries of a single discipline. May be repeated when topics vary.

Bachelor Degree Programs - School of Arts, Media & Communication

Art, BA

Program Description

The Bachelor of Arts degree with major study in art is a general program in art. The degree requires a minimum of 51 semester hours of art coursework. Course selections include two- and three-dimensional art, art history, design, and art electives.

The College of Liberal Arts also requires at least 6 semester hours of a second language for the Bachelor of Arts degree in Art.

The purposes of the art curriculum are:

1. To provide a general program that allows students access to a variety of art media, studio techniques, and instruction;
2. To provide students with opportunities to study past and present forms of art and to understand the function of art in society;
3. To provide courses that will help expand the knowledge and interest of non-majors in the area of art; and
4. To contribute to the cultural life of the University and the community by presenting quality art exhibitions in the Weil Gallery.

Students can major in art in either the Bachelor of Arts (BA) or the Bachelor of Fine Arts (BFA) degree programs. Students in the BFA have the option through electives to develop an emphasis beyond the general degree program in Printmaking, Painting, Sculpture, Ceramics, Photography, Drawing, or Art History.

Two minors are also available. The minor in Studio Art is 21 semester hours and will allow a student to concentrate in one studio area. The
Student Learning Outcomes

Students will have:

- knowledge in a variety of art media, studio techniques, and art history;
- the ability to clearly articulate the principles and theories of contemporary art as it applies to their creative interests;
- a working knowledge of visual problem solving and critical thinking.

General Requirements

Specific Degree Requirements

All art majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All art degrees require ARTS 1303 - Art History Survey I 3 sem. hrs., which also meets the Core Curriculum Program Fine Arts requirement. All and only coursework with the prefix ARTS and GRDS that count towards their major will be included in the grade point average for the students declared major field of study.

Capstone

This course must be taken in your final semester before graduation.

ARTS 4085 Senior Capstone 0

University Electives

Select 21 hours of university electives. 21

Foreign Language Requirements

See the College of Liberal Arts for the college language requirement. 6

Total Hours 122

Note:

All students graduating with a Bachelor of Arts Degree in Art Studio are required to submit an exit portfolio. The portfolio consists of six .jpg images that best represent their most successful coursework during their educational careers in the Department of Art. A written formal discussion of some aspect of their work is also required.

The senior capstone class sets the standards and format for these materials and coordinates the collection of the materials. These materials are due on or before the last class day of the semester in which the students plan to graduate.

Courses
ARTS 1301  Art and Society  3 Semester Credit Hours (3 Lecture Hours)
Designated for non-art majors. Establishes a working vocabulary for evaluating works of art in various media. Objects are interpreted in terms of their specific historical contexts and the changing relationships between art and society. This course does not fulfill the art history requirement for art majors.
TCCNS: ARTS 1301

ARTS 1303  Art History Survey I  3 Semester Credit Hours (3 Lecture Hours)
An examination of painting, sculpture, architecture, and other arts from the ancient through medieval periods.
TCCNS: ARTS 1303

ARTS 1304  Art History Survey II  3 Semester Credit Hours (3 Lecture Hours)
A further examination of painting, sculpture, architecture, and other arts from the Renaissance through Modern periods. This course satisfies the university core curriculum requirement in fine arts.
Prerequisite: ARTS 1303.
TCCNS: ARTS 1304

ARTS 1311  Design I  3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on two-dimensional concepts.
TCCNS: ARTS 1311

ARTS 1312  Design II  3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on three-dimensional concepts. This 3D foundations course utilizes creative problem-solving strategies and basic sculpture tools to explore spatial relationships and to create sculptural forms in space.
Co-requisite: SMTE 0097.
TCCNS: ARTS 1312

ARTS 1316  Drawing I  3 Semester Credit Hours (3 Lecture Hours)
A studio course investigating a variety of media techniques, including their descriptive and expressive possibilities.
TCCNS: ARTS 1316

ARTS 1317  Drawing II  3 Semester Credit Hours
A further investigation of media techniques explored in Drawing I, including their descriptive and expressive possibilities.
Prerequisite: ARTS 1316.
Co-requisite: SMTE 0097.
TCCNS: ARTS 1317

ARTS 2311  Design III: Color  3 Semester Credit Hours
Investigation of the properties of color. Color is studied and applied to studio-oriented design assignments.
Co-requisite: SMTE 0097.
ARTS 2316 Painting I
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring the potentials of painting media.
Prerequisite: ARTS 1316.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2316

ARTS 2323 Drawing III
3 Semester Credit Hours
A studio course continuing the investigation of media and techniques explored in Drawing I and Drawing II. Students investigate how formal aspects and selected media along with conceptual choices create specific visual ideas.
Prerequisite: ARTS 1317.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2323

ARTS 2326 Sculpture I
3 Semester Credit Hours
An introductory studio course exploring sculptural approaches, materials, concepts, and technical processes. Materials include wood, plaster, steel, and plastics.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2326

ARTS 2333 Printmaking I
3 Semester Credit Hours
An introductory studio course in basic printmaking processes and techniques.
Prerequisite: ARTS 1316 or 1311.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2333

ARTS 2346 Ceramics I
3 Semester Credit Hours (3 Lecture Hours)
An introductory studio course in basic ceramic processes.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2346

ARTS 2356 Photography I
3 Semester Credit Hours
This course is an introduction to digital photography capture, processing, and basic editing software. While focusing on the fundamentals of digital photography and printing techniques, it will introduce students to the theory and practice of photography and assist them in producing a conceptually devised and technically consistent portfolio.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2356

ARTS 2367 Watercolor
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring techniques in water-base media.
Co-requisite: SMTE 0097.

ARTS 3301 Life Drawing
3 Semester Credit Hours
Drawing from the model using a variety of techniques and media.
Prerequisite: ARTS 1317.
Co-requisite: SMTE 0097.

ARTS 3302 Screen Printing
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to screenprinting.
Prerequisite: ARTS 1311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3303 Intermediate Painting
3 Semester Credit Hours (3 Lecture Hours)
Explores the issues of content, imagery, application, and influences of master artists.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3304 Fabrication Sculpture
3 Semester Credit Hours
Building upon introductory skills, this course explores construction and fabrication in sculpture focusing on a primary material for the semester and applying advanced techniques and processes for this material. Through this material and techniques, students begin defining and developing their visual vocabulary relative to art history and contemporary sculptural issues.
Prerequisite: ARTS 2326.
Co-requisite: SMTE 0097.

ARTS 3305 Mold Making and Casting Sculpture
3 Semester Credit Hours
This course is designed to build upon the fundamental principles of mold making and casting while exploring more complex concepts, materials, and techniques. Creating multi-part molds, flexible molds, and investment molds, the project assignments incorporate the unique versatility of mold making and casting for exchanging media and making a series of multiples. In addition to making casts, students compare methods for assembling cast forms together to create larger sculptural artworks and installations.
Co-requisite: SMTE 0097.

ARTS 3306 Figurative Sculpture
3 Semester Credit Hours
A study of the human figure from an anatomical and artistic perspective. Examines the skeletal and muscular components of the figure in order to create lifelike and emotive sculptures. Discussion of the figure in both classical and contemporary art. Working with armature and modeling clay.
Co-requisite: SMTE 0097.

ARTS 3307 Lithography and Planographic Process
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white color techniques, including but not limited to lithography and monoprinting.
Prerequisite: ARTS 2311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3311 Color Theory
3 Semester Credit Hours
This course develops an understanding of color properties and relationships through formal exercises, research and creative thinking. Students build a vocabulary for analyzing and identifying color and color phenomena. Concepts of color theorists and color use in a variety of fields are examined to understand the application of color theory. Students will investigate the use of color in their own work and in the work of others to understand the conceptual and aesthetic application of color.
Prerequisite: ARTS 1311.
ARTS 3313 Figure Painting
3 Semester Credit Hours
This course addresses the structure and anatomy of the human figure using oil paint. Painting techniques and color theory exercises will familiarize students with tradition painting methods. Students will render proportions, balance, form and mass of the human figure. Research and discussions will address the human form throughout history as well as in the contemporary context. Image presentations, critiques and live model sessions will supplement studio work.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3316 Art Activities I
3 Semester Credit Hours (3 Lecture Hours)
Practical experience with basic design, drawing, painting, and sculpture, along with a study of art history and criticism. Includes a consideration of how these experiences relate to art curricula in the elementary school.

ARTS 3322 Art Activities II
3 Semester Credit Hours (3 Lecture Hours)
Practical experiences with basic design, drawing, painting, printmaking, sculpture, and crafts, along with a study of art history and criticism. Includes a consideration of how these experiences relate to art curricula in the secondary school.

ARTS 3324 Wheel Throwing
3 Semester Credit Hours
Covers wheel-thrown ceramics (other production techniques may be included), basic glazemaking, and an introduction to kiln firing and loading.
Prerequisite: ARTS 2346.
Co-requisite: SMTE 0097.

ARTS 3325 Handbuilt Ceramic Techniques
3 Semester Credit Hours
This course is a continuation of hand-building covered in Ceramics I ARTS 2346. The course will cover more advanced forming techniques such as extrusion, hump, slump, and press molds, and slip-casting. New surface and firing techniques will include more advanced techniques such as underglazes, onglaze techniques such as majolica, fired decal application, raku, and an introduction to low fire glazes and surfaces.
Prerequisite: ARTS 2346.

ARTS 3350 Art of the United States
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major developments in the art of North America from Pre-Columbian times to the modern era.

ARTS 3352 Modern Art
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major movements of 20th century art and aesthetics, which developed primarily in Europe. Includes a review of late 19th century modernist antecedents with emphasis placed on the principal movements of the early 20th century: Fauvism, German Expressionism, Cubism, Futurism, Abstract Art, Dada, and Surrealism.

ARTS 3353 Art Since 1945
3 Semester Credit Hours (3 Lecture Hours)
An examination of the dispersal of European artists and Modernism, primarily to America, as a result of World War II. Examines the development of Abstract Expressionism in New York in the 1940s and 50s, followed by a survey of recent trends in contemporary art to the present day.

ARTS 3360 Graphic Design I
3 Semester Credit Hours (3 Lecture Hours)
Introduce fundamental graphic communication techniques, software and theory. Explores hand skills by using tools and techniques to produce professional presentations as well as the correct procedures for presenting designs to a client.

ARTS 3365 Photography II
3 Semester Credit Hours
An intermediate studio course using digital cameras and image manipulation software. Prior completion of ARTS 2356 is required. This course will enhance and expand skills developed in Photography I. It is geared toward informing students in the many ways we can make photographs; by seeking them out, framing them, forming them, extracting them, building them, and finally sequencing and presenting them. Students will engage in the theory and practice of photography, refine their photographic technique, and create a conceptually devised and technically consistent portfolio. Emphasis is placed on the development of a strong conceptual foundation from which to approach the making and understanding of photography as an art form. This knowledge will be achieved through photographic assignments, slide lectures of relevant works, and in-class critiques. It can be repeated twice for credit.
Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3366 Analogue Photography
3 Semester Credit Hours
An introductory studio course in analogue photography using film cameras and the silver gelatin darkroom process. While focusing on the fundamentals of black and white, analogue photography and printing techniques this course will assist students in producing a conceptually devised and technically consistent portfolio.
Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3367 Digital Design Tools and Applications
3 Semester Credit Hours
This studio course explores the fundamental principles, standard creative processes and basic digital tools utilized in graphic design. The concepts and software learned are employed in projects specifically targeted to serve the professional and promotional needs of studio artists and design enthusiasts.

ARTS 4085 Senior Capstone
0 Semester Credit Hours
Required for all art students in partial fulfillment of the requirements for the BA in Art, BFA in Art studio track and the BFA with Teacher Certification in Art tracks. This course collects capstone materials for ARTS degrees. The course must be taken in the student's final semester before graduation.

ARTS 4301 Advanced Drawing
3 Semester Credit Hours
Emphasis on the development of content through drawing. Research on contemporary trends and process investigation will aid students in the development of visual ideas and lead to a cohesive body or work. May be taken three times for credit.
Prerequisite: ARTS 2323.
Co-requisite: SMTE 0097.
ARTS 4302 Advanced Printmaking
3 Semester Credit Hours
Furthers competencies attained in Printmaking I and Intermediate I & II courses. May be taken three times for credit.
Prerequisite: ARTS 3302 and 3307.
Co-requisite: SMTE 0097.

ARTS 4303 Advanced Painting
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3303. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4304 Advanced Sculpture
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3304. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4324 Advanced Ceramics
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3324. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4350 Pre-Columbian Art of Mesoamerica
3 Semester Credit Hours (3 Lecture Hours)
Explores the history of Pre-Columbian art from Mexico and Central America, from the Olmec through the Aztec cultures. May be taken three times for credit.

ARTS 4352 Modern Art of Mexico
3 Semester Credit Hours (3 Lecture Hours)
Explores the history of art during the nineteenth and twentieth centuries in Mexico. May be taken three times for credit.

ARTS 4354 Global Currents in Contemporary Art
3 Semester Credit Hours (3 Lecture Hours)
The course will cover key developments in contemporary art from the post-World War II era in the Western context to global currents in the present international arena. From a socio-political perspective, artistic tendencies will be considered as part of a trajectory that saw the center of the art world shift from being Euro- and Anglo-centric in the mid-twentieth century, to one without a discernible center in the early twenty-first century. Analysis of artworks from this decentralized cultural climate will focus on the evolution of conceptualism, the persistence of traditional modes of aesthetic practice, the role of the art market, and notions of environmentalism and sustainability as related to these "transnational transition." The course will consider works from Eastern Europe, South and Central America, the Caribbean, East/West/South/Southeast Asia, Oceania, and Africa.

ARTS 4356 Contemporary Art Since 1980
3 Semester Credit Hours (3 Lecture Hours)
The course will examine the evolution of architecture, sculpture, painting, digital media, installation, and interdisciplinary arts in the global context from 1980 to the present, in light of the historical and intellectual background of the period. Topics covered will include the transition from postmodernism to contemporaneity, considering notions of appropriation, commodification, consumerism, memory, history, and globalization. Lectures will be constructed upon thematic analysis of contemporary, primary sources coupled with secondary source material, and complemented by presentation opportunities and class discussion.

ARTS 4365 Advanced Photography
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3365. Covers content as creative expression in addition to basic photographic skills. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4390 Topics in Art History
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary.

ARTS 4391 Topics in Studio Art
3 Semester Credit Hours
May be repeated when topics vary.
Co-requisite: SMTE 0097.

ARTS 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description. Offered on application
Co-requisite: SMTE 0097.

ARTS 4398 Applied Experience
3 Semester Credit Hours (3 Lecture Hours)
See College description. Offered on application.
Co-requisite: SMTE 0097.

Art, BFA

Program Description
The curriculum for the Bachelor of Fine Arts degree is designed to provide professional development at the undergraduate level in the visual arts, through in-depth study in studio art. The degree requires a minimum of 75 semester hours in art, at least 36 of which must be in upper-division coursework.

Admission to the BFA is by special application. Such application can be made upon completion of 30 semester hours of art coursework, and must be made before completion of 48 semester hours of art coursework. A portfolio consisting of ten to fifteen works representing a variety of media must be submitted in addition to the application form. Copies of specific BFA admission policies and instructions for submitting an application to the BFA program are available from the Department of Art website (http://cla.tamucc.edu/art/). Completed BFA applications should be submitted to the office of the Department Chair.

The purposes of the art curriculum are:
1. To provide a general program that allows students access to a variety of art media, studio techniques, and instruction;
2. To provide students with opportunities to study past and present forms of art and to understand the function of art in society;
3. To provide courses that will help expand the knowledge and interest of non-majors in the area of art; and
4. To contribute to the cultural life of the University and the community by presenting quality art exhibitions in the Weil Gallery.

Students can major in art in either the Bachelor of Arts (BA) or the Bachelor of Fine Arts (BFA) degree programs. Students in the BFA have the option through electives to develop an emphasis beyond the general degree program in Printmaking, Painting, Sculpture, Ceramics, Photography, Drawing, or Art History.

The Bachelor of Fine Arts leading to all-level Teacher Certification (p. 354) is available.
Two minors are also available. The minor in Studio Art is 21 semester hours and will allow a student to concentrate in one studio area. The minor in Art History is 18 semester hours. Interested students should contact the department academic advisor.

### Student Learning Outcomes

Students will have:

- A comprehensive level of professional development in the visual arts in preparation for specific careers;
- proficiency in studio processes and the understanding of conceptual theories and histories as evidenced in their graduating senior exhibitions;
- demonstrated expertise in their specific area of concentration.

### General Requirements

#### Specific Degree Requirements

All art majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All art degrees require ARTS 1303 Art History Survey I (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. All and only coursework with the prefix ARTS will be included in the grade point average for the students declared major field of study.

**Capstone**

This course must be taken in your final semester before graduation.

| ARTS 4085 | Senior Capstone          | 0     |

#### University Electives

Select 6 hours of university electives.       | 6     |

| **Total Hours**                               | **122** |

Note:

A senior project is required of the BFA art major during the final semester as an undergraduate student. The student, with minimum assistance from the supervising faculty member, is expected to organize an exhibition of his or her work completed while a student at Texas A&M University-Corpus Christi. The student must be registered in a related course with the faculty advisor during the semester in which the project is presented. Students in the BFA art program are expected to spend one additional hour per week in the studio for each semester hour of studio enrollment.

All art majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All art degrees require ARTS 1303 Art History Survey I (3 sch), which also meets the
Core Curriculum Program Fine Arts requirement. All and only coursework with the prefix ARTS will be included in the grade point average for the students declared major field of study.

All students graduating with a Bachelor of Fine Arts Degree with Teachers Certification are required to submit an exit portfolio. The portfolio consists of 20 .jpg images that best represent their most successful coursework during their educational careers in the Department of Art. A written formal discussion of some aspect of their work is also required.

The senior capstone class sets the standards and format for these materials and coordinates the collection of the materials. These materials are due on or before the last class day of the semester in which the students plan to graduate.

**Total Hours** 122
ARTS 1311 Design I
3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on two-dimensional concepts.
TCCNS: ARTS 1311

ARTS 1312 Design II
3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on three-dimensional concepts. This 3D foundations course utilizes creative problem-solving strategies and basic sculpture tools to explore spatial relationships and to create sculptural forms in space.
Co-requisite: SMTE 0097.
TCCNS: ARTS 1312

ARTS 1316 Drawing I
3 Semester Credit Hours (3 Lecture Hours)
A studio course investigating a variety of media techniques, including their descriptive and expressive possibilities.
TCCNS: ARTS 1316

ARTS 1317 Drawing II
3 Semester Credit Hours
A further investigation of media techniques explored in Drawing I, including their descriptive and expressive possibilities.
Prerequisite: ARTS 1316.
Co-requisite: SMTE 0097.
TCCNS: ARTS 1317

ARTS 2311 Design III: Color
3 Semester Credit Hours
Investigation of the properties of color. Color is studied and applied to studio-oriented design assignments.
Co-requisite: SMTE 0097.

ARTS 2316 Painting I
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring the potentials of painting media.
Prerequisite: ARTS 1316.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2316

ARTS 2323 Drawing III
3 Semester Credit Hours
A studio course continuing the investigation of media and techniques explored in Drawing I and Drawing II. Students investigate how formal aspects and selected media along with conceptual choices create specific visual ideas.
Prerequisite: ARTS 1317.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2323

ARTS 2326 Sculpture I
3 Semester Credit Hours
An introductory studio course exploring sculptural approaches, materials, concepts, and technical processes. Materials include wood, plaster, steel, and plastics.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2326

ARTS 2333 Printmaking I
3 Semester Credit Hours
An introductory studio course in basic printmaking processes and techniques.
Prerequisite: ARTS 1316 or 1311.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2333

ARTS 2346 Ceramics I
3 Semester Credit Hours (3 Lecture Hours)
An introductory studio course in basic ceramic processes.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2346

ARTS 2356 Photography I
3 Semester Credit Hours
This course is an introduction to digital photography capture, processing, and basic editing software. While focusing on the fundamentals of digital photography and printing techniques, it will introduce students to the theory and practice of photography and assist them in producing a conceptually devised and technically consistent portfolio.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2356

ARTS 2367 Watercolor
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring techniques in water-base media.
Co-requisite: SMTE 0097.

ARTS 3301 Life Drawing
3 Semester Credit Hours
Drawing from the model using a variety of techniques and media.
Prerequisite: (ARTS 1317).
Co-requisite: SMTE 0097.

ARTS 3302 Screen Printing
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to screenprinting.
Prerequisite: ARTS 1311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3303 Intermediate Painting
3 Semester Credit Hours (3 Lecture Hours)
Explores the issues of content, imagery, application, and influences of master artists.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3304 Fabrication Sculpture
3 Semester Credit Hours
Building upon introductory skills, this course explores construction and fabrication in sculpture focusing on a primary material for the semester and applying advanced techniques and processes for this material. Through this material and techniques, students begin defining and developing their visual vocabulary relative to art history and contemporary sculptural issues.
Prerequisite: ARTS 2326.
Co-requisite: SMTE 0097.
ARTS 3305 Mold Making and Casting Sculpture
3 Semester Credit Hours
This course is designed to build upon the fundamental principles of mold making and casting while exploring more complex concepts, materials, and techniques. Creating multi-part molds, flexible molds, and investment molds, the project assignments incorporate the unique versatility of mold making and casting for exchanging media and making a series of multiples. In addition to making casts, students compare methods for assembling cast forms together to create larger sculptural artworks and installations.
Co-requisite: SMTE 0097.

ARTS 3306 Figurative Sculpture
3 Semester Credit Hours
A study of the human figure from an anatomical and artistic perspective. Examines the skeletal and muscular components of the figure in order to create lifelike and emotive sculptures. Discussion of the figure in both classical and contemporary art. Working with armature and modeling clay.
Co-requisite: SMTE 0097.

ARTS 3307 Lithography and Planographic Process
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to lithography and monoprinting.
Prerequisite: ARTS 2311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3311 Color Theory
3 Semester Credit Hours
This course develops an understanding of color properties and relationships through formal exercises, research and creative thinking. Students build a vocabulary for analyzing and identifying color and color phenomena. Concepts of color theorists and color use in a variety of fields are examined to understand the application of color theory. Students will investigate the use of color in their own work and in the work of others to understand the conceptual and aesthetic application of color.
Prerequisite: ARTS 1311.

ARTS 3313 Figure Painting
3 Semester Credit Hours
This course addresses the structure and anatomy of the human figure using oil paint. Painting techniques and color theory exercises will familiarize students with tradition painting methods. Students will render proportions, balance, form and mass of the human figure. Research and discussions will address the human form throughout history as well as in the contemporary context. Image presentations, critiques and live model sessions will supplement studio work.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3316 Art Activities I
3 Semester Credit Hours (3 Lecture Hours)
Practical experience with basic design, drawing, painting, and sculpture, along with a study of art history and criticism. Includes a consideration of how these experiences relate to art curricula in the elementary school.
ARTS 3322 Art Activities II
3 Semester Credit Hours (3 Lecture Hours)
Practical experiences with basic design, drawing, painting, printmaking, sculpture, and crafts, along with a study of art history and criticism. Includes a consideration of how these experiences relate to art curricula in the secondary school.

ARTS 3324 Wheel Throwing
3 Semester Credit Hours
Covers wheel-thrown ceramics (other production techniques may be included), basic glazemaking, and an introduction to kiln firing and loading.
Prerequisite: ARTS 2346.
Co-requisite: SMTE 0097.

ARTS 3325 Handbuilt Ceramic Techniques
3 Semester Credit Hours
This course is a continuation of hand-building covered in Ceramics I ARTS 2346. The course will cover more advanced forming techniques such as extrusion, hump, slump, and press molds, and slip-casting. New surface and firing techniques will include more advanced techniques such as underglazes, onglaze techniques such as majolica, fired decal application, raku, and an introduction to low fire glazes and surfaces.
Prerequisite: ARTS 2346.

ARTS 3350 Art of the United States
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major developments in the art of North America from Pre-Columbian times to the modern era.

ARTS 3352 Modern Art
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major movements of 20th century art and aesthetics, which developed primarily in Europe. Includes a review of late 19th century modernist antecedents with emphasis placed on the principal movements of the early 20th century: Fauvism, German Expressionism, Cubism, Futurism, Abstract Art, Dada, and Surrealism.

ARTS 3353 Art Since 1945
3 Semester Credit Hours (3 Lecture Hours)
An examination of the dispersal of European artists and Modernism, primarily to America, as a result of World War II. Examines the development of Abstract Expressionism in New York in the 1940s and 50s, followed by a survey of recent trends in contemporary art to the present day.

ARTS 3360 Graphic Design I
3 Semester Credit Hours (3 Lecture Hours)
Introduce fundamental graphic communication techniques, software and theory. Explores hand skills by using tools and techniques to produce professional presentations as well as the correct procedures for presenting designs to a client.

ARTS 3365 Photography II
3 Semester Credit Hours
An intermediate studio course using digital cameras and image manipulation software. Prior completion of ARTS 2356 is required. This course will enhance and expand skills developed in Photography I. It is geared toward informing students in the many ways we can make photographs; by seeking them out, framing them, forming them, extracting them, building them, and finally sequencing and presenting them. Students will engage in the theory and practice of photography, refine their photographic technique, and create a conceptually devised and technically consistent portfolio. Emphasis is placed on the development of a strong conceptual foundation from which to approach the making and understanding of photography as an art form. This knowledge will be achieved through photographic assignments, slide lectures of relevant works, and in-class critiques. It can be repeated twice for credit.
Prerequisite: ARTS 2356.
Co-requisite: SMTE 0097.
ARTS 3366 Analogue Photography
3 Semester Credit Hours
An introductory studio course in analogue photography using film cameras and the silver gelatin darkroom process. While focusing on the fundamentals of black and white, analogue photography and printing techniques this course will assist students in producing a conceptually devised and technically consistent portfolio.
Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3367 Digital Design Tools and Applications
3 Semester Credit Hours
This studio course explores the fundamental principles, standard creative processes and basic digital tools utilized in graphic design. The concepts and software learned are employed in projects specifically targeted to serve the professional and promotional needs of studio artists and design enthusiasts.

ARTS 4085 Senior Capstone
0 Semester Credit Hours
Required for all art students in partial fulfillment of the requirements for the BA in Art, BFA in Art studio track and the BFA with Teacher Certification in Art tracks. This course collects capstone materials for ARTS degrees. The course must be taken in the student's final semester before graduation.

ARTS 4301 Advanced Drawing
3 Semester Credit Hours
Emphasis on the development of content through drawing. Research on contemporary trends and process investigation will aid students in the development of visual ideas and lead to a cohesive body or work. May be taken three times for credit.
Prerequisite: ARTS 2323.
Co-requisite: SMTE 0097.

ARTS 4302 Advanced Printmaking
3 Semester Credit Hours
Furthers competencies attained in Printmaking I and Intermediate I & II courses. May be taken three times for credit.
Prerequisite: ARTS 3302 and 3307.
Co-requisite: SMTE 0097.

ARTS 4303 Advanced Painting
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3303. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4304 Advanced Sculpture
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3304. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4324 Advanced Ceramics
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3324. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4350 Pre-Columbian Art of Mesoamerica
3 Semester Credit Hours (3 Lecture Hours)
Explores the history of Pre-Columbian art from Mexico and Central America, from the Olmec through the Aztec cultures. May be taken three times for credit.

ARTS 4352 Modern Art of Mexico
3 Semester Credit Hours (3 Lecture Hours)
Explores the history of art during the nineteenth and twentieth centuries in Mexico. May be taken three times for credit.

ARTS 4354 Global Currents in Contemporary Art
3 Semester Credit Hours (3 Lecture Hours)
The course will cover key developments in contemporary art from the post-World War II era in the Western context to global currents in the present international arena. From a socio-political perspective, artistic tendencies will be considered as part of a trajectory that saw the center of the art world shift from being Euro- and Anglo-centric in the mid-twentieth century, to one without a discernible center in the early twenty-first century. Analysis of artworks from this decentralized cultural climate will focus on the evolution of conceptualism, the persistence of traditional modes of aesthetic practice, the role of the art market, and notions of environmentalism and sustainability as related to these "transnational transition." The course will consider works from Eastern Europe, South and Central America, the Caribbean, East/West/South/Southeast Asia, Oceania, and Africa.

ARTS 4356 Contemporary Art Since 1980
3 Semester Credit Hours (3 Lecture Hours)
The course will examine the evolution of architecture, sculpture, painting, digital media, installation, and interdisciplinary arts in the global context from 1980 to the present, in light of the historical and intellectual background of the period. Topics covered will include the transition from postmodernism to contemporaneity, considering notions of appropriation, commodification, consumerism, memory, history, and globalization. Lectures will be constructed upon thematic analysis of contemporary, primary sources coupled with secondary source material, and complemented by presentation opportunities and class discussion.

ARTS 4365 Advanced Photography
3 Semester Credit Hours (3 Lecture Hours)
 Assumes competencies attained in ARTS 3365. Covers content as creative expression in addition to basic photographic skills. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4370 Topics in Art History
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary.

ARTS 4391 Topics in Studio Art
3 Semester Credit Hours
May be repeated when topics vary.
Co-requisite: SMTE 0097.

ARTS 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description. Offered on application
Co-requisite: SMTE 0097.

ARTS 4398 Applied Experience
3 Semester Credit Hours (3 Lecture Hours)
See College description. Offered on application.
Co-requisite: SMTE 0097.

Communication Studies, BA
Program Description
The mission of the Department of Communication & Media is to develop students who are effective and ethical communicators with the creative, critical, and collaborative skills necessary to succeed in
a diverse global environment. The focus of the program is to enhance students’ knowledge and practical skills in various areas of human communication including organizational leadership, public relations, and relational communication. Communication Studies majors select an emphasis in either Communication Studies or Public Relations to fulfill their coursework. It is critical for all Communication majors to meet with their academic advisor prior to registering each semester.

Student Learning Outcomes

Students will:

- Gather, evaluate, and synthesize information to build and defend arguments.
- Demonstrate communication competence in varied contexts.
- Employ discipline specific knowledge in applied communication situations.

#### COMM 1311 Foundation of Communication
**3 Semester Credit Hours (3 Lecture Hours)**
This course examines a breadth of topics fundamental to the study of communication and works to improve students' communication skills in three primary contexts: interpersonal relationships, group/teamwork, and presentational speaking.

**TCCNS:** SPCH 1311

#### COMM 1315 Public Speaking
**3 Semester Credit Hours (3 Lecture Hours)**
Research, composition, organization, and delivery of speeches for various purposes and occasions, with emphasis on listener analysis and on informative and persuasive techniques.

**TCCNS:** SPCH 1315

#### COMM 1318 Interpersonal Communication
**3 Semester Credit Hours (3 Lecture Hours)**
Predominant issues related to verbal and nonverbal communication with a focus on interpersonal relationships.

**TCCNS:** SPCH 1318

#### COMM 1321 Business and Professional Communication
**3 Semester Credit Hours (3 Lecture Hours)**
Introduces students to basic skills, principles, and contexts of communication in business and professional settings by combining public speaking with aspects of communication ethics and organizational, small group, and interpersonal communication. Students will learn practical skills via presentations, research, resumes, interviews, meetings, and professional writing grounded in communication theory.

#### COMM 1342 Voice and Diction
**3 Semester Credit Hours (3 Lecture Hours)**
Basic voice training, including techniques for vocal production, manipulation, and control. Practical application of the vocal apparatus will be emphasized, including techniques of enunciation, projection, articulation, and the use of dialects. (Credit may not be given for both this course and THEA 1342.)

**TCCNS:** SPCH 1342

#### COMM 2330 Introduction to Public Relations
**3 Semester Credit Hours (3 Lecture Hours)**
An exploration of the history and development of public relations including the theory and process of public relations, and the various publics and careers associated with the public relations industry.

**TCCNS:** COMM 2330

#### COMM 2333 Small Group Communication
**3 Semester Credit Hours (3 Lecture Hours)**
Application of small group theories and techniques as they relate to group process and interaction.

**TCCNS:** SPCH 2333

#### COMM 2335 Presentational Communication
**3 Semester Credit Hours (3 Lecture Hours)**
Advanced study of the principles and methods of formal presentations for various purposes and audiences to further develop students into effective communicators. Course assignments will include various special occasion speeches, dynamic instructional speeches, extemporaneous speaking, creation of effective visual aids, and a group community action presentation.
COMM 3310 Communication Theory
3 Semester Credit Hours (3 Lecture Hours)
The foundations, processes, and effects of human communication. A survey of contemporary theory and research, including language theory, nonverbal and small group communication, persuasion, and mass communication.

COMM 3311 Nonverbal Communication
3 Semester Credit Hours (3 Lecture Hours)
The study of body movement, touch, paralanguage, space, environment, and other nonverbal factors in the communication process.

COMM 3325 Relational Communication
3 Semester Credit Hours (3 Lecture Hours)
This course is an advanced interpersonal communication course that focuses on communication within relationships, such as family, romantic, friendship, and workplace relationships.
Prerequisite: COMM 1318.

