CLINICAL PSYCHOLOGY, MA

Program Description
The Master of Arts (MA) in Clinical Psychology program is a 60 semester hour program designed to develop mastery of the scientific principles and methods of psychology and their application to clinical issues. The primary education and training mission of the program is to provide a program of study with an applied clinical emphasis to prepare students for the practice of psychology or counseling at the master's level of licensure. Students are required to take a sequence of core curriculum coursework that emphasizes major academic areas within the discipline of psychology before advancing to specialized coursework in the area of clinical psychology that prepares them for the professional application of psychological principles. In addition, students receive supervised clinical practicum experience as part of their training. They may also choose to complete an empirical thesis under the supervision of a faculty advisor.

Upon admission, each student will be assigned a faculty advisor who will assist the student with academic decisions during the course of the degree program. During their first year in the program students will also meet with the Graduate Coordinator to develop a degree plan.

Upon completion of the program, graduates will meet the necessary qualifications to take the Texas State Board of Examiners of Psychologists examination for certification as a Licensed Psychological Associate (LPA). With additional coursework and experience, graduates may elect to take the Licensed Professional Counselor (LPC) or Licensed Specialist in School Psychology (LSSP) examinations. Following licensure, graduates typically work under the supervision of a licensed psychologist, or as independent practitioners in a variety of public agency and private settings.

Student Learning Outcomes
- Graduates of the MA Clinical Psychology program will demonstrate knowledge of developmental, empirical, physiological and social psychology principals.
- Graduates will demonstrate mastery of the basic principles of clinical assessment and their therapeutic application as well as the ethical use of these principles.
- Graduates who choose the thesis option will be able to conduct independent research of psychological phenomenon as evidenced by successful completion and defense of their thesis in accordance with departmental guidelines.

College of Liberal Arts
Texas A&M University-Corpus Christi, 6300 Ocean Drive

E-mail: Yuliana.zaikman@tamucc.edu

Admission Requirements
In addition to the university admission requirements outlined for all graduate programs, the MA Clinical Psychology program requires:

- A bachelor's degree in psychology, or a bachelor's degree with 15 semester hours of undergraduate coursework in psychology for unconditional admission. This foundational undergraduate coursework must include general psychology, statistics, experimental psychology, and six hours of upper division psychology electives. (Students may be conditionally accepted into the program contingent upon completion of the required undergraduate courses.)

- A cumulative grade point average (G. P. A.) of no less than 3. 0 on a 4-point scale.

- Graduate Record Exam (G. R. E.) scores taken within the last five years from the application date.

- Two letters of evaluation from individuals such as professors and employers who can attest to the applicant's potential for success in a graduate program of study. Letters of evaluation should specifically address the applicant's potential for a successful career as well as qualifications and motivation for graduate study.

- An application essay. Applicants must submit a 500-1, 000 word essay describing their educational and professional goals as well as their qualifications for graduate study (e. g. academic achievements, research experience, relevant work or volunteer experience, etc.).

Admission Deadline
The graduate program in Clinical Psychology only accepts students for Fall admission. Application materials should be submitted electronically by following the instructions at https://gradcollege.tamucc.edu/new_students/application_process.html. Materials must be submitted by March 1 for full consideration for Fall admission.

Admission to the Program
Upon receipt of all application materials, the MA Clinical Psychology Admissions Committee will meet to review the application materials. Only complete applications are evaluated. The committee will review applications for the fall semester only. The committee may choose to admit, conditionally admit, or deny admission, based on the information contained in the application materials.

For unconditional admission, applicants must be a graduate of a regionally accredited university or, if an international student, have the equivalent of an U. S. accredited degree as determined by the Dean or Graduate Studies. Applicants must have completed at least 15 hours of undergraduate psychology and possess an overall grade point average (G. P. A.) of no less than 3. 0 on a 4-point scale. (These are minimum requirements; admission to the program is competitive and also dependent upon the size and quality of the overall applicant pool).

Applicants with less than a 3. 0 G. P. A. may be admitted to the program if the graduate admissions committee determines that the student's G. R. E. combined verbal and quantitative scores and other application materials compensate for the deficient G. P. A.
Applicants admitted to the program must meet with the Graduate Coordinator to develop an initial degree plan. The degree plan indicates whether foundational coursework is required and outlines the prescribed graduate coursework, examinations, and other requirements needed to complete the MA Clinical Psychology degree.

Conditional Admission

At the discretion of the admissions committee, students who have not completed all of the required undergraduate courses (general psychology, statistics, experimental psychology, and 6 hours of upper division electives) may be conditionally accepted into the program contingent upon completion of the required undergraduate courses.

