NURSING, DNP

Program Description
The Texas A&M University-Corpus Christi Doctor of Nursing Practice Program is an online, part-time, post-master's, clinical doctorate for registered nurses interested in expanding their skills as nurse leaders or nurse practitioners. This program prepares graduates to provide the most advanced level of nursing care for individuals, families, organizations and communities.

This includes direct care of individual patients, management of care for individuals and populations, administration of nursing systems, development and implementation of health and evidence-based practice.

Because courses are delivered remotely, students can remain in the communities where they live and work while completing program requirements. Travel may be required for students to interact with state or national experts in their areas of study. The curriculum is consistent with program standards set forth in the Essentials of Doctoral Education for Advanced Practice. Students enrolled in the program will complete a scholarly project designed to improve patient or system outcomes.

The Doctor of Nursing Practice program at Texas A&M University-Corpus Christi is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).

Nursing Programs Goals
The goals of the Nursing Programs in the College of Nursing and Health Sciences are:

1. To develop within the student the knowledge and skills necessary for beginning professional and advanced nursing practice, cultivating basic and specialized abilities needed to successfully pursue a career, and
2. To promote the concept of nursing as caring and facilitate attainment of a care delivery system sensitive to multicultural communities and their health values, and
3. To offer individuals the opportunity to increase the breadth and depth of the theoretical base for nursing practice, enhance and expand competence, prepare for role specialization, and contribute to the discovery of new nursing knowledge, and
4. To provide an educational environment of respect within which students may evolve as broadly educated, technology competent, responsible, and accountable professionals dedicated to the principles of lifelong learning, and
5. To build a foundation for life-long learning & systematic practice, and
6. To serve the community as nursing experts, leaders and consultants in professional organizations, health promoters, providers of health care policy information and advocates of ethical distribution and usage of resources.

Graduate Programs
The College of Nursing and Health Sciences offers course work leading to the Master of Science in Nursing degree and the Doctor of Nursing Practice degree. Additionally, the college offers graduate courses in Health Care Administration.

All graduate nursing courses and several of the health care administration courses employ distance education instructional strategies for the vast majority (75% or more) of the instruction and interaction.

Student Learning Outcomes
Students will:

1. Integrate nursing science knowledge from the biophysical, psychosocial, analytical, and organizational sciences and ethics as the basis for practice.
2. Provide culturally relevant health promotion and disease prevention initiatives based on epidemiological, bio-statistical, environmental, and other scientific evidence for diverse populations.
3. Demonstrate visionary organizational leadership by designing and implementing efficient effective practice and policy models.
4. Apply advanced levels of clinical scholarship, systems thinking and analytical methods in evidence-based management and practice.
5. Translate and disseminate knowledge to transform caring management and practice.
6. Leverage information systems and patient care technology for the improvement and transformation of health care.
7. Analyze, develop, and advocate for healthcare policies to improve healthcare systems across diverse constituencies.
8. Collaborate inter-professionally to improve patient and population outcomes through practice, education, and leadership.

Admission Requirements
Students seeking admission to the Doctor of Nursing Practice program will need to:

1. Complete an application to the University for admission to College of Graduate Studies and to the DNP Program.
2. Students must complete an online application to the College of Nursing and Health Sciences using the application in Apply Texas. If the student is not already enrolled at Texas A&M University-Corpus Christi, the student must also apply to the University for admission. Admission to the University does not constitute admission to the nursing program.

3. Have earned a Master of Science in Nursing or equivalent master’s degree.

4. Provide evidence of current valid unencumbered licensure as a registered nurse with authority to practice in Texas.

5. Have earned a satisfactory grade point average of 3.0 on 4.0 scale in their graduate nursing program.

6. Write a 500-word essay explaining why they are enrolling in a Doctor of Nursing Practice program.

7. Submit three letters of recommendation from individuals knowledgeable about their potential to work effectively in advanced, professional, and scholarly roles.

8. Provide a current resume that delineates an applicant’s professional contributions and work experiences and contains sufficient information to represent the applicant’s accomplishments in nursing.

9. Hold national certification as a Nurse Practitioner (for DNP in NP only).

10. Submit a copy of authorization to practice as an Advanced Practice Registered Nurse (APRN) in Texas (for DNP in NP only).

11. Have completed within the past seven years, a graduate-level inferential statistics course with a grade of B or better. Provisional admission is possible for students who do not meet this requirement. Students admitted with provisional status must complete this requirement within the first academic year of the DNP program and before enrolling in any research course.

12. Have completed a graduate level research course.

Program Requirements

Curriculum

The core nursing courses consist of graduate-level study of the scientific knowledge that comprises the discipline and profession of nursing, and prepares the student for advanced nursing practice.

1000 hours of field experience (maybe be completed within the required courses)

DNP Project (maybe be completed within the required courses)

Total Credit Hours 40

Field Experiences

Students are expected to complete a minimum of 1000 hours of field experience related to their courses and focus of study. Appropriate field or clinical hours completed in an MSN program will be counted as part of the 1000 hours (up to 500). Applicants will be required to demonstrate these hours were completed in relevant settings. Students will be responsible for identifying and selecting agencies or preceptors for their field experiences. For more information, please see the CONHS Doctoral Student Handbook.