COMM 3326 Research Methods
3 Semester Credit Hours (3 Lecture Hours)
The purpose of this course is to increase student's knowledge of the research process used in the Communication Studies discipline. Specifically, the course will allow students the opportunity to learn the goals of communication research and scrutinize various techniques for creating academic research and assessing academic knowledge.

COMM 3330 Persuasion
3 Semester Credit Hours (3 Lecture Hours)
Various theories and forms of rhetorical persuasion. Topics include practical reasoning skills, psychological theories of persuasion, and critical responses to persuasive messages.

COMM 3331 Public Relations Writing and Design
3 Semester Credit Hours (3 Lecture Hours)
This course will introduce students to the basic principles and formatting requirements for public relations writing. Students will gain theoretical and practical experience in developing content for specific audiences.

COMM 3335 UIL Debate and Speech
3 Semester Credit Hours (3 Lecture Hours)
Understanding the University Interscholastic League debate and speech events. Students explore approaches to analytical reasoning, research delivery, and the conceptual basis for debate and gain practical experience in understanding and judging UIL in the high school setting.

COMM 3350 Leadership
3 Semester Credit Hours (3 Lecture Hours)
focuses on the communication of influence that takes place to achieve goals or encourage change. Specific attention will be devoted to a variety of approaches, processes, and theories that will provide students general knowledge of leadership.

COMM 4314 Gender Communication
3 Semester Credit Hours (3 Lecture Hours)
Examination of communication about women and men, as well as communication between them. Special course emphasis on explanations of gender, sexist language, media depiction of the sexes, and gender communication in the formation of social and work relationships.

COMM 4315 Communication and Sexuality
3 Semester Credit Hours (3 Lecture Hours)
This course will focus on communication and sexuality, specifically exploring sex and gender identity development and expression, intersections of race/ethnicity and sex/gender, how communication impacts various types of relationships, the role of communication in sexual activity, and power abuses related to sexual activity, with specific focus on consent and sexual safety.

COMM 4331 Public Relations Campaigns
3 Semester Credit Hours (3 Lecture Hours)
An application of the public relations process (including primary and secondary research, goals and objective development, the selection of proper strategies and tactics for implementation, and an evaluation of campaign effectiveness) through the production and presentation of a public relations campaign for a local organization.
Prerequisite: COMM 2330.

COMM 4335 Crisis Communication
3 Semester Credit Hours (3 Lecture Hours)
An application of crisis communication (including organizational research, risk and vulnerability assessment, strategic communication, and performance and damage evaluation) through the development and presentation of a crisis communication plan for a local organization.

COMM 4345 Intercultural Communication
3 Semester Credit Hours (3 Lecture Hours)
An investigation of the process by which persons and groups of different cultural backgrounds create understanding. Types of knowledge, skills, and sensitivity necessary for intercultural communication are developed.

COMM 4350 Organizational Communication
3 Semester Credit Hours (3 Lecture Hours)
Examination and exploration of realistic applications of communication theories within the framework of an organization. Particular attention will be given to techniques for diagnosing communication problems, as well as strategies for effecting change in communication.

COMM 4360 International Leadership
3 Semester Credit Hours (3 Lecture Hours)
Study of international leadership in the context of communication and in multi-cultural and diverse settings. Influence of global economy, politics, social values in international leadership.

COMM 4380 Senior Seminar in Communication Studies
3 Semester Credit Hours (3 Lecture Hours)
This course serves as the capstone for the Communication Studies degree. It offers students opportunities to synthesize information learned in other Communication courses and demonstrate abilities to think critically, conduct independent research linked to appropriate communication theories, create individual and collaborative projects that demonstrate effective use of communication strategies, and present written and oral work at an advanced level.
Prerequisite: (COMM 2335, 3310 and 3326).

COMM 4390 Topics in Communication Studies
3 Semester Credit Hours (3 Lecture Hours)
Study of specialized topics and themes in communication studies. May be repeated when topics vary.

COMM 4394 Professional PR Portfolio
3 Semester Credit Hours (3 Lecture Hours)
Students prepare documents, explore strategies for enhancing their marketability, and assemble a professional portfolio of public relations work.
Prerequisite: COMM 2330, MEDA 2350, COMM 4331 and 4335.
COMM 4396 Directed Individual Study
1-3 Semester Credit Hours
See College description. By application. Only 3 semester hours of Directed Individual Study credit may be counted toward the major.

COMM 4399 Communication Internship
3 Semester Credit Hours
Practical experience in the field through placement in a communication internship position. Students interested in applying for the internship course must have a minimum cumulative GPA of 3.0; have at least junior standing at the university; be a communication studies major or minor, or public relations minor; have completed at least 12 hours of coursework in the major or minor at TAMU-CC. Preferred applicants will have a minimum communication or public relations GPA of 3.25. All applicants must solicit a recommendation from a Department of Communication and Media faculty member. Course may be taken three times for credit; however only 3 semester hours of internship credit may be counted toward the major. A second internship may apply to the communication studies minor or public relations minor; a third internship may be used as a free elective. Authorization to repeat the internship course is contingent on the students' successful completion of the previous internship experience. This course is graded Credit/No Credit.

Graphic Design, BA

Program Description
Graphic Design is a creative and inspiring process that combines art and technology to communicate ideas and information visually from client to audience. Rooted in traditional art and design foundations, the focus of the Graphic Design curriculum is to educate and inform students of the impact design can make through the exploration of diverse problem-solving methodologies, innovative investigations, and creative research in all forms of visual communication. Through their studio work, Graphic Design majors will address issues stressing social and cultural awareness, integration of new technology, and sustainable practices while being prepared to enter into the evolving creative industry.

Student Learning Outcomes
Students will:

- Demonstrate mastery of client-focused, visual communication and problem-solving methodologies;
- Demonstrate proficiency in professional skills and use of technology in preparation for professional practice;
- Demonstrate advanced critical thinking in analyzing discipline history, theory, criticism and practices;
- Be prepared for professional positions in the field of visual communications or for graduate school.

Lower Level Review happens in the Spring semester of Year 1
Upper Level Program Review happens in the Spring semester of Year 2

Graphic Design Electives
Select 3 hours of upper division electives.

University Electives
Select 18 hours of university electives.

Foreign Language Requirements
See the College of Liberal Arts for the college language requirement.
Transfer students with 24 or more hours are exempt from First-Year Seminar.

**Required Program Reviews**

Graphic Design Majors will undergo two formal portfolio and performance reviews. Students that intend to major in Graphic Design and meet all eligibility requirements for the reviews must participate. Students are eligible for the Lower Level Review (LL Review) after completing two specified GRDS foundational program courses. Lower and Upper Level Reviews occur in Spring semesters only. Students who do not pass the Lower Level Review will not be able to register for sophomore level classes and will be advised to repeat one or both of the specified foundational courses. After passing the LL Review, all students intending to graduate with a BA in Graphic Design must pass the Upper-Level Admission Portfolio Review (UL Review) with the completion the specified GRDS program courses to be allowed to continue upper-level coursework in the program. Students will not be permitted to enroll in the remaining 3000 - 4000-level Graphic Design Degree Program courses until they have passed the UL Review and have been formally advised to advance. Students denied advancement into upper-level courses in the Graphic Design program after their first UL Review will be allowed only one additional attempt by resubmitting their revised portfolio for review. Discerning advancement through the Graphic Design Degree Program ensures elevated professionalism of program graduates.

**Transfer Credit:**

Special arrangements will be made to review the work of students who have completed communication design or graphic design courses at other institutions to determine the appropriate entry level into the TAMU-CC program and award of transfer credit. All students, regardless of academic status, must be admitted into the Graphic Design Program through either the Lower Level Review or Upper Level Review.

**Grade Minimums:**

Graphic Design students must earn a “C” or higher in all major courses to remain in the program. If the student does not earn a “C” or higher in a major course, the student may be required to repeat the course or be removed from the Graphic Design Program. A student that earns a “D” or lower in major courses for two consecutive semesters will be removed from the Graphic Design Program.

**Degree Matriculation Expedition or Exceptions:**

The BA in Graphic Design degree is a 4-year, sequenced curriculum that cannot typically be expedited due to cohort capacities, program resources and course prerequisites. Requests for expediting the degree plan will be considered, but are not guaranteed to be granted. All requests must be approved by the Graphic Design Program Coordinator and Graphic Design Faculty. The GRDS Matriculation Exception Policy and Criteria is available upon request from the Program Coordinator.

Courses

Art Courses

ARTS 1301 Art and Society
3 Semester Credit Hours (3 Lecture Hours)
Designated for non-art majors. Establishes a working vocabulary for evaluating works of art in various media. Objects are interpreted in terms of their specific historical contexts and the changing relationships between art and society. This course does not fulfill the art history requirement for art majors.

TCCNS: ARTS 1301

ARTS 1303 Art History Survey I
3 Semester Credit Hours (3 Lecture Hours)
An examination of painting, sculpture, architecture, and other arts from the ancient through medieval periods.

TCCNS: ARTS 1303

ARTS 1304 Art History Survey II
3 Semester Credit Hours (3 Lecture Hours)
A further examination of painting, sculpture, architecture, and other arts from the Renaissance through Modern periods. This course satisfies the university core curriculum requirement in fine arts.

Prerequisite: ARTS 1303.

TCCNS: ARTS 1304

ARTS 1311 Design I
3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on two-dimensional concepts.

TCCNS: ARTS 1311

ARTS 1312 Design II
3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on three-dimensional concepts. This 3D foundations course utilizes creative problem-solving strategies and basic sculpture tools to explore spatial relationships and to create sculptural forms in space.

Co-requisite: SMTE 0097.

TCCNS: ARTS 1312

ARTS 1316 Drawing I
3 Semester Credit Hours (3 Lecture Hours)
A studio course investigating a variety of media techniques, including their descriptive and expressive possibilities.

TCCNS: ARTS 1316

ARTS 1317 Drawing II
3 Semester Credit Hours
A further investigation of media techniques explored in Drawing I, including their descriptive and expressive possibilities.

Prerequisite: ARTS 1316.

Co-requisite: SMTE 0097.

TCCNS: ARTS 1317

ARTS 2311 Design III: Color
3 Semester Credit Hours
Investigation of the properties of color. Color is studied and applied to studio-oriented design assignments.

Co-requisite: SMTE 0097.

ARTS 2316 Painting I
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring the potentials of painting media.

Prerequisite: ARTS 1316.

Co-requisite: SMTE 0097.

TCCNS: ARTS 2316

ARTS 2323 Drawing III
3 Semester Credit Hours
A studio course continuing the investigation of media and techniques explored in Drawing I and Drawing II. Students investigate how formal aspects and selected media along with conceptual choices create specific visual ideas.

Prerequisite: ARTS 1317.

Co-requisite: SMTE 0097.

TCCNS: ARTS 2323

ARTS 2326 Sculpture I
3 Semester Credit Hours
An introductory studio course exploring sculptural approaches, materials, concepts, and technical processes. Materials include wood, plaster, steel, and plastics.

Co-requisite: SMTE 0097.

TCCNS: ARTS 2326

ARTS 2333 Printmaking I
3 Semester Credit Hours
An introductory studio course in basic printmaking processes and techniques.

Prerequisite: ARTS 1316 or 1311.

Co-requisite: SMTE 0097.

TCCNS: ARTS 2333

ARTS 2346 Ceramics I
3 Semester Credit Hours (3 Lecture Hours)
An introductory studio course in basic ceramic processes.

Co-requisite: SMTE 0097.

TCCNS: ARTS 2346

ARTS 2356 Photography I
3 Semester Credit Hours
This course is an introduction to digital photography capture, processing, and basic editing software. While focusing on the fundamentals of digital photography and printing techniques, it will introduce students to the theory and practice of photography and assist them in producing a conceptually devised and technically consistent portfolio.

Co-requisite: SMTE 0097.

TCCNS: ARTS 2356

ARTS 2367 Watercolor
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring techniques in water-base media.

Co-requisite: SMTE 0097.

ARTS 3301 Life Drawing
3 Semester Credit Hours
Drawing from the model using a variety of techniques and media.

Prerequisite: (ARTS 1317).

Co-requisite: SMTE 0097.
ARTS 3302 Screen Printing
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to screenprinting.
Prerequisite: ARTS 1311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3303 Intermediate Painting
3 Semester Credit Hours (3 Lecture Hours)
Explores the issues of content, imagery, application, and influences of master artists.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3304 Fabrication Sculpture
3 Semester Credit Hours
Building upon introductory skills, this course explores construction and fabrication in sculpture focusing on a primary material for the semester and applying advanced techniques and processes for this material. Through this material and techniques, students begin defining and developing their visual vocabulary relative to art history and contemporary sculptural issues.
Prerequisite: ARTS 2326.
Co-requisite: SMTE 0097.

ARTS 3305 Mold Making and Casting Sculpture
3 Semester Credit Hours
This course is designed to build upon the fundamental principles of mold making and casting while exploring more complex concepts, materials, and techniques. Creating multi-part molds, flexible molds, and investment molds, the project assignments incorporate the unique versatility of mold making and casting for exchanging media and making a series of multiples. In addition to making casts, students compare methods for assembling cast forms together to create larger sculptural artworks and installations.
Co-requisite: SMTE 0097.

ARTS 3306 Figurative Sculpture
3 Semester Credit Hours
A study of the human figure from an anatomical and artistic perspective. Examines the skeletal and muscular components of the figure in order to create lifelike and emotive sculptures. Discussion of the figure in both classical and contemporary art. Working with armature and modeling clay.
Co-requisite: SMTE 0097.

ARTS 3307 Lithography and Planographic Process
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to lithography and monoprinting.
Prerequisite: ARTS 2311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3311 Color Theory
3 Semester Credit Hours
This course develops an understanding of color properties and relationships through formal exercises, research and creative thinking. Students build a vocabulary for analyzing and identifying color and color phenomena. Concepts of color theorists and color use in a variety of fields are examined to understand the application of color theory. Students will investigate the use of color in their own work and in the work of others to understand the conceptual and aesthetic application of color.
Prerequisite: ARTS 1311.

ARTS 3313 Figure Painting
3 Semester Credit Hours
This course addresses the structure and anatomy of the human figure using oil paint. Painting techniques and color theory exercises will familiarize students with tradition painting methods. Students will render proportions, balance, form and mass of the human figure. Research and discussions will address the human form throughout history as well as in the contemporary context. Image presentations, critiques and live model sessions will supplement studio work.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3316 Art Activities I
3 Semester Credit Hours (3 Lecture Hours)
Practical experience with basic design, drawing, painting, and sculpture, along with a study of art history and criticism. Includes a consideration of how these experiences relate to art curricula in the elementary school.

ARTS 3322 Art Activities II
3 Semester Credit Hours (3 Lecture Hours)
Practical experiences with basic design, drawing, painting, printmaking, sculpture, and crafts, along with a study of art history and criticism. Includes a consideration of how these experiences relate to art curricula in the secondary school.

ARTS 3324 Wheel Throwing
3 Semester Credit Hours
Covers wheel-thrown ceramics (other production techniques may be included), basic glazemaking, and an introduction to kiln firing and loading.
Prerequisite: ARTS 2346.
Co-requisite: SMTE 0097.

ARTS 3325 Handbuilt Ceramic Techniques
3 Semester Credit Hours
This course is a continuation of hand-building covered in Ceramics I ARTS 2316. The course will cover more advanced forming techniques such as extrusion, hump, slump, and press molds, and slip-casting. New surface and firing techniques will include more advanced techniques such as underglazes, onglaze techniques such as majolica, fired decal application, raku, and an introduction to low fire glazes and surfaces.
Prerequisite: ARTS 2346.

ARTS 3350 Art of the United States
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major developments in the art of North America from Pre-Columbian times to the modern era

ARTS 3352 Modern Art
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major movements of 20th century art and aesthetics, which developed primarily in Europe. Includes a review of late 19th century modernist antecedents with emphasis placed on the principal movements of the early 20th century: Fauvism, German Expressionism, Cubism, Futurism, Abstract Art, Dada, and Surrealism.

ARTS 3353 Art Since 1945
3 Semester Credit Hours (3 Lecture Hours)
An examination of the dispersal of European artists and Modernism, primarily to America, as a result of World War II. Examines the development of Abstract Expressionism in New York in the 1940s and 50s, followed by a survey of recent trends in contemporary art to the present day.
ARTS 3360 Graphic Design I
3 Semester Credit Hours (3 Lecture Hours)
Introduce fundamental graphic communication techniques, software and theory. Explores hand skills by using tools and techniques to produce professional presentations as well as the correct procedures for presenting designs to a client.

ARTS 3365 Photography II
3 Semester Credit Hours
An intermediate studio course using digital cameras and image manipulation software. Prior completion of ARTS 2356 is required. This course will enhance and expand skills developed in Photography I. It is geared toward informing students in the many ways we can make photographs; by seeking them out, framing them, forming them, extracting them, building them, and finally sequencing and presenting them. Students will engage in the theory and practice of photography, refine their photographic technique, and create a conceptually devised and technically consistent portfolio. Emphasis is placed on the development of a strong conceptual foundation from which to approach the making and understanding of photography as an art form. This knowledge will be achieved through photographic assignments, slide lectures of relevant works, and in-class critiques. It can be repeated twice for credit.

Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3366 Analogue Photography
3 Semester Credit Hours
An introductory studio course in analogue photography using film cameras and the silver gelatin darkroom process. While focusing on the fundamentals of black and white, analogue photography and printing techniques this course will assist students in producing a conceptually devised and technically consistent portfolio.

Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3367 Digital Design Tools and Applications
3 Semester Credit Hours
This studio course explores the fundamental principles, standard creative processes and basic digital tools utilized in graphic design. The concepts and software learned are employed in projects specifically targeted to serve the professional and promotional needs of studio artists and design enthusiasts.

ARTS 4085 Senior Capstone
0 Semester Credit Hours
Required for all art students in partial fulfillment of the requirements for the BA in Art, BFA in Art studio track and the BFA with Teacher Certification in Art tracks. This course collects capstone materials for ARTS degrees. The course must be taken in the student's final semester before graduation.

ARTS 4301 Advanced Drawing
3 Semester Credit Hours
Emphasis on the development of content through drawing. Research on contemporary trends and process investigation will aid students in the development of visual ideas and lead to a cohesive body or work. May be taken three times for credit.

Prerequisite: ARTS 2323.
Co-requisite: SMTE 0097.

ARTS 4302 Advanced Printmaking
3 Semester Credit Hours
Furthers competencies attained in Printmaking I and Intermediate I & II courses. May be taken three times for credit.

Prerequisite: ARTS 3302 and 3307.
Co-requisite: SMTE 0097.

ARTS 4303 Advanced Painting
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3303. May be taken three times for credit.

Co-requisite: SMTE 0097.

ARTS 4304 Advanced Sculpture
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3304. May be taken three times for credit.

Co-requisite: SMTE 0097.

ARTS 4324 Advanced Ceramics
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3324. May be taken three times for credit.

Co-requisite: SMTE 0097.

ARTS 4350 Pre-Columbian Art of Mesoamerica
3 Semester Credit Hours (3 Lecture Hours)
Explores the history of Pre-Columbian art from Mexico and Central America, from the Olmec through the Aztec cultures. May be taken three times for credit.

ARTS 4352 Modern Art of Mexico
3 Semester Credit Hours (3 Lecture Hours)
Explores the history of art during the nineteenth and twentieth centuries in Mexico. May be taken three times for credit.

ARTS 4354 Global Currents in Contemporary Art
3 Semester Credit Hours (3 Lecture Hours)
The course will cover key developments in contemporary art from the post-World War II era in the Western context to global currents in the present international arena. From a socio-political perspective, artistic tendencies will be considered as part of a trajectory that saw the center of the art world shift from being Euro- and Anglo-centric in the mid-twentieth century, to one without a discernible center in the early twenty-first century. Analysis of artworks from this decentralized cultural climate will focus on the evolution of conceptualism, the persistence of traditional modes of aesthetic practice, the role of the art market, and notions of environmentalism and sustainability as related to these "transnational transition." The course will consider works from Eastern Europe, South and Central America, the Caribbean, East/West/South/Southeast Asia, Oceania, and Africa.

ARTS 4356 Contemporary Art Since 1980
3 Semester Credit Hours (3 Lecture Hours)
The course will examine the evolution of architecture, sculpture, painting, digital media, installation, and interdisciplinary arts in the global context from 1980 to the present, in light of the historical and intellectual background of the period. Topics covered will include the transition from postmodernism to contemporaneity, considering notions of appropriation, commodification, consumerism, memory, history, and globalization. Lectures will be constructed upon thematic analysis of contemporary, primary sources coupled with secondary source material, and complemented by presentation opportunities and class discussion.
GRDS 2301  Typography II
3 Semester Credit Hours
This course explores the foundations of typography, best practices in type-setting, and appropriates uses of prescribed type faces. Hand rendering and digital media are used to give students a robust foundation in the study of typography.
Prerequisite: (GRDS 1301).

GRDS 2302  Design Studio I
3 Semester Credit Hours
This course introduces the fundamental principles of the graphic design industry. Students strengthen their vocabularies in design, theory, and visual communication. Exploring various two-dimensional projects, students will conduct research, form opinions, foster ideas, solve communication problems, learn to analyze and discuss graphic design work, and continue to develop their own creative process.
Prerequisite: GRDS 1301 and 1302.

GRDS 2303  Concept & Making
3 Semester Credit Hours
This studio course offers an in-depth study of approaching concept and idea generation to produce relevant and innovative design solutions. Students will explore tactics and techniques for creating their own original assets to support their solutions. Photo and illustration creation, manipulation and output are studied in addition to the utilization of machines, technology and tools to fulfill creative curiosity.
Prerequisite: GRDS 1301 and 1302.

GRDS 3301  Design Experience & Awareness
3 Semester Credit Hours
This studio course examines the role of design in society. Students will learn how to use empathy and a human-centered design approach to develop appropriate design solutions. Additionally, students will examine the role of environmental graphics to create works that reflect an enhanced impact in experience for the user. The topics in this course are explored through lectures, research and the creative development of a body of work.
Prerequisite: GRDS 2302.

GRDS 3304  Publication Design
3 Semester Credit Hours
This studio course explores the foundations of publication and editorial design to expand students’ design vocabulary. Students will explore the role of a graphic designer/art director in developing effective and innovative communication for editorial design.
Prerequisite: GRDS 2302.

GRDS 3305  Packaging Design
3 Semester Credit Hours
This studio course will teach students how to develop creative strategies for problem solving in a client-based environment. Focusing on three-dimensional packaging, students will learn how design applies to various surfaces, products, and audiences.
Prerequisite: GRDS 1301, 1302, 2301 and 2302.

GRDS 3306  User Interface/User Experience
3 Semester Credit Hours
This hands-on course examines how content is organized and structured to create a digital experience for a user, and what role the designer plays in creating and shaping user experience. Students will learn the roadmap process for developing robust User Interface/User Experience designs, from research, ideation and site mapping, to the design of engaging layouts for screens and the creation of dynamic prototypes.
Prerequisite: GRDS 2302.
GRDS 3308 Copywriting
3 Semester Credit Hours
This studio course explores copywriting for design, advertising, and media. Students will create writing and messaging for a variety of media including print design, web design, and advertising design within a consumer-driven context.
Prerequisite: (GRDS 1301) and (GRDS 1302) and (GRDS 2301) and (GRDS 2302).

GRDS 3309 Building Websites
3 Semester Credit Hours
This studio course will cover designing and maintaining a scalable and functional website utilizing contemporary building platforms. The processes and techniques demonstrated will allow students to plan the project scope, to generate website content, and to adopt the tools and expansive functionality available while learning best practices for the platform.
Prerequisite: GRDS 2303.

GRDS 3310 Client Solutions
3 Semester Credit Hours
In this studio course, students will define client needs, explore the designer-client relationship and investigate research strategies and methods for developing effective print and digital deliverables to meet established business goals. The conceptual and visual standards pertinent to creating a brand are explored and applied across a variety of client-driven projects.
Prerequisite: GRDS 2302.

GRDS 4304 Emerging Technologies
3 Semester Credit Hours (6 Lab Hours)
This studio explores the use of evolving current and emerging technology in the field to enhance storytelling and the user experience in a variety of interactive media.
Prerequisite: GRDS 3306.

GRDS 4309 Design in Advertising
3 Semester Credit Hours
This studio course will teach students how to develop creative strategies for problem solving in a client-based environment. This studio focuses on advertising design as it applies to print, multimedia, outdoor, and direct mail design for a chosen audience.
Prerequisite: GRDS 3310.

GRDS 4310 Portfolio and Professional Practices
3 Semester Credit Hours
In this capstone course, the student prepares for a professional career in the graphic design field by developing self-promotional materials, including a printed and digital portfolio, while focusing on professional practices and job-seeking strategies. Guest speakers will typically join the class for discussion, critique, lecture and hiring scenarios such as mock interviews. Students will display their work in an organized portfolio showcase gallery exhibition. Note: May be taken three times for credit.
Prerequisite: GRDS 3301, 3310 and 4304.

GRDS 4391 Topics in Graphic Design
1,3 Semester Credit Hours
Study of specialized topics and themes in Graphic Design. May be repeated when topics vary.

GRDS 4396 Directed Independent Study
1,3 Semester Credit Hours
See College description. Offered on application.

GRDS 4399 Internship
3 Semester Credit Hours
This course allows students to complete a semester long design-centric internship within their area of interest. Through the use of reflective journals, a project portfolio, and employer feedback, the student will report their experience to the supervising professor throughout the internship placement. May be repeated three times at a maximum of nine semester credit hours.
Prerequisite: GRDS 2302.

Media Arts, BA
Program Description
The program in Media Arts focuses on allowing students to cultivate the creative and critical skills necessary to actively engage in the media industry in a variety of capacities. Media Arts majors select an emphasis in either Media Production or Media Studies to fulfill their coursework.

Student Learning Outcomes
Students will:
- Understand and apply production skills in the creation of audiovisual media
- Understand and apply critical theories and research methods related to media studies through effective written communication
- Demonstrate a general understanding of the media industry and paths to transition from academic coursework to industry positions or advanced degrees
- Create advanced projects that demonstrate effective communication strategies in media production OR media studies

### Courses

**MEDA 1305 Film and Culture**
3 Semester Credit Hours (3 Lecture Hours)
Introduction to film aesthetics, history, and criticism for non-communication majors. Establishes a vocabulary for examining films and their roles in American culture.

**MEDA 1307 Media and Society**
3 Semester Credit Hours (3 Lecture Hours)
History and development of mass media in the United States as well as the organizational, institutional, and cultural dynamics of today’s major commercial media. Included are substantial components on print media, radio, television, cinema, and computer Internet communication systems. Course themes include media production and consumption, globalization, cultural imperialism, race, class, gender in media and popular culture.

**TCCNS: COMM 1307**

**MEDA 1315 Editing**
3 Semester Credit Hours (3 Lecture Hours)
Intensive instruction in postproduction software, postproduction workflows, and editing techniques for moving images.

**MEDA 1380 Introduction to Media Production**
3 Semester Credit Hours (3 Lecture Hours)
Overview of tools and skills necessary to produce digital media content such as editing, cinematography, sound recording, producing and directing for film, television and new media.

**MEDA 2311 Media Writing**
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to teach the fundamentals of writing for the mass media. It includes instruction in professional methods and techniques for gathering, processing and delivering content.

**TCCNS: COMM 2311**

**MEDA 2313 Intermediate Production: Documentary**
3 Semester Credit Hours (3 Lecture Hours)
Principles and techniques of media production with a focus on non-fiction filmmaking.

**Prerequisite:** (MEDA 1315 and 1380).

**MEDA 2315 News Reporting**
3 Semester Credit Hours (3 Lecture Hours)
This course focuses on advanced news-gathering and writing skills. It concentrates on the three-part process of producing news and features, which include discovering the news, reporting the news and writing news in different formats. This course will incorporate all forms of news writing, including: press release, print news, web news and TV and radio broadcast news.

**Prerequisite:** MEDA 2311.

**MEDA 2316 Intermediate Production: Narrative**
3 Semester Credit Hours (3 Lecture Hours)
Principles and techniques of media production with a focus on fictional narrative filmmaking.

**Prerequisite:** (MEDA 1315 and 1380).

**MEDA 2350 Media Performance**
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to teach students articulation, pronunciation, effective writing and on-air performance techniques for all kinds of media environments with videotaped and audio taped presentations.

**MEDA 2366 Media Forms**
3 Semester Credit Hours (3 Lecture Hours)
Examination of the formal elements of media texts, including cinematography/videoography, sound, and editing, across a variety of media platforms and styles. Includes instruction in writing formal analysis.

**TCCNS: COMM 2366**

**MEDA 2367 Media Industries**
3 Semester Credit Hours (3 Lecture Hours)
Examination of the media industries, including how they have evolved and now operate, as well as broader theoretical and practical implications of changing media organizations and practices. Includes instruction in researching contemporary and historical modes of media production, distribution, and exhibition.

**MEDA 3301 Television Criticism**
3 Semester Credit Hours (3 Lecture Hours)
Exploration of how TV communicates through the study of programming content, production practices, and audiences. Includes a laboratory for screening assigned programs.

**Prerequisite:** MEDA 1307.
MEDA 3302 Film Criticism
3 Semester Credit Hours (3 Lecture Hours)
Exploration of the critical approaches to the study of film from a variety of historical and theoretical perspectives, with an emphasis on narrative film and some consideration of experimental cinema. Includes a laboratory for screening assigned films.
Prerequisite: MEDA 1307.

MEDA 3303 Documentary Studies
3 Semester Credit Hours (3 Lecture Hours)
Historical and critical study of the non-fictional film with attention to changing technologies, to varying uses and styles of documentary, and to contemporary critical and theoretical issues.
Prerequisite: MEDA 1307.

MEDA 3310 Media Theory and Research
3 Semester Credit Hours (3 Lecture Hours)
This course is intended to immerse students in the leading theoretical and methodological approaches employed within the field of media studies to gain understating of media texts, popular culture, and audiences. Closely affiliated with cultural studies, qualitative research methods will be a primary focus. Readings and case studies will offer students insight into the way these methods are being used in the field, including their limitations and strengths. A series of assignments will allow them to propose, design, and conduct multiple sample research projects and analyze data in ways that engage with a variety of theories.

MEDA 3314 Multimedia Journalism
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to strengthen students' digital journalism skills, including field-based news gathering and reporting, on-air performance, interviewing techniques, live reporting, and podcasting. The course will prepare students for modern-based multimedia journalism outside of the studio.

MEDA 3317 Advanced Postproduction
3 Semester Credit Hours (3 Lecture Hours)
Intensive instruction in advanced postproduction software, postproduction workflows and editing techniques for moving images.
Prerequisite: MEDA 1315.

MEDA 3318 Editing & Layout
3 Semester Credit Hours (3 Lecture Hours)
This course will teach the principles of copy editing, with an emphasis on accuracy and fairness, as well as the principles of layout and design for print and web publications.
Prerequisite: MEDA 2311.

MEDA 3340 Photojournalism
3 Semester Credit Hours (3 Lecture Hours)
This course will instruct on photojournalism skills and methods for use in visual communication. It will examine ethical and legal limitations to photography and in editing. Student work in this class will be eligible for possible publication in the student newspaper or its accompanying website.

MEDA 3351 Screen Comedy
3 Semester Credit Hours (3 Lecture Hours)
Examination of the varieties of screen comedy, from silent comedy to contemporary forms, with some attention to the history and theory of comic performance.
Prerequisite: MEDA 1307.

MEDA 3360 Screenplay Writing
3 Semester Credit Hours (3 Lecture Hours)
Writing and analysis of the screenplay for narrative fictional films. Writing projects include problem-solving exercises and work on an original screenplay. Course can be repeated for credit.

MEDA 3361 Sports Writing
3 Semester Credit Hours (3 Lecture Hours)
This course will teach the elements of sports writing and reporting to include interviewing and writing to cover different aspects of sports coverage. This course will address content for print, Internet, radio and television. Campus-related sports assignments will be eligible for publication in the student newspaper and its accompanying website.

MEDA 3380 New Media and Communication
3 Semester Credit Hours (3 Lecture Hours)
Examines how new media technologies impact society and change communication practices. Particular emphasis placed on different modes of cultural expression and social interaction made possible through digital media and the Internet.

MEDA 4305 Interpreting and Making the Visual Culture of Hollywood
3 Semester Credit Hours (3 Lecture Hours)
This course examines the visual culture of Hollywood media production in a focused context, such as during a particular decade, or in relation to a particular genre, star, or cultural topic. The visual culture studied will include not just primary media texts such as films or television programs, but also posters, trailers, and other promotional materials, as well as visual culture not produced directly by the media industries, such as contemporary art. Students will learn and utilize basic design techniques to create their own artwork related to these materials, including movie posters, album covers, and sequential art. As resources and equipment availability allow, these designs will be produced using techniques including print-making.

MEDA 4308 Advanced Production: Commercial
3 Semester Credit Hours (3 Lecture Hours)
Advanced techniques in the creation of client based commercial media content with a focus on conceptualization, production, and delivery of a commercial, PSA, or corporate video project.
Prerequisite: (MEDA 1315, 2313 and 2316).