Electives

Select 6 hours of electives
May include 6 hours of PSYC 5395 - Thesis. Non-PSYC electives must be approved by the Graduate Coordinator.

Total Hours 60

1 The five core courses (15 credit hours) must be taken within the first 24 credit hours of graduate study.

Course Sequence

Courses must be taken in the prescribed sequence (please refer to the Psychology program student handbook for the prescribed course sequence). Failure to take the courses as prescribed may result in a delay in time toward graduation as courses are typically offered only once per rotation year.

Additional Requirements

Annual Performance Evaluation

Students’ progress in the program will be formally evaluated annually at the end of each Spring semester by a committee of graduate faculty. Each student will be evaluated in three areas: (1) academic performance (i.e., course performance; evaluated by the instructor), (2) professionalism (academic readiness/research, professionalism, and communication skills), and (3) clinical skill development (i.e., application of ethical standards, knowledge of cultural diversity, assessment/intervention skills, supervision, and interpersonal skills). Evaluations will be completed at the end of each semester by all faculty teaching a graduate course. Non-clinical faculty will complete part (1) and part (2) of the evaluation form. Clinical faculty will complete all parts of the form. Once completed, evaluations will be compiled at the end of the Spring semester and reviewed by the current graduate program committee who will provide the final evaluation for each student. Student progress will be rated as “satisfactory” or “needs improvement.” Any areas rated as “needs improvement” may require a personalized improvement plan (consisting of remedial steps with specific timelines) for the student. Students must make progress on documented deficiencies (as evaluated by the faculty committee) before continuing in the program. Multiple consecutive ratings of “needs improvement” on the same criteria may result in dismissal from the program. The results of the annual evaluation, including any improvement plans, will be shared with the student in a letter written by the student’s assigned faculty mentor.

In addition to the formal evaluation of all students in the Spring, an informal evaluation of first-year students will take place in the Fall (at the end of the first semester in the program). The purpose of this is to identify any areas of concern early on and to provide proper support to students before their difficulties become more significant. Unless there is a notable problem, students will not receive formal feedback from the Fall evaluation.

Practicum

Students will participate in three practicum placements as part of their clinical training. In order to register for practicum, a student must successfully pass the written comprehensive examination. Students must apply for practicum the semester before they intend to register for it. The Practicum Supervisor will arrange the assignment of the student to a practicum training facility during those semesters the student registers for practicum, and will have overall responsibility for supervising and evaluating the student’s performance.

Thesis Option

Students may also elect to complete a thesis option in addition to the required coursework. This involves six credit hours (completed over two semesters) in which the student designs and conducts an original research study, resulting in a written thesis that is presented to the student’s thesis committee. This option may be best suited to those students who wish to pursue advanced clinical training at the doctoral level. In general, students who complete a thesis can expect to take longer to complete the required program of coursework.

Students who elect to complete a thesis are encouraged to begin their work as soon as possible after being admitted to the program. In consultation with the assigned advisor, the student will select a thesis committee consisting of a chair (primary thesis advisor) and two additional university faculty. The chair and one of the members must be full-time graduate faculty members within the psychology department. The student is expected to work closely with the committee chair when
designing and executing the thesis research project. In consultation with the thesis committee, a proposal defense meeting will be scheduled. The student should distribute copies of the proposal to the committee members at least one week prior to the time of the proposal defense meeting. Upon successful completion of the thesis proposal meeting, the student will obtain permission (if applicable) of the institutional review board (IRB) to begin collecting data. When permission is granted, the student will collect data and complete the final thesis manuscript. Once the manuscript is complete, the student must successfully complete an oral defense and submit their thesis according to the instructions and deadlines detailed in the College of Graduate Studies’ student handbook for Master’s students (see Additional Exit Requirement for Student Completing a Thesis section below).

Exit Requirement for All Students
An oral examination will be given toward the end of the program over a therapy and testing case conducted during their practicum placement. Students are required to prepare a comprehensive written analysis of the case which will be presented during the oral examination with the faculty. Development of this presentation will be under the direction of the practicum faculty supervisor and the final draft of the paper must be approved before the oral exam. The practicum faculty supervisor is responsible for scheduling and administering the oral examination. The oral examination is graded as “satisfactory”, “conditional” or “re-examination required.” If deficiencies are identified during the exam, additional requirements may be added for successful completion of this requirement and may include, but are not limited to: repeating the examination, resubmission of written examination materials, or repeating a practicum placement. The student may retake the oral examination once, with a second failure resulting in termination from the program.