DNP Project

All students must complete a scholarly project as a requirement for the DNP degree. The project provides an opportunity for students to demonstrate their ability to develop effective interventions for patients and patient populations with complex health problems. The projects will be completed through multi-disciplinary collaborative partnerships and under faculty guidance.

Advanced Specialty Course

Select one of the following:

* Nurse Practitioner Special Course
  - NURS 6321 Application of Advanced Principles for Clinical Nursing Practice *

* Nurse Executive Specialty Course
  - NURS 6331 Advanced Principles for Executive Practice *

DNP Seminar

NURS 6195 DNP Project Seminar *

Total Hours 40

* Online offering
Courses

NURS 6195  DNP Project Seminar
1 Semester Credit Hour
Deliverables related to the DNP project. Open only to DNP students in the CONHS with consent of the DNP Chair. Does not count as credit toward regular graded coursework for DNP degree. Grade assigned will be "credit" (CR) or "no credit" (NC).
Co-requisite: NURS 6304, NURS 6307, NURS 6308, NURS 6311.

NURS 6300  Health Policy and Economics for the DNP
3 Semester Credit Hours (3 Lecture Hours)
Focus is on the use of political efficacy and competence to improve health outcomes and improve the quality of the health care delivery system. The interrelationships between policy, political trends, health care quality outcomes, access to care, and economics will be examined.

NURS 6301  Epidemiology and Statistics for Evidence-Based Practice
3 Semester Credit Hours (3 Lecture Hours)
Principles of epidemiology and biostatics applied to the management of population health.

NURS 6302  Genomics in Health Care
3 Semester Credit Hours (3 Lecture Hours)
Focus is on the relationship between genes, environment, and health. Emphasis will be placed on concepts of prevention and treatment effectiveness within cultural care contexts. Ethical and legal considerations will also be addressed.

NURS 6303  System Behavior and Impact on Health Care
3 Semester Credit Hours (3 Lecture Hours)
Principles and application of organizational behavior that promotes quality care delivery in diverse healthcare settings. The microsystems framework for quality management will be applied to quality management in selected healthcare settings. May require field-based activities.

NURS 6304  Application of Evidence in Practice I
3 Semester Credit Hours (3 Lecture Hours)
Exploration of issues related to evidence-based practice in select clinical settings under the direction of faculty. Synthesizes key research related to clinical topics as part of systematic review of evidence. Requires field-based activities.

NURS 6306  Informatics and Technology for Advanced Practice
3 Semester Credit Hours (3 Lecture Hours)
The examination of the use and mobilization of information and technology across organizations for insuring continuity of quality care. May require field-based activities.

NURS 6307  Application of Evidence in Practice II
3 Semester Credit Hours (3 Lecture Hours)
Integration of practice, theory, and research to expand clinical expertise in the management of clinical or system problems. Includes the examination of care delivery structures and processes that contribute to specific clinical problems. Clinical practice experiences available with this course.
Prerequisite: NURS 6304 and 6308.

NURS 6308  DNP Project Proposal
3 Semester Credit Hours (3 Lecture Hours)
Development of DNP project proposal. Requires presentation to DNP faculty for approval at the end of the course.
Prerequisite: NURS 6303 and 6304.
Co-requisite: NURS 6195.

NURS 6309  Integration and Translation of Theory in Practice
3 Semester Credit Hours (3 Lecture Hours)
Expanded development of expertise in the management of health problems in selected populations through integrating and translating theory in practice. An overview of theoretical principles and guidelines appropriate for use in DNP projects, quality improvement and implementing evidence-based projects.
Prerequisite: NURS 6303 and 6304.

NURS 6311  DNP Project Report
3 Semester Credit Hours (3 Lecture Hours)
Demonstration of advanced role competencies through the design and the implementation of a project with potential to have a positive impact on patient or system outcomes.
Prerequisite: (NURS 6307, 6304, 6308 and 6309).
Co-requisite: NURS 6195.

NURS 6321  Application of Advanced Principles for Clinical Nursing Practice
3 Semester Credit Hours (3 Lecture Hours)
Emphasis will be on synthesis of past clinical practice, with advanced understanding of theory, evidence based practice, policy issues, and principles of quality assurance and safety to continue the development of the doctoral student as an expert reflective practitioner. Individualized clinical focus will be on designated populations.

NURS 6331  Advanced Principles for Executive Practice
3 Semester Credit Hours (3 Lecture Hours)
Application of financial and human resource management principles in designing solutions to complex healthcare delivery problems emerging from current healthcare reimbursement and performance requirements. Clinical experiences are required for this course.

NURS 6393  The DNP Project and Biostatistics
3 Semester Credit Hours (3 Lecture Hours)
In depth study of various leadership and clinical nursing practice areas. Students will study techniques in evidence based research and apply aspects of research methods including quality improvement methodologies and statistical techniques.
Prerequisite: NURS 6308.