MEDA 4310 Advanced Production: Documentary
3 Semester Credit Hours (3 Lecture Hours)
Advanced techniques in the creation of documentary media content with a focus on conceptualization, production, and distribution of a short documentary film. Course can be repeated once for credit. This course serves as a capstone for the Media Production Track.
Prerequisite: MEDA 2313.

MEDA 4312 Advanced Production: Narrative
3 Semester Credit Hours (3 Lecture Hours)
Advanced techniques in the creation of narrative media content with a focus on scripting, production, and distribution of a short narrative film. Course can be repeated once for credit. This course serves as a capstone for the Media Production Track.
Prerequisite: MEDA 2316.

MEDA 4317 After Effects
3 Semester Credit Hours (3 Lecture Hours)
Conceptualization and execution of digital media projects using visual effects, motion graphics and composition through the creation of video, animation, special effects and more using Adobe's After Effects postproduction software.
Prerequisite: MEDA 1315.
MEDA 4340 Advertising Criticism
3 Semester Credit Hours (3 Lecture Hours)
The examination of advertising history through critical and cultural approaches.

MEDA 4341 First Amendment and Ethical Issues in the Media
3 Semester Credit Hours (3 Lecture Hours)
Study of legal and ethical issues in mediated communication, including the First Amendment and free speech, control, and regulation of broadcasting, obscenity in the media.
Prerequisite: MEDA 1307.

MEDA 4342 Global Media and International Communication
3 Semester Credit Hours (3 Lecture Hours)
Examines global media in the context of international communication, diversity of media and cultural production, styles of media practices abroad, including differences between U.S. news values and ethical and moral dimensions across differing societies of the world.

MEDA 4343 News Publication
3 Semester Credit Hours (3 Lecture Hours)
This course will be a hands-on newsroom experience with the student newspaper the Island Waves and its accompanying website. Individual assignments will be assigned by editors of the student media. Assignments may include writing, advertising, photography, cartooning and video production and editing. Students are required to work on the staff of the official college publication during prescribed hours under faculty supervision.
Prerequisite: MEDA 2311.

MEDA 4370 Advanced New Media Project
3 Semester Credit Hours (3 Lecture Hours)
As the capstone course for the New Media Arts Certificate, this course guides students through the planning, development, and execution of new media-based project.
Prerequisite: ARTS 2356, MEDA 2313 and 1315.

MEDA 4381 Senior Seminar in Media Studies
3 Semester Credit Hours (3 Lecture Hours)
The capstone course for seniors in the Media Studies offers opportunities to synthesize information learned in other Media Studies courses through in-depth study of a particular topic. Students will demonstrate their abilities to think and write critically, and to conduct independent research or produce media projects at an advanced level. Topics vary by instructor.
Prerequisite: MEDA 1307 and 3310.

MEDA 4390 Topics in Media Arts
3 Semester Credit Hours (3 Lecture Hours)
Study of specialized topics and themes in media arts. May be repeated when topics vary.

MEDA 4396 Directed Individual Study
1-3 Semester Credit Hours
See College description. By application. Only 3 semester hours of Directed Individual Study credit may be counted toward the major.

MEDA 4399 Media Arts Internship
3 Semester Credit Hours
Practical experience in the field through placement in a media internship position. Students interested in applying for the internship course must have a minimum cumulative GPA of 3.0; have at least junior standing at the university; be a media arts (media studies or media production emphasis) major or digital journalism minor; have completed at least 12 hours of coursework in the major or minor at TAMU-CC. Preferred applicants will have a minimum media arts or digital journalism GPA of 3.25. All applicants must solicit a recommendation form from a Department of Communication and Media faculty member. Course may be taken three times for credit; however only 3 semester hours of internship credit may be counted toward the major. A second internship may apply to the digital journalism minor; a third internship may be used as a free elective. Authorization to repeat the internship course is contingent on the students’ successful completion of the previous internship experience. This course is graded Credit/No Credit.

Music, BA
Music Degree Programs
Texas A&M University-Corpus Christi offers three distinct degree programs, a minor in music, and a minor in music industry.

- Music, BA (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/music-ba/)
- Music, BM with EC-12 Teacher Certification (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/certification-samc/music-bm-ec-12-teacher-certification/)
- Performance (Instrumental), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/performance-instrumental-bm/)
- Performance (Voice), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/performance-voice-bm/)

The mission of the Texas A&M University-Corpus Christi Department of Music is to assist students in the development of their aural, aesthetic, and analytical capacities in music. This mission is accomplished within a nurturing, student-centered environment where faculty and students strive together for attainment of the following program goals:

1. To prepare music majors for successful professional careers in music education, studio teaching, music industry, and performance;
2. To provide music courses for all students that will acquaint them with fundamental music skills, various musical styles, historical periods and literature, the functions of music in the community, and to provide opportunities to participate in the live performance of music;
3. To encourage students to be continually aware of music as an art form, and to seek opportunities for creative experiences and personal enrichment that are inherent in the study, performance, and production of music; and
4. To contribute to the artistic and cultural life of the community by providing public concerts and recitals, and other forms of appropriate musical involvement of faculty and students.

Texas A&M University-Corpus Christi is an accredited institutional member of the National Association of Schools of Music.
Music Courses Designed Specifically for Non-Majors

Music course offerings of special interest to students majoring in fields outside music include various kinds of ensemble experience:

Admission to Music Degree Programs

Degree-seeking music majors are expected to perform at increasingly higher levels of technical and artistic performance throughout the course of undergraduate study. Assessment of growth in performance is accomplished at the final examination for each semester of Principal Studio enrollment. This consists of a performance before a jury committee composed of music faculty members. Jury committees are charged with two tasks: first, they recommend an advisory jury grade to each student's studio teacher, and second, they determine if students will pass to the next course in the studio sequence. In order to avoid a situation in which a student attempts the pursuit of a music degree for which there is little or no practical hope of success, the following procedures governing admission to Texas A&M-Corpus Christi music degree programs are closely followed.

All music majors share a common first-year music course enrollment, consisting of Musicianship I and II, Aural Training I and II, Class Piano I and II, First Year Principal Applied Studio I and II, and an appropriate major ensemble. The jury examination for First Year Principal Applied Studio II will serve as an application audition for the Bachelor of Music or Bachelor of Music with Teacher Certification. Jury committees will approve applications based upon the jury performance and recommendation of the student's principal studio instructor. Because the Bachelor of Arts program is more broadly focused and not as dependent upon performance, students who are not accepted into the Bachelor of Music or Bachelor of Music with Teacher Certification programs may continue with the BA. Transfer students who have completed two or more semesters of principal studio at another institution should audition for admission to the BM or BMTC degrees at auditions held during the first week of classes each semester for that purpose. Students may attempt to qualify for the Bachelor of Music or the Bachelor of Music with Teacher Certification program only twice.

Ensemble Participation and Requirements

1. Every full-time music major must enroll, participate and receive a passing grade in a major ensemble every semester except the student teaching semester.
2. Major ensemble requirements must be satisfied in the following ways:
   • A student in any instrumental music degree program whose major instrument is a woodwind, brass, or percussion instrument must register for MUEN 1122 Concert Band (1 sch)/MUEN 3122 Concert Band (1 sch), MUEN 1123 Symphonic Winds (1 sch)/MUEN 3123 Symphonic Winds (1 sch) and/or MUEN 1124 Concert Orchestra (1 sch)/MUEN 3124 Concert Orchestra (1 sch) or as assigned by the instrumental ensemble directors and the applied teacher, based on auditions as required.
   • A student in any instrumental music degree program whose major instrument is an orchestral stringed instrument must register for MUEN 1124 Concert Orchestra (1 sch) or
   • A student in any vocal/choral/general music degree program must register for MUEN 1151 University Singers (1 sch)/MUEN 3151 University Singers (1 sch) or MUEN 1153 Chamber Choir (1 sch)/MUEN 3153 Chamber Choir (1 sch) as assigned by the choral ensemble director and the applied music teacher, based on auditions as required.
   • Pianists or guitarists in instrumental music degree normally enroll in MUEN 1151 University Singers (1 sch)/MUEN 3151 University Singers (1 sch) to fulfill the ensemble requirement. If they play a wind band or orchestral instrument well enough, they may enroll in concert band or orchestra instead.
3. Exceptions to these policies will be made only with the approval of the student's applied teacher, the Department Chair and the appropriate ensemble director.

Policy on Course Substitutions

At times, it may be necessary for a student nearing graduation to substitute a secondary applied lesson for a techniques course when there are class scheduling conflicts. In such cases, the students may be allowed to enroll in an applied lesson with the instructor or instructors in that area in lieu of that specific methods course. Courses may include Woodwind Techniques I (MUSI 3166), Woodwind Techniques II (MUSI 3167), Brass Techniques I (MUSI 3168), Brass Techniques II (MUSI 3169), Voice Techniques (MUSI 3170), Percussion Techniques (MUSI 3188), and String Techniques (MUSI 3189). These substitutions are exceptions to be determined on a case-by-case basis by permission of the Music Department Chair.

Policy on Repeated Music Courses

Students majoring and/or minoring in music will have three opportunities to earn a “C” or better in all MUSI, MUAP, MUEN and MIND courses required on the student's degree program/plan. Students who do not earn a “C” or better on the third attempt of a class will not be allowed to continue in courses restricted to music majors and minors, with the exception of non-major applied lessons and ensembles.

Program Description

The Bachelor of Arts in Music offers a choice of two emphases. The BA-Music, Music Studies Emphasis is a desirable degree for those who wish to study music within a traditional liberal arts framework. The degree is appropriate for students who wish to engage in studies in the performing arts, musicology, composition, and other academic music areas, or as instructors in private music studios. The BA-Music, Music Industry Emphasis is a desirable degree for those who wish to study music within a traditional liberal arts framework combined with studies in music business, recording technology, and related fields. The degree is appropriate for students who seek comprehensive knowledge and a foundation of skills foundation for work and growth in the music industry.

Concentration/Emphasis

A concentration or emphasis is a structured plan of study within a major. The number of semester hours for a concentration or emphasis
varies, but is included within the semester hours for the major. Students pursuing the BA in Music will select an emphasis in either Music Studies or Music Industry.

**Student Learning Outcomes**

Students will:

- have knowledge of music theory, history, literature, and culture
- be able to apply their knowledge through singing or performing on a musical instrument
- be able to apply critical thinking skills when hearing musical sounds

In addition, students undertaking the Music Industry Emphasis will:

- have a working knowledge of the operations of the music industry
- operate professional audio recording systems

**Specific Degree Requirements**

All music majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All music degrees require MUSI 1307 Elements of Musical Style (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. Understanding and Enjoying Music (MUSI 1306 Understanding and Enjoying Music (3 sch)) cannot count towards any degree requirement of the Bachelor of Arts in Music. No music coursework with a grade lower than "C" will be counted toward the completion of the Bachelor of Arts in Music, the Bachelor of Music with Teacher Certification, or the Bachelor of Music in Performance, with the following exception. In order to progress to the next level of applied principal lessons (MUAP courses), a student must earn at least an "A" or "B" in his/her lessons and also be recommended to advance by the jury committee. A student who does not advance to the next level of lessons, as recommended by the jury committee, can earn no higher than a "C" in applied music. Students who do not advance in lessons due to other factors (i.e. theory sequence issues) are not held to this grading policy.

### Courses

#### Music Courses

**MUSI 1116 Aural Training I**

1 Semester Credit Hour (1 Lecture Hour)

A companion course to MUSI 1311, designed to strengthen the understanding of theoretical principles through the development of aural perception and skills; exercises in melodic, harmonic, and rhythmic dictation; and drill in sight singing.

TCCNS: MUSI 1116

**MUSI 1117 Aural Training II**

1 Semester Credit Hour (1 Lecture Hour)

Continuation of MUSI 1116; a companion course to MUSI 1312.

**Prerequisite:** MUSI 1116 and 1311.

TCCNS: MUSI 1117

**MUSI 1181 Class Piano I**

1 Semester Credit Hour (1 Lab Hour)

Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.

TCCNS: MUSI 1181

**MUSI 1182 Class Piano II**

1 Semester Credit Hour (1 Lab Hour)

Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.

TCCNS: MUSI 1182

**MUSI 1301 Fundamentals of Music**

3 Semester Credit Hours (3 Lecture Hours)

Designed to teach beginning music students the basic tenet of music theory: note reading, rhythm, scales, key signatures, basic intervals and triads, and solfeggio.

**MUSI 1302 Non-major Class Piano I**

3 Semester Credit Hours (3 Lecture Hours)

Group instruction in the elements of piano playing, designed for the non-major. No previous experience necessary.

**MUSI 1303 Basic Guitar I**

3 Semester Credit Hours (3 Lecture Hours)

Group instruction in the fundamentals of guitar playing, designed for the non-major. The student must furnish an acceptable instrument. No previous experience necessary.

TCCNS: MUSI 1303

**MUSI 1306 Understanding and Enjoying Music**

3 Semester Credit Hours (3 Lecture Hours)

A course for the non-music major. Study of selected music literature of contrasting styles and forms with emphasis on listening to music with understanding.

TCCNS: MUSI 1306
MUSI 1307  Elements of Musical Style  
3 Semester Credit Hours (3 Lecture Hours)  
A survey of selected western and non-western musical styles, based upon the analysis of the characteristic use of the elements of music. Required for music majors and recommended for non-majors with a significant high school music background.  
TCCNS: MUSI 1307

MUSI 1310  History of Rock and Roll  
3 Semester Credit Hours (3 Lecture Hours)  
A general survey of composers, performers, and styles of rock and roll. Emphasis on understanding stylistic elements of music, including rhythm, texture, form, and harmony.  
TCCNS: MUSI 1310

MUSI 1311  Musicianship I  
3 Semester Credit Hours (3 Lecture Hours)  
First principles of chord progression and phrase harmonization. Theory assessment required prior to enrollment.  
TCCNS: MUSI 1311

MUSI 1312  Musicianship II  
3 Semester Credit Hours (3 Lecture Hours)  
Continuation of MUSI 1311, with a study of more advanced chord structures and their placement within the phrase through written exercises, analysis, and correlated keyboard projects.  
Prerequisite: MUSI 1311 and 1116.  
TCCNS: MUSI 1312

MUSI 2116  Aural Training III  
1 Semester Credit Hour (1 Lecture Hour)  
Continuation of MUSI 1117; a companion course to MUSI 2311. Designed to further the understanding of advanced theoretical principles and techniques through related aural exercises, dictation, and sight singing.  
Prerequisite: MUSI 1117 and 1312.  
TCCNS: MUSI 2116

MUSI 2117  Aural Training IV  
1 Semester Credit Hour (1 Lecture Hour)  
Continuation of MUSI 2116; a companion course to MUSI 2312.  
Prerequisite: MUSI 2116 and 2311.  
TCCNS: MUSI 2117

MUSI 2181  Class Piano III  
1 Semester Credit Hour (2 Lecture Hours)  
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.  
Prerequisite: MUSI 1182.  
TCCNS: MUSI 2181

MUSI 2182  Class Piano IV  
1 Semester Credit Hour (1 Lab Hour)  
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.  
TCCNS: MUSI 2182

MUSI 2182  Non-major Class Piano II  
3 Semester Credit Hours (3 Lecture Hours)  
Extension of skill development begun in MUSI 1302 Non-Major Class Piano I.  
Prerequisite: MUSI 1302.

MUSI 2303  Basic Guitar II  
3 Semester Credit Hours (3 Lecture Hours)  
Extension of skill development begun in MUSI 1303 - BASIC GUITAR I. The student must furnish an acceptable instrument.  
Prerequisite: MUSI 1303.

MUSI 2311  Musicianship III  
3 Semester Credit Hours (3 Lecture Hours)  
Continuation of MUSI 1312. A broad summary of classical and chromatic harmony, explored through written exercises, analysis, and correlated keyboard drill.  
Prerequisite: MUSI 1312 and 1117.  
TCCNS: MUSI 2311

MUSI 2312  Musicianship IV  
3 Semester Credit Hours (3 Lecture Hours)  
Continuation of MUSI 2311. An exploration of 20th-century techniques through written exercises, analysis, and correlated keyboard drill.  
Prerequisite: MUSI 2311 and 2116.  
TCCNS: MUSI 2312

MUSI 3085  Junior Recital  
0 Semester Credit Hours  
Required for all students presenting a Junior Recital in partial fulfillment of the requirements for the Bachelor of Music in Performance Degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Department Chair.

MUSI 3162  Diction for Singers I  
1 Semester Credit Hour (1 Lecture Hour)  
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in English and French.

MUSI 3165  Diction for Singers II  
1 Semester Credit Hour (1 Lecture Hour)  
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in Italian and German.

MUSI 3166  Woodwind Techniques I  
1 Semester Credit Hour (1 Lab Hour)  
Basic techniques of playing and teaching the oboe, bassoon, and saxophone. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3167  Woodwind Techniques II  
1 Semester Credit Hour (1 Lab Hour)  
Basic techniques of playing and teaching the flute and clarinet. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3168  Brass Techniques I  
1 Semester Credit Hour (1 Lab Hour)  
Basic techniques of playing and teaching the trumpet and French horn. Includes a survey of pedagogical materials and basic performance literature.
MUSI 3169  Brass Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trombone, euphonium, and tuba. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3170  Voice Techniques for Instrumentalists
1 Semester Credit Hour (1 Lab Hour)
Group instruction and practical experience in the fundamentals of voice production and song interpretation for the instrumental music educator. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3188  Percussion Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the instruments of the percussion family. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3189  String Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the violin, viola, ’cello, and string bass. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3252  Foundations of Music Programs
2 Semester Credit Hours (2 Lecture Hours)
A survey of the historical, social, and philosophical bases of music education in the United States, psychological theories of learning and musical responsiveness, and studies of how these foundations have been applied in various types of music curricula.
Prerequisite: MUSI 2311 and 2116.

MUSI 3253  Basic Conducting
2 Semester Credit Hours (2 Lecture Hours)
A skills acquisition course designed to give students competence in basic baton techniques and musical control of an ensemble. Includes score study and musical terminology.
Prerequisite: MUSI 2311 and 2116.

MUSI 3310  History of Jazz
3 Semester Credit Hours (3 Lecture Hours)
A study of jazz styles, influences, trends, innovators, and literature. Readings include interviews and articles that discuss origins of jazz, definitions of jazz, and race politics of jazz. No previous experience is necessary.

MUSI 3317  Rap and Hip Hop: Music and Culture
3 Semester Credit Hours (3 Lecture Hours)
This course is recommended for non-music majors and music minors. Rap and Hip Hop Music and Culture traces the ideological, social, historical, and cultural influences of a musical genre that first came to prominence in the mid-1970s in one of New York’s toughest neighborhoods, the South Bronx. This course describes how the arts of DJing, MCing, breakin’ [b-boying], and graffiti developed as a way for this community’s struggle to find its own voice. Addressed will be rap’s early successes on the pop charts; its spread to mainstream culture; the growth of “gangsta rap” and mainstream society’s reaction to it; and the commercial success of rap music from the ’90s through today. Throughout, this course will highlight key performers, producers, and voices in the rap and hip hop movements, using their stories to illuminate the underlying issues of racism, poverty, prejudice, and artistic freedom that are part of rap and hip hop’s ongoing legacy.

MUSI 3327  Music and Film
3 Semester Credit Hours (3 Lecture Hours)
The object of this course is to develop skills in analyzing the soundtrack, music’s role in the soundtrack, and the relation of soundtrack and image track (especially relating to music) on small-scale and large-scale (narrative) levels. The course develops critical listening and viewing skills, but it also offers a particular kind of film-music history survey, one that focuses on the three nodal points in the history of film sound: the introduction of sound, the introduction of stereo, and the introduction of digital sound. We will explore the thesis that each of these technological advances alters the structural relationships among the three relatively autonomous components of the soundtrack—dialogue, music and effects.

MUSI 3334  Music Cultures of the World
3 Semester Credit Hours (3 Lecture Hours)
The course introduces the student to ethnomusicology and the cross-cultural study of music and society. It emphasizes the role of music in human life, and explores music and performance from around the world. The student will learn about classical, folk and popular styles found on all seven continents. This course is appropriate for any student of any musical background.

MUSI 3345  Composition
1-3 Semester Credit Hours
Creative writing with a view toward developing an individual style of musical composition. Variable credit, 1, 2, or 3 hrs. One private lesson per week.
Prerequisite: MUSI 2312 and 2117.

MUSI 3346  Form and Analysis of Tonal Music
3 Semester Credit Hours (3 Lecture Hours)
Analysis of the melodic and harmonic design of tonal music, including the aural and visual analysis of scores for piano, voice, chamber ensembles, and orchestra.
Prerequisite: MUSI 2312 and 2117.

MUSI 3354  Advanced Conducting
3 Semester Credit Hours (3 Lecture Hours)
A continuation of MUSI 3252. Advanced experiences with score preparation and effective ensemble rehearsal and management techniques.
Prerequisite: MUSI 3252.

MUSI 3370  Class Voice
3 Semester Credit Hours (3 Lecture Hours)
Group instruction and practical experience in the fundamentals of voice production, music reading, and song interpretation. Dramatic stage movement and singing will be explored using Classical and Broadway song literature. This course is designed for the non-major. No previous experience is necessary.

MUSI 4085  Senior Recital
0 Semester Credit Hours
Required for all students presenting a Senior Recital in partial fulfillment of the requirements for any music degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Program Coordinator.

MUSI 4334  History of Western Music I
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of the evolution of Western musical style from antiquity through the 18th-century.
Prerequisite: MUSI 1307, 2312 and 2117.
MUSI 4335 History of Western Music II
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 4334, an in-depth study of the evolution of Western musical style from the age of Beethoven to the present.
Prerequisite: MUSI 4334.

MUSI 4340 Studies in Repertoire
3 Semester Credit Hours
Systematic examination of the history and literature of a specific performance medium.

MUSI 4346 Orchestration and Arranging
3 Semester Credit Hours (3 Lecture Hours)
The compass, timbre, and techniques of arranging and/or orchestration for instruments and/or voices. Practical experience in arranging for orchestra, band, and other instrumental and vocal combinations.
Prerequisite: MUSI 2312 and 2117.

MUSI 4355 Music for Young Children
3 Semester Credit Hours (3 Lecture Hours)
Study of musical development in children in grades K-6. Study of and practical experience with pedagogical approaches and materials appropriate for that age group.
Prerequisite: MUSI 3252.

MUSI 4357 Choral Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful vocal ensembles in secondary schools.
Prerequisite: MUSI 3253.

MUSI 4358 Instrumental Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful instrumental ensembles in secondary schools. Includes a segment pertaining to the development of marching band shows.
Prerequisite: MUSI 3253.

MUSI 4360 Studies in Pedagogy
3 Semester Credit Hours
Methods, materials and psychology of presenting musical materials to students at various ages. Evaluation of teaching materials and techniques. Classes are organized by specific performance areas.

MUSI 4385 Senior Capstone
3 Semester Credit Hours
The Senior Capstone is intended to provide students seeking the Bachelor of Arts in Music with an opportunity to demonstrate their musical scholarship through scholarly analysis and writing within a field of music of their choosing. May include a performance component, as in a lecture recital, but musical performance may comprise no more than 40% of the capstone project.

MUSI 4390 Topics in Music
1-3 Semester Credit Hours (1-3 Lecture Hours)
May be repeated for credit when topics vary.

MUSI 4396 Directed Individual Study
1-3 Semester Credit Hours
See College description.

MUSI 4398 Applied Experience
3 Semester Credit Hours
See College description.

**Music Ensemble Courses**

MUEN 1122 Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1123 Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1124 Concert Orchestra
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1127 Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1128 Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1131 Piano Accompanying
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1132 Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1133 Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1135 Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1136 Woodwind Choir
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1137 Clarinet/Sax Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1138 Jazz Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1139 Flute Ensemble
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1140 String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1143 Chorale
1 Semester Credit Hour (1 Lecture Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1151 University Singers
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1153 Chamber Choir
1 Semester Credit Hour (1 Lecture Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1157 Opera Workshop
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1159 Mariachi Ensemble
1 Semester Credit Hour (1 Lab Hour)
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1.) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2.) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.

MUEN 3122 Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3123 Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3124 Concert Orchestra
1 Semester Credit Hour (35 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3127 Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3128 Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3132 Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 3133 Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3135 Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3136 Woodwind Ensemble
1 Semester Credit Hour (2 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3139 Flute Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3140 String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3143 Chorale
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3151 University Singers
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3153 Chamber Choir
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3157 Opera Workshop
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3159 Mariachi Ensemble
1 Semester Credit Hour (15 Lab Hours)
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.
Music Industry Courses
MIND 3311 Applications of Music Technology
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, this course will focus on hands-on learning in a workshop environment. Students will gain perspective on the people, procedures, data, software and hardware associated with the creation of music. Topics discussed include: computer proficiency, MIDI, computer based music notation, sequencing music evaluation, music and the Internet, and current trends in music technology.

MIND 3312 Recording Techniques I
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, this course is an examination of the art of audio recording. The curriculum will cover signal flow of the mixing console as it applies to both recording and sound reinforcement; microphones and techniques of application; use of sonic effects; recording devices (Digital, and Hard Disk); synchronization formats; etc.

MIND 3313 Recording Techniques II
3 Semester Credit Hours (3 Lecture Hours)
A continuation of MIND 3312 Recording Techniques. The curriculum will cover advanced topics regarding digital console technology, power and ground related issues, studio acoustics and design, digital audio technology, multimedia and web applications, amplifiers, noise reduction, monitoring, surround sound, and mastering procedures.

MIND 3314 Live Sound Engineering
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, an overview of the basic principles of sound and reinforcement and how audio can be manipulated utilizing current live sound technology. Topics will include signal flow, microphone selection and placement, signal processing, and mixing.

MIND 3315 Musical Acoustics
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, an overview of acoustics with emphasis in the areas of scientific knowledge that are relevant to music: the physiological properties of sounds; the effect of acoustical environment; the acoustical behavior of musical instruments; and the various applications of electronics and computers to the production, reproduction, and composition of music.

MIND 3316 Introduction to MIDI Sound Synthesis and Control
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, this course introduces students to the Musical Instrument Digital Interface (MIDI) sequencing using computer software and keyboard synthesizers. Students learn concepts, basic theory and techniques, and the application of MIDI techniques to the production of music. Hands-on projects are completed using MIDI keyboard synthesizers and sequencer software.

MIND 3320 Music Business Survey
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, this course is an overview of the practices and procedures of the music industry, including such topics as career possibilities, publishing, labels, marketing, and copyrights. It also includes an overview of career options will include performer, composer, record producer and engineer, artist manager, booking agent, concert promoter, sales, marketing, and entertainment attorney.

MIND 3321 Music Business II
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, this course is an in depth examination of the practices and procedures of the music industry that pertain to accounting, taxes, copyright, licensing, marketing and contracts. The primary objective of this course is to develop a working knowledge of the music industry and to remain in compliance with the U.S. legal system.

MIND 3322 Entertainment Law and the Music Industry
3 Semester Credit Hours (3 Lecture Hours)
Designed for both music majors and non-majors, an overview of the legal practices and ramifications of United States law and its influence on the music industry. Topics will include intellectual property, business structures, contracts, distribution regulations, and copyrights. Legal practices for entertainment mediums will include television, film, live stage performances, recording, and publishing.

MIND 4398 Directed Individual Study
1-3 Semester Credit Hours
See College description. Offered on application.

MIND 4399 Applied Experience
3 Semester Credit Hours
See College description. Offered on application.

Performance (Instrumental), BM

Music Degree Programs
Texas A&M University-Corpus Christi offers three distinct degree programs, a minor in music, and a minor in music industry.

- Music, BA (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/music-ba/)
- Music, BM with EC-12 Teacher Certification (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/ certification-samc/music-bm-ec-12-teacher-certification/)
- Performance (Instrumental), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/samc-performance-instrumental-bm/)
- Performance (Voice), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/samc-performance-voice-bm/)

The mission of the Texas A&M University-Corpus Christi Department of Music is to assist students in the development of their aural, aesthetic, and analytical capacities in music. This mission is accomplished within a nurturing, student-centered environment where faculty and students strive together for attainment of the following program goals:

1. To prepare music majors for successful professional careers in music education, studio teaching, music industry, and performance;
2. To provide music courses for all students that will acquaint them with fundamental music skills, various musical styles, historical periods and literature, the functions of music in the community, and to provide opportunities to participate in the live performance of music;
3. To encourage students to be continually aware of music as an art form, and to seek opportunities for creative experiences and personal enrichment that are inherent in the study, performance, and production of music; and
Ensemble Participation and Requirements

1. Every full-time music major must enroll, participate and receive a passing grade in a major ensemble every semester except the student teaching semester.

2. Major ensemble requirements must be satisfied in the following ways:
   - A student in any instrumental music degree program whose major instrument is a woodwind, brass, or percussion instrument must register for MUSE 1122 Concert Band (1 sch)/MUSE 3122 Concert Band (1 sch), MUSE 1123 Symphonic Winds (1 sch)/MUSE 3123 Symphonic Winds (1 sch) and/or MUSE 1124 Concert Orchestra (1 sch)/MUSE 3124 Concert Orchestra (1 sch) or as assigned by the instrumental ensemble directors and the applied teacher, based on auditions as required.
   - A student in any instrumental music degree program whose major instrument is an orchestral stringed instrument must register for MUSE 1124 Concert Orchestra (1 sch)/MUSE 3124 Concert Orchestra (1 sch) or
   - A student in any vocal/choral/general music degree program must register for MUSE 1151 University Singers (1 sch)/MUSE 3151 University Singers (1 sch) or MUSE 1153 Chamber Choir (1 sch)/MUSE 3153 Chamber Choir (1 sch) as assigned by the choral ensemble director and the applied music teacher, based on auditions as required.
   - Pianists or guitarists in instrumental music degree normally enroll in MUSE 1151 University Singers (1 sch)/MUSE 3151 University Singers (1 sch) to fulfill the ensemble requirement. If they play a wind band or orchestral instrument well enough, they may enroll in concert band or orchestra instead.

Exceptions to these policies will be made only with the approval of the student’s applied teacher, the Department Chair and the appropriate ensemble director.

Policy on Course Substitutions
At times, it may be necessary for a student nearing graduation to substitute a secondary applied lesson for a techniques course when there are class scheduling conflicts. In such cases, the students may be allowed to enroll in an applied lesson with the instructor or instructors in that area in lieu of that specific methods course. Courses may include Woodwind Techniques I (MUSI 3166), Woodwind Techniques II (MUSI 3167), Brass Techniques I (MUSI 3168), Brass Techniques II (MUSI 3169), Voice Techniques (MUSI 3170), Percussion Techniques (MUSI 3188), and String Techniques (MUSI 3189). These substitutions are exceptions to be determined on a case-by-case basis by permission of the Music Department Chair.

Policy on Repeated Music Courses
Students majoring and/or minoring in music will have three opportunities to earn a “C” or better in all MUSI, MUAP, MUSE and MIND courses required on the student’s degree program/plan. Students who do not earn a “C” or better on the third attempt of a class will not be allowed to continue in courses restricted to music majors and minors, with the exception of non-major applied lessons and ensembles.

Program Description
Bachelor of Music in Performance
This degree is intended for students whose skills and interest in the performance of music are focused at the professional level. Those who elect this option must be aware that ultimate success in performance careers normally involves further study beyond the bachelor’s degree, as well as a growing accumulation of actual performance experience.
Student Learning Outcomes

Students will:

- gain knowledge of music theory, history, literature, and culture
- acquire skills necessary to perform, conduct, and/or compose music from various periods and genres
- acquire knowledge of performance literature appropriate to their medium

Specific Degree Requirements

All music majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All music degrees require MUSI 1307 Elements of Musical Style (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. Understanding and Enjoying Music (MUSI 1306 Understanding and Enjoying Music (3 sch)) cannot count towards any degree requirement of the Bachelor of Music in Performance. No music coursework with a grade lower than "C" will be counted toward the completion of the Bachelor of Arts in Music, the Bachelor of Music with Teacher Certification, or the Bachelor of Music in Performance, with the following exception. In order to progress to the next level of applied principal lessons (MUAP courses), a student must earn at least an “A” or “B” in his/her lessons and also be recommended to advance by the jury committee. A student who does not advance to the next level of lessons, as recommended by the jury committee, can earn no higher than a “C” in applied music. Students who do not advance in lessons due to their ineligibility to take the Basic Music Skills Assessment due to other factors (i.e. theory sequence issues) are not held to this grading policy.

University Core Curriculum 3

University Core Curriculum 3
### Courses

#### Music Courses

**MUSI 1116 Aural Training I**
1 Semester Credit Hour (1 Lecture Hour)
A companion course to MUSI 1311, designed to strengthen the understanding of theoretical principles through the development of aural perception and skills; exercises in melodic, harmonic, and rhythmic dictation; and drill in sight singing.

TCCNS: MUSI 1116

**MUSI 1117 Aural Training II**
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 1116; a companion course to MUSI 1312.