Additional Exit Requirements for Students Completing a Thesis
A final oral thesis defense will be required of all students completing a thesis. The chair of the thesis committee is responsible for scheduling and administering the final oral defense. The thesis defense is graded “pass” or “fail.” The student may retake the final oral examination once. When the final version of the thesis is completed and all committee members have approved the final document, the student is required to submit the thesis according to the instructions and deadlines detailed in the College of Graduate Studies’ student handbook for Master’s students. When submitting their thesis, students are required to order and purchase two bound copies of their thesis (one for the University library and one for the Department of Psychology & Sociology).

Grade-Point Average
A minimum grade-point average of 3.0 (“B”) on a 4 point scale in all graduate-level work taken at this university is required for graduation. In addition, a minimum grade-point average of 3.0 (“B”) is required in all psychology courses (PSYC prefix) taken at the graduate level. No grade of less than “C” and no more than two “C’s” earned at this university will be accepted as credit for any Master’s program (please see graduate academic and degree requirements in the graduate catalog). Students receiving more than two grades of “C” in their coursework will be terminated from the program.

Registration Restrictions
Students who have not been accepted into the MA Clinical Psychology program (Non Degree Seeking Students or students enrolled in other programs) may enroll in:

Students who enroll in these courses must satisfy the course prerequisites (see Courses A-Z (http://catalog.tamucc.edu/graduate/courses-az/)). Permission of the instructor is required for enrollment in any other graduate course in Psychology.

Courses

PSYC 5311 Research Methods and Statistics I
3 Semester Credit Hours (3 Lecture Hours)
The purpose of this course is to provide beginners knowledge on topics related to Psychological methodology and statistics. Specifically, the course will cover a range of topics related to standard normal curve, t-scores, z-scores, transformation of scales, reliability, validity, confidence intervals, effect size, item analysis and factor analysis. The course will cover these topics within the context of t-tests, correlation and regression analyses. It will also cover the research methods in which these tests are most commonly used: non-experimental methods such as survey and longitudinal studies.

PSYC 5312 Research Methods and Statistics II
3 Semester Credit Hours (3 Lecture Hours)
The purpose of this course is to provide advanced knowledge on topics related to psychological methodology and statistics. Specifically, the course will cover the following statistical tests: ANOVA, non-parametric statistics, between, within/repeated and mixed studies design. Furthermore, it will also cover the research designs in which these tests are commonly used. Specifically, the course will focus primarily on quantitative and qualitative experiments. Prerequisite: PSYC 5311.

PSYC 5321 Biological Bases of Behavior
3 Semester Credit Hours (3 Lecture Hours)
The study of the anatomy and physiology of the human nervous system including neural transmission, motor systems, speech and higher cortical functions with special emphasis on the physiological changes associated with pathological conditions and their impact on human behavior. Core course.

PSYC 5322 Advanced Personality Theories
3 Semester Credit Hours (3 Lecture Hours)
A survey of the major approaches to the study of personality. Psychoanalytic, trait, behavioral and humanistic paradigms will be studied with respect to theory, research, and therapeutic application.

PSYC 5323 Advanced Social Psychology
3 Semester Credit Hours (3 Lecture Hours)
A survey of social psychological theory and research. Topics include attitudes, cognition, interpersonal relationships, social influence, prejudice, and group behavior.

PSYC 5324 Advanced Developmental Psychology
3 Semester Credit Hours (3 Lecture Hours)
A review of research and theories on normal physical, cognitive, emotional, and social development across the lifespan.
PSYC 5341 Graduate Psychopathology
3 Semester Credit Hours (3 Lecture Hours)
Theories, processes and issues related to the development, evaluation, and classification of deviant behaviors.

PSYC 5342 Professional Issues and Ethics in Psychology
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to introduce graduate students to the ethical standards and contemporary issues affecting professional conduct in the field of psychology. The topics covered revolve around ethical conduct in practice and research, as well as the decision-making foundations for resolving ethical issues. In addition to ethical standards, legal issues affecting professional practice will be covered in detail.

PSYC 5343 Intellectual Assessment
3 Semester Credit Hours (3 Lecture Hours)
Instruction in the theoretical, ethical and practical application of intellectual assessment in a clinical setting using standardized instruments, such as the WAIS-IV and WISC-IV. Also reviews the current development and use of other instruments that assess cognitive function.

PSYC 5344 Personality Assessment
3 Semester Credit Hours (3 Lecture Hours)
Personality assessment and interpretation using standard instruments such as MMPI, CPI, TAT, and Rorschach.