**Prerequisite:** MUSI 1116 and 1311.

TCCNS: MUSI 1117

**MUSI 1181 Class Piano I**
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.

TCCNS: MUSI 1181
MUSI 1182 Class Piano II
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
TCCNS: MUSI 1182

MUSI 1301 Fundamentals of Music
3 Semester Credit Hours (3 Lecture Hours)
Designed to teach beginning music students the basic tenet of music theory: note reading, rhythm, scales, key signatures, basic intervals and triads, and solfeggio.

MUSI 1302 Non-major Class Piano I
3 Semester Credit Hours (3 Lecture Hours)
Group instruction in the elements of piano playing, designed for the non-major. No previous experience necessary.
TCCNS: MUSI 1302

MUSI 1303 Basic Guitar I
3 Semester Credit Hours (3 Lecture Hours)
Group instruction in the fundamentals of guitar playing, designed for the non-major. The student must furnish an acceptable instrument. No previous experience necessary.
TCCNS: MUSI 1303

MUSI 1306 Understanding and Enjoying Music
3 Semester Credit Hours (3 Lecture Hours)
A course for the non-music major. Study of selected music literature of contrasting styles and forms with emphasis on listening to music with understanding.
TCCNS: MUSI 1306

MUSI 1307 Elements of Musical Style
3 Semester Credit Hours (3 Lecture Hours)
A survey of selected western and non-western musical styles, based upon the analysis of the characteristic use of the elements of music. Required for music majors and recommended for non-majors with a significant high school music background.
TCCNS: MUSI 1307

MUSI 1310 History of Rock and Roll
3 Semester Credit Hours (3 Lecture Hours)
A general survey of composers, performers, and styles of rock and roll. Emphasis on understanding stylistic elements of music, including rhythm, texture, form, and harmony.
TCCNS: MUSI 1310

MUSI 1311 Musicianship I
3 Semester Credit Hours (3 Lecture Hours)
First principles of chord progression and phrase harmonization. Theory assessment required prior to enrollment.
TCCNS: MUSI 1311

MUSI 1312 Musicianship II
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 1311, with a study of more advanced chord structures and their placement within the phrase through written exercises, analysis, and correlated keyboard projects.
Prerequisite: MUSI 1311 and 1116.
TCCNS: MUSI 1312

MUSI 2116 Aural Training III
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 1117; a companion course to MUSI 2311. Designed to further the understanding of advanced theoretical principles and techniques through related aural exercises, dictation, and sight singing.
Prerequisite: MUSI 1117 and 1312.
TCCNS: MUSI 2116

MUSI 2117 Aural Training IV
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 2116; a companion course to MUSI 2312.
Prerequisite: MUSI 2116 and 2311.
TCCNS: MUSI 2117

MUSI 2181 Class Piano III
1 Semester Credit Hour (2 Lecture Hours)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
Prerequisite: MUSI 1182.
TCCNS: MUSI 2181

MUSI 2182 Class Piano IV
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
TCCNS: MUSI 2182

MUSI 2302 Non-major Class Piano II
3 Semester Credit Hours (3 Lecture Hours)
Extension of skill development begun in MUSI 1302 Non-Major Class Piano I.
Prerequisite: MUSI 1302.

MUSI 2303 Basic Guitar II
3 Semester Credit Hours (3 Lecture Hours)
Extension of skill development begun in MUSI 1303 - BASIC GUITAR I. The student must furnish an acceptable instrument.
Prerequisite: MUSI 1303.

MUSI 2311 Musicianship III
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 1312. A broad summary of classical and chromatic harmony, explored through written exercises, analysis, and correlated keyboard drill.
Prerequisite: MUSI 1312 and 1117.
TCCNS: MUSI 2311

MUSI 2312 Musicianship IV
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 2311. An exploration of 20th-century techniques through written exercises, analysis, and correlated keyboard drill.
Prerequisite: MUSI 2311 and 2116.
TCCNS: MUSI 2312
MUSI 3085  Junior Recital
0 Semester Credit Hours
Required for all students presenting a Junior Recital in partial fulfillment of the requirements for the Bachelor of Music in Performance Degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Department Chair.

MUSI 3162  Diction for Singers I
1 Semester Credit Hour (1 Lecture Hour)
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in English and French.

MUSI 3165  Diction for Singers II
1 Semester Credit Hour (1 Lecture Hour)
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in Italian and German.

MUSI 3166  Woodwind Techniques I
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the oboe, bassoon, and saxophone. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3167  Woodwind Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the flute and clarinet. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3168  Brass Techniques I
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trumpet and French horn. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3169  Brass Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trombone, euphonium, and tuba. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3170  Voice Techniques for Instrumentalists
1 Semester Credit Hour (1 Lab Hour)
Group instruction and practical experience in the fundamentals of voice production and song interpretation for the instrumental music educator. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3188  Percussion Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the instruments of the percussion family. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3189  String Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the violin, viola, ’cello, and string bass. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3252  Foundations of Music Programs
2 Semester Credit Hours (2 Lecture Hours)
A survey of the historical, social, and philosophical bases of music education in the United States, psychological theories of learning and musical responsiveness, and studies of how these foundations have been applied in various types of music curricula.
Prerequisite: MUSI 2311 and 2116.

MUSI 3253  Basic Conducting
2 Semester Credit Hours (2 Lecture Hours)
A skills acquisition course designed to give students competence in basic baton techniques and musical control of an ensemble. Includes score study and musical terminology.
Prerequisite: MUSI 2311 and 2116.

MUSI 3310  History of Jazz
3 Semester Credit Hours (3 Lecture Hours)
A study of jazz styles, influences, trends, innovators, and literature. Readings include interviews and articles that discuss origins of jazz, definitions of jazz, and race politics of jazz. No previous experience is necessary.

MUSI 3317  Rap and Hip Hop: Music and Culture
3 Semester Credit Hours (3 Lecture Hours)
This course is recommended for non-music majors and music minors. Rap and Hip Hop Music and Culture traces the ideological, social, historical, and cultural influences of a musical genre that first came to prominence in the mid-1970s in one of New York’s toughest neighborhoods, the South Bronx. This course describes how the arts of DJing, MCing, breakin’ [b-boying], and graffiti developed as a way for this community’s struggle to find its own voice. Addressed will be rap’s early successes on the pop charts; its spread to mainstream culture; the growth of “gangsta rap” and mainstream society’s reaction to it; and the commercial success of rap music from the ’90s through today. Throughout, this course will highlight key performers, producers, and voices in the rap and hip hop movements, using their stories to illuminate the underlying issues of racism, poverty, prejudice, and artistic freedom that are part of rap and hip hop’s ongoing legacy.

MUSI 3327  Music and Film
3 Semester Credit Hours (3 Lecture Hours)
The object of this course is to develop skills in analyzing the soundtrack, music’s role in the soundtrack, and the relation of soundtrack and image track (especially relating to music) on small-scale and large-scale (narrative) levels. The course develops critical listening and viewing skills, but it also offers a particular kind of film-music history survey, one that focuses on the three nodal points in the history of film sound: the introduction of sound, the introduction of stereo, and the introduction of digital sound. We will explore the thesis that each of these technological advances alters the structural relationships among the three relatively autonomous components of the soundtrack—dialogue, music and effects.

MUSI 3334  Music Cultures of the World
3 Semester Credit Hours (3 Lecture Hours)
The course introduces the student to ethnomusicology and the cross-cultural study of music and society. It emphasizes the role of music in human life, and explores music and performance from around the world. The student will learn about classical, folk and popular styles found on all seven continents. This course is appropriate for any student of any musical background.
MUSI 3345 Composition
1-3 Semester Credit Hours
Creative writing with a view toward developing an individual style of musical composition. Variable credit, 1, 2, or 3 hrs. One private lesson per week.
Prerequisite: MUSI 2312 and 2117.

MUSI 3346 Form and Analysis of Tonal Music
3 Semester Credit Hours (3 Lecture Hours)
Analysis of the melodic and harmonic design of tonal music, including the aural and visual analysis of scores for piano, voice, chamber ensembles, and orchestra.
Prerequisite: MUSI 2312 and 2117.

MUSI 3354 Advanced Conducting
3 Semester Credit Hours (3 Lecture Hours)
A continuation of MUSI 3252. Advanced experiences with score preparation and effective ensemble rehearsal and management techniques.
Prerequisite: MUSI 3252.

MUSI 3370 Class Voice
3 Semester Credit Hours (3 Lecture Hours)
Group instruction and practical experience in the fundamentals of voice production, music reading, and song interpretation. Dramatic stage movement and singing will be explored using Classical and Broadway song literature. This course is designed for the non-major. No previous experience is necessary.

MUSI 4085 Senior Recital
0 Semester Credit Hours
Required for all students presenting a Senior Recital in partial fulfillment of the requirements for any music degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Program Coordinator.

MUSI 4334 History of Western Music I
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of the evolution of Western musical style from antiquity through the 18th-century.
Prerequisite: MUSI 1307, 2312 and 2117.

MUSI 4335 History of Western Music II
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 4334, an in-depth study of the evolution of Western musical style from the age of Beethoven to the present.
Prerequisite: MUSI 4334.

MUSI 4340 Studies in Repertoire
3 Semester Credit Hours
Systematic examination of the history and literature of a specific performance medium.

MUSI 4346 Orchestration and Arranging
3 Semester Credit Hours (3 Lecture Hours)
The compass, timbre, and techniques of arranging and/or orchestration for instruments and/or voices. Practical experience in arranging for orchestra, band, and other instrumental and vocal combinations.
Prerequisite: MUSI 2312 and 2117.

MUSI 4355 Music for Young Children
3 Semester Credit Hours (3 Lecture Hours)
Study of musical development in children in grades K-6. Study of and practical experience with pedagogical approaches and materials appropriate for that age group.
Prerequisite: MUSI 3252.

MUSI 4357 Choral Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful vocal ensembles in secondary schools.
Prerequisite: MUSI 3253.

MUSI 4358 Instrumental Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful instrumental ensembles in secondary schools. Includes a segment pertaining to the development of marching band shows.
Prerequisite: MUSI 3253.

MUSI 4360 Studies in Pedagogy
3 Semester Credit Hours
Methods, materials and psychology of presenting musical materials to students at various ages. Evaluation of teaching materials and techniques. Classes are organized by specific performance areas.

MUSI 4385 Senior Capstone
3 Semester Credit Hours
The Senior Capstone is intended to provide students seeking the Bachelor of Arts in Music with an opportunity to demonstrate their musical scholarship through scholarly analysis and writing within a field of music of their choosing. May include a performance component, as in a lecture recital, but musical performance may comprise no more than 40% of the capstone project.

MUSI 4390 Topics in Music
1-3 Semester Credit Hours (1-3 Lecture Hours)
May be repeated for credit when topics vary.

MUSI 4396 Directed Individual Study
1-3 Semester Credit Hours
See College description.

MUSI 4398 Applied Experience
3 Semester Credit Hours
See College description.

Music Ensemble Courses
MUEN 1122 Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1123 Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1133  Percussion Ensemble**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1127  Pep Band**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1135  Brass Ensemble**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1128  Jazz Band**
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1136  Woodwind Choir**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1131  Piano Accompanying**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1137  Clarinet/Sax Ensemble**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1132  Classical Guitar Ensemble**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

**MUEN 1138  Jazz Guitar Ensemble**
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1139 Flute Ensemble  
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1140 String Ensemble  
1 Semester Credit Hour (1 Lab Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1143 Chorale  
1 Semester Credit Hour (1 Lecture Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1151 University Singers  
1 Semester Credit Hour (1 Lab Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1153 Chamber Choir  
1 Semester Credit Hour (1 Lecture Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1157 Opera Workshop  
1 Semester Credit Hour (1 Lab Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1159 Mariachi Ensemble  
1 Semester Credit Hour (1 Lab Hour)  
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1.) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2.) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.

MUEN 3122 Concert Band  
1 Semester Credit Hour (1 Lab Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3123 Symphonic Winds  
1 Semester Credit Hour (1 Lab Hour)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3124 Concert Orchestra  
1 Semester Credit Hour (35 Lab Hours)  
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 3127  Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3128  Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3132  Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3133  Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3135  Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3136  Woodwind Ensemble
1 Semester Credit Hour (2 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3139  Flute Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3140  String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3143  Chorale
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3151  University Singers
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
Performance (Voice), BM

Music Degree Programs

Texas A&M University-Corpus Christi offers three distinct degree programs, a minor in music, and a minor in music industry.

- Music, BA (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/music-ba/)
- Music, BM with EC-12 Teacher Certification (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/certification-samc/music-bm-ec-12-teacher-certification/)
- Performance (Instrumental), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/performance-instrumental-bm/)
- Performance (Voice), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/performance-voice-bm/)

The mission of the Texas A&M University-Corpus Christi Department of Music is to assist students in the development of their aural, aesthetic, and analytical capacities in music. This mission is accomplished within a nurturing, student-centered environment where faculty and students strive together for attainment of the following program goals:

1. To prepare music majors for successful professional careers in music education, studio teaching, music industry, and performance;
2. To provide music courses for all students that will acquaint them with fundamental music skills, various musical styles, historical periods and literature, the functions of music in the community, and to provide opportunities to participate in the live performance of music;
3. To encourage students to be continually aware of music as an art form, and to seek opportunities for creative experiences and personal enrichment that are inherent in the study, performance, and production of music; and
4. To contribute to the artistic and cultural life of the community by providing public concerts and recitals, and other forms of appropriate musical involvement of faculty and students.

Texas A&M University-Corpus Christi is an accredited institutional member of the National Association of Schools of Music.

Music Courses Designed Specifically for Non-Majors

Music course offerings of special interest to students majoring in fields outside music include various kinds of ensemble experience:

Admission to Music Degree Programs

Degree-seeking music majors are expected to perform at increasingly higher levels of technical and artistic performance throughout the course of undergraduate study. Assessment of growth in performance is accomplished at the final examination for each semester of Principal Studio enrollment. This consists of a performance before a jury committee composed of music faculty members. Jury committees are charged with two tasks: first, they recommend an advisory jury grade to each student’s studio teacher; and second, they determine if students will pass to the next course in the studio sequence. In order to avoid a situation in which a student attempts the pursuit of a music degree for which there is little or no practical hope of success, the following procedures governing admission to Texas A&M-Corpus Christi music degree programs are closely followed.

All music majors share a common first-year music course enrollment, consisting of Musicianship I and II, Aural Training I and II, Class Piano I and II, First Year Principal Applied Studio I and II, and an appropriate major ensemble. The jury examination for First Year Principal Applied Studio II will serve as an application audition for the Bachelor of Music or Bachelor of Music with Teacher Certification. Jury committees will approve applications based upon the jury performance and recommendation of the student’s principal studio instructor. Because the Bachelor of Arts program is more broadly focused and not as dependent upon performance, students who are not accepted into the Bachelor of
Music or Bachelor of Music with Teacher Certification programs may continue with the BA. Transfer students who have completed two or more semesters of principal studio at another institution should audition for admission to the BM or BMTC degrees at auditions held during the first week of classes each semester for that purpose. Students may attempt to qualify for the Bachelor of Music or the Bachelor of Music with Teacher Certification program only twice.

**Ensemble Participation and Requirements**

1. Every full-time music major must enroll, participate and receive a passing grade in a major ensemble every semester except the student teaching semester.
2. Major ensemble requirements must be satisfied in the following ways:
   - A student in any instrumental music degree program whose major instrument is a woodwind, brass, or percussion instrument must register for MUEN 1124 Concert Band (1 sch)/MUEN 3122 Concert Band (1 sch), MUEN 1123 Symphonic Winds (1 sch)/MUEN 3123 Symphonic Winds (1 sch) and/or MUEN 1124 Concert Orchestra (1 sch)/MUEN 3124 Concert Orchestra (1 sch) or as assigned by the instrumental ensemble directors and the applied teacher, based on auditions as required.
   - A student in any instrumental music degree program whose major instrument is an orchestral stringed instrument must register for MUEN 1124 Concert Orchestra (1 sch)/MUEN 3124 Concert Orchestra (1 sch) or
   - A student in any vocal/choral/general music degree program must register for MUEN 1151 University Singers (1 sch)/MUEN 3151 University Singers (1 sch) or MUEN 1153 Chamber Choir (1 sch)/MUEN 3153 Chamber Choir (1 sch) as assigned by the choral ensemble director and the applied music teacher, based on auditions as required.
   - Pianists or guitarists in instrumental music degree programs must register for MUEN 1151 University Singers (1 sch)/MUEN 3151 University Singers (1 sch) to fulfill the ensemble requirement. If they play a wind band or orchestral instrument well enough, they may enroll in concert band or orchestra instead.
3. Exceptions to these policies will be made only with the approval of the student’s applied teacher, the Department Chair and the appropriate ensemble director.

**Policy on Course Substitutions**

At times, it may be necessary for a student nearing graduation to substitute a secondary applied lesson for a techniques course when there are class scheduling conflicts. In such cases, the students may be allowed to enroll in an applied lesson with the instructor or instructors in that area in lieu of that specific methods course. Courses may include Woodwind Techniques I (MUSI 3166), Woodwind Techniques II (MUSI 3167), Brass Techniques I (MUSI 3168), Brass Techniques II (MUSI 3169), Voice Techniques (MUSI 3170), Percussion Techniques (MUSI 3188), and String Techniques (MUSI 3189). These substitutions are exceptions to be determined on a case-by-case basis by permission of the Music Department Chair.

**Policy on Repeated Music Courses**

Students majoring and/or minoring in music will have three opportunities to earn a “C” or better in all MUSI, MUAP, MUEN and MIND courses required on the student’s degree program/plan. Students who do not earn a “C” or better on the third attempt of a class will not be allowed to continue in courses restricted to music majors and minors, with the exception of non-major applied lessons and ensembles.

**Program Description**

**Bachelor of Music in Performance**

This degree is intended for students whose skills and interest in the performance of music are focused at the professional level. Those who elect this option must be aware that ultimate success in performance careers normally involves further study beyond the bachelor’s degree, as well as a growing accumulation of actual performance experience.

**Student Learning Outcomes**

Students will:

- gain knowledge of music theory, history, literature, and culture
- acquire skills necessary to perform, conduct, and/or compose music from various periods and genres
- acquire knowledge of performance literature appropriate to their medium

**Specific Degree Requirements**

All music majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All music degrees require MUSI 1307 Elements of Musical Style (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. Understanding and Enjoying Music (MUSI 1306 Understanding and Enjoying Music (3 sch)) cannot count towards any degree requirement of the Bachelor of Arts in Music. No music coursework with a grade lower than “C” will be counted toward the completion of the Bachelor of Arts in Music, the Bachelor of Music with Teacher Certification, or the Bachelor of Music in Performance, with the following exception. In order to progress to the next level of applied principal lessons (MUAP courses), a student must earn at least an “A” or “B” in his/her lessons and also be recommended to advance by the jury committee. A student who does not advance to the next level of lessons, as recommended by the jury committee, can earn no higher than a “C” in applied music. Students who do not advance in lessons due to their ineligibility to take the Basic Music Skills Assessment due to other factors (i.e. theory sequence issues) are not held to this grading policy.

Courses
Music Courses
MUSI 1116 Aural Training I
1 Semester Credit Hour (1 Lecture Hour)
A companion course to MUSI 1311, designed to strengthen the understanding of theoretical principles through the development of aural perception and skills; exercises in melodic, harmonic, and rhythmic dictation; and drill in sight singing.
TCCNS: MUSI 1116

MUSI 1117 Aural Training II
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 1116; a companion course to MUSI 1312.
Prerequisite: MUSI 1116 and 1311.
TCCNS: MUSI 1117

MUSI 1181 Class Piano I
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
TCCNS: MUSI 1181

MUSI 1182 Class Piano II
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
TCCNS: MUSI 1182

MUSI 1301 Fundamentals of Music
3 Semester Credit Hours (3 Lecture Hours)
Designed to teach beginning music students the basic tenet of music theory: note reading, rhythm, scales, key signatures, basic intervals and triads, and solfeggio.

MUSI 1302 Non-major Class Piano I
3 Semester Credit Hours (3 Lecture Hours)
Group instruction in the elements of piano playing, designed for the non-major. No previous experience necessary.

MUSI 1303 Basic Guitar I
3 Semester Credit Hours (3 Lecture Hours)
Group instruction in the fundamentals of guitar playing, designed for the non-major. The student must furnish an acceptable instrument. No previous experience necessary.
TCCNS: MUSI 1303

MUSI 1306 Understanding and Enjoying Music
3 Semester Credit Hours (3 Lecture Hours)
A course for the non-music major. Study of selected music literature of contrasting styles and forms with emphasis on listening to music with understanding.
TCCNS: MUSI 1306

MUSI 1307 Elements of Musical Style
3 Semester Credit Hours (3 Lecture Hours)
A survey of selected western and non-western musical styles, based upon the analysis of the characteristic use of the elements of music. Required for music majors and recommended for non-majors with a significant high school music background.
TCCNS: MUSI 1307

MUSI 1310 History of Rock and Roll
3 Semester Credit Hours (3 Lecture Hours)
A general survey of composers, performers, and styles of rock and roll. Emphasis on understanding stylistic elements of music, including rhythm, texture, form, and harmony.
TCCNS: MUSI 1310

MUSI 1311 Musicianship I
3 Semester Credit Hours (3 Lecture Hours)
First principles of chord progression and phrase harmonization. Theory assessment required prior to enrollment.
TCCNS: MUSI 1311
MUSI 1312 Musicianship II
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 1311, with a study of more advanced chord structures and their placement within the phrase through written exercises, analysis, and correlated keyboard projects.
Prerequisite: MUSI 1311 and 1116.
TCCNS: MUSI 1312

MUSI 2116 Aural Training III
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 1117; a companion course to MUSI 2311. Designed to further the understanding of advanced theoretical principles and techniques through related aural exercises, dictation, and sight singing.
Prerequisite: MUSI 1117 and 1312.
TCCNS: MUSI 2116

MUSI 2311 and 2116.

MUSI 2117 Aural Training IV
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 2116; a companion course to MUSI 2312. 
Prerequisite: MUSI 2116 and 2311.
TCCNS: MUSI 2117

MUSI 2181 Class Piano III
1 Semester Credit Hour (2 Lecture Hours)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
Prerequisite: MUSI 1182.
TCCNS: MUSI 2181

MUSI 2182 Class Piano IV
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
TCCNS: MUSI 2182

MUSI 2302 Non-major Class Piano II
3 Semester Credit Hours (3 Lecture Hours)
Extension of skill development begun in MUSI 1302 Non-Major Class Piano I.
Prerequisite: MUSI 1302.

MUSI 2303 Basic Guitar II
3 Semester Credit Hours (3 Lecture Hours)
Extension of skill development begun in MUSI 1303 - BASIC GUITAR I. The student must furnish an acceptable instrument.
Prerequisite: MUSI 1303.

MUSI 2311 Musicianship III
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 1312. A broad summary of classical and chromatic harmony, explored through written exercises, analysis, and correlated keyboard drill.
Prerequisite: MUSI 1312 and 1117.
TCCNS: MUSI 2311

MUSI 2312 Musicianship IV
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 2311. An exploration of 20th-century techniques through written exercises, analysis, and correlated keyboard drill.
Prerequisite: MUSI 2311 and 2116.
TCCNS: MUSI 2312

MUSI 3085 Junior Recital
0 Semester Credit Hours
Required for all students presenting a Junior Recital in partial fulfillment of the requirements for the Bachelor of Music in Performance Degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Department Chair.

MUSI 3162 Diction for Singers I
1 Semester Credit Hour (1 Lecture Hour)
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in English and French.

MUSI 3165 Diction for Singers II
1 Semester Credit Hour (1 Lecture Hour)
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in Italian and German.

MUSI 3166 Woodwind Techniques I
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the oboe, bassoon, and saxophone. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3167 Woodwind Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the flute and clarinet. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3168 Brass Techniques I
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trumpet and French horn. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3169 Brass Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trombone, euphonium, and tuba. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3170 Voice Techniques for Instrumentalists
1 Semester Credit Hour (1 Lab Hour)
Group instruction and practical experience in the fundamentals of voice production and song interpretation for the instrumental music educator. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3188 Percussion Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the instruments of the percussion family. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3189 String Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the violin, viola, 'cello, and string bass. Includes a survey of pedagogical materials and basic performance literature.
MUSI 3252  Foundations of Music Programs  
2 Semester Credit Hours (2 Lecture Hours)  
A survey of the historical, social, and philosophical bases of music education in the United States, psychological theories of learning and musical responsiveness, and studies of how these foundations have been applied in various types of music curricula.  
Prerequisite: MUSI 2311 and 2116.

MUSI 3253  Basic Conducting  
2 Semester Credit Hours (2 Lecture Hours)  
A skills acquisition course designed to give students competence in basic baton techniques and musical control of an ensemble. Includes score study and musical terminology.  
Prerequisite: MUSI 2311 and 2116.

MUSI 3310  History of Jazz  
3 Semester Credit Hours (3 Lecture Hours)  
A study of jazz styles, influences, trends, innovators, and literature. Readings include interviews and articles that discuss origins of jazz, definitions of jazz, and race politics of jazz. No previous experience is necessary.

MUSI 3317  Rap and Hip Hop: Music and Culture  
3 Semester Credit Hours (3 Lecture Hours)  
This course is recommended for non-music majors and music minors. Rap and Hip Hop Music and Culture traces the ideological, social, historical, and cultural influences of a musical genre that first came to prominence in the mid-1970s in one of New York’s toughest neighborhoods, the South Bronx. This course describes how the arts of DJing, MCing, breakin’ [b-boying], and graffiti developed as a way for this community’s struggle to find its own voice. Addressed will be rap’s early successes on the pop charts; its spread to mainstream culture; the growth of “gangsta rap” and mainstream society’s reaction to it; and the commercial success of rap music from the ’90s through today. Throughout, this course will highlight key performers, producers, and voices in the rap and hip hop movements, using their stories to illuminate the underlying issues of racism, poverty, prejudice, and artistic freedom that are part of rap and hip hop’s ongoing legacy.

MUSI 3327  Music and Film  
3 Semester Credit Hours (3 Lecture Hours)  
The object of this course is to develop skills in analyzing the soundtrack, music’s role in the soundtrack, and the relation of soundtrack and image track (especially relating to music) on small-scale and large-scale (narrative) levels. The course develops critical listening and viewing skills, but it also offers a particular kind of film-music history survey, one that focuses on the three nodal points in the history of film sound: the introduction of sound, the introduction of stereo, and the introduction of digital sound. We will explore the thesis that each of these technological advances alters the structural relationships among the three relatively autonomous components of the soundtrack—dialogue, music and effects.

MUSI 3334  Music Cultures of the World  
3 Semester Credit Hours (3 Lecture Hours)  
The course introduces the student to ethnomusicology and the cross-cultural study of music and society. It emphasizes the role of music in human life, and explores music and performance from around the world. The student will learn about classical, folk and popular styles found on all seven continents. This course is appropriate for any student of any musical background.

MUSI 3345  Composition  
1-3 Semester Credit Hours  
Creative writing with a view toward developing an individual style of musical composition. Variable credit, 1, 2, or 3 hrs. One private lesson per week.  
Prerequisite: MUSI 2312 and 2117.

MUSI 3346  Form and Analysis of Tonal Music  
3 Semester Credit Hours (3 Lecture Hours)  
Analysis of the melodic and harmonic design of tonal music, including the aural and visual analysis of scores for piano, voice, chamber ensembles, and orchestra.  
Prerequisite: MUSI 2312 and 2117.

MUSI 3354  Advanced Conducting  
3 Semester Credit Hours (3 Lecture Hours)  
A continuation of MUSI 3252. Advanced experiences with score preparation and effective ensemble rehearsal and management techniques.  
Prerequisite: MUSI 3252.

MUSI 3370  Class Voice  
3 Semester Credit Hours (3 Lecture Hours)  
Group instruction and practical experience in the fundamentals of voice production, music reading, and song interpretation. Dramatic stage movement and singing will be explored using Classical and Broadway song literature. This course is designed for the non-major. No previous experience is necessary.

MUSI 4085  Senior Recital  
0 Semester Credit Hours  
Required for all students presenting a Senior Recital in partial fulfillment of the requirements for any music degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Program Coordinator.

MUSI 4334  History of Western Music I  
3 Semester Credit Hours (3 Lecture Hours)  
An in-depth study of the evolution of Western musical style from antiquity through the 18th-century.  
Prerequisite: MUSI 1307, 2312 and 2117.

MUSI 4335  History of Western Music II  
3 Semester Credit Hours (3 Lecture Hours)  
Continuation of MUSI 4334, an in-depth study of the evolution of Western musical style from the age of Beethoven to the present.  
Prerequisite: MUSI 4334.

MUSI 4340  Studies in Repertoire  
3 Semester Credit Hours  
Systematic examination of the history and literature of a specific performance medium.

MUSI 4346  Orchestration and Arranging  
3 Semester Credit Hours (3 Lecture Hours)  
The compass, timbre, and techniques of arranging and/or orchestration for instruments and/or voices. Practical experience in arranging for orchestra, band, and other instrumental and vocal combinations.  
Prerequisite: MUSI 2312 and 2117.

MUSI 4355  Music for Young Children  
3 Semester Credit Hours (3 Lecture Hours)  
Study of musical development in children in grades K-6. Study of and practical experience with pedagogical approaches and materials appropriate for that age group.  
Prerequisite: MUSI 3252.
MUSI 4357  Choral Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful vocal ensembles in secondary schools.
Prerequisite: MUSI 3253.

MUSI 4358  Instrumental Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful instrumental ensembles in secondary schools. Includes a segment pertaining to the development of marching band shows.
Prerequisite: MUSI 3253.

MUSI 4360  Studies in Pedagogy
3 Semester Credit Hours
Methods, materials and psychology of presenting musical materials to students at various ages. Evaluation of teaching materials and techniques. Classes are organized by specific performance areas.

MUSI 4385  Senior Capstone
3 Semester Credit Hours
The Senior Capstone is intended to provide students seeking the Bachelor of Arts in Music with an opportunity to demonstrate their musical scholarship through scholarly analysis and writing within a field of music of their choosing. May include a performance component, as in a lecture recital, but musical performance may comprise no more than 40% of the capstone project.

MUSI 4390  Topics in Music
1-3 Semester Credit Hours (1-3 Lecture Hours)
May be repeated for credit when topics vary.

MUSI 4396  Directed Individual Study
1-3 Semester Credit Hours
See College description.

MUSI 4398  Applied Experience
3 Semester Credit Hours
See College description.

Music Ensemble Courses

MUEN 1122  Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1123  Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1124  Concert Orchestra
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1127  Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1128  Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1131  Piano Accompanying
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1132  Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1133  Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1135  Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1136  Woodwind Choir
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1137  Clarinet/Sax Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1138  Jazz Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1139  Flute Ensemble
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1140  String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1143  Chorale
1 Semester Credit Hour (1 Lecture Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1151  University Singers
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1153  Chamber Choir
1 Semester Credit Hour (1 Lecture Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1157 Opera Workshop
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1159 Mariachi Ensemble
1 Semester Credit Hour (1 Lab Hour)
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1.) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2.) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.

MUEN 3122 Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3123 Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3124 Concert Orchestra
1 Semester Credit Hour (35 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3127 Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3128 Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3132 Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3133 Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3135 Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3136  Woodwind Ensemble
1 Semester Credit Hour (2 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3139  Flute Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3140  String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3143  Chorale
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3159  Mariachi Ensemble
1 Semester Credit Hour (15 Lab Hours)
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.

Theatre, BA
Program Description
The mission of the Texas A&M University-Corpus Christi Theatre Program is to provide students with the tools needed for preparation as Theatre educators or professional practitioners, or for continuation of their studies on the graduate level.

The goal of the program is to provide students with meaningful experiences that promote an understanding of Theatre as a medium of expression and collaboration. Students are given opportunities for creative and critical thinking, problem solving, and exploration in an environment that values artistic integrity, understands failure as well as success, and respects the viewpoints of others in the encouragement of artistic truth. The extensive season of the Theatre Program serves not only as a training lab for the students, but also enhances the cultural and aesthetic experience of the campus and is a major cultural resource for the residents of South Texas.

Student Learning Outcomes
1. BA in Theatre: Acting/Directing concentration and Design/Technical concentration will demonstrate the following
   • Demonstrate analysis competencies in historical research and script analysis.
• Communicate historical and cultural dimensions of Theatre during a required exit jury with the faculty.
• Communicate and defend their senior capstone project to the Theatre faculty.
• Communicate and defend a cumulative portfolio of their work complete with headshot, résumé, and marketing strategy for post-baccalaureate opportunities in graduate school or professional work.

2. BA in Theatre: Teaching Certificate concentration will demonstrate the following:
• Communicate competencies in historical research and script analysis during a required exit jury with the Theatre faculty.
• Communicate historical and cultural dimensions of Theatre during a required exit jury with the faculty.
• Communicate visual and aural perceptions of Theatre performance during a required exit jury with the Theatre faculty. The student will use specific examples from their participation in University Theatre productions.

BA Theatre Entrance Auditions/Interviews and BA Theatre Scholarship Auditions

All students wishing to major in Theatre must audition/interview or present a design/technical portfolio for review prior to Admission into the program.

• Auditions/interviews for incoming fall or spring: Incoming first-year and transfer students who wish to major in Theatre must audition/interview or design/technical portfolio review prior to Islander Launch (new student orientation) by calling Mr. Kevin Loeffler, Director of the University Theatre, at 361-825-2262. If you have not auditioned/interviewed or presented a design/technical portfolio for review prior to Islander Launch, you will be asked to do so prior to enrolling in Theatre courses. Theatre auditions for the acting/directing or teacher certification concentration consist of a résumé and two contrasting monologues totaling no more than 2 minutes. Students majoring with the design/technical concentration are required to bring a design/technical portfolio and resume of their previous work in the Theatre for review to a scheduled interview prior to being admitted into Theatre courses.
• For transfer students and first-year students who miss Islander Launch, auditions/interviews, or design/technical portfolio reviews should be scheduled for the Friday or Monday before semester classes begin. Contact Mr. Kevin Loeffler for an audition/interview, or design/technical portfolio review to schedule a day and time.
• Students will only be allowed three opportunities to audition/interview for admittance into the department. After the third attempt, students must seek department chair approval for admittance into the program.

To schedule an audition/interview time, design/technical portfolio review, to audition for a Theatre Scholarship, or for more information, contact:

Mr. Kevin Loeffler
Texas &M University-Corpus Christi
6300 Ocean Drive, Unit 5724
Corpus Christi, Texas 78412
Phone: 361-825-2262
Fax: 361-825-2250
Email: kevin.loeffler@tamucc.edu

Scholarships for Theatre Majors and Minors

Theatre scholarships are talent-based awards given to Theatre majors and minors by annual audition/interview, and/or portfolio review. The scholarships range from $1,000 to $3,000 per academic year. To audition for a scholarship, contact Mr. Kevin Loeffler at the above contact information.

Admission to Theatre Degree Programs

Prospective Theatre majors are required to audition/interview prior to admission to the Theatre Program. Degree seeking Theatre majors are expected to perform at increasingly higher levels of design, technical, and/or artistic performance throughout their course of undergraduate study. Successful students in acting/directing or design/technical Theatre will maintain a 3.0 grade point average or higher in their course work and receive a positive faculty evaluation at their required annual jury. Students receiving negative faculty jury reviews or low grade-point averages may be asked to re-audition or re-interview to continue as a Theatre major. Current students wishing to change their concentration in the program, or add/drop their teacher certification must audition/interview with the faculty during their annual jury.

Bachelor of Arts Degree with a Major in Theatre

Students earning a Bachelor of Arts with a major in Theatre may concentrate on one of two specialties:

• Acting/Directing Concentration
• Design/Technical Theatre Concentration

Theatre majors may also pursue a Bachelor of Arts in Theatre leading to Teacher Certification.

**Core Curriculum Program**

University Core Curriculum 42

**Theatre Major Requirements**

- THEA 1120  Theatre Practicum 1 1
- THEA 1121  Theatre Practicum 2 1
- THEA 1351  Acting I 3
- THEA 1371  Costume Technology 3
- THEA 2120  Theatre Practicum 3 1
- THEA 2121  Theatre Practicum 4 1
- THEA 3120  Theatre Practicum 5 1
- THEA 3121  Theatre Practicum 6 1
- THEA 2355  Script Analysis 3
- THEA 3350  Production Management 3
- THEA 3370  History of the Theatre I 3
- THEA 3371  History of the Theatre II 3
- THEA 4100  Senior Seminar 1
- THEA 4200  Senior Capstone 2
- THEA 4360  Stage Direction I 3

**Concentrations**

Select one of the following concentrations: 28-30

**Acting/Directing Concentration**

- THEA 1341  Stage Makeup
- THEA 2336  Voice for the Actor
- THEA 1352  Acting II
- THEA 3300  Stage Movement
- THEA 3340  Audition Preparation
- THEA 3375  Acting III: Period Styles
- THEA 3386  Playwriting
- THEA 4361  Stage Direction II
- THEA 4371  Acting for the Camera
- THEA 4373  Improvisation Skills Level I

**Design/Technical Theatre Concentration**

- THEA 1341  Stage Makeup
- THEA 3165  The Design and Technical Portfolio.
- THEA 3373  Principles of Design
- THEA 3380  History of Theatrical Styles
- THEA 3381  Drawing and Rendering for the Stage
- THEA 3382  Drafting and Computer-Aided Design for the Stage
- THEA 4314  Collaborative Approaches to Design
- THEA 4365  Costume Design
- THEA 4370  Set Design
- THEA 4375  Lighting Design

**Electives**

- THEA 3302  Creative Dramatics
- THEA 3312  Stage Combat I
- THEA 4312  Stage Combat II (May be repeated for credit)
- THEA 3377  Acting Shakespeare
- THEA 4364  Costume Crafts
- THEA 4373  Improvisation Skills Level I
- THEA 4374  Improvisation Skills Level II (May be repeated for credit)
- THEA 4375  Improvisation Skills Level I
- THEA 4376  Improvisation Skills Level II

**Dance**

- DANC 1141  Ballet I
- DANC 1147  Jazz Dance I
- DANC 1148  Modern Dance I
- DANC 1304  Dance in Performance (May be repeated for credit)
- DANC 2141  Ballet II
- DANC 2147  Jazz Dance II
- DANC 2148  Modern Dance II
- DANC 3303  World Dance and Culture
- DANC 3306  Dance Choreography I
- DANC 3310  History of Dance
- DANC 4306  Dance Choreography II (May be repeated for credit)
- DANC 4310  Dance Instruction

**University Electives**

Select 9-11 hours of university electives. 11-9

**Foreign Language Requirements**

See the College of Liberal Arts for the college language requirement. 6

**Total Hours**

122

The Theatre and Dance courses are highly recommended (but not required) as electives for the Acting/Directing, Design/Technical, and Teacher Certification areas.

</table>
THEA 3300 Stage Movement  
3 Semester Credit Hours (3 Lecture Hours)  
Students will gain insights into the physical skills, exercises, and techniques developed and used by actors and directors in theatrical performance, with an emphasis on relaxation, freedom, expressiveness, spatial relationships, and composition.  
**Prerequisite:** THEA 1351 and 1352.

THEA 3302 Creative Dramatics  
3 Semester Credit Hours (3 Lecture Hours)  
Theories and practices incorporating the techniques of creative drama in the elementary, middle, and high school classroom. Especially recommended for elementary education, recreation, and the social sciences.

THEA 3303 Theatre in the Public Schools  
3 Semester Credit Hours (3 Lecture Hours)  
Theories and practices of incorporating theatre activities in the public schools. Especially recommended to students of elementary and secondary education, recreation and the social sciences.

THEA 3310 Contemporary Theatre  
3 Semester Credit Hours (3 Lecture Hours)  
An overview of the nature and function of theatre in our contemporary society with discussion of representative plays and playwrights, theatrical and avant-garde theatre. Students will explore multicultural, political, and experimental themes, attend theatrical productions, and meet with actors, designers, and directors to discuss contemporary practices.

THEA 3312 Stage Combat I  
3 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)  
Stage combat is a unique form of acting and movement; integral to the training of the professional actor and an extremely marketable skill. This course is an introduction to the stage fight discipline. It is important as actors that we develop a keen sense of duality in performance; a seemingly impromptu, theatrically engaging moment of violence built upon a foundation of safe, consistent physical dialogue. In this way, we can enhance the physical lives of all the characters we play; especially those engaged in acts of violence. This course explores many fundamental acting techniques in a new light including responsibility to a partner, listening and responding, projection, articulation, spatial awareness and above all intent. May be repeated for credit.

THEA 3335 UIL Debate and Speech  
3 Semester Credit Hours (3 Lecture Hours)  
This course will prepare students to coach High School speech events as extra-curricular and co-curricular activities. The class will focus primarily on Texas University Interscholastic Leagues (UIL competitions) but will also cover events sponsored by the Texas Forensics Association (TFA) and the National Forensics League (NFL). Areas covered will include oral interpretation, extemporaneous speaking, and debate.

THEA 3340 Audition Preparation  
3 Semester Credit Hours (3 Lecture Hours)  
Provides the student with the information and skills needed for auditioning in both professional and educational theatre.  
**Prerequisite:** THEA 1351 and 1352.

THEA 3350 Production Management  
3 Semester Credit Hours (3 Lecture Hours)  
This course is a survey of stage management and theatre administration. Topics to be studied include stage management, production management, professional unions, publicity/marketing, box office and house management.  
**Prerequisite:** THEA 1371, 1330 and 2355.

THEA 3370 History of the Theatre I  
3 Semester Credit Hours (3 Lecture Hours)  
Historical investigation of the nature and function of theatre from primitive rituals through the Renaissance periods with discussions of representative plays/playwrights, theatrical styles and stage design.  
**Prerequisite:** THEA 2355.

THEA 3371 History of the Theatre II  
3 Semester Credit Hours (3 Lecture Hours)  
Historical investigation of theatre from the Restoration era to the present. Focus on the nature and function as well as the critical analysis of theatre and design, various movements, and influential people.  
**Prerequisite:** THEA 2355.

THEA 3373 Principles of Design  
3 Semester Credit Hours (3 Lecture Hours)  
Builds upon the student’s practical lab experience and understanding of theatrical design begun in costume construction and theatre stagecraft. Students will explore the creative process of theatre production as it pertains to lighting, set, sound, props, and costume design projects.  
**Prerequisite:** THEA 1371 and 1330.

THEA 3375 Acting III: Period Styles  
3 Semester Credit Hours (3 Lecture Hours)  
Specific training for actors in period plays. Emphasis on training the actor for the Classical, Renaissance, Shakespearean, and Modern Periods.  
**Prerequisite:** THEA 1351 and 1352.

THEA 3377 Acting Shakespeare  
3 Semester Credit Hours (3 Lecture Hours)  
Advance study in the analysis and performance of heightened text as written by William Shakespeare. Coursework includes in-depth application of Elizabeth theatre practices and how these practices may be adapted for 21st century actors, directors, and audiences.

THEA 3380 History of Theatrical Styles  
3 Semester Credit Hours (3 Lecture Hours)  
A survey and research-oriented course which studies the major impact of the visual, artistic, historical, and social period movements. The course will focus on the approach that the actor, designer, director, and playwright take in developing the understanding of the environment of a play’s location and time period.

THEA 3381 Drawing and Rendering for the Stage  
3 Semester Credit Hours (3 Lecture Hours)  
Examination of the uses of the various materials used and the development of the techniques employed in the creation and presentation of theatrical renderings and models.  
**Co-requisite:** SMTE 0098.

THEA 3382 Drafting and Computer-Aided Design for the Stage  
3 Semester Credit Hours (3 Lecture Hours)  
Practical examination and practice in theatrical drafting conventions with an emphasis on the development of hand drafting techniques and CAD (computer-aided design).  
**Prerequisite:** THEA 1330.

THEA 3385 Musical Theatre  
3 Semester Credit Hours (3 Lecture Hours)  
The focus of the course is on musical theatre history, exploring trends in the genre, audition techniques, characterization, staging and choreography.
THEA 3386 Playwriting
3 Semester Credit Hours (3 Lecture Hours)
is a fundamentals course in writing for the stage. The course will cover playwriting for monologues, 10 Minute Plays, and One Act Plays. Completion of Script Analysis is strongly suggested but not required. May be repeated for credit.

THEA 3387 Dramaturgy
3 Semester Credit Hours (3 Lecture Hours)
This class will provide a brief overview of many of the skills and tools that dramaturgs possess. We will study the history of the field and learn about currently working dramaturgs, while also covering the foundational skills of historical research, structural analysis, and theoretical application. Completion of Script Analysis is strongly suggested but not required. May be repeated for credit.

THEA 4100 Senior Seminar
1 Semester Credit Hour (1 Lecture Hour)
A seminar class for the graduating senior. The student will be given the opportunity to address individual weaknesses and strengths in preparation for graduate school or entering the job market.

THEA 4200 Senior Capstone
2 Semester Credit Hours (2 Lab Hours)
The course is designed to provide the graduating senior an opportunity to complete a final project in the acting/directing or design/tech focus areas. The student's project will be judged by the entire faculty and include a research and production component.

THEA 4312 Stage Combat II
3 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)
Stage combat is a continuation of the skills of acting and movement; integral to the training of the professional actor and an extremely marketable skill. This course is an advanced weaponry course in the stage fight discipline. It is important as actors that we develop a keen sense of duality in performance; a seemingly impromptu, theatrically engaging moment of violence built upon a foundation of safe, consistent physical dialogue. In this way, we can enhance the physical lives of all the characters we play; especially those engaged in acts of violence. May be repeated for credit.

Prerequisite: THEA 3312.

THEA 4313 Theatre Technologies
3 Semester Credit Hours (3 Lecture Hours)
Designed to provide a forum for intensive study of a particular aspect of modern theatrical technologies. Various topics may be selected based on current industry trends, student needs and available resources.

Prerequisite: THEA 1330, 3381 and 3382.

THEA 4314 Collaborative Approaches to Design
3 Semester Credit Hours (3 Lecture Hours)
An advanced design course where the student will examine the process of design from the standpoint of the relationship created within the design team. Through class projects, the student will participate in a design process which fosters communication of ideas, written analysis and collaboration in pursuit of a unified design in all aspects of production.

Prerequisite: THEA 3373.
Co-requisite: SMTE 0098.

THEA 4323 Oral Interpretation of Children's Literature
3 Semester Credit Hours (3 Lecture Hours)
A study, primarily through the medium of performance, of various types and forms of literature for children. Strongly oriented toward teaching literature in the elementary school classroom. (Credit may not be given for both this course and COMM 4323 or ENGL 4370.)

THEA 4333 Technical Direction
3 Semester Credit Hours (3 Lecture Hours)
An advanced technical class geared for the student who wishes to receive training and employment as a technical director.

THEA 4360 Stage Direction I
3 Semester Credit Hours (3 Lecture Hours)
The study and practical application of directing principals for the beginning director. Elements of script analysis, blocking, movement, character development, tempo, and design will be investigated as part of the directing process. The student will direct a ten-minute play for public performance.

Prerequisite: THEA 1352 and 2355.

THEA 4361 Stage Direction II
3 Semester Credit Hours (3 Lecture Hours)
An advanced study in directing with actual experience in organization, interpretation, casting, and producing the one-act play. The student will direct a one-act play for public performance.

Prerequisite: THEA 4360.

THEA 4364 Costume Crafts
3 Semester Credit Hours (4 Lecture Hours)
Students will learn to identify, comprehend, and demonstrate practical knowledge of tools, machines, and techniques practiced in a costume craft studio. They will learn to recognize the different materials, chemicals, and tools used in costume crafts. They will know what the above items are best suited for and what type of project they should be applied to. The student will gain basic crafting skills. These skills are gained by extensive hands-on experience by working on projects in the costume studio. They will gain the ability to purchase, layout, cut, and construct any specialty project in the costuming area.

Prerequisite: THEA 1371 and 2370.

THEA 4365 Costume Design
3 Semester Credit Hours (3 Lecture Hours)
A study of the theory and practice of costume design utilizing the human form as a design element for the stage. Encompasses theatre form, style, and drafting and drawing techniques. Students are required to work on University Theatre productions as part of this course.

THEA 4366 Scene Painting
3 Semester Credit Hours
The examination and practice of the various materials and techniques of professional scenic painting, including material mixing, faux techniques, and textural applications.

THEA 4370 Set Design
3 Semester Credit Hours
A study of the theory and practice of set design. Students will learn the fundamentals of theatre design and will apply this knowledge to projects. Projects will encompass theatre form, style, and concept utilization. Students are required to work on University Theatre productions as a part of this course.

Co-requisite: SMTE 0098.

THEA 4371 Acting for the Camera
3 Semester Credit Hours (3 Lecture Hours)
Emphasizes the practice of various acting styles for television, video, and film. The student will receive practical experience in commercial styles, public service announcements, television and video style acting, and film scene study. (Credit may not be given for both this course and COMM 4371.)
THEA 4372 Theatre Practicum
3 Semester Credit Hours (3 Lecture Hours)
Advanced practice and participation in set construction, lighting implementation, and stagecraft. Students will build upon skills in the areas of theatre production and design for production in the University Theatre. Class meets twice weekly with additional crew/lab work requirements as well. Students are required to work on University Theatre productions as a part of this course. May be repeated twice for credit.

THEA 4373 Improvisation Skills Level I
3 Semester Credit Hours (3 Lecture Hours)
is a fundamentals of improvisation course that teaches the guidelines for successful improvisation skills. The course emphasizes the basics of successful improvisation as it pertains to Theatre, Communication, and the student who wants to improve their communication skills. May be repeated for credit.

THEA 4374 Improvisation Skills Level II
3 Semester Credit Hours (3 Lecture Hours)
is a continuation of improvisation course level I that instructs the student in the guidelines for advanced improvisation skills. The course teaches the skills necessary for advanced individual and group improvisation. Emphasis is on ensemble performance. May be repeated for credit.

Prerequisite: THEA 4373.

THEA 4375 Lighting Design
3 Semester Credit Hours (3 Lecture Hours)
A study of the theory and practice of lighting design. Practical experiences in University Theatre are included to provide exposure to the total design and implementation of lighting design. Students will become familiar with the techniques and aesthetics of lighting theatrical performances and will apply skills to create designs for projects and actual plays. Students are required to work on University Theatre productions as a part of this course.

THEA 4380 Advanced Stage Makeup
3 Semester Credit Hours (3 Lecture Hours)
A study of the theory and practice of designing makeup for the stage. Students will learn about aesthetics, application, and techniques of stage makeup. Students will do makeup designs as projects in the class. Students are required to work on University Theatre productions as part of this course.

THEA 4384 Theatre Production
1-3 Semester Credit Hours (1-3 Lecture Hours)
An applied production experience in which students perform in a play, work back stage or on a stage crew, or learn to design a play or musical from conception to final production. Students enrolling in the course but not cast in the shows will work backstage (technical production) or in another production capacity. Enrollment is by application only, and must be approved by the instructor in advance of registration. As part of the application process the number of credit hours will be determined by the instructor. May be repeated for credit.

THEA 4390 Topics in Theatre
1-3 Semester Credit Hours (1-3 Lecture Hours)
Study of specialized topics and themes in the areas of acting, directing, and theatre history. May be repeated when topics vary.

THEA 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description. By application.

THEA 4398 Applied Experience
3 Semester Credit Hours
See College description. By application.

Teacher Certifications

- English, BA with Secondary Teacher Certification in English Language Arts (Grades 7-12) (p. 330)
- English, BA with Teacher Certification in English Language Arts (Grades 4-8) (p. 337)
- History and Social Studies, Teacher Certification (p. 342)
- Spanish, Teaching Certification EC-12 (p. 350)

English, BA with Secondary Teacher Certification in English Language Arts (Grades 7-12)

Program Description

Admission and Retention Requirements for English Certification

For admission to and retention in Teacher Education in the field of English, students must achieve and sustain a 3.0 GPA in all English coursework. To qualify to take the English TExES examination, students must meet the following criteria:

1. Have at least a 2.5 GPA on all college coursework (lower and upper level).
2. Have completed one English TExES Review Workshop at Texas A&M University-Corpus Christi.

Students who meet the above criteria must request permission to take the TExES certification exam via the College of Education and Human Development’s TExES Approval/Request System (TAR) at <http://tar.tamucc.edu>. The English TExES Coordinator will approve all students who meet the above criteria. In addition, it is strongly recommended that students take two English TExES Review Workshops before they take the exam.

Students may choose either a Literary Studies or a Writing Studies Emphasis.

Students returning to the University to complete certification must see the English TExES Coordinator to identify any course deficiencies in the student’s teaching field. All criteria outlined in the plan must be met before the student will be permitted to take the English TExES.

Students seeking certification must also qualify to take the Professional Development TExES. For information, see the College of Education and Human Development section of this catalog.

Courses

ENGL 0399  Integrated Reading and Writing  3
3 Semester Credit Hours (3 Lecture Hours)

A portfolio-based course with required tutoring (lab) time focused on the
writing and reading processes, including strategies for invention, revision,
and editing, and techniques of active reading, such as analysis, inference,
summary, and evaluating texts. Students will enter ENGL 0399 through
Texas Success Initiative (TSI) mandated remediation. (Not counted
toward graduation)

ENGL 1301  Writing and Rhetoric I  3
3 Semester Credit Hours (3 Lecture Hours)

English 1301 introduces students to writing studies, rhetoric, academic
research, and information literacy. Students will critically read and reflect
on threshold concepts in writing studies. They will practice recursive
writing and research processes for various situations. Sections will be
offered both online and in person each semester.

TCCNS: ENGL 1301

ENGL 1302  Writing and Rhetoric II  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2303  Introduction to Writing Studies  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2304  Introduction to Writing Studies  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2316  Literature and Culture  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2322  Instructional Design for Special
Populations: Grades 7-12  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2331  Literature and Culture  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2332  Literature of the Western World: From the Classics to the
Renaissance  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2333  Literature of the Western World: From the Enlightenment to
the Present  3
3 Semester Credit Hours (3 Lecture Hours)

This course will review current scholarship on writing studies, including
threshold concepts, activity theory, and genre studies. It will consider
various perspectives on the uses of writing to provide students with an
intellectual and practical understanding of writing. This course provides
a starting point for the more specific studies of writing that occur in other
writing studies courses.

ENGL 2360  Language and Gender  3
3 Semester Credit Hours (3 Lecture Hours)

In this class, we explore how language reflects, and is reflected upon, one
facet of our identities: gender. We will explore the complex relationships
between gender and aspects of language such as conversation, narrative,
pronunciation, grammar, and pragmatic norms. We will also discuss
the intersection of gender and other social factors, such as race or
culture, as manifested in the language use. Students will also have an
opportunity to discuss how gender is represented in the media and
online, as well as how gender is situated in institutional contexts, such
as home, school, work, and law. There is no prior knowledge of linguistics
or social theory required for this class. Course activities include lectures,
class discussions, in-class article presentation, language observations,
and a final project.
ENGL 2370 Introduction to Literary Studies
3 Semester Credit Hours
An introduction to literary analysis and scholarship for the intermediate writer. Emphasis placed on genres of literature, literary research, and expository and analytical composition. Familiarizes students with the various disciplines and related conversations within English Studies. Should be taken by sophomore-level English majors in the Literary Studies emphasis, and by Literary Studies and Creative Writing minors. 
Prerequisite: ENGL 1302.

ENGL 2371 Exploring Social Media
3 Semester Credit Hours (3 Lecture Hours)
In this course we will examine and discuss current issues related to social media within a rhetorical framework. We will use different social media platforms to share and discuss in order to provide hands-on experience in these environments. Social media will be explored at the micro level as students will review their online social media presence to better understand how readers view them online. From the macro level we will identify current topics that affect the design and use of social media platforms and applications.

ENGL 3167 English as a Second/Foreign Language Tutoring
1 Semester Credit Hour
Students pursuing the Advanced TESOL Certificate will supplement ENGL 3367 (TESOL Seminar: Methods) with practical experience tutoring English learners. Students will write reflectively about those experiences. As needed, students will undergo site-specific training. 
Co-requisite: ENGL 3367.

ENGL 3301 Technical and Professional Writing
3 Semester Credit Hours
A course designed to help students gain practical experience in finding and interpreting information and writing reports and documents for specialized audiences in the technical and professional world. ENGL 3301 will be held in a computer-assisted classroom.

ENGL 3302 Techniques of Creative Writing
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to the theoretical knowledge and practical experience used in creative writing. Focuses on poetry, creative nonfiction, and short fiction. For all majors.

ENGL 3310 Technical and Professional Writing for Computer Science
3 Semester Credit Hours (3 Lecture Hours)
Designed specifically for computer science majors, this course focuses on developing students ability to (1) use writing to communicate effectively with a range of audiences about technology; (2) identify, analyze, and appropriately integrate relevant information in their writing; (3) make informed judgments about their uses of writing based on ACM's and IEEE's code of ethics; and (4) develop their ability to function effectively individually and as members of a team to establish goals, plan tasks, meet deadlines, manage risk, and produce deliverables.

ENGL 3321 Film and Literature
3 Semester Credit Hours (3 Lecture Hours)
Studies the connections between the formal elements of literature and of film, with emphasis on theme, narrative style, and genre. By viewing films based on literary sources, students will analyze how literature is adapted into film as well as identify strategies to view and read critically. For all majors.

ENGL 3323 Young Adult Fiction
3 Semester Credit Hours (3 Lecture Hours)
Literary study of young adult literature through analysis, discussion, and interpretation. The course emphasizes literary issues connected with society, culture, history, and genre.

ENGL 3325 Interdisciplinary Approaches to Literature
3 Semester Credit Hours (3 Lecture Hours)
In recent decades, it has become common to study literature in light of other disciplinary perspectives-and to study other disciplines as they are depicted in literature. From these interdisciplinary approaches has emerged a distinct mode of analysis that examines texts within their broader social and cultural milieu. In this course students will earn to use cross-disciplinary methods to interpret literature and culture. Topics will vary, but may include Religion, Medicine, and American Literature, Disability Narratives in the Eighteenth Century, Trauma and the City in Twentieth-Century Literature.

ENGL 3330 Current Events and Literature
3 Semester Credit Hours (3 Lecture Hours)
This course examines literature in the context of current issues and events. Students will place literature in conversation with social, political, and cultural trends as a means of engaging with and understanding these trends and the debates associated with them. Using reading, writing, and discussion as modes of critical inquiry, students will discover the critical role that literature plays in representing, responding to, and shaping current events.

ENGL 3339 Introduction to Linguistics
3 Semester Credit Hours (3 Lecture Hours)
Introductory survey course covering phonetics, morphology, syntax, semantics, sociolinguistics, neurolinguistics, and language acquisition.

ENGL 3340 Grammar
3 Semester Credit Hours (3 Lecture Hours)
Presenta general descriptive overview of English grammar and provides a structural framework for analyzing English sentences.

ENGL 3341 British Literature before 1800
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of poetry, drama, and prose before 1800 with emphasis on historical context and the exploration of literary and cultural values through written texts. 
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 2303) * May be taken concurrently.

ENGL 3345 British Literature since 1800
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of British poetry, drama, and prose since 1800 with emphasis on historical context and the exploration of literary and cultural values through written texts. 
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 2303) * May be taken concurrently.

ENGL 3348 Drama
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of dramatic literature, using a wide range of texts. Variable content.

ENGL 3349 Poetry
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of poetry using a wide range of texts. Variable content.

ENGL 3354 American Literatures before 1900
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of American poetry, drama, and prose from the country's pre-European beginnings to 1900 with emphasis on historical context and the exploration of literary and cultural values through written texts. 
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 3303) * May be taken concurrently.
ENGL 3355  American Literatures since 1900
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of American poetry, drama, and prose from 1900 to the present with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370*) or (ENGL 2303*) or (ENGL 3303*). May be taken concurrently.

ENGL 3360  Current Approaches to Composition and Literature
3 Semester Credit Hours (3 Lecture Hours)
 Prepares prospective teachers to create developmentally appropriate learning environments and tasks that enable student success in writing and the study of literature in Language Arts and English courses. Prepares students to meet the increased writing and reading expectations in all subject areas, including their own writing.

ENGL 3361  Strategies and Genres of Advanced Writing
3 Semester Credit Hours (3 Lecture Hours)
Students will practice-writing in situated contexts (such as their majors, careers, and/or other professional interests) and across genres to develop more advanced and reflective writing strategies. By studying theories of writing; engaging in writing as a craft; and drafting, revising, and editing texts; students will refine and become more reflective in their writing processes.

ENGL 3362  Creative Writing Workshop: Survey and Practice of Genres
3 Semester Credit Hours (3 Lecture Hours)
Develops students’ skills as critics and writers of fiction, poetry, and creative nonfiction in a workshop setting. For all majors.

ENGL 3363  Foundations of Rhetoric
3 Semester Credit Hours (3 Lecture Hours)
This course will study the historical and theoretical development of rhetoric through the works of principal thinkers. Students will analyze rhetorical concepts in their relation to civic, cultural, political, and pedagogical developments and the construction of knowledge and will use rhetorical concepts to produce logical, ethical, and moral arguments.

ENGL 3364  Strategies of Writing Creative Nonfiction
3 Semester Credit Hours (3 Lecture Hours)
Explores the uses of creative nonfiction through reading and writing about published works of experienced writers and scholars in the field and practicing a variety of creative nonfiction techniques and genres (e.g. literary journalism, memoir, and the personal narrative).

ENGL 3365  Second Language Acquisition
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to second language acquisition. The course is designed to be accessible to students from a wide variety of backgrounds and no basic knowledge of the linguistic structure of English will be assumed. This course will address issues related to how second language is learned by both children and adults.

ENGL 3366  Language in Society
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the study of language as a function of several societal variables. Introduces basic concepts of language such as linguistic varieties, dialect, speech communities, and linguistic attitudes.

ENGL 3367  TESOL Seminar
3 Semester Credit Hours (3 Lecture Hours)
This course presents an introduction to and a critique of current and traditional methodologies of teaching English to speakers of other languages, with emphasis on aural comprehension; speaking, reading, and writing skills; testing and assessment; and linguistic-cultural differences. This course is open to all majors, but is required for students seeking the Certificate in TESOL.
Prerequisite: ENGL 3365.

ENGL 3369  Topics in Linguistics
3 Semester Credit Hours (3 Lecture Hours)
Exploration of topics such as second language acquisition, language assessment, history of English, and contrastive analysis. May be repeated when topics vary.

ENGL 3378  Document Design and Publishing
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the integration of text and visual rhetoric, such as graphics, for all kinds of professional publications including technical documents, media, public relations pieces, and advertisements.

ENGL 3379  Writing for the Web
3 Semester Credit Hours (3 Lecture Hours)
Emphasizes practical concepts related to writing and communication on the internet and the World Wide Web. Attention is given to finding and analyzing information; analyzing and designing WWW sites and other digital, hypertextual environments; and analyzing and composing hypertext-hypermedia materials for digital, networked environments. For all majors.

ENGL 3380  Visual Rhetoric
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the analysis, design, and production of visual representations and multi-modal texts that integrate visual elements.

ENGL 4123  Nonprofit Writing Project
1 Semester Credit Hour
Students will gain practical experience with a nonprofit agency by developing a significant project that meets an agency identified need. Students should take this course in the last semester of their nonprofit certificate program in conjunction with one of the following: ENGL 3378, ENGL 3379, ENGL 4322, or ENGL 4321. The students’ professor in the regular course will be the instructor of record for the projects course.

ENGL 4300  Technologies and Cultures of the Book
3 Semester Credit Hours (3 Lecture Hours)
Working with a range of print media, students will learn to analyze the interplay between the text’s content and its formal features. Students will build the skills to think and write analytically about the materiality of texts.

ENGL 4305  Major Authors
3 Semester Credit Hours (3 Lecture Hours)
This course studies the significant works of a major literary author. Texts are viewed through a variety of critical perspectives and placed in the context of the writer’s life and of the society, culture, and history of the times. May be repeated once for credit when authors vary.

ENGL 4320  Professional Writing Workshop
3 Semester Credit Hours (3 Lecture Hours)
This course is tailored for individual students’ writing and publishing projects in their disciplines.
ENGL 4321 Grants and Proposals
3 Semester Credit Hours (3 Lecture Hours)
This course will teach students the grant proposal writing process, including identifying sources of funding, conducting research to support funding applications, and tailoring each proposal to a specific funding agency. Students will receive experience writing actual proposals on behalf of local organizations and agencies.

ENGL 4322 Writing in the Nonprofit Agencies
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the specific kinds writing of professionals in the nonprofit world or, including internal communication in an agency, writing for the public, document creation, fund raising, board relations, and other relevant topics.

ENGL 4324 Editing & Style
3 Semester Credit Hours (3 Lecture Hours)
Practice in methods, tools, and principles of editing for nonfiction and technical publications. Emphasis on a rhetorical understanding of levels of editing, managing the editorial process, and grammar and style.

ENGL 4325 Writing Across Cultures and Contexts
3 Semester Credit Hours (3 Lecture Hours)
Through writing, students will study how groups perceive, understand, and communicate with and about each other. The course may focus on a specific type of writing (cross cultural expository writing, travel writing, cross cultural writing in industry), or on the linguistic and rhetorical practices of a cross-cultural community (latino/a rhetoric, African-American rhetorics, etc).

ENGL 4335 Creative Writing Studio: Development of Craft
3 Semester Credit Hours (3 Lecture Hours)
Develops students’ skills as critics and writers of fiction, poetry, and creative nonfiction in a studio setting. Guides students to focus on a major project in one genre with sustained practice of techniques and revision. Open to students of all levels, from the novice to the advanced. For all majors.

ENGL 4340 The Novel
3 Semester Credit Hours (3 Lecture Hours)

ENGL 4345 Rhetorics, Literacies, and Writing
3 Semester Credit Hours (3 Lecture Hours)
This course examines the history and major theories of rhetoric, literacy, and composition, and explores how they influence contemporary cultural productions.

ENGL 4350 Studies in Poetics: Theory, Form, and Practice
3 Semester Credit Hours (3 Lecture Hours)
Develops students’ theoretical knowledge of poetics and practical experience of writing in traditional forms, from the Anglo-American tradition to the culturally diverse movements and innovation of form. Focusing on works written by poets about poetry and poetics primarily from the 19th to the 21st centuries. For all majors.