PSYC 5345 Family Theory, Practice and Therapy
3 Semester Credit Hours (3 Lecture Hours)
Provides an introductory survey of the major theories and theorists in the area of the psychological formulation of family therapy. This course will cover various theories of family therapy as well as assessment of family dynamics, and the implications for the application of family theory in practice. A review of the research done in the area and the applicability of the research findings in practice.

PSYC 5346 Projective Techniques
3 Semester Credit Hours (3 Lecture Hours)
An in-depth study of projective techniques for personality assessment. The main instrument studied is the Rorschach Inkblot Test using the Beck system. Also covered are the Thematic Apperception Test (TAT), House-Tree-Person Projective Technique, and Draw-a-Person Techniques.

PSYC 5347 Diversity Issues and Multiculturalism in Psychology
3 Semester Credit Hours (3 Lecture Hours)
This purpose of this course is to build foundation on multicultural competencies and skills to provide culturally relevant, sensitive, and effective psychotherapy services and assessments to diverse populations. Students will obtain a thorough review on multicultural awareness, skills and knowledge which will improve competencies related to the practice of psychology. Evaluation of culture from the standpoint of both the therapist and client in the delivery of therapeutic services is the key feature of this course. Thus, the course will provide a sociopolitical perspective as well as identify how specific forms of oppression operate and impact clinical practice and psychology research.

PSYC 5350 Introduction to Psychotherapy
3 Semester Credit Hours (3 Lecture Hours)
The course includes a review of numerous theoretical approaches to psychotherapy, with a reliance on information from research-supported psychotherapeutic approaches. Students will learn the similarities and differences between these approaches at both the theoretical and technical level. Various stages of treatment and a range of important issues in conducting psychotherapy are considered. Students will develop a general understanding of the process of therapy, an ability to conceptualize client problems in a way that suggests potential interventions, and knowledge of techniques that can facilitate improvement.

PSYC 5351 Child Psychopathology
3 Semester Credit Hours (3 Lecture Hours)
The course will take a developmental approach in explaining child psychopathology. The course will include a consideration of diagnostic, epidemiological, developmental, and psychophysiological determinants of behavior.
Prerequisite: PSYC 5324 and 5341.

PSYC 5352 Therapy with Multiple Clients: Interpersonal and Group Dynamics
3 Semester Credit Hours (3 Lecture Hours)
This course will engage graduate-level students in the study of the principal theories of group therapy and family therapy. The class will focus on the theoretical, ethical, and practical and culturally-informed application of both group process and family therapy.

PSYC 5353 Group Psychotherapy
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to introduce the graduate student to the theoretical and applied issues related to the practice of group psychotherapy. Examines a variety of therapeutic groups as well as the issues related to the practice of group psychotherapy with special populations.
Prerequisite: PSYC 5350.

PSYC 5354 Applied Behavioral/Cognitive Psychology
3 Semester Credit Hours (3 Lecture Hours)
The focus of this course will be on key cognitive and affective bases of behavior and the manner in which these interact with environmental influences. The course will cover how essential concepts within these areas are linked to theoretical conceptualizations of behavior and psychopathology. Theoretical principles will be linked to applications within clinical psychology and to evidence-based interventions for psychological disorders.

PSYC 5355 Psychopharmacology
3 Semester Credit Hours (3 Lecture Hours)
This course is designed to introduce the graduate student to the basic classes of psychotropic drugs and their effects on human behavior. The course will begin with a basic review of how drugs are processed and used by the body including pharmacokinetics, pharmacodynamics and neural transmission. A discussion of the chemical properties of both therapeutic drugs and drugs of abuse by drug class will follow, including a discussion of the most common drugs used to treat psychological disorders. A previous course in graduate Physiological Psychology (PSYC 5321) is a prerequisite for this course.
Prerequisite: PSYC 5321.
PSYC 5360  Seminar in Psychology
3 Semester Credit Hours (3 Lecture Hours)
In-depth study of various topics within psychology such as those related to history, clinical, social, experimental and business and industrial. May be repeated when topics vary.

PSYC 5395  Thesis
3 Semester Credit Hours
Independent research under the direction of a faculty member. May be repeated to a total of six semester hours.

PSYC 5396  Individual Study
1,3 Semester Credit Hours
Individual study, reading or research with faculty direction and evaluation. Offered on application to and approval of the program coordinator. No more than 6 hours will be counted towards the degree.

PSYC 5398  Clinical Practicum
3 Semester Credit Hours
Supervised experience in a placement such as a community mental health/mental retardation agency. May be repeated. (Limited to degree students in the Psychology program or graduates of the psychology program working on the LSSP [Licensed Specialist in School Psychology]). Liability insurance required. Enrollment is dependent on the number of suitable practicum sites available.