ENGL 4351 Senior Capstone: Literature and Writing
3 Semester Credit Hours (3 Lecture Hours)
A study of literature in English for graduating seniors in the Literary Studies Emphasis. Emphasis is placed on genre, research, and analytical expository writing. Prerequisite: ENGL 2370, 3303 or 2303.

ENGL 4352 Capstone in Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
This course is the culminating experience for the Writing Studies emphasis in English. Students review, reflect on, integrate, and apply their learning from previous courses and experiences. Students create digital portfolios for career and publishing opportunities, emphasizing selection, revision, reflection, and presentation. In addition, students identify, evaluate, and annotate texts and resources to include in a curated digital collection/publication that will be available for students in future Writing Studies courses.

ENGL 4360 Gender, Sexuality and Literature
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to literature that explores issues of gender and sexuality. It focuses on relevant literary periods and conventions, as well as on the historical, social, and cultural contexts of artistic productions. Sample topics: women's literature, queer literature, literature and masculinity.

ENGL 4361 Race and Ethnicity in Literature
3 Semester Credit Hours (3 Lecture Hours)
Topics focus on a variety of cross-cultural issues in historical and/or contemporary texts by Caribbean, British Indian, Native American, African American, Chicano/a, and/or other underrepresented authors.

ENGL 4362 Texts and Contexts
3 Semester Credit Hours (3 Lecture Hours)
Study of literary and cultural texts that raise issues of community and social relations, diversity, multiculturalism, and/or globalization. Sample topics: Medicine and Religion in American Literature, Traveling Histories, the Global City, and Literary Regionalism in Transnational Context. May be repeated once for credit when topics vary.

ENGL 4370 Oral Interpretation of Children's Literature
3 Semester Credit Hours (3 Lecture Hours)
A study, primarily through the medium of performance, of various types and forms of literature for children. Strongly oriented toward teaching literature in the elementary school classroom. (Credit may not be given for both this course or THEA 4323.)

ENGL 4380 Critical Approaches to Literature and Culture
3 Semester Credit Hours (3 Lecture Hours)
A study of selected perspectives and critical approaches to literature and culture, including an examination of some of the theoretical assumptions upon which they are based, as well as their implications for the way we think about literature, human identity, and the power of language. Prerequisite: ENGL 2370.

ENGL 4385 Studies in Creative Writing
3 Semester Credit Hours (3 Lecture Hours)
Students will focus on the craft of a specific genre or type of writing through reading experts’ advice, reading and analyzing examples written by practitioners, and engaging in peer-response workshops with classmates. Attention will be paid to publication opportunities available for writers in that genre.

ENGL 4390 Topics in Literary Studies
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary—see S.A.I.L. or advisor for further information.

ENGL 4391 Topics in Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary—see S.A.I.L. or advisor for further information.
ENGL 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description.

ENGL 4398 Applied Experience
3 Semester Credit Hours (3 Lecture Hours)
See College description.

ENGL 4399 TESOL Practicum
3 Semester Credit Hours
Practical experience teaching English to second language learners. Students will observe, plan, and teach ESL lessons. Instructional support provides opportunities to discuss and reflect upon teaching experiences and help students connect theory, methods, and practice. This course enhances the TESOL Certification, but is not required for it. Cannot be repeated for credit.

English, BA with Teacher Certification in English Language Arts (Grades 4-8)

Program Description

Admission and Retention Requirements for English Certification

For admission to and retention in Teacher Education in the field of English, students must achieve and sustain a 3.0 GPA in all English coursework. To qualify to take the English TEExS examination, students must meet the following criteria:

1. Have at least a 2.5 GPA on all college coursework (lower and upper level).
2. Have completed one English TEExS Review Workshop at Texas A&M University-Corpus Christi. This workshop must be taken in the semester prior to the term the student takes the TEExS.

Students who meet the above criteria must request permission to take the TEExS certification exam via the College of Education and Human Development's TEExS Approval/Request System (TAR) at <http://tar.tamucc.edu>. The English TEExS Coordinator will approve all students who meet the above criteria. In addition, it is strongly recommended that students take a second English TEExS Review Workshop in the semester that they take the exam.

There is no difference between a Literary Studies or Writing Studies emphasis for this certification.

Students returning to the University to complete certification must see the English TEExS coordinator to identify any course deficiencies in the student's teaching field. All criteria outlined in the plan must be met before the student will be permitted to take the English TEExS.

Students seeking certification must also qualify to take the Professional Development TEExS. For information, see the College of Education and Human Development section of this catalog.

Courses
ENGL 0399 Integrated Reading and Writing
3 Semester Credit Hours (3 Lecture Hours)
A portfolio-based course with required tutoring (lab) time focused on the writing and reading processes, including strategies for invention, revision, and editing, and techniques of active reading, such as analysis, inference, summary, and evaluating texts. Students will enter ENGL 0399 through Texas Success Initiative (TSI) mandated remediation. (Not counted toward graduation)
ENGL 1301 Writing and Rhetoric I
3 Semester Credit Hours (3 Lecture Hours)
English 1301 introduces students to writing studies, rhetoric, academic research, and information literacy. Students will critically read and reflect on threshold concepts in writing studies. They will practice recursive writing and research processes for various situations. Sections will be offered both online and in person each semester.
TCCNS: ENGL 1301

ENGL 1302 Writing and Rhetoric II
3 Semester Credit Hours (3 Lecture Hours)
English 1302 builds on the foundation in writing studies, rhetoric, academic research, and information literacy introduced in ENGL 1301. Students will read, apply, and reflect on the current research and scholarship in writing studies and rhetoric. Students will practice transferring, deepening, and extending their ability to use writing into discipline-specific, workplace, and civic contexts. Sections will be offered both online and in person each semester.
Prerequisite: ENGL 1301.
TCCNS: ENGL 1302

ENGL 2303 Introduction to Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
This course will review current scholarship on writing studies, including threshold concepts, activity theory, and genre studies. It will consider various perspectives on the uses of writing to provide students with an intellectual and practical understanding of writing. This course provides a starting point for the more specific studies of writing that occur in other writing studies courses.

ENGL 2316 Literature and Culture
3 Semester Credit Hours (3 Lecture Hours)
Introduction to literatures that raise aesthetic, cultural, social, and/or political issues that affect and reflect the human condition across regions, cultures, and nations. Sample topics: Crossing Borders, The City in Literature, Islands and Islanders, Science and Fiction.
TCCNS: ENGL 2331

ENGL 2332 Literature of the Western World: From the Classics to the Renaissance
3 Semester Credit Hours (3 Lecture Hours)
Study of important literary texts from the Ancient World to the Renaissance.
TCCNS: ENGL 2332

ENGL 2333 Literature of the Western World: From the Enlightenment to the Present
3 Semester Credit Hours (3 Lecture Hours)
Study of important literary texts from the Enlightenment to the present.
TCCNS: ENGL 2333

ENGL 2360 Language and Gender
3 Semester Credit Hours (3 Lecture Hours)
In this class, we explore how language reflects, and is reflected upon, one facet of our identities: gender. We will explore the complex relationships between gender and aspects of language such as conversation, narrative, pronunciation, grammar, and pragmatic norms. We will also discuss the intersection of gender and other social factors, such as race or culture, as manifested in the language use. Students will also have an opportunity to discuss how gender is represented in the media and online, as well as how gender is situated in institutional contexts, such as home, school, work, and law. There is no prior knowledge of linguistics or social theory required for this class. Course activities include lectures, class discussions, in-class article presentation, language observations, hands-on data analysis, and a final project.

ENGL 2370 Introduction to Literary Studies
3 Semester Credit Hours
An introduction to literary analysis and scholarship for the intermediate writer. Emphasis placed on genres of literature, literary research, and expository and analytical composition. Familiarizes students with the various disciplines and related conversations within English Studies. Should be taken by sophomore-level English majors in the Literary Studies emphasis, and by Literary Studies and Creative Writing minors.
Prerequisite: ENGL 1302.

ENGL 2371 Exploring Social Media
3 Semester Credit Hours (3 Lecture Hours)
In this course we will examine and discuss current issues related to social media within a rhetorical framework. We will use different social media platforms to share and discuss in order to provide hands-on experience in these environments. Social media will be explored at the micro level as students will review their online social media presence to better understand how readers view them online. From the macro level we will identify current topics that affect the design and use of social media platforms and applications.

ENGL 3167 English as a Second/Foreign Language Tutoring
1 Semester Credit Hour
Students pursuing the Advanced TESOL Certificate will supplement ENGL 3367 (TESOL Seminar: Methods) with practical experience tutoring English learners. Students will write reflectively about those experiences. As needed, students will undergo site-specific training.
Co-requisite: ENGL 3367.

ENGL 3301 Technical and Professional Writing
3 Semester Credit Hours
A course designed to help students gain practical experience in finding and interpreting information and writing reports and documents for specialized audiences in the technical and professional world. ENGL 3301 will be held in a computer-assisted classroom.

ENGL 3302 Techniques of Creative Writing
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to the theoretical knowledge and practical experience used in creative writing. Focuses on poetry, creative nonfiction, and short fiction. For all majors.

ENGL 3310 Technical and Professional Writing for Computer Science
3 Semester Credit Hours (3 Lecture Hours)
Designed specifically for computer science majors, this course focuses on developing students ability to (1) use writing to communicate effectively with a range of audiences about technology; (2) identify, analyze, and appropriately integrate relevant information in their writing; (3) make informed judgments about their uses of writing based on ACM’s and IEEE’s code of ethics; and (4) develop their ability to function effectively individually and as members of a team to establish goals, plan tasks, meet deadlines, manage risk, and produce deliverables.

ENGL 3321 Film and Literature
3 Semester Credit Hours (3 Lecture Hours)
3 sem. hrs. Studies the connections between the formal elements of literature and of film, with emphasis on theme, narrative style, and genre. By viewing films based on literary sources, students will analyze how literature is adapted into film as well as identify strategies to view and read critically. For all majors.

ENGL 3323 Young Adult Fiction
3 Semester Credit Hours (3 Lecture Hours)
Literary study of young adult literature through analysis, discussion, and interpretation. The course emphasizes literary issues connected with society, culture, history, and genre.
ENGL 3325 Interdisciplinary Approaches to Literature
3 Semester Credit Hours (3 Lecture Hours)
In recent decades, it has become common to study literature in light of other disciplinary perspectives and to study other disciplines as they are depicted in literature. From these interdisciplinary approaches has emerged a distinct mode of analysis that examines texts within their broader social and cultural milieu. In this course students will earn to use cross-disciplinary methods to interpret literature and culture. Topics will vary, but may include Religion, Medicine, and American Literature, Disability Narratives in the Eighteenth Century, Trauma and the City in Twentieth-Century Literature.

ENGL 3330 Current Events and Literature
3 Semester Credit Hours (3 Lecture Hours)
This course examines literature in the context of current issues and events. Students will place literature in conversation with social, political, and cultural trends as a means of engaging with and understanding these trends and the debates associated with them. Using reading, writing, and discussion as modes of critical inquiry, students will discover the critical role that literature plays in representing, responding to, and shaping current events.

ENGL 3339 Introduction to Linguistics
3 Semester Credit Hours (3 Lecture Hours)
Introductory survey course covering phonetics, morphology, syntax, semantics, sociolinguistics, neurolinguistics, and language acquisition.

ENGL 3340 Grammar
3 Semester Credit Hours (3 Lecture Hours)
Presents a general descriptive overview of English grammar and provides a structural framework for analyzing English sentences.

ENGL 3341 British Literature before 1800
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of poetry, drama, and prose before 1800 with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 2303).
* May be taken concurrently.

ENGL 3345 British Literature since 1800
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of British poetry, drama, and prose since 1800 with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370) or (ENGL 3303) or (ENGL 2303).
* May be taken concurrently.

ENGL 3348 Drama
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of dramatic literature, using a wide range of texts. Variable content.

ENGL 3349 Poetry
3 Semester Credit Hours (3 Lecture Hours)
A genre-oriented study of poetry using a wide range of texts. Variable content.

ENGL 3354 American Literatures before 1900
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of American poetry, drama, and prose from the country's pre-European beginnings to 1900 with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370) or (ENGL 2303) or (ENGL 3303).
* May be taken concurrently.

ENGL 3355 American Literatures since 1900
3 Semester Credit Hours (3 Lecture Hours)
Study of significant works of American poetry, drama, and prose from 1900 to the present with emphasis on historical context and the exploration of literary and cultural values through written texts.
Prerequisite: (ENGL 2370) or (ENGL 2303) or (ENGL 3303).
* May be taken concurrently.

ENGL 3360 Current Approaches to Composition and Literature
3 Semester Credit Hours (3 Lecture Hours)
Prepares prospective teachers to create developmentally appropriate learning environments and tasks that enable student success in writing and the study of literature in Language Arts and English courses. Prepares students to meet the increased writing and reading expectations in all subject areas, including their own writing.

ENGL 3361 Strategies and Genres of Advanced Writing
3 Semester Credit Hours (3 Lecture Hours)
Students will practice-writing in situated contexts (such as their majors, careers, and/or other professional interests) and across genres to develop more advanced and reflective writing strategies. By studying theories of writing; engaging in writing as a craft; and drafting, revising, and editing texts; students will refine and become more reflective in their writing processes.

ENGL 3362 Creative Writing Workshop: Survey and Practice of Genres
3 Semester Credit Hours (3 Lecture Hours)
Develops students' skills as critics and writers of fiction, poetry, and creative nonfiction in a workshop setting. For all majors.

ENGL 3363 Foundations of Rhetoric
3 Semester Credit Hours (3 Lecture Hours)
This course will study the historical and theoretical development of rhetoric through the works of principal thinkers. Students will analyze rhetorical concepts in their relation to civic, cultural, political, and pedagogical developments and the construction of knowledge and will use rhetorical concepts to produce logical, ethical, and moral arguments.

ENGL 3364 Strategies of Writing Creative Nonfiction
3 Semester Credit Hours (3 Lecture Hours)
Explores the uses of creative nonfiction through reading and writing about published works of experienced writers and scholars in the field and practicing a variety of creative nonfiction techniques and genres (e.g. literary journalism, memoir, and the personal narrative).

ENGL 3365 Second Language Acquisition
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to second language acquisition. The course is designed to be accessible to students from a wide variety of backgrounds and no basic knowledge of the linguistic structure of English will be assumed. This course will address issues related to how second language is learned by both children and adults.

ENGL 3366 Language in Society
3 Semester Credit Hours (3 Lecture Hours)
An introduction to the study of language as a function of several societal variables. Introduces basic concepts of language such as linguistic varieties, dialect, speech communities, and linguistic attitudes.
ENGL 3367  TESOL Seminar
3 Semester Credit Hours (3 Lecture Hours)
This course presents an introduction to and a critique of current and traditional methodologies of teaching English to speakers of other languages, with emphasis on aural comprehension; speaking, reading, and writing skills; testing and assessment; and linguistic-cultural differences. This course is open to all majors, but is required for students seeking the Certificate in TESOL.
Prerequisite: ENGL 3365.

ENGL 3369  Topics in Linguistics
3 Semester Credit Hours (3 Lecture Hours)
Exploration of topics such as second language acquisition, language assessment, history of English, and contrastive analysis. May be repeated when topics vary.

ENGL 3378  Document Design and Publishing
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the integration of text and visual rhetoric, such as graphics, for all kinds of professional publications including technical documents, media, public relations pieces, and advertisements.

ENGL 3379  Writing for the Web
3 Semester Credit Hours (3 Lecture Hours)
Emphasizes practical concepts related to writing and communication on the internet and the World Wide Web. Attention is given to finding and analyzing information; analyzing and designing WWW sites and other digital, hypertextual environments; and analyzing and composing hypertext-hypermedia materials for digital, networked environments. For all majors.

ENGL 3380  Visual Rhetoric
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the analysis, design, and production of visual representations and multi-modal texts that integrate visual elements.

ENGL 4123  Nonprofit Writing Project
1 Semester Credit Hour
Students will gain practical experience with a nonprofit agency by developing a significant project that meets an agency identified need. Students should take this course in the last semester of their nonprofit certificate program in conjunction with one of the following: ENGL 3378, ENGL 3379, ENGL 4322, or ENGL 4321. The students’ professor in the regular course will be the instructor of record for the projects course.

ENGL 4300  Technologies and Cultures of the Book
3 Semester Credit Hours (3 Lecture Hours)
Working with a range of print media, students will learn to analyze the interplay between the text’s content and its formal features. Students will build the skills to think and write analytically about the materiality of texts.

ENGL 4305  Major Authors
3 Semester Credit Hours (3 Lecture Hours)
This course studies the significant works of a major literary author. Texts are viewed through a variety of critical perspectives and placed in the context of the writer’s life and of the society, culture, and history of the times. May be repeated once for credit when authors vary.

ENGL 4320  Professional Writing Workshop
3 Semester Credit Hours (3 Lecture Hours)
This course is tailored for individual students’ writing and publishing projects in their disciplines.

ENGL 4321  Grants and Proposals
3 Semester Credit Hours (3 Lecture Hours)
This course will teach students the grant proposal writing process, including identifying sources of funding, conducting research to support funding applications, and tailoring each proposal to a specific funding agency. Students will receive experience writing actual proposals on behalf of local organizations and agencies.

ENGL 4322  Writing in the Nonprofit Agencies
3 Semester Credit Hours (3 Lecture Hours)
Focuses on the specific kinds writing of professionals in the nonprofit world do, including internal communication in an agency, writing for the public, document creation, fund raising, board relations, and other relevant topics.

ENGL 4324  Editing & Style
3 Semester Credit Hours (3 Lecture Hours)
Practice in methods, tools, and principles of editing for nonfiction and technical publications. Emphasis on a rhetorical understanding of levels of editing, managing the editorial process, and grammar and style.

ENGL 4325  Writing Across Cultures and Contexts
3 Semester Credit Hours (3 Lecture Hours)
Through writing, students will study how groups perceive, understand, and communicate with and about each other. The course may focus on a specific type of writing (cross cultural expository writing, travel writing, cross cultural writing in industry), or on the linguistic and rhetorical practices of a cross-cultural community (latino/a rhetoric, African-American rhetorics, etc).

ENGL 4335  Creative Writing Studio: Development of Craft
3 Semester Credit Hours (3 Lecture Hours)
Develops students’ skills as critics and writers of fiction, poetry, and creative nonfiction in a studio setting. Guides students to focus on a major project in one genre with sustained practice of techniques and revision. Open to students of all levels, from the novice to the advanced. For all majors.

ENGL 4340  The Novel
3 Semester Credit Hours (3 Lecture Hours)

ENGL 4345  Rhetorics, Literacies, and Writing
3 Semester Credit Hours (3 Lecture Hours)
This course examines the history and major theories of rhetoric, literacy, and composition, and explores how they influence contemporary cultural productions.

ENGL 4350  Studies in Poetics: Theory, Form, and Practice
3 Semester Credit Hours (3 Lecture Hours)
Develops students’ theoretical knowledge of poetics and practical experience of writing in traditional forms, from the Anglo-American tradition to the culturally diverse movements and innovation of form. Focusing on works written by poets about poetry and poetics primarily from the 19th to the 21st centuries. For all majors.

ENGL 4351  Senior Capstone: Literature and Writing
3 Semester Credit Hours (3 Lecture Hours)
A study of literature in English for graduating seniors in the Literary Studies Emphasis. Emphasis is placed on genre, research, and analytical expository writing.
Prerequisite: ENGL 2370, 3303 or 2303.
ENGL 4352 Capstone in Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
This course is the culminating experience for the Writing Studies emphasis in English. Students review, reflect on, integrate, and apply their learning from previous courses and experiences. Students create digital portfolios for career and publishing opportunities, emphasizing selection, revision, reflection, and presentation. In addition, students identify, evaluate, and annotate texts and resources to include in a curated digital collection/publication that will be available for students in future Writing Studies courses.

ENGL 4360 Gender, Sexuality and Literature
3 Semester Credit Hours (3 Lecture Hours)
This course introduces students to literature that explores issues of gender and sexuality. It focuses on relevant literary periods and conventions, as well as on the historical, social, and cultural contexts of artistic productions. Sample topics: women’s literature, queer literature, literature and masculinity.

ENGL 4361 Race and Ethnicity in Literature
3 Semester Credit Hours (3 Lecture Hours)
Topics focus on a variety of cross-cultural issues in historical and/or contemporary texts by Caribbean, British Indian, Native American, African American, Chicano/a, and/or other underrepresented authors.

ENGL 4362 Texts and Contexts
3 Semester Credit Hours (3 Lecture Hours)
Study of literary and cultural texts that raise issues of community and social relations, diversity, multiculturalism, and/or globalization. Sample topics: Medicine and Religion in American Literature, Traveling Histories, the Global City, and Literary Regionalism in Transnational Context. May be repeated once for credit when topics vary.

ENGL 4370 Oral Interpretation of Children's Literature
3 Semester Credit Hours (3 Lecture Hours)
A study, primarily through the medium of performance, of various types and forms of literature for children. Strongly oriented toward teaching literature in the elementary school classroom. (Credit may not be given for both this course or THEA 4323.)

ENGL 4380 Critical Approaches to Literature and Culture
3 Semester Credit Hours (3 Lecture Hours)
A study of selected perspectives and critical approaches to literature and culture, including an examination of some of the theoretical assumptions upon which they are based, as well as their implications for the way we think about literature, human identity, and the power of language.
Prerequisite: ENGL 2370.

ENGL 4385 Studies in Creative Writing
3 Semester Credit Hours (3 Lecture Hours)
Students will focus on the craft of a specific genre or type of writing through reading experts’ advice, reading and analyzing examples written by practitioners, and engaging in peer-response workshops with classmates. Attention will be paid to publication opportunities available for writers in that genre.

ENGL 4390 Topics in Literary Studies
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary—see S.A.I.L. or advisor for further information.

ENGL 4391 Topics in Writing Studies
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary—see S.A.I.L. or advisor for further information.

Courses

HIST 1301  U.S. History to 1865
3 Semester Credit Hours (3 Lecture Hours)
A survey of the political, social, economic, military, cultural and intellectual history of the United States from 1492 to 1865.
TCCNS: HIST 1301

HIST 1302  U.S. History Since 1865
3 Semester Credit Hours (3 Lecture Hours)
A survey of the political, social, economic, military, cultural and intellectual history of the United States from 1865 to the present.
TCCNS: HIST 1302

HIST 2301  Texas History
3 Semester Credit Hours (3 Lecture Hours)
Spanish colonial period, Mexican statehood, independence, the development of the Republic, annexation and growth as a state.
TCCNS: HIST 2301

HIST 2311  Western Civilization I
3 Semester Credit Hours (3 Lecture Hours)
Survey of the cultures and civilizations of the Ancient Mediterranean world and the political, social, economic, military, cultural, and intellectual influences shaping the emergence and development of Europe to 1500.
TCCNS: HIST 2311

HIST 2312  Western Civilization II
3 Semester Credit Hours (3 Lecture Hours)
A survey of the political, social, economic, military, cultural, and intellectual development of Europe from 1500 to the present.
TCCNS: HIST 2312

HIST 2322  World History Since 1500
3 Semester Credit Hours (3 Lecture Hours)
examines major global issues over the past 500 years. Topics may include European expansion and colonialism, the integration of the Americans into world economic systems, changes in science and technology, decolonization, and modern environmental problems. This course will help students understand historical events within a global framework.

HIST 3301  History of World Religions
3 Semester Credit Hours (3 Lecture Hours)
Surveys the key beliefs, practices, rituals, figures, and historical developments of the world’s major religious traditions, including Hinduism, Buddhism, Confucianism, Judaism, Christianity, Islam, and New Age religions. Gives particular attention to their encounter with modernity and their complicated place in today’s global, diverse, post-modern world.

HIST 3303  Colonial Latin America
3 Semester Credit Hours (3 Lecture Hours)
An overview of Latin American history from pre-Columbian times until Independence.

HIST 3304  Modern Latin America
3 Semester Credit Hours (3 Lecture Hours)
A study of the major political, economic and cultural processes that marked the development of modern Latin America.

HIST 3307  The Ancient World
3 Semester Credit Hours (3 Lecture Hours)
This course examines the ancient history of the human race. It begins with the evolution of Homo sapiens in Africa and continues through approximately the 4th century CE. Topics examined include the formation of cultures, societies, states, and empires around the world including those in Egypt, Southwest Asia, India, China, and the Mediterranean.

HIST 3315  Europe 1750-1815
3 Semester Credit Hours (3 Lecture Hours)
Explores the processes which contributes to the establishment of a new political, economic, and social order in Europe. The course includes an in-depth focus upon the causes and consequences of the French Revolution as well as an examination of the European response to Napoleon.

HIST 3316  Colonial North America
3 Semester Credit Hours (3 Lecture Hours)
Covers early North American history from pre-contact through 1763, with a focus on the territory that would eventually become the United States. Examines the varieties of colonial worlds created by Europeans and native peoples, the nature and impact of European colonization, the development of slave societies, the emergence of regional economies and modern culture, the consolidation of European empires in the early and mid-18th century, and the imperial wars that finally set the stage for the coming of the American Revolution.

HIST 3317  Europe 1815-1914
3 Semester Credit Hours (3 Lecture Hours)
The evolution of European industrial society from the Congress of Vienna to the outbreak of World War I. Themes include changes in the nature of work and family life, urbanization, and the emergence and growth of liberalism, socialism, nationalism, and romanticism as competing ideologies.

HIST 3318  The American Revolution
3 Semester Credit Hours (3 Lecture Hours)
Covers the history of the American Revolution from the end of the Seven Years’ War in 1763 to the ratification on the new federal constitution in 1789. Covers the political and social history of the independence movement, the Declaration of Independence, the military, social, and indigenous history of the Revolutionary War, and the making of the Constitution.

HIST 3319  Europe 1914 to the Present
3 Semester Credit Hours (3 Lecture Hours)
Political, social, economic and cultural developments since 1914: includes the impact of World War I, the Russian Revolution, Fascism, the origins of the Cold War, the tension between European unification and growing ethnic tensions and the dissolution of the Soviet empire.

HIST 3320  Colonial and Revolutionary U.S.
3 Semester Credit Hours (3 Lecture Hours)
Traces regional economic, social, and political change in the Americas from 1607 to the end of the Revolution.

HIST 3321  The Early American Republic
3 Semester Credit Hours (3 Lecture Hours)
This course examines American history from the end of the revolutionary war to 1850. Political, economic, and social issues including, but not limited to, the creation of the Constitution, the development of the first and second party systems, the market revolution, antebellum reform, the Old South, and westward expansion.
HIST 3323  Civil War and Reconstruction
3 Semester Credit Hours (3 Lecture Hours)
Background and causes of the Civil War, military, political, diplomatic, and
economic developments during the War, Reconstruction and post-war
adjustments.

HIST 3324  U.S. Gilded Age and Progressive Era
3 Semester Credit Hours (3 Lecture Hours)
An examination of the dramatic period when the United States definitively
settled the remaining portions of the continent and decisively moved
towards becoming an industrial, urban nation with world-wide economic
and political influence.

HIST 3325  Emergence of Modern U.S.
3 Semester Credit Hours (3 Lecture Hours)
Study of American life from World War I through World War II. Topics
include America’s rise to a world power, the social, cultural, and political
effects of corporate enterprise, urbanization, and immigration, women’s
suffrage, the Twenties, and the New Deal.

HIST 3326  U.S. Since 2nd World War
3 Semester Credit Hours (3 Lecture Hours)
A study of American life and development as a world power since World
War II.

HIST 3335  The U.S. Urban Experience
3 Semester Credit Hours (3 Lecture Hours)
A general survey of the social, cultural, and political history of the
American city, with particular emphasis on Corpus Christi and the ways
our city illustrates these larger trends.

HIST 3340  Modern Asia
3 Semester Credit Hours (3 Lecture Hours)
This course will examine Asia from 1600 to the present. Topics include
politics, the nation state, colonialism, empire, war, nationalism, the Cold
War and revolution, all in a historical context.

HIST 3345  America by Nature
3 Semester Credit Hours (3 Lecture Hours)
Examines the role of nature in the nation’s past, looking beyond more
traditional historical topics to discover how the environment has shaped
society and the ways in which humans, in turn, have shaped nature
throughout American history. Community-engaged learning component.

HIST 3350  Dictators and Dirty Wars in Latin America
3 Semester Credit Hours (3 Lecture Hours)
Explores the rise of dictatorships and military regimes in twentieth
century Latin America. Focuses on human rights struggles and popular
movements in Mexico, Central America and the Southern Cone.

HIST 3360  Introduction to Museum Studies
3 Semester Credit Hours (1.5 Lecture Hours)
In this cross-disciplinary class, students of history, sciences, the arts, and
more will be introduced to the different departments of a museum and
gain experience in programming, exhibits, research, public engagement,
and other various aspects of museum management through their
participation in a real working museum (Corpus Christi Museum of
Science and History).

HIST 3370  Introduction to Public History
3 Semester Credit Hours (3 Lecture Hours)
A project-centered class that examines public history practices and
debates, including the changing field over time, the relationship between
history and memory, and the interpretive and sometimes controversial
nature of historical sites and exhibits. Students will also learn methods
and practices of museums, archives, oral history, digital history, and more.
Includes community-engaged learning, workshops, local field trips.

HIST 3373  Oral History and Podcasting
3 Semester Credit Hours (3 Lecture Hours)
A project-based course designed to teach students oral history, audio
recording, and editing. Topics include oral history theory and methods,
the role of testimony and memory in constructing historical narratives,
interview techniques, archival practices, and the technical aspects of
audio production, audio storytelling, and podcasting.

HIST 3385  The Art and Practice of History
3 Semester Credit Hours (3 Lecture Hours)
Introduces students to the most significant historiographical problems
that face historians, focusing on recent and current controversies that
have shaken the profession and been the subject of public and political
debate. Provides examples of how historians think about and do history.
Prerequisite: (HIST 1301, 1302 and 2311) or (HIST 2312).

HIST 4320  U.S. Cultural Experience
3 Semester Credit Hours (3 Lecture Hours)
Explores ways that the myriad groups who have made up American
society from the colonial period to the “information age” understood
and expressed themselves and related to each other. (The chronological
scope of this course may vary.)

HIST 4327  U.S. Modern Popular Culture
3 Semester Credit Hours (3 Lecture Hours)
The historical development of modern popular culture—including
television, movies, fiction, newspapers, music and consumption—and its
effect on the structure and experience of U.S. society and work from the
nineteenth century to the present.

HIST 4335  The Military and United States History
3 Semester Credit Hours (3 Lecture Hours)
The development of U.S. military strategy and policy from the Colonial
Wars through Vietnam.

HIST 4336  Mexican American History
3 Semester Credit Hours (3 Lecture Hours)
Spanish and Mesoamerican backgrounds, conquest and mestizaje,
settlement of Aztlán, interaction with Anglo-Americans, 20th century
immigration, urbanization, identity, the Chicano Movement, and Mexican
American organizational/political development.

HIST 4337  United States Women's History
3 Semester Credit Hours (3 Lecture Hours)
The history of women’s role in the work force and public life.

HIST 4340  European Women's History
3 Semester Credit Hours (3 Lecture Hours)
Study of the experiences of European women from the 18th to the
20th centuries. Also addresses the role that gender has played in the
development of modern European societies. Some topics covered are
women and the French Revolution, gender and class in industrial Europe,
feminism and suffrage, and women and fashion.

HIST 4342  The Holocaust
3 Semester Credit Hours (3 Lecture Hours)
Examines the Holocaust by exploring the role of racism and anti-
Semitism, the rise of Nazi policies, Jewish responses and resistance to
them, deportation and genocide, the role of war, and the aftermath and
memory of an event “beyond human imagination.”
HIST 4345  European Thought and Culture, 1750-present
3 Semester Credit Hours (3 Lecture Hours)
Survey of the major European intellectual and cultural movements from the Enlightenment to the present. Broader than a traditional course in intellectual history, special attention will be given to the emergence and development of the concepts of "modernity" and the challenges of "postmodernity."

HIST 4346  The Search for Modern China: From 1600 to the Present
3 Semester Credit Hours (3 Lecture Hours)
This course surveys modern Chinese history from the late Ming dynasty to the present, with an emphasis on the late 19th and 20th centuries. Topics include empire, colonialism, nationalism, the nation state, modernization, revolution and the Cold War, all in a historical context.

HIST 4347  The History of Sexuality in the West
3 Semester Credit Hours
This course will examine how ideas about sexuality as well as sexual practices and identities have evolved over time and in different places; how the categories of homosexuality and heterosexuality were created and how they have been perceived. The course will focus on the 19th and 20th centuries in Europe and the United States, and address the themes of gender, body, race, class, image, representation, and the law.

HIST 4349  Transnational Histories of Asia and the Pacific
3 Semester Credit Hours (3 Lecture Hours)
Explores the transnational relations of Asia and the Pacific with the West from the 19th century to the present day. Themes include colonialism and imperialism, diaspora and migration, labor and economy, war and displacement. Topics include the Opium Wars, Immigration and Exclusion, Atomic Bombing of Hiroshima, Military War Brides, Third World Radicalism, Transnational Adoption Complex, and Environmentalism and Globalization.

HIST 4350  Narratives of World War II in the Pacific
3 Semester Credit Hours (3 Lecture Hours)
Examines how the relations between history, memory, and contemporary politics in post-WWII U.S. and Asia-Pacific have shaped the meaning of various contentious issues related to the Pacific War-such as war origins and responsibility, atrocities, racism, reparations, and nationalism-in textbooks, monuments, literature, art, films, political debates, exhibits, commemorative events, and scholarly works in different social and temporal contexts.

HIST 4352  Mexican American Women's History
3 Semester Credit Hours (3 Lecture Hours)
Examines the broad political, economic, social, and cultural trends in the lives of Mexican American women since 1848.

HIST 4374  Mexico: the National Period
3 Semester Credit Hours (3 Lecture Hours)
Traces economic, social, and political change in Mexico from independence to the present.

HIST 4375  Cold War Kids: Youth in Modern Latin America
3 Semester Credit Hours (3 Lecture Hours)
An examination of the experiences of Latin American youth in modern Latin America. Special emphasis on the role of young people in the revolutions and rebellions that marked the Cold War period.

HIST 4376  Directed Individual Study
1-3 Semester Credit Hours
See College description.

HIST 4377  Internship
3 Semester Credit Hours
See College description.

HIST 4378  Historical Research and Writing
3 Semester Credit Hours (3 Lecture Hours)
The study and writing of history, with emphasis on historical analysis, research, and writing. Designed as the capstone course for history majors and prospective social science teachers. This course will feature a senior research paper, and should be taken during the student's final year of undergraduate study.
Prerequisite: HIST 3385 or READ 3353.

HIST 4379  Topics in History
3 Semester Credit Hours (3 Lecture Hours)
Study of significant periods, countries, regions, or themes in history. May be repeated when topics vary.

HIST 4380  The Search for Modern China: From 1600 to the Present
3 Semester Credit Hours (3 Lecture Hours)
Survey of modern Chinese history from the late Ming dynasty to the present, with an emphasis on the late 19th and 20th centuries. Topics include empire, colonialism, nationalism, the nation state, modernization, revolution and the Cold War, all in a historical context.

Spanish, Teaching Certification EC-12
Admission and Retention Requirements for Spanish Certification

For admission to and retention in Teacher Education in the field of Spanish, students must achieve and sustain a 2.75 GPA in all Spanish coursework. To qualify to take the Spanish (All Level) TExES examination (LOTE-613), students must meet the following criteria:

1. Have at least a 2.5 GPA on all college coursework (lower and upper level).
2. Have a 2.75 GPA on all Spanish coursework (lower and upper level).
3. Have completed one Spanish TExES Review Workshop. This workshop must be taken in the semester prior to the term the student takes the TExES.
4. Provide official permit with approval of Spanish certification coordinator or designee.

Students returning to the University to complete certification must see the Spanish certification coordinator to receive a deficiency plan. All criteria outlined in the plan must be met before the student will be permitted to take the Spanish TExES.

For further information on required professional development courses, the Professional Development TExES (PPR-160), and other Teacher Certification requirements, please see the College of Education and Human Development section of this catalog. Students should also consult the Certification Office of the College of Education and Human Development for complete and current information about Teacher Certification requirements.
Students seeking Teacher Certification in Spanish must take a minimum of 36 semester hours in Spanish, at least 30 of which must be at the upper-division level.

Courses

SPAN 1100  Introduction to Service Learning 1 Semester Credit Hour
This is a one-credit course in which students in Spanish 1311 or 1312 may enroll and participate. This service learning course aims to promote collaborative learning between college students learning Spanish and people in the community. Available upon application. Repeatable up to 2 hours.

SPAN 1311  Spanish I 3 Semester Credit Hours (3 Lecture Hours)
Introduction to listening, speaking, reading and writing skills within a Spanish cultural framework. For students without previous knowledge of the language. (Language laboratory required. One hour per week.) *A lab fee is required for these courses.

SPAN 1312  Spanish II 3 Semester Credit Hours (3 Lecture Hours)
Continued practice in listening, speaking, reading and writing skills within a Spanish cultural framework. (Language laboratory required. One hour per week.) A lab fee is required for these courses.
Prerequisite: (SPAN 1311).

SPAN 2311  Spanish III 3 Semester Credit Hours (3 Lecture Hours)
Study of more complex Spanish sentence structure to further listening, speaking, reading and writing skills at an intermediate level within a Spanish cultural framework.
Prerequisite: SPAN 1312.
TCCNS: SPAN 2311

SPAN 2312  Continuing Spanish 3 Semester Credit Hours (3 Lecture Hours)
Continued development and review of all language skills at an intermediate level within a Spanish framework with an emphasis in the linguistic and cultural perspective.
Prerequisite: SPAN 2311.
TCCNS: SPAN 2312

SPAN 2313  Spanish for Heritage Speakers 3 Semester Credit Hours (3 Lecture Hours)
An introductory course designed for bilingual students who wish to enhance their linguistic skills (speaking, listening, reading and writing). This course will focus on the cultural and historical aspects related to the heritage Spanish speaker.
TCCNS: SPAN 2313

SPAN 2315  Language and Culture for Heritage Learners 3 Semester Credit Hours (3 Lecture Hours)
This course is designed to guide Spanish heritage language learners, as well as advanced learners of Spanish, in the development of their oral proficiency, written communication, and grammatical accuracy while exploring different cultural aspects from the Spanish-speaking world. It is highly recommended for students who have taken SPAN 2313 and/or who are transitioning into upper-division Spanish courses.
Prerequisite: SPAN 2313.
SPAN 3302  Spanish Composition
3 Semester Credit Hours (3 Lecture Hours)
A course designed to develop analytical perspectives in literary criticism and to strengthen reading and writing skills in Spanish through intensive reading of Spanish, Spanish American, and Chicano fiction.
Prerequisite: SPAN 2312.

SPAN 3303  Spanish Conversation
3 Semester Credit Hours (3 Lecture Hours)
A course designed to strengthen the student's oral proficiency in the language through selected readings, videos and oral presentations.
Prerequisite: SPAN 2312.

SPAN 3304  Spanish Civilization
3 Semester Credit Hours (3 Lecture Hours)
This course has been designed to provide a general overview of the cultural, linguistic, and historical experience of the Spanish people within its larger European context. Conducted in Spanish unless otherwise stated. This course may be used to satisfy the university core curriculum requirement in Language, Philosophy, and Culture.
Prerequisite: SPAN 2312.

SPAN 3305  Latin American Civilization
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to provide a general overview of the cultural, linguistic, and historical experience of Latin American people before and after Columbus. Conducted in Spanish unless otherwise stated. This course may be used to satisfy the university core curriculum in Language, Philosophy, and Culture.
Prerequisite: SPAN 2312.

SPAN 3307  Spanish Literature I
3 Semester Credit Hours (3 Lecture Hours)
A critical approach to the study of early Spanish literature from the Middle Ages through the Eighteenth Century. Literary selections include masterpieces that establish and reflect Spain's literary tradition within its larger European context.

SPAN 3308  Spanish Literature II
3 Semester Credit Hours (3 Lecture Hours)
A continuation of a critical approach to the study of Spanish literature from the Nineteenth Century through the present. Representative works of Spanish Romanticism, Realism, Naturalism, and contemporary literature are studied within their larger European context.

SPAN 3309  Spanish American Literature I
3 Semester Credit Hours (3 Lecture Hours)
A critical approach to the study of early Spanish American literature from the Pre-Columbian Period through the Nineteenth Century. Selected readings in all literary genres, major themes, writers, and early literary movements will be studied within their larger Latin American context.

SPAN 3310  Spanish American Literature II
3 Semester Credit Hours (3 Lecture Hours)
A continuation of a critical approach to the study of Spanish American literature from the Twentieth Century through the present. Representative works of Latin American writers and literary movements: Modernism, Realism, Avant-Garde, Regionalism, Magic-Realism are studied within their larger Latin American context.

SPAN 3311  Spanish Phonetics
3 Semester Credit Hours (3 Lecture Hours)
A course designed to study the production and discrimination of the Spanish sound system with a general overview of the geographical and social distribution of phonemic and allophonic variants.

SPAN 3312  Spanish Grammar
3 Semester Credit Hours (3 Lecture Hours)
The course will serve to expand vocabulary, further develop writing skills; understand, apply, and use Spanish grammatical structures, and communicate more accurately in written and oral Spanish within a Hispanic cultural context.

SPAN 3313  Introduction to Translation
3 Semester Credit Hours (3 Lecture Hours)
This course is an introduction to the theory, methods and practice of English to Spanish and Spanish to English translation of general texts from different fields. Challenges related to culture and language, as well as professional ethics will be examined.

SPAN 3315  Civilizations of the Spanish-Speaking World
3 Semester Credit Hours (3 Lecture Hours)
This course has been designed to provide a general overview of the historical, sociocultural and political experience of peoples from the Spanish-Speaking world, both from Spain and Spanish America.
Prerequisite: SPAN 2312.

SPAN 3316  Spanish for the Professions
3 Semester Credit Hours (3 Lecture Hours)
The course stresses Health, Business and Legal terminology in Spanish to enhance communication skills and cultural knowledge that will help to serve the South Texas Spanish speaking population as well as to conduct interactions with Spanish speakers and/or businesses through the United States and the world.

SPAN 3317  Introduction to Hispanic Linguistics
3 Semester Credit Hours (3 Lecture Hours)
This course introduces the study of language, the main subfields of Hispanic linguistics, and their application to other sciences.

SPAN 3320  Introduction to Spanish Literature
3 Semester Credit Hours (3 Lecture Hours)
A critical approach to the study of Spanish literature from the Middle Ages through the present. Representative works of Spanish literature are studied within their larger European context. It is highly recommended that students take any of the following before taking this course: SPAN 2313, 2315, 3302, 3303 have advanced proficiency or faculty permit. Conducted in Spanish, unless otherwise stated. This course may be used to satisfy the University Core Curriculum requirement in Language, Philosophy, and Culture.

SPAN 3325  Introduction to Latin American Literature
3 Semester Credit Hours (3 Lecture Hours)
A critical approach to the study of Latin American literature from the Pre-Columbian Period through the present. Selected readings in all literary genres, major themes, writers, and literary movements will be studied with a wide Latin American context. It is highly recommended that students take any of the following before taking this course: SPAN 2313, 2315, 3302, 3303 have advanced proficiency or faculty permit. Conducted in Spanish, unless otherwise stated. This course may be used to satisfy the University Core Curriculum requirement in Language, Philosophy, and Culture.

SPAN 4100  Service Learning
1 Semester Credit Hour
This is a one-credit course designed specifically for students who are preparing themselves to serve the community using their Spanish language skills. Students in this course will familiarize themselves with the methodology of a particular field (heritage language teaching, translation, interpreting, etc) to be able to interact and serve Spanish-speaking individuals in the community. Available upon application. Repeatable up to 3 hours.
SPAN 4301 Spanish Civil War and Literature
3 Semester Credit Hours (3 Lecture Hours)
Significance of the Civil War for Spanish, European, and world history. Effect of war on literary and cultural life of the country and the response of writers from Spain and Latin America. Conducted in Spanish.

SPAN 4302 Mexican Narrative
3 Semester Credit Hours (3 Lecture Hours)
Examination of representative novels and short stories reflecting the emergence of a post-revolutionary society in Mexico. Conducted in Spanish.

SPAN 4303 Spanish in the Southwest
3 Semester Credit Hours (3 Lecture Hours)
Cultural and linguistic dimensions of Spanish dialects of the Southwestern United States, with special attention to Texas Spanish and its sociolinguistic perspectives in the bilingual community at large. Prerequisite: SPAN 2312.

SPAN 4304 Miguel de Cervantes' Don Quijote
3 Semester Credit Hours (3 Lecture Hours)
An advanced course designed to provide an introduction to Miguel de Cervantes' Don Quijote.

SPAN 4305 Latin American Novel
3 Semester Credit Hours (3 Lecture Hours)
This course explores major novels from Latin America from the 20th century to the present. It examines the different problems, discourses, voices, contexts, and geographies that define this genre in Latin America.

SPAN 4306 Modern Spanish Literature
3 Semester Credit Hours (3 Lecture Hours)
A course that focuses on modern Spanish literature. It is highly recommended that students take any of the following before taking this course: SPAN 2313, 2315, 3302, 3303, have advanced proficiency or faculty permit. Conducted in Spanish, unless otherwise stated.

SPAN 4313 Spanish Interpretation
3 Semester Credit Hours (3 Lecture Hours)
This course presents an introduction to methodologies, requirements, terminology, and practice of interpretation, with emphasis on simultaneous, consecutive, and sight interpretation.

SPAN 4320 Spanish in the Americas
3 Semester Credit Hours (3 Lecture Hours)
A study of the Spanish that was brought to the Americas, its development, propagation and contact with native-American languages, including the sociocultural factors that have contributed to the linguistic variation in contemporary Spanish-speaking societies.

SPAN 4322 Medical, Scientific and Technical Translation
3 Semester Credit Hours (3 Lecture Hours)
An advanced course in translation concentrating on medical, scientific and technical translation. The course is designed to extend student’s knowledge of translation theory and consolidate their skills in specialized translation. Prerequisite: (SPAN 3313).

SPAN 4327 Methods in Foreign Language Instruction
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to study the current methods in foreign languages, their application in maximizing language proficiency, and the role of the students’ culture and language during the learning process.

SPAN 4390 Topics in Spanish
3 Semester Credit Hours (3 Lecture Hours)
Study of specialized topics in language or literature. These courses may also be designed to develop terminology and overall Spanish proficiency regarding specific professions: Business, Medical, Criminal Justice, Sociology, etc. May be repeated when topics vary.

SPAN 4396 Directed Individual Study
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description.

SPAN 4398 Applied Experience
3 Semester Credit Hours
A practical work experience related to the Spanish area and related careers. It is intended to provide an opportunity for a student to gain first-hand experience in an unfamiliar field. Consequently, Applied Experience credit may not be granted for a student’s regular work assignment or for previous work experience. Registration is by application. The application must include a clearly written description of the duties and responsibilities involved in the Applied Experience project, and be signed by the student, the on-site supervisor, and the faculty supervisor. Completed applications must be received in the Dean’s Office by the last class day of the semester preceding intended registration. This course is graded “credit” or “no credit.” No more than three semester hours of Applied Experience credit may be counted toward the baccalaureate degree. Undergraduate Applied Experience course will include no less than one hundred hours and no more than 150 hours of work experience per semester.

SPAN 4421 Business, Commercial, and Legal Translation
4 Semester Credit Hours (4 Lecture Hours)
An advanced course in translation concentrating on business, commercial and legal texts. The course is designed to extend student’s knowledge of translation theory and consolidate their skills in specialized translation. Prerequisite: (SPAN 3313).

Certification Programs - School of Arts, Media & Communication

• Art, BFA with Teacher Certification (p. 354)
• Music, BM with EC-12 Teacher Certification (p. 360)
• Theatre Arts, Teacher Certification (p. 370)

Art, BFA with Teacher Certification
Program Description
The curriculum for the Bachelor of Fine Arts degree leading to teacher certification is also designed to provide professional development at the undergraduate level for the prospective teacher in the visual arts, through in-depth study in studio art. The degree requires a minimum of 60 semester hours in art, at least 30 of which must be in upper-division coursework.

Admission to the BFA leading to teacher certification is by special application. Such application can be made upon completion of 30 semester hours of Art coursework, and must be made before completion of 48 semester hours of Art coursework. A portfolio consisting of ten to fifteen works representing a variety of media must be submitted in addition to the application form. Copies of specific admission policies and instructions for submitting an application to the program are available from the Department of Art website (https://cla.tamucc.edu/
The purposes of the art curriculum are:

1. To provide a general program that allows students access to a variety of art media, studio techniques, and instruction;
2. To provide students with opportunities to study past and present forms of art and to understand the function of art in society;
3. To provide courses that will help expand the knowledge and interest of non-majors in the area of art; and
4. To contribute to the cultural life of the University and the community by presenting quality art exhibitions in the Weil Gallery.

Two minors are also available. The minor in Studio Art is 21 semester hours and will allow a student to concentrate in one studio area. The minor in Art History is 18 semester hours. Interested students should contact the department academic advisor.

### Student Learning Outcomes

- demonstrate competencies in studio art;
- be able to successfully pass the test for State Board for Educator Certification enabling them to teach K-12 within the State of Texas;
- have the ability to articulate principles and theories of contemporary art as it applies to the teaching/learning environment.

### Specific Degree Requirements

All art majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All art degrees require ARTS 1303 Art History Survey I (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. All and only coursework with the prefix ARTS will be included in the grade point average for the students declared major field of study.

art/Current%20Students.html). Completed applications should be submitted to the office of the Department Chair.
Please see the College of Education and Human Development for more details.

**Total Hours** 128

**Note:**

All art majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All art degrees require ARTS 1303 Art History Survey I (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. All and only coursework with the prefix ARTS will be included in the grade point average for the students declared major field of study.

All students graduating with a Bachelor of Fine Arts Degree with Teachers Certification are required to submit an exit portfolio. The portfolio consists of six .jpg images that best represent their most successful coursework during their educational careers in the Department of Art. A written formal discussion of some aspect of their work is also required. The senior capstone class sets the standards and format for these materials and coordinates the collection of the materials. These materials are due on or before the last class day of the semester in which the students plan to graduate.

Students in the program are expected to spend one additional hour per week in the studio for each upper division semester hour of studio enrollment.

### Other Certification Requirements

For information on required professional development courses and other teacher certification requirements, please see the College of Education and Human Development section of this catalog. Students should also consult the Certification Office of the College of Education and Human Development for complete and current information about teacher certification requirements.

To qualify to take the TExES (Texas Examinations of Educator Standards) in the field of Art, students must meet the following criteria:

1. Make pre-specified acceptable scores on TExES practice tests, or departmental equivalent, and participate in practice test review and analysis session.
2. Provide official permit with signature of Program Coordinator or designated person for each teaching field on the student’s certification plan.

Students must also qualify to take the Professional Development TExES.

Courses

ARTS 1301 Art and Society
3 Semester Credit Hours (3 Lecture Hours)
Designated for non-art majors. Establishes a working vocabulary for evaluating works of art in various media. Objects are interpreted in terms of their specific historical contexts and the changing relationships between art and society. This course does not fulfill the art history requirement for art majors.
TCCNS: ARTS 1301

ARTS 1303 Art History Survey I
3 Semester Credit Hours (3 Lecture Hours)
An examination of painting, sculpture, architecture, and other arts from the ancient through medieval periods.
TCCNS: ARTS 1303

ARTS 1304 Art History Survey II
3 Semester Credit Hours (3 Lecture Hours)
A further examination of painting, sculpture, architecture, and other arts from the Renaissance through Modern periods. This course satisfies the university core curriculum requirement in fine arts.
Prerequisite: ARTS 1303.
TCCNS: ARTS 1304

ARTS 1311 Design I
3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on two-dimensional concepts.
TCCNS: ARTS 1311

ARTS 1312 Design II
3 Semester Credit Hours
A studio course concerning the fundamentals of art with emphasis on three-dimensional concepts. This 3D foundations course utilizes creative problem-solving strategies and basic sculpture tools to explore spatial relationships and to create sculptural forms in space.
Prerequisite: SMTE 0097.
TCCNS: ARTS 1312

ARTS 1316 Drawing I
3 Semester Credit Hours (3 Lecture Hours)
A studio course investigating a variety of media techniques, including their descriptive and expressive possibilities.
TCCNS: ARTS 1316

ARTS 1317 Drawing II
3 Semester Credit Hours
A further investigation of media techniques explored in Drawing I, including their descriptive and expressive possibilities.
Prerequisite: ARTS 1316.
Co-requisite: SMTE 0097.
TCCNS: ARTS 1317

ARTS 2311 Design III: Color
3 Semester Credit Hours
Investigation of the properties of color. Color is studied and applied to studio-oriented design assignments.
Co-requisite: SMTE 0097.

ARTS 2316 Painting I
3 Semester Credit Hours (3 Lecture Hours)
A studio course exploring the potentials of painting media.
Prerequisite: ARTS 1316.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2316

ARTS 2323 Drawing III
3 Semester Credit Hours
A studio course continuing the investigation of media and techniques explored in Drawing I and Drawing II. Students investigate how formal aspects and selected media along with conceptual choices create specific visual ideas.
Prerequisite: ARTS 1317.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2323

ARTS 2326 Sculpture I
3 Semester Credit Hours
An introductory studio course exploring sculptural approaches, materials, concepts, and technical processes. Materials include wood, plaster, steel, and plastics.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2326

ARTS 2333 Printmaking I
3 Semester Credit Hours
An introductory studio course in basic printmaking processes and techniques.
Prerequisite: ARTS 1316 or 1311.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2333

ARTS 2346 Ceramics I
3 Semester Credit Hours (3 Lecture Hours)
An introductory studio course in basic ceramic processes.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2346
ARTS 2356 Photography I
3 Semester Credit Hours
This course is an introduction to digital photography capture, processing, and basic editing software. While focusing on the fundamentals of digital photography and printing techniques, it will introduce students to the theory and practice of photography and assist them in producing a conceptually devised and technically consistent portfolio.
Co-requisite: SMTE 0097.
TCCNS: ARTS 2356

ARTS 2346 Wheel Throwing
3 Semester Credit Hours
This course is designed to build upon the fundamental principles of mold making and casting while exploring more complex concepts, materials, and techniques. Creating multi-part molds, flexible molds, and investment molds, the project assignments incorporate the unique versatility of mold making and casting for exchanging media and making a series of multiples. In addition to making casts, students compare methods for assembling cast forms together to create larger sculptural artworks and installations.
Co-requisite: SMTE 0097.

ARTS 3306 Figurative Sculpture
3 Semester Credit Hours
A study of the human figure from an anatomical and artistic perspective. Examines the skeletal and muscular components of the figure in order to create lifelike and emotive sculptures. Discussion of the figure in both classical and contemporary art. Working with armature and modeling clay.
Co-requisite: SMTE 0097.

ARTS 3307 Lithography and Planographic Process
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to lithography and monoprinting.
Prerequisite: ARTS 2311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3311 Color Theory
3 Semester Credit Hours
This course develops an understanding of color properties and relationships through formal exercises, research and creative thinking. Students build a vocabulary for analyzing and identifying color and color phenomena. Concepts of color theorists and color use in a variety of fields are examined to understand the application of color theory. Students will investigate the use of color in their own work and in the work of others to understand the conceptual and aesthetic application of color.
Prerequisite: ARTS 1311.

ARTS 3302 Screen Printing
3 Semester Credit Hours
Traditional printmaking processes will be explored using black and white and color techniques, including but not limited to screenprinting.
Prerequisite: ARTS 1311 or 1316.
Co-requisite: SMTE 0097.

ARTS 3303 Intermediate Painting
3 Semester Credit Hours (3 Lecture Hours)
Explores the issues of content, imagery, application, and influences of master artists.
Prerequisite: ARTS 2316.
Co-requisite: SMTE 0097.

ARTS 3304 Fabrication Sculpture
3 Semester Credit Hours
Building upon introductory skills, this course explores construction and fabrication in sculpture focusing on a primary material for the semester and applying advanced techniques and processes for this material. Through this material and techniques, students begin defining and developing their visual vocabulary relative to art history and contemporary sculptural issues.
Prerequisite: ARTS 2326.
Co-requisite: SMTE 0097.

ARTS 3305 Mold Making and Casting Sculpture
3 Semester Credit Hours
This course is designed to build upon the fundamental principles of mold making and casting while exploring more complex concepts, materials, and techniques. Creating multi-part molds, flexible molds, and investment molds, the project assignments incorporate the unique versatility of mold making and casting for exchanging media and making a series of multiples. In addition to making casts, students compare methods for assembling cast forms together to create larger sculptural artworks and installations.
Co-requisite: SMTE 0097.

ARTS 3306 Figurative Sculpture
3 Semester Credit Hours
A study of the human figure from an anatomical and artistic perspective. Examines the skeletal and muscular components of the figure in order to create lifelike and emotive sculptures. Discussion of the figure in both classical and contemporary art. Working with armature and modeling clay.
Co-requisite: SMTE 0097.
ARTS 3350  Art of the United States  
3 Semester Credit Hours (3 Lecture Hours)  
A survey of the major developments in the art of North America from Pre-Columbian times to the modern era.

ARTS 3352  Modern Art  
3 Semester Credit Hours (3 Lecture Hours)  
A survey of the major movements of 20th century art and aesthetics, which developed primarily in Europe. Includes a review of late 19th century modernist antecedents with emphasis placed on the principal movements of the early 20th century. Fauvism, German Expressionism, Cubism, Futurism, Abstract Art, Dada, and Surrealism.

ARTS 3353  Art Since 1945  
3 Semester Credit Hours (3 Lecture Hours)  
An examination of the dispersal of European artists and Modernism, primarily to America, as a result of World War II. Examines the development of Abstract Expressionism in New York in the 1940s and 50s, followed by a survey of recent trends in contemporary art to the present day.

ARTS 3360  Graphic Design I  
3 Semester Credit Hours (3 Lecture Hours)  
Introduce fundamental graphic communication techniques, software and theory. Explores hand skills by using tools and techniques to produce professional presentations as well as the correct procedures for presenting designs to a client.

ARTS 3365  Photography II  
3 Semester Credit Hours  
An intermediate studio course using digital cameras and image manipulation software. Prior completion of ARTS 2356 is required. This course will enhance and expand skills developed in Photography I. It is geared toward informing students in the many ways we can make photographs; by seeking them out, framing them, forming them, extracting them, building them, and finally sequencing and presenting them. Students will engage in the theory and practice of photography, refine their photographic technique, and create a conceptually devised and technically consistent portfolio. Emphasis is placed on the development of a strong conceptual foundation from which to approach the making and understanding of photography as an art form. This knowledge will be achieved through photographic assignments, slide lectures of relevant works, and in-class critiques. It can be repeated twice for credit.

Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3366  Analogue Photography  
3 Semester Credit Hours  
An introductory studio course in analogue photography using film cameras and the silver gelatin darkroom process. While focusing on the fundamentals of black and white, analogue photography and printing techniques this course will assist students in producing a conceptually devised and technically consistent portfolio.

Prerequisite: (ARTS 2356).
Co-requisite: SMTE 0097.

ARTS 3367  Digital Design Tools and Applications  
3 Semester Credit Hours  
This studio course explores the fundamental principles, standard creative processes and basic digital tools utilized in graphic design. The concepts and software learned are employed in projects specifically targeted to serve the professional and promotional needs of studio artists and design enthusiasts.

ARTS 4085  Senior Capstone  
0 Semester Credit Hours  
Required for all art students in partial fulfillment of the requirements for the BA in Art, BFA in Art studio track and the BFA with Teacher Certification in Art tracks. This course collects capstone materials for ARTS degrees. The course must be taken in the student’s final semester before graduation.

ARTS 4301  Advanced Drawing  
3 Semester Credit Hours  
Emphasis on the development of content through drawing. Research on contemporary trends and process investigation will aid students in the development of visual ideas and lead to a cohesive body or work. May be taken three times for credit.

Prerequisite: ARTS 2323.
Co-requisite: SMTE 0097.

ARTS 4302  Advanced Printmaking  
3 Semester Credit Hours  
Furthers competencies attained in Printmaking I and Intermediate I & II courses. May be taken three times for credit.

Prerequisite: ARTS 3302 and 3307.
Co-requisite: SMTE 0097.

ARTS 4303  Advanced Painting  
3 Semester Credit Hours (3 Lecture Hours)  
Assumes competencies attained in ARTS 3303. May be taken three times for credit.

Co-requisite: SMTE 0097.

ARTS 4304  Advanced Sculpture  
3 Semester Credit Hours (3 Lecture Hours)  
Assumes competencies attained in ARTS 3304. May be taken three times for credit.

Co-requisite: SMTE 0097.

ARTS 4324  Advanced Ceramics  
3 Semester Credit Hours (3 Lecture Hours)  
Assumes competencies attained in ARTS 3324. May be taken three times for credit.

Co-requisite: SMTE 0097.

ARTS 4350  Pre-Columbian Art of Mesoamerica  
3 Semester Credit Hours (3 Lecture Hours)  
Explores the history of Pre-Columbian art from Mexico and Central America, from the Olmec through the Aztec cultures. May be taken three times for credit.

ARTS 4352  Modern Art of Mexico  
3 Semester Credit Hours (3 Lecture Hours)  
Explores the history of art during the nineteenth and twentieth centuries in Mexico. May be taken three times for credit.
ARTS 4354 Global Currents in Contemporary Art  
3 Semester Credit Hours (3 Lecture Hours)
The course will cover key developments in contemporary art from the post-World War II era in the Western context to global currents in the present international arena. From a socio-political perspective, artistic tendencies will be considered as part of a trajectory that saw the center of the art world shift from being Euro- and Anglo-centric in the mid-twentieth century, to one without a discernible center in the early twenty-first century. Analysis of artworks from this decentralized cultural climate will focus on the evolution of conceptualism, the persistence of traditional modes of aesthetic practice, the role of the art market, and notions of environmentalism and sustainability as related to these "transnational transition." The course will consider works from Eastern Europe, South and Central America, the Caribbean, East/West/South/ Southeast Asia, Oceania, and Africa.

ARTS 4356 Contemporary Art Since 1980  
3 Semester Credit Hours (3 Lecture Hours)
The course will examine the evolution of architecture, sculpture, painting, digital media, installation, and interdisciplinary arts in the global context from 1980 to the present, in light of the historical and intellectual background of the period. Topics covered will include the transition from postmodernism to contemporaneity, considering notions of appropriation, commodification, consumerism, memory, history, and globalization. Lectures will be constructed upon thematic analysis of contemporary, primary sources coupled with secondary source material, and complemented by presentation opportunities and class discussion.

ARTS 4365 Advanced Photography  
3 Semester Credit Hours (3 Lecture Hours)
Assumes competencies attained in ARTS 3365. Covers content as creative expression in addition to basic photographic skills. May be taken three times for credit.
Co-requisite: SMTE 0097.

ARTS 4390 Topics in Art History  
3 Semester Credit Hours (3 Lecture Hours)
May be repeated when topics vary.

ARTS 4391 Topics in Studio Art  
3 Semester Credit Hours
May be repeated when topics vary.
Co-requisite: SMTE 0097.

ARTS 4396 Directed Individual Study  
1-3 Semester Credit Hours (1-3 Lecture Hours)
See College description. Offered on application.
Co-requisite: SMTE 0097.

ARTS 4398 Applied Experience  
3 Semester Credit Hours (3 Lecture Hours)
See College description. Offered on application.
Co-requisite: SMTE 0097.

Music, BM with EC-12 Teacher Certification

Music Degree Programs
Texas A&M University-Corpus Christi offers three distinct degree programs, a minor in music, and a minor in music industry.

• Music, BA  (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/music-ba/)

• Music, BM with EC-12 Teacher Certification (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/certification-samc/music-bm-ec-12-teacher-certification/)

• Performance (Instrumental), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/performance-instrumental-bm/)

• Performance (Voice), BM (http://catalog.tamucc.edu/archive/2022-2023/undergraduate/liberal-arts/bachelors-samc/performance-voice-bm/)

The mission of the Texas A&M University-Corpus Christi Department of Music is to assist students in the development of their aural, aesthetic, and analytical capacities in music. This mission is accomplished within a nurturing, student-centered environment where faculty and students strive together for attainment of the following program goals:

1. To prepare music majors for successful professional careers in music education, studio teaching, music industry, and performance;
2. To provide music courses for all students that will acquaint them with fundamental music skills, various musical styles, historical periods and literature, the functions of music in the community, and to provide opportunities to participate in the live performance of music;
3. To encourage students to be continually aware of music as an art form, and to seek opportunities for creative experiences and personal enrichment that are inherent in the study, performance, and production of music; and
4. To contribute to the artistic and cultural life of the community by providing public concerts and recitals, and other forms of appropriate musical involvement of faculty and students.

Texas A&M University-Corpus Christi is an accredited institutional member of the National Association of Schools of Music.

Music Courses Designed Specifically for Non-Majors
Music course offerings of special interest to students majoring in fields outside music include various kinds of ensemble experience:

Admission to Music Degree Programs
Degree-seeking music majors are expected to perform at increasingly higher levels of technical and artistic performance throughout the course of undergraduate study. Assessment of growth in performance is accomplished at the final examination for each semester of Principal Studio enrollment. This consists of a performance before a jury committee composed of music faculty members. Jury committees are charged with two tasks: first, they recommend an advisory jury grade to each student’s studio teacher, and second, they determine if students
will pass to the next course in the studio sequence. In order to avoid a situation in which a student attempts the pursuit of a music degree for which there is little or no practical hope of success, the following procedures governing admission to Texas A&M-Corpus Christi music degree programs are closely followed.

All music majors share a common first-year music course enrollment, consisting of Musicianship I and II, Aural Training I and II, Class Piano I and II, First Year Principal Applied Studio I and II, and an appropriate major ensemble. The jury examination for First Year Principal Applied Studio II will serve as an application audition for the Bachelor of Music or Bachelor of Music with Teacher Certification. Jury committees will approve applications based upon the jury performance and recommendation of the student’s principal studio instructor. Because the Bachelor of Arts program is more broadly focused and not as dependent upon performance, students who are not accepted into the Bachelor of Music or Bachelor of Music with Teacher Certification programs may continue with the BA. Transfer students who have completed two or more semesters of principal studio at another institution should audition for admission to the BM or BMTTC degrees at auditions held during the first week of classes each semester for that purpose. Students may attempt to qualify for the Bachelor of Music or the Bachelor of Music with Teacher Certification program only twice.

**Ensemble Participation and Requirements**

1. Every full-time music major must enroll, participate and receive a passing grade in a major ensemble every semester except the student teaching semester.

2. Major ensemble requirements must be satisfied in the following ways:
   - A student in any instrumental music degree program whose major instrument is a woodwind, brass, or percussion instrument must register for MUEN 1122 Concert Band (1 sch)/MUEN 3122 Concert Band (1 sch), MUEN 1123 Symphonic Winds (1 sch)/MUEN 3123 Symphonic Winds (1 sch) and/or MUEN 1124 Concert Orchestra (1 sch)/MUEN 3124 Concert Orchestra (1 sch) or as assigned by the instrumental ensemble directors and the applied teacher, based on auditions as required.
   - A student in any instrumental music degree program whose major instrument is an orchestral stringed instrument must register for MUEN 1124 Concert Orchestra (1 sch)/MUEN 3124 Concert Orchestra (1 sch) or
   - A student in any vocal/choral/general music degree program must register for MUEN 1151 University Singers (1 sch)/MUEN 3151 University Singers (1 sch) or MUEN 1153 Chamber Choir (1 sch)/MUEN 3153 Chamber Choir (1 sch) as assigned by the choral ensemble director and the applied music teacher, based on auditions as required.
   - Pianists or guitarists in instrumental music degree normally enroll in MUEN 1151 University Singers (1 sch)/MUEN 3151 University Singers (1 sch) to fulfill the ensemble requirement. If they play a wind band or orchestral instrument well enough, they may enroll in concert band or orchestra instead.

3. Exceptions to these policies will be made only with the approval of the student’s applied teacher, the Department Chair and the appropriate ensemble director.

**Policy on Course Substitutions**

At times, it may be necessary for a student nearing graduation to substitute a secondary applied lesson for a techniques course when there are class scheduling conflicts. In such cases, the students may be allowed to enroll in an applied lesson with the instructor or instructors in that area in lieu of that specific methods course. Courses may include Woodwind Techniques I (MUSI 3166), Woodwind Techniques II (MUSI 3167), Brass Techniques I (MUSI 3168), Brass Techniques II (MUSI 3169), Voice Techniques (MUSI 3170), Percussion Techniques (MUSI 3188), and String Techniques (MUSI 3189). These substitutions are exceptions to be determined on a case-by-case basis by permission of the Music Department Chair.

**Policy on Repeated Music Courses**

Students majoring and/or minoring in music will have three opportunities to earn a “C” or better in all MUSI, MUAP, MUEN and MIND courses required on the student’s degree program/plan. Students who do not earn a “C” or better on the third attempt of a class will not be allowed to continue in courses restricted to music majors and minors, with the exception of non-major applied lessons and ensembles.

**Program Description**

**Bachelor of Music with Teacher Certification**

This is the appropriate professional degree for students who seek careers in elementary and/or secondary music education. Degree tracks in vocal/general and instrumental music are available. This degree leads to Texas EC-12 teacher certification in music.

The Bachelor of Music with Teacher Certification curriculum has been designed to insure reasonable competence in all graduates, but it is rigorous and time consuming. Although the program can be completed in 9 regular semesters, it requires very heavy course loads to do so. Students whose personal learning styles do not respond well to such pressure, or those who must continue partial employment, should consider attending several summer sessions and/or extending their programs to 10 full semesters. In all cases, however, students are strongly urged to consult with the Music Department Chair or their assigned faculty advisor prior to beginning the program and frequently throughout.

All students seeking the Bachelor of Music with Teacher Certification degree must complete a 122 hr. set of Common Requirements consisting of the Core Curriculum Program (42 hrs.), Common Musicianship coursework (40 hrs.), Common Pedagogy Core (10 hrs.), and Professional Development (27 hrs.). In addition, a 10 hr. Track Specific Techniques Block must be completed.

**Student Learning Outcomes**

Student will:

- be able to assess and critique student performances
- have knowledge of music theory, history, literature, and culture
- be able to structure and apply appropriate music pedagogy to form effective instruction in classrooms or ensembles

**Specific Degree Requirements**

All music majors must meet all general University and College graduation requirements, including First Year Seminars, regardless of the following specific degree requirements, unless specifically excused. All music degrees require MUSI 1307 Elements of Musical Style (3 sch), which also meets the Core Curriculum Program Fine Arts requirement. Understanding and Enjoying Music (MUSI 1306 Understanding and Enjoying Music (3 sch)) cannot count towards any degree requirement of the Bachelor of Music with Teacher Certification. No music coursework with a grade lower than “C” will be counted toward the completion
Music, BM with EC-12 Teacher Certification

of the Bachelor of Arts in Music, the Bachelor of Music with Teacher Certification, or the Bachelor of Music in Performance, with the following exception. In order to progress to the next level of applied principal lessons (MUAP courses), a student must earn at least an “A” or “B” in his/her lessons and also be recommended to advance by the jury committee. A student who does not advance to the next level of lessons, as recommended by the jury committee, can earn no higher than a “C” in applied music. Students who do not advance in lessons due to their ineligibility to take the Basic Music Skills Assessment due to other factors (i.e. theory sequence issues) are not held to this grading policy.

Professional Development Coursework

For more information on required professional development courses, 24 the Professional Development TExES (PPR-160), and other teacher certification requirements, please see the College of Education and Human Development section of this catalog. Students should also consult the Certification Office of the College of Education for complete and current information about teacher certification requirements.

Track-Specific Techniques Blocks

Select one of the following Tracks:

Vocal/General

- MUAP 31XX Secondary Guitar Studio
- MUSI 3166 Woodwind Techniques I
- MUSI 3167 Woodwind Techniques II
- MUSI 3168 Brass Techniques I
- MUSI 3169 Brass Techniques II
- MUSI 3188 Percussion Techniques
- MUSI 3162 Diction for Singers I
- MUSI 3165 Diction for Singers II
- MUSI 4357 Choral Literature and Techniques

Instrumental

- MUSI 3166 Woodwind Techniques I
- MUSI 3167 Woodwind Techniques II
- MUSI 3168 Brass Techniques I
- MUSI 3169 Brass Techniques II
- MUSI 3170 Voice Techniques for Instrumentalists
- MUSI 3188 Percussion Techniques
- MUSI 3189 String Techniques
- MUSI 4358 Instrumental Literature and Techniques

Total Hours 131
Students with adequate keyboard skills may substitute Secondary Piano Studio courses for Class Piano I-IV with permission of the Music Department Chair.

Students are not required to take the instrumental techniques course that includes their own major instrument.

Other Certification Requirements
For more information on teacher certification requirements, see the College of Education section of this catalog. Students should also consult the Certification Office of the College of Education for complete and current information about teacher certification requirements.

Upon satisfactory completion of all subject field and professional development courses, a student may register for the subject field certification examination, called TExES (Texas Examinations of Educator Standards). A student wishing to take the TExES prior to program completion must satisfy the following:

1. Make pre-specified acceptable scores on TExES practice tests, or departmental equivalent, and participate in practice test review and analysis session.
2. Provide official permit with signature of Department Chair or designated person for each teaching field on the student’s certification plan.

Students must also qualify to take the Professional Development TExES.

Courses

Music Courses

MUSI 1116  Aural Training I
1 Semester Credit Hour (1 Lecture Hour)
A companion course to MUSI 1311, designed to strengthen the understanding of theoretical principles through the development of aural perception and skills; exercises in melodic, harmonic, and rhythmic dictation; and drill in sight singing.

TCCNS: MUSI 1116

MUSI 1117  Aural Training II
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 1116; a companion course to MUSI 1312.
Prerequisite: MUSI 1116 and 1311.
TCCNS: MUSI 1117

MUSI 1181  Class Piano I
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.

TCCNS: MUSI 1181

MUSI 1182  Class Piano II
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.

TCCNS: MUSI 1182

MUSI 1301  Fundamentals of Music
3 Semester Credit Hours (3 Lecture Hours)
Designed to teach beginning music students the basic tenet of music theory: note reading, rhythm, scales, key signatures, basic intervals and triads, and solfeggio.

MUSI 1302  Non-major Class Piano I
3 Semester Credit Hours (3 Lecture Hours)
Group instruction in the elements of piano playing, designed for the non-major. No previous experience necessary.

MUSI 1303  Basic Guitar I
3 Semester Credit Hours (3 Lecture Hours)
Group instruction in the fundamentals of guitar playing, designed for the non-major. The student must furnish an acceptable instrument. No previous experience necessary.

TCCNS: MUSI 1303

MUSI 1306  Understanding and Enjoying Music
3 Semester Credit Hours (3 Lecture Hours)
A course for the non-music major. Study of selected music literature of contrasting styles and forms with emphasis on listening to music with understanding.

TCCNS: MUSI 1306

MUSI 1307  Elements of Musical Style
3 Semester Credit Hours (3 Lecture Hours)
A survey of selected western and non-western musical styles, based upon the analysis of the characteristic use of the elements of music. Required for music majors and recommended for non-majors with a significant high school music background.

TCCNS: MUSI 1307

MUSI 1310  History of Rock and Roll
3 Semester Credit Hours (3 Lecture Hours)
A general survey of composers, performers, and styles of rock and roll. Emphasis on understanding stylistic elements of music, including rhythm, texture, form, and harmony.

TCCNS: MUSI 1310

MUSI 1311  Musicianship I
3 Semester Credit Hours (3 Lecture Hours)
First principles of chord progression and phrase harmonization. Theory assessment required prior to enrollment.

TCCNS: MUSI 1311

MUSI 1312  Musicianship II
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 1311, with a study of more advanced chord structures and their placement within the phrase through written exercises, analysis, and correlated keyboard projects.

Prerequisite: MUSI 1311 and 1116.
TCCNS: MUSI 1312

MUSI 2116  Aural Training III
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 1117; a companion course to MUSI 2311. Designed to further the understanding of advanced theoretical principles and techniques through related aural exercises, dictation, and sight singing.

Prerequisite: MUSI 1117 and 1312.
TCCNS: MUSI 2116

MUSI 2117  Aural Training IV
1 Semester Credit Hour (1 Lecture Hour)
Continuation of MUSI 2116; a companion course to MUSI 2312.

Prerequisite: MUSI 2116 and 2311.
TCCNS: MUSI 2117
MUSI 2181  Class Piano III
1 Semester Credit Hour (2 Lecture Hours)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
Prerequisite: MUSI 1302.
TCCNS: MUSI 2181

MUSI 2182  Class Piano IV
1 Semester Credit Hour (1 Lab Hour)
Group instruction in piano for music majors, covering piano technique and literature, major and minor scales, transposition, sight reading, and simple harmonization of melodies. In extraordinary circumstances, students may substitute one semester of secondary applied piano for this course. Keyboard majors accepted for degree-level study should substitute four semesters of Secondary Applied Studio.
TCCNS: MUSI 2182

MUSI 2302  Non-major Class Piano II
3 Semester Credit Hours (3 Lecture Hours)
Extension of skill development begun in MUSI 1302 Non-Major Class Piano I.
Prerequisite: MUSI 1302.

MUSI 2303  Basic Guitar II
3 Semester Credit Hours (3 Lecture Hours)
Extension of skill development begun in MUSI 1303 - BASIC GUITAR I. The student must furnish an acceptable instrument.
Prerequisite: MUSI 1303.

MUSI 2311  Musicianship III
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 1312. A broad summary of classical and chromatic harmony, explored through written exercises, analysis, and correlated keyboard drill.
Prerequisite: MUSI 1312 and 1117.
TCCNS: MUSI 2311

MUSI 2312  Musicianship IV
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 2311. An exploration of 20th-century techniques through written exercises, analysis, and correlated keyboard drill.
Prerequisite: MUSI 2311 and 2116.
TCCNS: MUSI 2312

MUSI 3085  Junior Recital
0 Semester Credit Hours
Required for all students presenting a Junior Recital in partial fulfillment of the requirements for the Bachelor of Music in Performance Degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Department Chair.

MUSI 3162  Diction for Singers I
1 Semester Credit Hour (1 Lecture Hour)
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in English and French.

MUSI 3165  Diction for Singers II
1 Semester Credit Hour (1 Lecture Hour)
Learning to use the International Phonetic Alphabet (IPA) with sufficient fluency to effectively teach and learn proper pronunciation of song texts in Italian and German.

MUSI 3166  Woodwind Techniques I
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the oboe, bassoon, and saxophone. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3167  Woodwind Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the flute and clarinet. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3168  Brass Techniques I
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trumpet and French horn. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3169  Brass Techniques II
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the trombone, euphonium, and tuba. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3170  Voice Techniques for Instrumentalists
1 Semester Credit Hour (1 Lab Hour)
Group instruction and practical experience in the fundamentals of voice production and song interpretation for the instrumental music educator. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3188  Percussion Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the instruments of the percussion family. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3189  String Techniques
1 Semester Credit Hour (1 Lab Hour)
Basic techniques of playing and teaching the violin, viola, ‘cello, and string bass. Includes a survey of pedagogical materials and basic performance literature.

MUSI 3252  Foundations of Music Programs
2 Semester Credit Hours (2 Lecture Hours)
A survey of the historical, social, and philosophical bases of music education in the United States, psychological theories of learning and musical responsiveness, and studies of how these foundations have been applied in various types of music curricula.
Prerequisite: MUSI 2311 and 2116.

MUSI 3253  Basic Conducting
2 Semester Credit Hours (2 Lecture Hours)
A skills acquisition course designed to give students competence in basic baton techniques and musical control of an ensemble. Includes score study and musical terminology.
Prerequisite: MUSI 2311 and 2116.
MUSI 3310 History of Jazz
3 Semester Credit Hours (3 Lecture Hours)
A study of jazz styles, influences, trends, innovators, and literature. Readings include interviews and articles that discuss origins of jazz, definitions of jazz, and race politics of jazz. No previous experience is necessary.

MUSI 3317 Rap and Hip Hop: Music and Culture
3 Semester Credit Hours (3 Lecture Hours)
This course is recommended for non-music majors and music minors. Rap and Hip Hop Music and Culture traces the ideological, social, historical, and cultural influences of a musical genre that first came to prominence in the mid-1970s in one of New York’s toughest neighborhoods, the South Bronx. This course describes how the arts of DJing, MCing, breakin’ [b-boying], and graffiti developed as a way for this community’s struggle to find its own voice. Addressed will be rap’s early successes on the pop charts; its spread to mainstream culture; the growth of “gangsta rap” and mainstream society’s reaction to it; and the commercial success of rap music from the ‘90s through today. Throughout, this course will highlight key performers, producers, and voices in the rap and hip hop movements, using their stories to illuminate the underlying issues of racism, poverty, prejudice, and artistic freedom that are part of rap and hip hop’s ongoing legacy.

MUSI 3327 Music and Film
3 Semester Credit Hours (3 Lecture Hours)
The object of this course is to develop skills in analyzing the soundtrack, music’s role in the soundtrack, and the relation of soundtrack and image track (especially relating to music) on small-scale and large-scale (narrative) levels. The course develops critical listening and viewing skills, but it also offers a particular kind of film-music history survey, one that focuses on the three nodal points in the history of film sound: the introduction of sound, the introduction of stereo, and the introduction of digital sound. We will explore the thesis that each of these technological advances alters the structural relationships among the three relatively autonomous components of the soundtrack—dialogue, music, and effects.

MUSI 3334 Music Cultures of the World
3 Semester Credit Hours (3 Lecture Hours)
The course introduces the student to ethnomusicology and the cross-cultural study of music and society. It emphasizes the role of music in human life, and explores music and performance from around the world. The student will learn about classical, folk and popular styles found on all seven continents. This course is appropriate for any student of any musical background.

MUSI 3345 Composition
1-3 Semester Credit Hours
Creative writing with a view toward developing an individual style of musical composition. Variable credit, 1, 2, or 3 hrs. One private lesson per week.
Prerequisite: MUSI 2312 and 2117.

MUSI 3346 Form and Analysis of Tonal Music
3 Semester Credit Hours (3 Lecture Hours)
Analysis of the melodic and harmonic design of tonal music, including the aural and visual analysis of scores for piano, voice, chamber ensembles, and orchestra.
Prerequisite: MUSI 2312 and 2117.

MUSI 3354 Advanced Conducting
3 Semester Credit Hours (3 Lecture Hours)
A continuation of MUSI 3252. Advanced experiences with score preparation and effective ensemble rehearsal and management techniques.
Prerequisite: MUSI 3252.

MUSI 3370 Class Voice
3 Semester Credit Hours (3 Lecture Hours)
Group instruction and practical experience in the fundamentals of voice production, music reading, and song interpretation. Dramatic stage movement and singing will be explored using Classical and Broadway song literature. This course is designed for the non-major. No previous experience is necessary.

MUSI 4085 Senior Recital
0 Semester Credit Hours
Required for all students presenting a Senior Recital in partial fulfillment of the requirements for any music degree. Specific policies governing the presentation and evaluation of such recitals are given in the document, Preparing and Presenting Degree Recitals, available from the Music Program Coordinator.

MUSI 4334 History of Western Music I
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of the evolution of Western musical style from antiquity through the 18th-century.
Prerequisite: MUSI 1307, 2312 and 2117.

MUSI 4335 History of Western Music II
3 Semester Credit Hours (3 Lecture Hours)
Continuation of MUSI 4334, an in-depth study of the evolution of Western musical style from the age of Beethoven to the present.
Prerequisite: MUSI 4334.

MUSI 4340 Studies in Repertoire
3 Semester Credit Hours
Systematic examination of the history and literature of a specific performance medium.

MUSI 4346 Orchestration and Arranging
3 Semester Credit Hours (3 Lecture Hours)
The compass, timbre, and techniques of arranging and/or orchestration for instruments and/or voices. Practical experience in arranging for orchestra, band, and other instrumental and vocal combinations.
Prerequisite: MUSI 2312 and 2117.

MUSI 4355 Music for Young Children
3 Semester Credit Hours (3 Lecture Hours)
Study of musical development in children in grades K-6. Study of and practical experience with pedagogical approaches and materials appropriate for that age group.
Prerequisite: MUSI 3252.

MUSI 4357 Choral Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful vocal ensembles in secondary schools.
Prerequisite: MUSI 3253.

MUSI 4358 Instrumental Literature and Techniques
3 Semester Credit Hours (3 Lecture Hours)
Advanced study of the literature, pedagogy, and management techniques required for successful instrumental ensembles in secondary schools. Includes a segment pertaining to the development of marching band shows.
Prerequisite: MUSI 3253.
MUSI 4360  Studies in Pedagogy
3 Semester Credit Hours
Methods, materials and psychology of presenting musical materials to students at various ages. Evaluation of teaching materials and techniques. Classes are organized by specific performance areas.

MUSI 4385  Senior Capstone
3 Semester Credit Hours
The Senior Capstone is intended to provide students seeking the Bachelor of Arts in Music with an opportunity to demonstrate their musical scholarship through scholarly analysis and writing within a field of music of their choosing. May include a performance component, as in a lecture recital, but musical performance may comprise no more than 40% of the capstone project.

MUSI 4390  Topics in Music
1-3 Semester Credit Hours (1-3 Lecture Hours)
May be repeated for credit when topics vary.

MUSI 4396  Directed Individual Study
1-3 Semester Credit Hours
See College description.

MUSI 4398  Applied Experience
3 Semester Credit Hours
See College description.

Music Ensemble Courses

MUEN 1122  Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1123  Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1124  Concert Orchestra
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1127  Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1128  Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1131  Piano Accompanying
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1132  Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1133  Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1135  Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1136  Woodwind Choir
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1137  Clarinet/Sax Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1138  Jazz Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1139  Flute Ensemble
1 Semester Credit Hour (1 Lecture Hour, 1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1140  String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1143  Chorale
1 Semester Credit Hour (1 Lecture Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1151  University Singers
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1153  Chamber Choir
1 Semester Credit Hour (1 Lecture Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 1157  Opera Workshop
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 1159 Mariachi Ensemble
1 Semester Credit Hour (1 Lab Hour)
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1.) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2.) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.

MUEN 3122 Concert Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3123 Symphonic Winds
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3124 Concert Orchestra
1 Semester Credit Hour (35 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3127 Pep Band
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3128 Jazz Band
1 Semester Credit Hour (3 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3132 Classical Guitar Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3133 Percussion Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3135 Brass Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3136 Woodwind Ensemble
1 Semester Credit Hour (2 Lab Hours)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.
MUEN 3139  Flute Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3140  String Ensemble
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3143  Chorale
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3151  University Singers
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3153  Chamber Choir
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3157  Opera Workshop
1 Semester Credit Hour (1 Lab Hour)
Membership in music ensembles is open to all University students. Ensembles meet for periods of rehearsal ranging from two to five hours each week. All ensemble courses carry one semester hour of credit, and all may be repeated for credit. Some degree programs limit the amount of such credit that may be applied to the degree. In some instances, an audition with the ensemble director may be required for admission to the course. Every full-time music major must enroll, participate, and receive a passing grade in a major ensemble every semester except the student teaching semester.

MUEN 3159  Mariachi Ensemble
1 Semester Credit Hour (15 Lab Hours)
This course is designed to assist the student in developing an increased proficiency in the art of Mariachi Performance. In accomplishing this goal, this course will allow each student to develop: 1) performance skills on the instruments of the mariachi (including violin, trumpet, guitar, guitarron, vihuela, and harp), and 2) knowledge of the repertoire and history of mariachi literature. Performance of an instrument in the mariachi also requires singing when the repertoire calls for it. The objective is to study the literature of Mexican Folk music; to engage in the technical study of mastering performance on the instruments of the mariachi; to represent TAMUCC in the immediate and global community through musical excellence.

Theatre Arts, Teacher Certification
Program Description
The mission of the Texas A&M University-Corpus Christi Theatre Program is to provide students with the tools needed for preparation as Theatre educators or professional practitioners, or for continuation of their studies on the graduate level. The goal of the program is to provide students with meaningful experiences that promote an understanding of theatre as a medium of expression and collaboration. Students are given opportunities for creative and critical thinking, problem solving, and exploration in an environment that values artistic integrity, understands failure as well as success, and respects the viewpoints of others in the encouragement of artistic truth. The extensive season of the Theatre Program serves not only as a training lab for the students, but also enhances the cultural and aesthetic experience of the campus and is a major cultural resource for the residents of South Texas.

Student Learning Outcomes
BA in Theatre graduates with Teaching Certification will demonstrate the following:

Students will

- Communicate historical and cultural dimensions of Theatre during a required exit jury with the Theatre faculty.
- Communicate competencies in historical research and script analysis during a required exit jury with the Theatre faculty.
- Communicate visual and aural perceptions of Theatre performance during a required exit jury with the Theatre faculty. The student will use specific examples from their participation in University Theatre productions.
Teacher Certification in Theatre Arts (grades Early Childhood – 12)

All students seeking certification in Theatre Arts should select a Theatre faculty advisor to help them choose appropriate courses and co-curricular activities.

For information on required professional development courses and other teacher certification requirements, please see the complete and current information about teacher certification requirements.

To qualify to take the TExES (Texas Examinations of Educator Standards), in the field of Theatre, students must meet the following criteria:

1. Make pre-specified acceptable scores on TExES practice tests, or departmental equivalent, and participate in practice test review and analysis session.
2. Provide official permit with signature of Program Coordinator or designated person for each teaching field on the student’s certification plan.

Students must also qualify to take the Professional Development TExES.

Courses
THEA 1120  Theatre Practicum 1  1 Semester Credit Hour (1 Lab Hour)
Practicum in theater open to all students with emphasis on technique and procedures with experience gained in play productions. Linked with THEA 1342 - Costume Technology.
Co-requisite: SMTE 0098, THEA 1371.

THEA 1121  Theatre Practicum 2  1 Semester Credit Hour (1 Lab Hour)
Practicum in theater open to all students with emphasis on technique and procedures with experience gained in play productions. Linked with THEA 1330 - Theatre Stagecraft.
Co-requisite: SMTE 0098, THEA 1330.

THEA 1310  Theatre Appreciation  3 Semester Credit Hours (3 Lecture Hours)
Survey of theatre including its history, dramatic works, stage techniques, production procedures, and relation to other art forms. Participation in productions may be required.
TCCNS: DRAM 1310

THEA 1330  Theatre Stagecraft  3 Semester Credit Hours (3 Lab Hours)
Study and application of the methods and components of theatrical production which may include one or more of the following: theater facilities, scenery construction and painting, properties, lighting, and sound.
Co-requisite: SMTE 0098, THEA 1121.

THEA 1341  Stage Makeup  3 Semester Credit Hours (3 Lecture Hours)
A practical exploration of basic stage makeup techniques. The student will also investigate the relationships of character to makeup and begin to understand the work needed to design makeup for a production.
Co-requisite: SMTE 0098.
TCCNS: DRAM 1341

THEA 1351  Acting I  3 Semester Credit Hours (3 Lecture Hours)
The development of basic skills and techniques of acting, including sensory awareness, ensemble performing, character analysis, and script analysis. Emphasis on the mechanics of voice, body, emotion, and analysis as tools for the actor.
TCCNS: DRAM 1351

THEA 1352  Acting II  3 Semester Credit Hours (3 Lecture Hours)
A continuation of Acting I with emphasis on characterization and working with extended realism. The student will study the theories of Constantin Stanislavski.
Prerequisite: THEA 1351.
TCCNS: DRAM 1352

THEA 1371  Costume Technology  3 Semester Credit Hours (3 Lecture Hours)
A BEGINNING OVERVIEW OF THE VOCABULARY AND BASIC SEWING METHODS OF THEATRICAL COSTUMING.
Co-requisite: SMTE 0098, THEA 1120.
TCCNS: DRAM 1342

THEA 2120  Theatre Practicum 3  1 Semester Credit Hour (1 Lab Hour)
Practicum in theater open to all students with emphasis on technique and procedures with experience gained in play productions.
Co-requisite: SMTE 0098.

THEA 2121  Theatre Practicum 4  1 Semester Credit Hour (1 Lab Hour)
Practicum in theater open to all students with emphasis on technique and procedures with experience gained in play productions.
Co-requisite: SMTE 0098.
THEA 2336 Voice for the Actor
3 Semester Credit Hours (3 Lecture Hours)
Principles, practices, and exercises in awareness, relaxation, freedom, flexibility, and expressiveness in the actor's vocal instrument.

THEA 2355 Script Analysis
3 Semester Credit Hours (3 Lecture Hours)
Students will learn the principles, techniques, and processes of dramatic structure found in written scripts as seen through the perception of the stage director, actor, and designer. A written intensive analysis of each script studied during the semester will be required. Focus will be on the theories of Aristotle and Eugene Scribe's "Well Made Play Formula". Prerequisite: THEA 1330 and 1371.

THEA 3120 Theatre Practicum 5
1 Semester Credit Hour (1 Lab Hour)
Practicum in theater open to all students with emphasis on technique and procedures with experience gained in play productions. Co-requisite: SMTE 0098.

THEA 3121 Theatre Practicum 6
1 Semester Credit Hour (1 Lab Hour)
Practicum in theater open to all students with emphasis on technique and procedures with experience gained in play productions. Co-requisite: SMTE 0098.

THEA 3165 The Design and Technical Portfolio.
1 Semester Credit Hour (1 Lecture Hour)
A basic course in the development of the student portfolio for the areas of design and technology with emphasis in the theatrical job market or graduate school.

THEA 3300 Stage Movement
3 Semester Credit Hours (3 Lecture Hours)
Students will gain insights into the physical skills, practices, exercises, and staging techniques developed and used by actors and directors in theatrical performance, with an emphasis on relaxation, freedom, expressiveness, spatial relationships, and composition. Prerequisite: THEA 1351 and 1352.

THEA 3302 Creative Dramatics
3 Semester Credit Hours (3 Lecture Hours)
Theories and practices incorporating the techniques of creative drama in the elementary, middle, and high school classroom. Especially recommended for elementary education, recreation, and the social sciences.

THEA 3303 Theatre in the Public Schools
3 Semester Credit Hours (3 Lecture Hours)
Theories and practices of incorporating theatre activities in the public schools. Especially recommended to students of elementary and secondary education, recreation and the social sciences.

THEA 3310 Contemporary Theatre
3 Semester Credit Hours (3 Lecture Hours)
An overview of the nature and function of theatre in our contemporary society with discussion of representative plays and playwrights, theatrical styles, and avant-garde theatre. Students will explore multicultural, political, and experimental themes, attend theatrical productions, and meet with actors, designers, and directors to discuss contemporary practices.

THEA 3312 Stage Combat I
3 Semester Credit Hours (1 Lecture Hour, 2 Lab Hours)
Stage combat is a unique form of acting and movement; integral to the training of the professional actor and an extremely marketable skill. This course is an introduction to the stage fight discipline. It is important as actors that we develop a keen sense of duality in performance; a seemingly impromptu, theatrically engaging moment of violence built upon a foundation of safe, consistent physical dialogue. In this way, we can enhance the physical lives of all the characters we play; especially those engaged in acts of violence. This course explores many fundamental acting techniques in a new light including responsibility to a partner, listening and responding, projection, articulation, spatial awareness and above all intent. May be repeated for credit.

THEA 3335 UIL Debate and Speech
3 Semester Credit Hours (3 Lecture Hours)
This course will prepare students to coach High School speech events as extra-curricular and co-curricular activities. The class will focus primarily on Texas University Interscholastic Leagues (UIL competitions) but will also cover events sponsored by the Texas Forensics Association (TFA) and the National Forensics League (NFL). Areas covered will include oral interpretation, extemporaneous speaking, and debate.

THEA 3340 Audition Preparation
3 Semester Credit Hours (3 Lecture Hours)
Provides the student with the information and skills needed for auditioning in both professional and educational theatre. Prerequisite: THEA 1351 and 1352.

THEA 3350 Production Management
3 Semester Credit Hours (3 Lecture Hours)
This course is a survey of stage management and theatre administration. Topics to be studied include stage management, production management, professional unions, publicity/marketing, box office and house management. Prerequisite: THEA 1371, 1330 and 2355.

THEA 3370 History of the Theatre I
3 Semester Credit Hours (3 Lecture Hours)
Historical investigation of the nature and function of theatre from primitive rituals through the Renaissance periods with discussions of representative plays/playwrights, theatrical styles and stage design. Prerequisite: THEA 2355.

THEA 3371 History of the Theatre II
3 Semester Credit Hours (3 Lecture Hours)
Historical investigation of theatre from the Restoration era to the present. Focus on the nature and function as well as the critical analysis of theatre and design, various movements, and influential people. Prerequisite: THEA 2355.

THEA 3373 Principles of Design
3 Semester Credit Hours (3 Lecture Hours)
Builds upon the student's practical lab experience and understanding of theatrical design begun in costume construction and theatre stagecraft. Students will explore the creative process of theatre production as it pertains to lighting, set, sound, props, and costume design projects. Prerequisite: THEA 1371 and 1330.

THEA 3375 Acting III: Period Styles
3 Semester Credit Hours (3 Lecture Hours)
Specific training for actors in period plays. Emphasis on training the actor for the Classical, Renaissance, Shakespearean, and Modern Periods. Prerequisite: THEA 1351 and 1352.
THEA 3377  Acting Shakespeare
3 Semester Credit Hours (3 Lecture Hours)
Advance study in the analysis and performance of heightened text as written by William Shakespeare. Coursework includes in-depth application of Elizabeth theatre practices and how these practices may be adapted for 21st century actors, directors, and audiences.

THEA 3380  History of Theatrical Styles
3 Semester Credit Hours (3 Lecture Hours)
A survey and research-oriented course which studies the major impact of the visual, artistic, historical, and social period movements. The course will focus on the approach that the actor, designer, director, and playwright take in developing the understanding of the environment of a play's location and time period.

THEA 3381  Drawing and Rendering for the Stage
3 Semester Credit Hours (3 Lecture Hours)
Examination of the uses of the various materials used and the development of the techniques employed in the creation and presentation of theatrical renderings and models.
Co-requisite: SMTE 0098.

THEA 3382  Drafting and Computer-Aided Design for the Stage
3 Semester Credit Hours (3 Lecture Hours)
Practical examination and practice in theatrical drafting conventions with an emphasis on the development of hand drafting techniques and CAD (computer-aided design).
Prerequisite: THEA 1330.

THEA 3385  Musical Theatre
3 Semester Credit Hours (3 Lecture Hours)
The focus of the course is on musical theatre history, exploring trends in the genre, audition techniques, characterization, staging and choreography.

THEA 3386  Playwriting
3 Semester Credit Hours (3 Lecture Hours)
